- 1. MHz/GHz only measures microprocessor internal clock speed; many factors affect application performance.
- 2. MB/GB equals one million/billion bytes when referring to storage capacity; accessibility may be less.
- 3. Measurements assume standard 12" display.
- 4. IBM will provide hardware support for customers who create unique Windows XP Embedded images. Field problems for XP Embedded will need to be recreated under Windows XP Professional.
- 5. For a copy of the terms and conditions of IBM's Statement of Limited Warranty, please contact your IBM representative or authorized reseller.
- 6. Technical support times may vary.
