New IBM SurePOS 300 Series offers faster processing, more functionality
The recently refreshed models of the IBM SurePOS 300 Series help deliver the power and performance that your on demand retail customers need, with a space-saving design and an affordable price. Now with processor speeds up to 2GHz, this point-of-sale (POS) system can run the latest software from IBM Business Partners and independent providers even more effectively. Plus, it is built on a proven POS platform from IBM that helps enable high uptime. In other words, this versatile, retail-hardened system can surpass the reliability and quality of conventional PCs at a competitive price.
