The information on new products is for informational purposes only and may not be incorporated into any contract. The information on new products is not a commitment, promise, or legal obligation to deliver any material, code or functionality. The development, release, and timing of any features or functionality described for our products remains at our sole discretion.

Maximo and TRIRIGA Solutions

Add-on Solutions

Additional options, used with core or industry solutions, provide deeper functionality for specific needs.

Integration Adapters

Commercially-supported integration to other enterprise and 3rd party systems.

The Cold Hard Truth

Maximo used to handle the demands of work management with a number of internal tools that accommodated complex work requirements, but required adaptors for true planning and scheduling.

- Microsoft Project Adaptor
- Primavera Adaptor

We have charted a path to eliminate the need for adaptors and place full work management control and visibility into the hands of the Planners & Schedulers leveraging our existing products:

- Maximo
- Maximo Scheduler
- Maximo Everyplace

The Forces Behind our Strategy

- Industry driving forces are changing the way in which companies compete, maintain, and offer services to customers
- The demand for improved service levels (internal/external) and an increased focus on schedule and resource optimization
- Empowering the field technician
- Natural fit with Maximo's Industry Solutions
- Why Now?
 - Deregulation
 - Globalization
 - Rising customer expectations
 - Decreasing operational budgets
 - Reduced workforces
 - Technological changes
 - Do more with less to increase customer satisfaction while reducing operating costs.
- Who is telling us
 - Development Partners
 - Beta customers
 - Scheduler users

The Work Management Plan Forward

Objective: Invest in the natural evolution of our current products in a direction desired by our customers

Functionality Within Scheduler

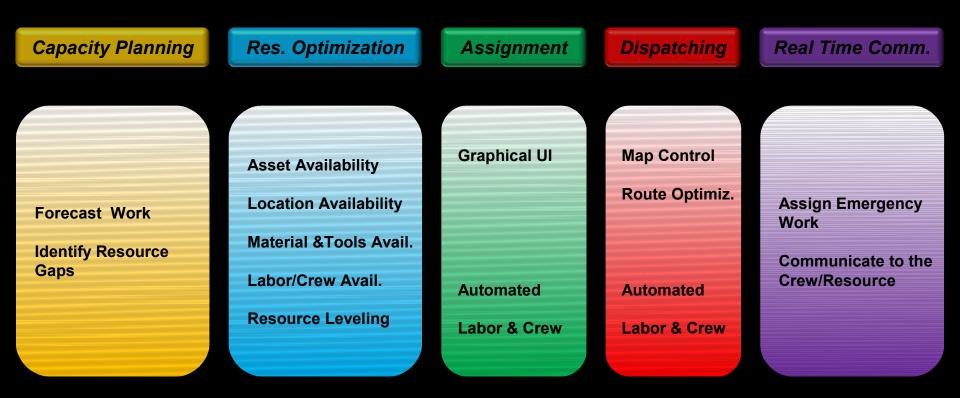

- Graphical Assignment
- Dispatching
- Provision of standard Work Order actions
- Additional Resources
 - Assets/Locations
 - Labor
 - Tools
 - Materials
- Schedule Compliance
- Optimization (iLOG Optimization tools)

Functionality Within Maximo

- Service Addresses
- Public Map UI Control
- Crews

Additional Maximo Everyplace role based templates

Focus Areas Moving Forward

Schedule Compliance

Roles considered within the use cases

Scheduler/Planner

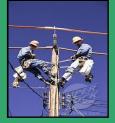

- Defines and adjusts labor/crew availability along with resource leveling
- Capacity Planning
- Assigns work orders to resources
- · Continuously optimizes the schedule as the operational environment changes
- Sequence and route work assignments based on geography

Dispatcher

- Monitor field resources and work order progress and status
- Monitor the location of field resources compared to open orders
- Enter status and complete work orders on behalf of technicians who don't have mobile devices
- Sequence and route ongoing work assignments based on geography and optimization

Field Technician

- · Supervisor approves and assigns work on mobile devices
- Receive work orders in the field and provide real time status updates to dispatch
- Complete, edit and approve work orders on mobile devices along with viewing work on a map with optimal driving directions
- Notify dispatch of potentially dangerous situations, incomplete work

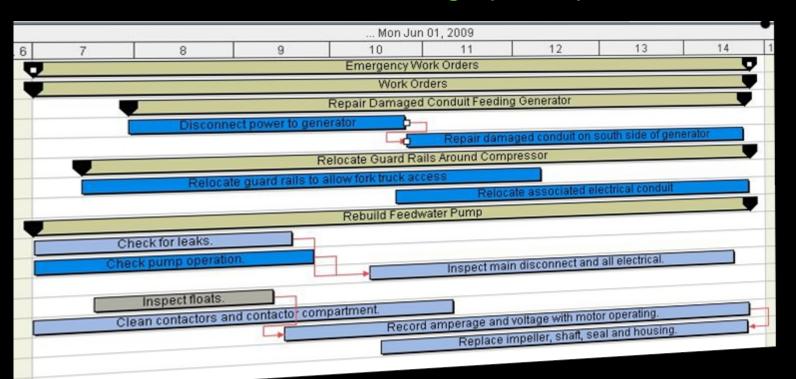

Scheduler Work Management Components

What is Maximo Asset Management Scheduler?

A Maximo application that contains a Gantt tool to schedule work orders, tasks and PM forecasts graphically

Scheduler so far...

Scheduler 7.1

Gantt View to visualize work orders and tasks

- Drag & drop work orders & tasks
- Manage dependencies
- Perform CPM
- View resource load and availability

Work Orders

- Date constraints
- Task dependencies

3Q,2009

Scheduler 7.1.1

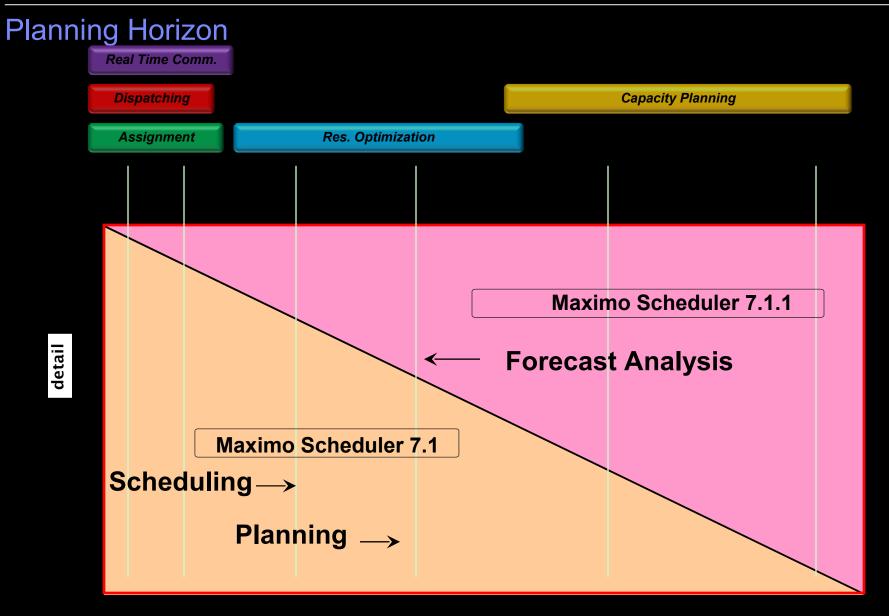

Gantt View to visualize PM forecasts

- View and manage future PMs and Work Orders
- View resource load and availability for both future PMs and Work Orders

Work Orders

Bulk Reschedule
Assignment Manager tab in Work
Order application

1Q,2010

time

Show Other Resources

- Following additional resources will also be shown in the Gantt
 - Assets
 - Show maintenance window when Asset is available
 - Locations
 - Show maintenance window when Location is available
 - Tools (both rotating and non rotating)
 - Show required vs available, similar to crafts
 - Materials
 - Indicate in green reserved items that are in stock
 - Show required vs available for non reserved items

Change Status and Other Options

- Provide the ability to change the status of the work order / task from Scheduler
 - Can select multiple work orders and change the status
 - Action available as a tool bar button
- Create follow up work order
- Create Job Plan
- Start Workflow

Work Order Actions

Resource Leveling & Optimization

- Support various optimization models
 - Input
 - Flexible resource combinations
 - Priorities: Asset, Work , Location, Material, Tools
 - Resource availability
 - Appointment request
 - Output
 - Optimal work schedule based on resource availability, time constraint and other user defined objectives such as minimize cost, schedule emergency work first, etc.

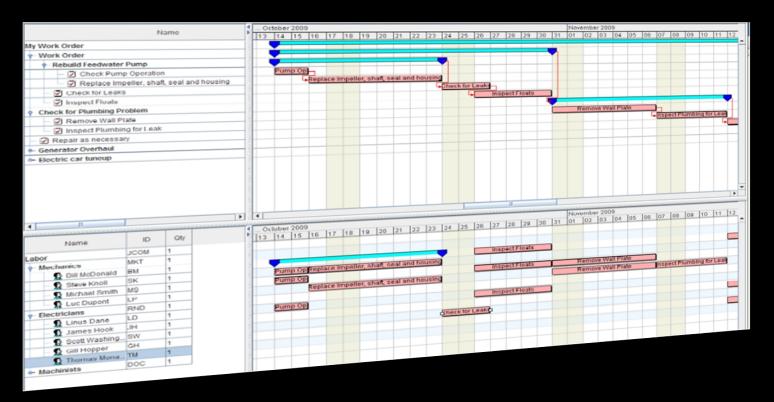

Schedule Compliance

- How is my Schedule performing?
 - Quickly identify Work orders that are running late
 - In progress and scheduled but not started
 - Identify the cascading effect of delayed work orders
 - Reschedule pending work orders by CPM or via manual edits

Scheduler Graphical Assignment

Assignments

- A new graphical UI to assign people to work orders and tasks
- Drag and drop capability
- Supports both Automatic and Manual Assignment
- Ability to view a person's existing assignments, vacation, work breaks etc.
- Ability to split assignments and reallocate to different people

Dispatching With Maximo Scheduler

Dispatching Application

New Dispatching application will be created

- Quickly identify where resources and crews are located on maps

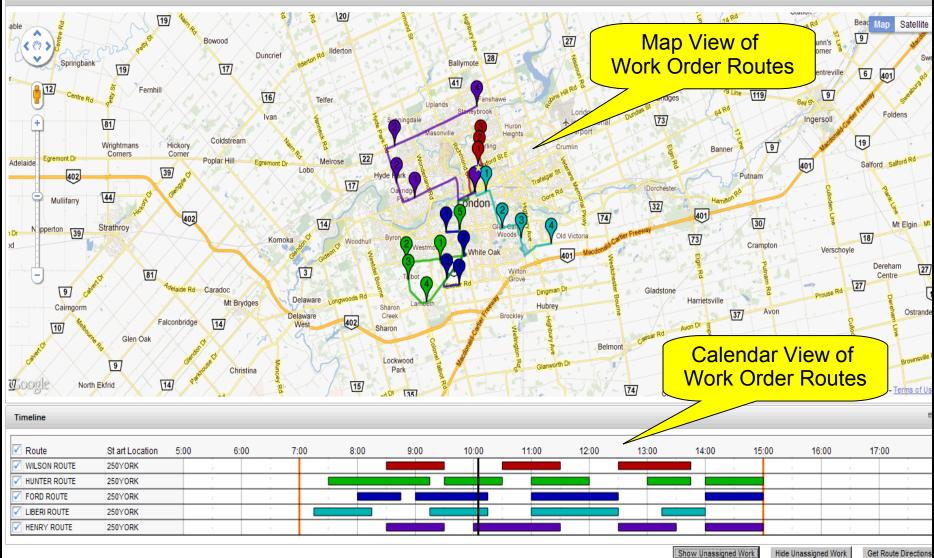

Current crew or resource assignments Prioritized route

- View overall assignments and routes
 Provision of directions where required
- View daily schedule of each resource Include scheduled downtime, overtime

Dispatching Application

Route Map

From the Technicians Perspective

Revise the Technicians View

Create new mobile applications for the field technician

- Leverage existing Maximo Everyplace product

Ability to tailor the application with Application Designer tool

- New templates will be created for the field technician

View current and sequenced assignments for themselves or their crew Obtain directions where required

- View and feedback on work order details
 Tailorable content
- Dynamic updates of sequenced work reflecting newer higher priority work, reassignments, emergencies

Route Details 1 - 3 of 3

The Summarized Work Management Vision

- Use Maximo Scheduler to:
 - Find the optimal time to schedule upcoming work by balancing:
 - Work order and Task relationships and constraints
 - Labor, Asset, Location, Craft, and Material availability
 - Drag and drop labor assignments (or automate)
- Increase the visibility of resources and crews by:
 - Leverage map UI control for dispatching of incoming work
 - Monitor progress of existing work
 - Manipulate crew and resource routes
- Improve efficiency of field technicians
 - Leveraging map UI control for viewing of route stops
 - Dynamic work list based on dispatched work and automated optimization
 - Communication with neighboring resources
 - Intuitive feedback from mobile applications
