Micromuse Disclaimer of Warranty and Statement of Limited Liability

Micromuse provides this document "as is", without warranty of any kind, either express or implied, including, but not limited to, the implied warranties of merchantability, fitness for a particular purpose or non-infringement. This document may contain technical inaccuracies or typographical errors.

Micromuse may make improvements and changes to the programs described in this document or this document at any time without notice. Micromuse assumes no responsibility for the use of the programs or this document except as expressly set forth in the applicable Micromuse agreement(s) and subject to terms and conditions set forth therein. Micromuse does not warrant that the functions contained in the programs will meet your requirements, or that the operation of the programs will be uninterrupted or error-free. Micromuse shall not be liable for any indirect, consequential or incidental damages arising out of the use or the ability to use the programs or this document.

Micromuse specifically disclaims any express or implied warranty of fitness for high risk activities.

Micromuse programs and this document are not certified for fault tolerance, and are not designed, manufactured or intended for use or resale as on-line control equipment in hazardous environments requiring fail-safe performance, such as in the operation of nuclear facilities, aircraft navigation or communication systems, air traffic control, direct life support machines, or weapons systems ("High Risk Activities") in which the failure of programs could lead directly to death, personal injury, or severe physical or environmental damage.

Compliance with Applicable Laws; Export Control Laws

Use of Micromuse programs and documents is governed by all applicable federal, state and local laws. All information therein is subject to U.S. export control laws and may also be subject to the laws of the country where you reside.

All Micromuse programs and documents are commercial in nature. Use, duplication or disclosure by the United States Government is subject to the restrictions set forth in DFARS 252.227-7015 and FAR 52.227-19.

Release Notes

Netcool/Reporter 2.1.0.6 is a fix pack that addresses a selected list of issues and extends database and platform support. This fix pack can be applied on a Netcool/Reporter 2.0 deployment as well as Netcool/Reporter 2.1 with or without any of the previous fix packs. These release notes describe the installation and known issues of this new release.

This document contains the following information:

- *Overview*
- *New and Updated Features in Version 2.1*
- *Operating System, Locale and Charset Configurations*
- *Installation Procedures*
- *General Points to Note*
- *Resolved Issues*

Overview

Netcool/Reporter 2.1 Fix Pack 2.1.0.6 is an accumulated fix pack for Netcool/Reporter. Besides normal bug fixes, Netcool/Reporter 2.1.0.6 also expands repository and datasource support and operating systems support. This fix pack can be applied on Netcool/Reporter 2.0 as well as Netcool/Reporter 2.1 deployments. With this fix pack installed, Netcool/Reporter 2.1 is available on the platform/database configurations as described in the following table:

Table 1: Netcool/Reporter 2.1.0.6 Supported Platforms/Databases

Platform	Database
Solaris 8	Oracle 9.2, Oracle 10g
Solaris 9	Oracle 9.2, Oracle 10g, Sybase 12.5.1/2/3
Solaris 10	Oracle 9.2, Oracle 10g, Sybase 12.5.1/2/3
Windows 2000	Oracle 9.2, Oracle 10g, MS SQL Server 2000, and Sybase 12.5.1/2/3
Windows 2003	Oracle 9.2, Oracle 10g, MS SQL Server 2000, and Sybase 12.5.1/2/3
AIX 5.1/5.2/5.3	Oracle 9.2, Sybase 12.5.1/2/3
HPUX 11i	Oracle 9.2, Sybase 12.5.1/2/3

Note:

The 32-bit version of Oracle is supported on Windows platforms. The 32-bit and 64-bit versions of Oracle are supported on UNIX platforms using a 32-bit library (if a 32-bit version is available). The 32-bit of Sybase is supported for the above platforms.

Internationalization has been certified on the Solaris and Windows platforms.

Netcool/Reporter 2.1.0.6 is comprised of components as listed below. During an installation, the components will be applied in this order:

1. Netcool/Reporter 2.0 Upgrade Package
2. Netcool/Reporter 2.1 Service Pack 1 (SP1)
3. Netcool/Reporter 2.1 Service Pack 2 (SP2-I18N)
4. Netcool/Reporter 2.1 Fix Pack 2.1.0.3
5. Netcool/Reporter 2.1 Fix Pack 2.1.0.4
6. Netcool/Reporter 2.1 Fix Pack 2.1.0.5
7. Netcool/Reporter 2.1 Fix Pack 2.1.0.6

The primary requirement for applying Netcool/Reporter 2.1.0.6 is a functioning installation of Netcool/Reporter 2.0 or Netcool/Reporter 2.1 (with or without any of previous 2.1 fix packs, like 2.1.0.4 or 2.1.0.5).

New and Updated Features in Version 2.1

Netcool/Reporter version 2.1 provides the following new features, compared with version 2.0:

- Lightweight Chart engine.
- Freeform Report Designer with enhanced usability.
- Freeform Report Templates that integrate multiple charts and tables.
- Report Book Designer for displaying and printing multiple Freeform reports.
- JSP Tool which allows the running reports and viewing snapshots via a URL.

Netcool/Reporter version 2.1 provides the following enhancements to version 2.0:

- Severity color-mapping for Lightweight Charts.
- Ability to select **unencrypted links** option in the Report Designer.
- Ability to e-mail reports, with unencrypted links, as attachments using the Scheduler.
- Edit Pencil reintroduced to My Folders to open the Report Designer for a selected report.
- Load All Values button for parameterized reports when run outside the Report Designer.
- Freeform Report objects can be refreshed by the Scheduler.
- Ability to set fixed length columns in the Report Designer.
- Display user's full name on main page.
- Ability to unpublish a report from an individual user or group.
- Ability to set default channel properties and list view.
- Run multiple reports in one batch using the Scheduler for UNIX only.
- Additional portlet to delete aged temp files on a 30, 60, 90, or 120 minute interval.

Operating System, Locale and Charset Configurations

This section specifies the required configurations on operating system (OS), locale, and charset for each supported language.

English

Since English is the default language of Netcool/Reporter 2.1, there are no special configuration requirements on locale and charset.

Simplified Chinese

The following table describes the configuration requirements for simplified Chinese:

Table 2: OS, Locale and Charset Settings for Simplified Chinese Environment

	Simplified Chinese
Reporter Sever side JRE (Solaris)	Original JRE 1.3.1
Oracle server charset	ZHS16GBK
Oracle client charset (NLS_LANG)	SIMPLIFIED CHINESE_CHINA.ZHS16GBK
Server OS locale (Solaris)	zh_CN.GBK
Client locale	Simplified Chinese
Reporter charset option	gb2312

French

The following table describes the configuration requirements for French:

Table 3: OS, Locale and Charset Settings for French Environment

	French
Reporter Sever side JRE (Solaris)	Original JRE 1.3.1
Oracle server charset	WE8ISO8859P1
Oracle client charset (NLS_LANG)	FRENCH_FRANCE.WE8MSWIN1252

Table 3: OS, Locale and Charset Settings for French Environment

Server OS locale (Solaris)	FR.ISO8859-1
Client locale	French
Reporter charset option	iso-8859-1

Russian

The following table describes the configuration requirements for Russian:

Table 4: OS, Locale and Charset Settings for Russian Environment

	Russian
Reporter Sever side JRE (Solaris)	JRE1.4.2
Oracle server charset	AL32UTF8
Oracle client charset (NLS_LANG)	NLS_LANG=RUSSIAN_CIS.CL8MSWIN1251
Server OS locale (Solaris)	ru_RU.ANSI1251
Client locale	Russian
Reporter charset option	windows-1251

Japanese(shift_jis)

The following table describes the configuration requirements for Japanese(shift_jis):

Table 5: OS, Locale and Charset Settings for Japanese(shift_jis) Environment

	Japanese(shift_jis)
Reporter Sever side JRE (Solaris)	JRE1.4.2
Oracle server charset	AL32UTF8
Oracle client charset (NLS_LANG)	JAPANESE_JAPAN.JA16SJIS
Server OS locale (Solaris)	ja_JP.PCK
Client locale	Japanese
Reporter charset option	shift_jis

Traditional Chinese (BIG5)

The following table describes the configuration requirements for Traditional Chinese (BIG5):

Table 6: OS, Locale and Charset Settings for Traditional Chinese (BIG5) Environment

	Traditional Chinese (BIG5)
Reporter Sever side JRE (Solaris)	JRE1.3.1
Oracle server charset	ZHT16BIG5
Oracle client charset (NLS_LANG)	TRADITIONAL CHINESE_TAIWAN.ZHT16BIG5
Server OS locale (Solaris)	zh_TW.BIG5
Client locale	Traditional Chinese
Reporter charset option	BIG5

Installation Procedures

This section discusses the procedures of installing Netcool/Reporter 2.1.0.6 on Windows, Solaris 9, Solaris 10, HPUX, and AIX platforms.

Note: To avoid impacts to Netcool/Reporter by the DST (Daylight Saving Time) changes issue, it is required that the operating system's DST fix/patch be applied on each of the supported platforms before Netcool/Reporter 2.1.0.6 is installed.

Netcool/Reporter 2.1.0.6 Installation on Windows Platforms

The Netcool/Reporter 2.1.0.6 installation is an upgrade installation, not a full installation. Users must have Netcool/Reporter version 2.0 or 2.1 (with or without any of the previous 2.1 fix packs, such as 2.1.0.4) installed before applying Netcool/Reporter 2.1.0.6.

Windows Installation

To install Netcool/Reporter 2.1.0.6:

1. Before running the installer program, you need to do the following:
 - Exit any Netcool/Reporter clients.
 - Shut down the Netcool/Reporter server.
 - Back up your repository system (recommended).
 - Back up your Netcool/Reporter file system (recommended).
2. Ensure the environment variables %INFOHOME% and %ORACLE_HOME% are defined (for Oracle database type only). Sybase-related environment variables must be defined if the database type is Sybase, such as %SYBASE%.
3. This fix pack is delivered as a zip file 2.1.0.6-TIV-NCReporter-Win-FP0001.zip. Extract it into a temporary directory (for example, C:\temp) using the WinZip utility.
4. A subdirectory 2.1.0.6-TIV-NCReporter-Win-FP0001 is created under the temporary directory (for example, C:\temp\2.1.0.6-TIV-NCReporter-Win-FP0001). All files and utilities required to install the fix pack are extracted into this subdirectory.
5. Change to the directory 2.1.0.6-TIV-NCReporter-Win-FP0001, which contains the files to be installed.
6. Launch a DOS prompt window, run setup.bat to start the installation, and include the database type and version. The usage is:

```
setup "oracle10g|sybase125|oracle9i|oracle8i|2000mssql|2003mssql|rollback" [ssl]
```

For example:

```
setup.bat oracle10g
```

or

```
setup.bat sybase125
```

Include the parameter SSL on SSL-configured Netcool/Reporter environment.

For example:

```
setup.bat oracle10g SSL
```

or

```
setup.bat sybase125 SSL
```

The fix pack installer will back up existing files into the

INFOHOME\backup\vpatch_2.1.0.6-TIV-NCReporter-Win-FP0001 directory before copying the new files over.

7. The installer may request the location of Netcool/Reporter directory if the %INFOHOME% environment is not defined.

For example, if Netcool/Reporter 2.1 is installed in the c:\http\htdocs\infospc directory, then type:

```
c:\http\htdocs\infospc
```

8. The installer prompts you to enter the JRUN location.
9. The installer prompts you to enter the Sybase server IP and Port number if the repository database is Sybase.
10. The installer prompts you to select the language settings option (For Localization installation only. If necessary, refer to *Netcool/Reporter 2.1 SP2 I18N Release Notes* for more information about the internationalization of Netcool/Reporter 2.1).
11. After the fix pack is processed completely, start Netcool/Reporter.

Note:

Web browsers store recent versions of web pages and Java applets. If you need to clear the browser cache and Java Plug-in cache on the client machine, do it before accessing any Netcool/Reporter 2.1 components.

Netcool/Reporter 2.1.0.6 Installation on Solaris 9 Platforms

The Netcool/Reporter 2.1.0.6 installation is an upgrade installation, not a full installation. Users must have Netcool/Reporter version 2.0 or 2.1 (with or without any of the previous 2.1 fix packs, such as 2.1.0.4) installed before applying Netcool/Reporter 2.1.0.6.

Solaris Installation

To install Netcool/Reporter 2.1.0.6 on a Solaris 9 (or 8) platform:

1. Before running the installer program, you need to do the following:
 - Exit any Netcool/Reporter clients.
 - Shutdown the Netcool/Reporter server (`stopreporter`).
 - Back up your repository system (recommended).
 - Back up your Netcool/Reporter file system (recommended).
2. Ensure the environment variables `$ORACLE_HOME` and `$LD_LIBRARY_PATH` are defined if the database type is Oracle. Sybase-related environment variables must be defined if the database type is Sybase, such as `$SYBASE`.
3. The package is delivered as a compressed UNIX tar file: `2.1.0.6-TIV-NCReporter-Sol9-FP0001.tar.gz`. Extract it into a temporary directory (for example, `/opt/tmp`) using:

```
% cd /opt/tmp
% gzip -dc 2.1.0.6-TIV-NCReporter-Sol9-FP0001.tar.gz | tar xvf -
```
4. A subdirectory `2.1.0.6-TIV-NCReporter-Sol9-FP0001` is created under the temporary directory (for example, `/opt/tmp/2.1.0.6-TIV-NCReporter-Sol9-FP0001`). All files and utilities required to install the fix pack are extracted into this subdirectory.
5. Change to the directory `2.1.0.6-TIV-NCReporter-Sol9-FP0001`, which contains the files to be installed.
6. Run the `setup.sh` script and include the database type and version. The usage is:

```
setup.sh "{oracle817|oracle9i|oracle10g|sybase125|rollback} [SSL]"
```

For example:

```
% setup.sh sybase125
```

Include the parameter `SSL` on SSL-configured Netcool/Reporter environment, for example:

```
% setup.sh sybase125 SSL
```
7. The fix pack installer may request the location of the Netcool/Reporter directory if the `$INFOHOME` environment is not defined. For example, if Netcool/Reporter is installed in the `/opt/netcool/reporter/apache/htdocs/infospc` directory, then when the installer asks for the `INFOHOME` location, type:

```
/opt/netcool/reporter/apache/htdocs/infospc
```
8. The fix pack installer backs up existing files into the `$INFOHOME/backup/vpatch_`
9. `2.1.0.6-TIV-NCReporter-Sol9-FP0001` directory before copying the new files over.
10. The installer prompts you to enter the `JRUN` location.

11. The installer prompts you to enter Sybase ASE Server IP address (or hostname) and Port number if the repository database is Sybase.
12. The installer prompts you to select the language settings option (For Internationalization support only. If necessary, refer to *Netcool/Reporter 2.1 SP2 I18N Release Notes* for more information about the internationalization of Netcool/Reporter 2.1).
13. After the fix pack is processed completely, start Netcool/Reporter.

Note:

Web browsers store recent versions of web pages and Java applets. If you need to clear the browser cache and Java Plug-in cache on the client machine, do it before accessing any Netcool/Reporter 2.1 components.

Netcool/Reporter 2.1.0.6 Installation on Solaris 10 Platforms

The Netcool/Reporter 2.1.0.6 installation is an upgrade installation, not a full installation. Users must have Netcool/Reporter version 2.0 installed before applying Netcool/Reporter 2.1.0.6.

Solaris Installation

To install Netcool/Reporter 2.1.0.6:

1. Before running the installer program, you need to do the following:
 - Exit any Netcool/Reporter clients.
 - Shutdown the Netcool/Reporter server (`stopreporter`).
 - Back up your repository system (recommended).
 - Back up your Netcool/Reporter 2.0 file system (recommended).
2. Ensure the environment variables `$ORACLE_HOME` and `$LD_LIBRARY_PATH` are defined if the database type is Oracle. Sybase-related environment variables must be defined if the database type is Sybase, such as `$SYBASE`.
3. The package is delivered as a compressed UNIX tar file: `2.1.0.6-TIV-NCReporter-Sol10-FP0001.tar.gz`. Extract it into a temporary directory (for example, `/opt/tmp`) using:

```
% cd /opt/tmp
% gzip -dc 2.1.0.6-TIV-NCReporter-Sol10-FP0001.tar.gz | tar xvf -
```
4. A subdirectory `2.1.0.6-TIV-NCReporter-Sol10-FP0001` is created under the temporary directory (for example, `/opt/tmp/2.1.0.6-TIV-NCReporter-Sol10-FP0001`). All files and utilities required to install the fix pack are extracted into this subdirectory.

5. Change to the directory `2.1.0.6-TIV-NCReporter-Sol10-FP0001`, which contains the files to be installed.

6. Run the `setup.sh` script and include the database type and version. The usage is:

```
setup.sh "{oracle817|oracle9i|oracle10g|sybase125|rollback} [SSL]"
```

For example:

```
% setup.sh sybase125
```

Include the parameter `SSL` on SSL-configured Netcool/Reporter environment, for example:

```
% setup.sh sybase125 SSL
```

7. The fix pack installer may request the location of the Netcool/Reporter directory if the `$INFOHOME` environment is not defined. For example, if Netcool/Reporter 2.0 is installed in the `/opt/netcool/reporter/apache/htdocs/infospc` directory, then when the installer asks for the `INFOHOME` location, type:

```
/opt/netcool/reporter/apache/htdocs/infospc
```

8. The installer backs up existing files into the `$INFOHOME/backup/vpatch_2.1.0.6-TIV-NCReporter-Sol10-FP0001` directory before copying the new files over.
9. The installer prompts you to enter the `JRUN` location.
10. The installer prompts you to enter Sybase ASE Server IP address (or hostname) and Port number if the repository database is Sybase.
11. The installer prompts you to select the language settings option (For Internationalization support only. If necessary, refer to *Netcool/Reporter 2.1 SP2 I18N Release Notes* for more information about the internationalization of Netcool/Reporter 2.1).
12. After the fix pack is processed completely, start Netcool/Reporter.

Note:

Web browsers store recent versions of web pages and Java applets. If you need to clear the browser cache and Java Plug-in cache on the client machine, do it before accessing any Netcool/Reporter 2.1 components.

Netcool/Reporter 2.1.0.6 Installation on AIX Platforms

The Netcool/Reporter 2.1.0.6 installation is an upgrade installation, not a full installation. Users must have Netcool/Reporter version 2.0 installed before applying Netcool/Reporter 2.1.0.6.

Note:

For AIX version 5.2 or 5.3, `reporter-2.0-patch-46753-41962-0` must be applied to the Netcool/Reporter 2.0 distribution/installation before running the base install. This will ensure that the Netcool/Reporter 2.0 install script is updated to allow an install on either of those two operating system versions prior to installing Netcool/Reporter 2.1.

AIX Installation

To install Netcool/Reporter 2.1.0.6:

1. Before running the installer program, you need to do the following:
 - Exit any Netcool/Reporter clients.
 - Shutdown the Netcool/Reporter server (`stopreporter`).
 - Back up your repository system (recommended).
 - Back up your Netcool/Reporter 2.0 file system (recommended).
2. You must set some environment variables depending on the type of database you are working with:
 - For Oracle, set `$ORACLE_HOME`.
In addition, in order to support Oracle 9.2 64 bit via a 32-bit library, you need to add `$ORACLE_HOME/lib32` to the `LIBPATH` environment variable.
 - For Sybase, Sybase-related environment variables must be defined, such as `$SYBASE`.

You may need to consult your database administrator for information on these environment variables.

3. The package is delivered as a compressed UNIX tar file: `2.1.0.6-TIV-NCReporter-Aix-FP0001.tar.gz`. Extract it into a temporary directory (for example, `/opt/tmp`) using:

```
% cd /opt/tmp
% gzip -dc 2.1.0.6-TIV-NCReporter-Aix-FP0001.tar.gz | tar xvf -
```

4. A subdirectory `2.1.0.6-TIV-NCReporter-Aix-FP0001` is created under the temporary directory (for example, `/opt/tmp/2.1.0.6-TIV-NCReporter-Aix-FP0001`). All files and utilities required to install the fix pack are extracted into this subdirectory.
5. Change to the directory `2.1.0.6-TIV-NCReporter-Aix-FP0001`, which contains the files to be installed.
6. Run the `setup.sh` script and include the database type and version. The usage is:

```
setup.sh "{oracle817|oracle9i|oracle10g|sybase125|rollback} [SSL]"
```

For example:

```
% setup.sh sybase125
```

Include the parameter SSL on SSL-configured Netcool/Reporter environment, for example:

```
% setup.sh sybase125 SSL
```

7. The fix pack installer may request the location of the Netcool/Reporter directory if the `$INFOHOME` environment variable is not defined. For example, if Netcool/Reporter 2.0 is installed in the `/opt/netcool/reporter/apache/htdocs/infospc` directory, then when the installer asks for the `INFOHOME` location, type:

```
/opt/netcool/reporter/apache/htdocs/infospc
```

8. The installer backs up existing files into the `$INFOHOME/backup/vpatch_2.1.0.6-TIV-NCReporter-Aix-FP0001` directory before copying the new files over.
9. The installer prompts you to enter the `JRUN` location on a SSL-configured Netcool/Reporter environment.
10. The installer prompts you to enter Sybase ASE Server IP address (or hostname) and Port number if the repository database is Sybase.
11. The installer prompts you to select the language settings option (For Internationalization support only. If necessary, refer to *Netcool/Reporter 2.1 SP2 I18N Release Notes* for more information about the internationalization of Netcool/Reporter 2.1).
12. After the fix pack is processed completely, start Netcool/Reporter 2.1.

Note:

Web browsers store recent versions of web pages and Java applets. If you need to clear the browser cache and Java Plug-in cache on the client machine, do it before accessing any Netcool/Reporter 2.1 components.

Netcool/Reporter 2.1.0.6 Installation on HPUX Platforms

The Netcool/Reporter 2.1.0.6 installation is an upgrade installation, not a full installation. Users must have Netcool/Reporter version 2.0 installed before applying Netcool/Reporter 2.1.0.6.

HPUX Installation

To install Netcool/Reporter 2.1.0.6:

1. Before running the installer program, you need to do the following:
 - Exit any Netcool/Reporter clients.
 - Shutdown the Netcool/Reporter server (`stopreporter`).
 - Back up your repository system (recommended).
 - Back up your Netcool/Reporter 2.0 file system (recommended).
2. Set the environment variables related to Oracle database and HPUNIX, as listed below:
 - `$ORACLE_HOME`
 - `$SHLIB_PATH`
 - In addition, in order to support Oracle 9.2 64 bit via a 32-bit library, you need to add `$ORACLE_HOME/lib32` to the `SHLIB_PATH` environment variable.
3. The package is delivered as a compressed UNIX tar file: `2.1.0.6-TIV-NCReporter-Hpux-FP0001.tar.gz`. Extract it into a temporary directory (for example, `/opt/tmp`) using:

```
% cd /opt/tmp
% gzip -dc 2.1.0.6-TIV-NCReporter-Hpux-FP0001.tar.gz | tar xvf -
```
4. A subdirectory `2.1.0.6-TIV-NCReporter-Hpux-FP0001` is created under the temporary directory (for example, `/opt/tmp/2.1.0.6-TIV-NCReporter-Hpux-FP0001`). All files and utilities required to install the fix pack are extracted into this subdirectory.
5. Change to the directory `2.1.0.6-TIV-NCReporter-Hpux-FP0001`, which contains the files to be installed.
6. Run the `setup.sh` script and include the Oracle database version. The usage is:

```
setup.sh "{oracle817|oracle9i|oracle10g|rollback} [SSL]"
```

 For example:

```
% setup.sh oracle9i
```

 Include the parameter `SSL` on SSL-configured Netcool/Reporter environment, for example:

```
% setup.sh oracle9i SSL
```
7. The fix pack installer may request the location of the Netcool/Reporter directory if the `$INFOHOME` environment variable is not defined. For example, if Netcool/Reporter 2.0 is installed in the `/opt/netcool/reporter/apache/htdocs/infospc` directory, then when the installer asks for the `INFOHOME` location, type:

```
/opt/netcool/reporter/apache/htdocs/infospc
```
8. The installer backs up existing files into the `$INFOHOME/backup/vpatch_2.1.0.6-TIV-NCReporter-Hpux-FP0001` directory before copying the new files over.
9. The installer prompts you to enter the `JRUN` location on a SSL-configured Netcool/Reporter environment.

10. The installer prompts you to select the language settings option (For Internationalization support only. If necessary, refer to *Netcool/Reporter 2.1 SP2 I18N Release Notes* for more information about the internationalization of Netcool/Reporter 2.1).
11. After this installation process is completed, start Netcool/Reporter 2.1.

Note:

Web browsers store recent versions of web pages and Java applets. If you need to clear the browser cache and Java Plug-in cache on the client machine, do it before accessing any Netcool/Reporter 2.1 components. In addition, increase the `kernel` parameter value for `max_thread_proc`.

General Points to Note

- There is a slight possibility that the infosql process does not stop in the UNIX environment after users run reports. In this case, kill the infosql process manually.
- I18N is supported in this fix pack with limitations. Please contact Micromuse Support for details.
- Server Admin must use default port no. 7777.
- The solution to the `runreport.jsp` and `viewsnapshot.jsp` tools exception issues has been included in this release.
- For Solaris install, the jikesw compiler has been replaced with newer version jikesw 1.15 for JRUN to fix the jsp scripts compilation issues.
- The Netcool/Reporter server side JRE has been upgraded to the latest DST patched 1.4.2 release for each of the supported platforms.
- To avoid any impact by the DST (Daylight Saving Time) changes issue, it is required that the operating system's DST fix/patch be applied on each of the supported server platforms and all clients. It is also required that the client side JRE plug-in be upgraded to the latest DST patched 1.4.2 release.
- Three letter timezone changes have no impact on any of Reporter's functions. The JRE which Reporter uses has the sole responsibility for the timezone manipulation and time generation.
- For the Crosstab report, the limitation for the combined total number of horizontal and vertical axes is seven columns.
- The `AUDIT_LEVEL` parameter in `spacesql.cfg` file is used to audit information regarding user logins to Netcool/Reporter. The audit information will be written into audit files under:

```
infospc/server/Infolog/Log_datastamp.log
```

To make this parameter work at logging, you must ensure that:

- This `AUDIT_LEVEL` parameter is set to 1;
- The debug levels are set to `DEBUG` for two of the parameters in `debuglog.xml` - `rs` and `root`. This configuration file can be found under:

```
infospc/configs/debuglog.xml
```

The following examples indicate the type of information passed by setting this parameter:

```
OPNAME=LOGINUSER, User=scott, LOGINTIME=13-Sep-2006 18:08:41
```

For example, the following shows login to Netcool/Reporter by the user scott.

```
DEBUG p.sqlc -ANFOSQL>OPID=1,OPNAME=LOGINUSER, USER=scott,LOGINTIME=13-Sep-2006
18:08:41
```

Login to Netcool/Reporter by the user scott and the exact time.

- Excel output in Lightweight Chart is disabled temporarily in this 2.1.0.6 release, because we are updating the underlying engine. This feature will be re-enabled in a forthcoming release.
- The Firefox browser does not show CSV report preview results properly. All report data will be squeezed into the first column. This problem is caused by Firefox, not a product defect of Reporter. To work around it, you can save the report preview result onto your local machine as a CSV file, and then open that file using Excel. You will see the data is properly displayed in columns.
- The Firefox browser has options for saving files (Tools->Option->Download). When you save report preview results onto your machine, you may want to specify a file format so next time you open that same file, you will not be prompted for choosing an application to open it. To do this, you can check the "Ask me where to save every file" option. If you check the "Ask me where to save every file" option instead, you are not prompted for when saving report files; but when you try to open it locally, you will have to choose an application.
- On HP/UX platforms, there is a limitation that only 15 applets can run simultaneously. Applets may include Report Designer, HTML Customizer, Information Designer and Easy Reporter. You may close applets no longer in use to release more memory for other users.

Resolved Issues

This section provides tables listing issues fixed in Netcool/Reporter 2.1 since the 2.0 version, including:

- *Problems Resolved in Netcool/Reporter 2.1.0.6 (Total: 21)*
- *Problems Resolved in Netcool/Reporter 2.1.0.5 (Total: 22)*
- *Problems Resolved in Netcool/Reporter 2.1.0.4 (Total: 10)*
- *Problems Resolved in Netcool/Reporter 2.1.0.3 (Total: 36)*
- *Problems Resolved in Netcool/Reporter 2.1 SP2 (Total 17)*
- *Problems Resolved in Netcool/Reporter 2.1 SP1 (Total 31)*
- *Problems Resolved in Netcool/Reporter 2.1 GA (Total: 77)*

Problems Resolved in Netcool/Reporter 2.1.0.6 (Total: 21)

Table 7: Problems Resolved in Netcool/Reporter 2.1.0.6 (1 of 2)

No.	Issue	Applied Platform
1.	Failed to generate report in Oracle_Events_by_AlertGroup.par	All supported platforms
2.	Reporter 2.1 fails to produce PDF reports in large numbers of data.	All supported platforms
3.	Cancel button does not work in presentation.	All supported platforms
4.	There is no prompted error message when preview drill-chart report in Report Designer.	All supported platforms
5.	The limitation that more than 15 applets cannot be opened simultaneously is not documented.	HPUX
6.	Changing FTP listen port during installation breaks Upload Content.	All supported platforms
7.	Infosql processes are not being deleted.	All supported platforms
8.	** not allowed as a password character even though not excluded in documentation.	All supported platforms
9.	Save option does not save existing files into its original location by default.	All supported platforms

Table 7: Problems Resolved in Netcool/Reporter 2.1.0.6 (2 of 2)

No.	Issue	Applied Platform
10.	Time delay in returning crosstab in PDF format with unencrypted option checked.	All supported platforms
11.	Parameter report with break cannot "export current report".	All supported platforms
12.	Set text alignment as right/fit/center, tab could not work.	All supported platforms
13.	Open report by user has no privilege to access the data source.	All supported platforms
14.	Easy Reporter licenses not being fully released.	All supported platforms
15.	Form based report Sybase_Top_Nodes fails.	All supported platforms
16.	Unable to log back into Reporter after being disconnected.	All supported platforms
17.	The Sybase canned reports fail to run against Sybase 12.	All supported platforms

Problems Resolved in Netcool/Reporter 2.1.0.5 (Total: 22)

Table 8: Problems Resolved in Netcool/Reporter 2.1.0.5 (1 of 2)

No.	Issue	Applied Platform
1.	Publish tab was placed above the Unpublish tab in the Unpublish portlet.	All supported platforms
2.	Element list is not shown nicely in the content filter window using the Firefox browser.	All supported platforms
3.	Prompt message cannot show after uploading content using the Firefox browser.	All supported platforms
4.	Uploading an empty file to channel or folder prompts "File(s) Uploaded successfully" in the Firefox environment.	All supported platforms
5.	Horizontal scrollbar is not displayed when adding a parameter report to the reportbook.	All supported platforms
6.	Add Excel97 snapshot to reportbook; icon cannot show in reportbook when previewing the reportbook in the Firefox environment.	All supported platforms
7.	A 0.5cm height blank row is shown on Reporter main page using Firefox.	All supported platforms
8.	Cannot generate Cube report result when the measure column has null values.	All supported platforms
9.	Cannot generate SQL report result when there is no alias set for the function sum in SQL statement.	All supported platforms
10.	Installer does not work with JVM on 64-bit AIX machine.	AIX platforms
11.	Cannot generate form report if unchecking Show Form/Label Header.	All supported platforms
12.	Failed to generate chart report result if there are two or more measures.	All supported platforms
13.	The original JPEG Encode is not supported on AIX.	AIX platforms
14.	Drill-chart report could not run when selecting drill-chart as output format and choosing "no detail" as detail type.	All supported platforms
15.	Selecting the "percent only" as horizontal axis could not return results.	All supported platforms
16.	Non-owner can open file but cannot save changes made.	All supported platforms

Table 8: Problems Resolved in Netcool/Reporter 2.1.0.5 (2 of 2)

No.	Issue	Applied Platform
17.	Crosstab axes limitation not documented: For the Crosstab report, the limitation for the combined total number of horizontal and vertical axes is seven columns.	All supported platforms
18.	Reporter not reconnecting to MSSQL database after the database has been restarted while Reporter still running.	All supported platforms
19.	One page at a time option in HTML Report Display Option section is enabled when unsupported report output type is selected.	All supported platforms
20.	Particular crosstab generated in PDF format is different from HTML format.	All supported platforms
21.	Unable to display other types of snapshot after loading an Excel snapshot.	All supported platforms
22.	Tabular reports with xml as output type with 1 break, 1 level and 1 summary will fail to preview on Windows only.	Windows

Problems Resolved in Netcool/Reporter 2.1.0.4 (Total: 10)

Table 9: Problems Resolved in Netcool/Reporter 2.1.0.4 (1 of 2)

No.	Issue	Applied Platform
1.	When a user enters a string such as “ ‘ or '1' = '1 “ into the Reporter Inbox text Search box, the search returns all the files which exist on the server, with permissions to run any reports.	All supported platforms
2.	Cannot edit email list in Scheduler.	All supported platforms
3.	XML report not getting generated.	All supported platforms
4.	Reports will not run outside of the Reporter server via JSP if there is a comma in the selected parameter.	All supported platforms
5.	Audit_Level=1 parameter in spacesql.cfg does not work as documented.	All supported platforms (See <i>General Points to Note</i> for description on how to enable the parameter work.)
6.	Advanced search and simple search functionality broken in SP1 and patch reporter2.1-patch-35556-40851.	All supported platforms

Table 9: Problems Resolved in Netcool/Reporter 2.1.0.4 (2 of 2)

No.	Issue	Applied Platform
7.	Report run outside of Reporter prompts for parameter when the user is not the owner of report.	All supported platforms
8.	Reporter error: File semi color; does not exist or cannot be read.	All supported platforms
9.	Reports exported to Excel have a missing column after Chinese patch applied.	All supported platforms
10.	If a report contains semi colon, then report will fail to run.	All supported platforms

Problems Resolved in Netcool/Reporter 2.1.0.3 (Total: 36)

Table 10: Problems Resolved in Netcool/Reporter 2.1.0.3 (1 of 3)

No.	Issue	Applied Platform
1.	Error occurs when running the report which contains the post-processing procedure.	Solaris 10/HPUX/AIX
2.	The SP3.2 installation fails if the environment variable "LD_LIBRARY_PATH" is not defined in the system.	Solaris
3.	The Run button and the Reset button are in the wrong place in the canned report "MSSQL_Top_Managers".	Windows
4.	Cannot roll back if the SP3.1 installation fails.	Windows and Solaris
5.	The jre folder will be removed if the installation cannot find the relevant libraries.	Solaris
6.	Enable to configure the email subject of the scheduled jobs to reflect the job name.	Windows and Solaris
7.	Pencil icon allows users without Report Designer rights access to Report Designer.	Windows and Solaris
8.	Failed to generate Freeform report if there is at least one Crosstab, Chart or LChart etc. type of report contains no data.	Windows and Solaris

Table 10: Problems Resolved in Netcool/Reporter 2.1.0.3 (2 of 3)

No.	Issue	Applied Platform
9.	<p>Reports over 2 pages do not run from Inbox with specific dataset.</p> <p>The error is "Failed to generate report result because: Failed to generate report result."</p> <p>Insert this report to Freeform Reporter, failed to preview with error message "Failed to generate report result because: java.lang.NullPointerException".</p>	Windows and Solaris
10.	<p>Use SaveFilesIntoRepository utility to import LChart files into the destination repository.</p> <p>Use SaveFilesIntoRepository utility to import report file description.</p>	Windows and Solaris
11.	Allow to enter Name Prefix when creating a scheduled job for parameterised report.	Windows and Solaris
12.	"netcool" user can see and edit scheduled jobs created by other users.	Windows and Solaris
13.	Scheduler does not allow capital letters as email address.	Windows and Solaris
14.	Result is wrong if "Case Sensitive" is checked in Scheduler - File Search window.	Windows and Solaris
15.	"Run" and "Reset" buttons are in English in Form Based Report page if locale is set to Chinese. (I18N specific problem)	Windows and Solaris
16.	Chinese characters incorrectly displayed as jE in X axis label when exporting a chart to PDF format from an applet chart. (I18N Chinese locale specific problem)	Windows and Solaris
17.	"Text missing" in Page Setup window title in Easy Reporter. (I18N Chinese locale specific problem)	Windows and Solaris
18.	Failed to upload content if default ftp listener port is changed during installation. (Unix platform specific problem)	Windows and Solaris
19.	Select pie as chart type under measure page in Lchart Designer, "vcd906:text missing" is displayed in "content" drop-down list. (I18N specific problem)	Windows and Solaris
20.	Enhancement: to sort the scheduled jobs by modification time or name order.	Windows and Solaris
21.	Incorrect Version information displayed in Version.html for SP3.	Windows and Solaris
22.	Service pack installer does not rollback to Netcool/Reporter 2.0 status.	Windows and Solaris

Table 10: Problems Resolved in Netcool/Reporter 2.1.0.3 (3 of 3)

No.	Issue	Applied Platform
23.	There is java error in backup_log file after applying SP3. (Oracle817 specific)	Windows and Solaris
24.	User guide and online help require update due to change in sorting of scheduled jobs by modification time or name order.	Windows and Solaris
25.	Drill-chart report could not run when select drill-chart as output format and choose "no detail" as detail type.	Solaris-Sybase12.5
26.	Failed to preview crosstab report if select "percent only" as horizontal axis for measure.	Solaris-Sybase12.5
27.	The "500 Internal Server Error" message appears in browser when launching Netcool/Reporter immediately after the installation.	Solaris
28.	Problems running runreport.jsp tool in Netcool/Reporter 2.1 patched to SP2.	Windows and Solaris
29.	Can't generate Cube report result when column has null value as measure.	AIX 5.x
30.	Cannot generate SQL report result when there is no alias of function sum in sql statement.	AIX 5.x
31.	Installer does not work with 64bit JRE on AIX machine.	AIX 5.x
32.	Cannot generate Form style report if Show Form/Label Header is unchecked.	AIX 5.x
33.	Failed to generate chart report result if there are 2 or more measures.	AIX 5.x
34.	The browser hangs when trying to preview a Jpeg Lchart the 2nd time.	AIX 5.x
35.	Drill-chart report could not run when select drill-chart as output format and choose "no detail" as detail type.	Solaris 9/Sybase 12.5
36.	Failed to preview crosstab report if select "percent only" as horizontal axis for measure.	Solaris 9/Sybase 12.5

Problems Resolved in Netcool/Reporter 2.1 SP2 (Total 17)

Table 11: Problem(s) Resolved in SP2

No.	Issue
1.	Does not support concurrent user license model.
2.	A message window has never been closed while the presentation (contains a simple report) is launched from Portal.
3.	VRTL tag bug. Failed to run a report owned by another user.
4.	Throw Java exception errors in Java Console when exit from Easy Reporter. (Solaris Specific problem)
5.	There is error message when saving 3D Gif Chart snapshot.
6.	Cannot preview Form, Label, Break Form, Master Detail I and Master Detail II style report if the output format is Excel97.
7.	Pops up error when searching for a file in Scheduler with Case Sensitive ticked.
8.	No warning message when entering wrong associated column name in the parameterized SQL report preview window.
9.	Parameter is not replaced by value in report title for crosstab PDF reports.
10.	Got "500 Internal Server Error" after entering value for parameterized report in Report Book Designer window.
11.	Failed to open Parameterized Combo (from mailbox) which contains more than one report.
12.	Cannot open parameterized chart report in presentation mode from portal.
13.	N-tier crosstab report snapshots cannot be opened from portal.
14.	Core dump file is generated on server machine when report or chart is generated using *Oracle 9i* as datasource.
15.	Some HTML files are missing from zipped N-tier Crosstab report file when it is attached to email.
16.	Netcool/Reporter Service Pack installer rollback option does not rollback new added files.
17.	viewlicense utility does not show the correct number of user license.

Problems Resolved in Netcool/Reporter 2.1 SP1 (Total 31)

Table 12: Problem(s) Resolved in SP1 (1 of 2)

No.	Issue
1.	In Publish Folder Content - Set Publish Access Right window, the Help button is in capital letter.
2.	Child window is not loaded completely when maximizing Report Book window using Windows XP client.
3.	Bar chart becomes a scatter chart.
4.	Move one file to another folder, prompt message doesn't indicate the actual result.
5.	Proper prompt message is needed when Report Book generated has no data.
6.	'Clear All' button in Express Content Properties doesn't work well.
7.	On add Report Book Banner window, banner type is html document, but all jsp files appear in the html file list.
8.	Warning message should be prompted at earlier stage when saving an empty Report Book report.
9.	Unable to edit frequency for those jobs are originally scheduled as 'Once Only'.
10.	Help in Scheduler File Search window links to wrong place.
11.	Parameter is not replaced by value in report title for PDF reports.
12.	With SSL configured, Report Book content is missing when running from portal.
13.	Running mssql.drop_repository.sql gets error.
14.	Inconsistent problem happens when publishing and unpublishing report.
15.	Netscape 7.1 browser left justify the alignment of channel list objects in ListView and DetailView.
16.	Cannot edit Group Administrator Privilege when creating a new user.
17.	Preview the Report Book, cannot see the correct result.
18.	Cannot display content from saved Report Book file.
19.	Have to refresh the page after removing content from Report Book window.
20.	Stack chart option is not loaded for canned lchart.
21.	Some Help windows do not have the scrollbar to enable viewing complete information.
22.	Need to change report alert email subject to 'Netcool Reporter'.
23.	Content Filter window cannot be launched.

Table 12: Problem(s) Resolved in SP1 (2 of 2)

No.	Issue
24.	Page Organizer window cannot be launched.
25.	Set and save job frequency to "Every Month" from Scheduler, it becomes 'Every Week'.
26.	File extension of Report Book is missing in Publish Folder Content portlet (Specific to Netscape 7 browser).
27.	LChart x-axis properties is not applied for horizontal stack chart.
28.	'Netcool/Reporter 2.0' shows in the login window title bar.
29.	N-tier crosstab report snapshots cannot be opened from portal.
30.	File Details are missing in the right frame when selecting a report from Report Book Designer.
31.	One servlet class file throws exception in JRUN default-err.log.

Problems Resolved in Netcool/Reporter 2.1 GA (Total: 77)

Netcool/Reporter 2.0 Java 1.4.2 Plug-in Related Patch - List of Bug Fixes (Total: 17)

Table 13: Netcool/Reporter 2.0 Java 1.4.2 Plug-in related Patch - List of Bug Fixes (Total: 17) - All Relate to NBS: 25882 (1 of 2)

Component	Issue
Easy Reporter	After closing Easy Reporter windows, <i>Easy Reporter - Enter Parameter Values</i> pops up automatically.
Easy Reporter	Some exception in Java Console.
Easy Reporter	Incomplete display for export dialog by using plug-in 1.4.2.
