

## Today's customers want more

## Choose a solution provider that knows grocery

Grocery retailers compete in one of the industry's toughest, most competitive segments. Customers expect low prices, fast checkout and flawless service. Margins are small and shrinking. Employee turnover is high. And new competitors threaten your market share every day. To thrive in these conditions, you need reliable point-of-sale (POS) systems that work harder and last longer than other industries. You need software designed for grocery stores. And you need a solution provider that can put it all together, from planning and installation to customization and technical support.

IBM Retail Store Solutions is the right choice. Whether you run an independent market, an international chain or anything in between, IBM understands the needs and priorities of grocery retailers. When you work with IBM, we can help you meet five critical objectives:

- Sell more. Increase sales and generate new streams of revenue.
- 2. Run smoothly. Improve uptime and customer service.
- Work smarter. Maximize employee productivity and retention.
- Control costs. Protect your investment and pay less over time.
- Get stronger. Deploy advanced technology to grow market share.

## Increase sales and generate new streams of revenue

Working with IBM, grocery retailers can implement proven strategies for increasing sales. For example, we make it easy to create a loyalty program that rewards your best customers, builds a customer database, helps you provide personalized service at the POS, attracts new customers and improves retention. Other strategies include:

- Analyzing consumer data to make better inventory, merchandising and pricing decisions
- Integrating the POS with CPFR (Collaborative Planning Forecasting and Replenishment) to help reduce the risk of out-of-stocks and overstocks
- Using a customer-facing display to sell advertising to CPG suppliers, promote instore specials and deliver messages to loyalty cardholders
- Extending your business by integrating fuel sales and POS to execute loyalty programs at fuel islands

## Improve uptime and customer service

More than any other customer in retail, the shopper with a full grocery cart hates to wait. That's why IBM offers reliable hardware, software and peripherals that help eliminate the risk of downtime, as well as self-checkout solutions that let customers control their own experience.

- Retail-hardened POS systems are designed to withstand dirt, dust, food hazards, spills, vibration and rough handling
- Fast thermal printers and powerful POS processors speed checkout
- Intuitive POS interfaces allow cashiers to focus on delivering friendly, attentive customer service
- Proven IBM 4690 Operating System (OS), designed to excel in high-volume retail environments, increases enterprise-wide uptime

## Protect your investment and pay less over time

IBM understands that grocery retailers need to control costs now and in the future. That's why we give you so many ways to help reduce total cost of ownership, protect your technology investment and improve long-term ROI.

- One store architecture across the enterprise can lower IT costs
- Open systems let you choose the most affordable platform, operating system and POS applications for your stores
- Upgradeable POS solutions feature expansion options for memory, ports, peripherals and wireless capabilities to grow with your business
- Flexible POS systems help enable smooth migration to new software
- Advanced systems management tools can reduce operating costs
- IBM retail hardware traditionally offers high residual value
- Affordable pricing and financing options

## Deploy advanced technology to grow market share

Many grocery retailers use multiple channels to reach customers – they deliver personalized shopping lists over the Web, place interactive kiosks in the store, and provide access through wireless devices. That's why IBM offers a comprehensive set of hardware, software and services designed to help you realize the full potential of integrated multichannel retailing and get the e-business edge on competitors.

- Kiosks deliver detailed information about gourmet items or specials
- Self-checkout helps reduce operating costs and improves customer service
- Wireless POS lets you add checkstands during peak periods without recabling the store
- Wireless shopping applications allow customers to scan items with handheld devices
- IBM e-business solutions enable you to partner with online grocers, integrate Web-based marketing and take advantage of the Internet

## The right partner for grocery retailers

IBM is a clear global leader in POS and retail e-business. Our experience spans nearly 30 years, during which we revolutionized the industry with patented innovations like the barcode. We provide advanced technology, a vast service organization, and a network of IBM Business Partners – so you have one convenient, cost-effective source for hardware, software, services, consulting, rollout and maintenance. Most important, we know what it takes to grow and thrive in grocery retail around the world. Our customers include grocery retailers from more than 80 countries, and our solutions accommodate local language requirements. Plus, with our global presence, we can help you specify the same solution for every store worldwide or develop a tailored solution for a specific market or region.

# The right technology for grocery retail

IBM SurePOS 700 Serie:

IBM SurePOS 4694 System

IBM Kiosł

## IBM SurePOS 700 Series

With processor speeds up to 2.4GHz, the IBM SurePOS<sup>™</sup> 700 Series delivers the speed and power grocery retailers need to maximize shopper convenience at the POS. A range of choices in speed, size, color and connectivity gives you a POS solution that meets your store-specific needs.

- Runs on IBM 4690 OS, Linux and Microsoft® Windows®
- IBM SurePorts offer customized connectivity options
- Supports a wide range of POS applications from IBM and IBM solution developers

## IBM SurePOS 4694 System

With more than one million units placed worldwide, the IBM SurePOS 4694 System delivers the consistency and reliability to help keep busy grocery stores running smoothly.

- Flexible choices for keyboards, displays, cash drawers
- RS-232 and RS-485 connectivity let you keep existing peripherals
- Runs DOS plus new applications for 4690 OS, Microsoft Windows OS, and Linux

## **IBM Kiosk**

This powerful, Web-enabled kiosk is e-business ready and optimized for multichannel retailing. It features retail-hardened core technology, plus a modular, open-platform design.

- Print coupons, deli tickets, loyalty promotions
- Enable upselling and cross-selling
- Combine menu planning with special offers

## **IBM SurePOS 300**

The IBM SurePOS 300 delivers the performance grocery retailers expect from IBM at a remarkably affordable price. Thin-client or thick-client configurations maximize opportunities for POS, point-of-service and back-office functionality.

- Runs today's software and new applications for Windows and Linux
- Compact system unit takes up very little real estate
- Distributed design increases choices for software and peripherals

#### IBM SureOne

The IBM SureOne® system is an affordable POS platform with an integrated, countertop design engineered for budget-conscious grocery retailers, as well as those that operate in areas where space is limited.

- Eliminates the need for complex integration
- Familiar PC technology is easy to use and affordable

## **IBM SureMark Printer**

IBM SureMark<sup>™</sup> thermal printers can reduce customer waittime by delivering up to 52 lines per second (lps) for Single Byte Character Set output and up to 50 lps for Double Byte Character Set output in the receipt station.

- Deliver targeted messages on receipts
- Scalable fonts and color printing increase readability

## **IBM VisualStore Electronic POS Solution**

IBM VisualStore is a grocery-specific, function-rich software solution with a user-friendly interface, open platform and low hardware requirements – all of which help keep total cost of ownership down.

- Includes promotion system and customer loyalty
- Strong combination of functionality and flexibility

## IBM 4680-4690 Supermarket Application

The IBM 4680-4690 Supermarket Application (SA) delivers the supermarket-specific features retailers want to help increase checkstand efficiency and improve information access.

- Optional Java™ GUIs available for touchscreen or wireless POS
- Ideal for multinational grocery chains
- Processes large transactions quickly

## **IBM 4690 OS**

Created specifically for retail, the IBM 4690 OS provides a solid foundation for grocery store functions and a wide range of e-business strategies. It is also designed to run unattended, allowing you to shift systems maintenance tasks from stores to a central site.

- High performance with data integrity
- Outstanding reliability and availability

## IBM Technical Support

Whether you have an urgent situation or need routine maintenance, our service engineers provide fast, responsive assistance that can help keep your grocery store operating at peak productivity.

- Single point of contact for technical support
- Service agreements available

## **IBM Global Services**

This vast team of retail-focused specialists can deliver the upfront planning as well as play a key role in the execution of incredibly varied and complex e-business solutions for your store.

- Security and privacy
- Rapid infrastructure design
- Application management services

## **IBM Global Financing**

IBM Global Financing is an attractive option for grocery retailers that need to overcome budget constraints. We can help you reduce initial capital outlay and afford a more comprehensive solution.

- Pay over time to help reduce operating costs
- Easy paperwork for total convenience

## **IBM Business Partners**

A diverse global network of authorized IBM Business Partners and solution providers can deliver the customized software and services many grocery retailers want to compete effectively.

- Access to a wide variety of software and services
- Local, face-to-face support
