### **3 Prerequisites**

This section lists the Tech Pack modules that the current Tech Pack is dependent on.

- Neutral Core GOM
- Neutral GPRS BSS GOM
- Neutral GPRS/UMTS CN GOM
- Neutral GSM BSS/NSS GOM
- Neutral UMTS UTRAN GOM
- VNL GOMlet
- NOK GOMlet
- Neutral UMTS UTRAN Ext GOM

## 4 Network Model

This section describes the network objects (logical and physical) that are referenced in this technology pack module's data model.

### 4.1 AGPS\_IF

The Assisted-GPS (AGPS) interface to the network AGPS Server

Attribute Name	Description	Type	Related Object
AGPS_IF_Id	The unique identifier for the AGPS interface.	STRING	
AGPS_IF_Name	The user-friendly name preferably unique for the AGPS interface.	STRING	
RNC_Id	The RNC associated with the AGPS_IF	STRING	RNC
Region_Id	The region associated with the AGPS_IF.	STRING	Region
Network_Id	The network associated with the AGPS_IF.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the AGPS interface.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the AGPS_IF	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

## 4.2 ASSOIND

M3UA Association Index

Attribute Name	Description	Type	Related Object
ASSOIND_Id	A unique identifier for the Association Index.	STRING	
ASSOIND_Name	A user friendly name preferably unique for the ASSOIND.	STRING	
ASSOSET_Id	The ASSOSET to which the ASSOIND belongs.	STRING	ASSOSET
RNC_Id	The RNC to which the ASSOIND belongs.	STRING	RNC
Region_Id	Region associated with the ASSOIND.	STRING	Region
Network_Id	Network associated with the ASSOIND.	STRING	Network
Node_Id	Node associated with the ASSOIND	STRING	
Node_Type	Node type of the ASSOIND	STRING	
ASSOIND_Version	Hardware/Software version of the ASSOIND.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the ASSOIND	STRING	

## 4.3 ASSOSET

M3UA Association Set

Attribute Name	Description	Type	Related Object
ASSOSET_Id	A unique identifier for the Association Set.	STRING	
ASSOSET_Name	A user friendly name preferably unique for the ASSOSET.	STRING	
RNC_Id	The RNC to which the ASSOSET belongs.	STRING	RNC
Region_Id	Region associated with the ASSOSET.	STRING	Region
Network_Id	Network associated with the ASSOSET.	STRING	Network
Node_Id	Identifier for the node of the ASSOSET	STRING	

Node_Type	Node Type for the ASSOSET.	STRING	
ASSOSET_Version	Hardware/Software version of the ASSOSET.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the ASSOSET	STRING	

#### 4.4 ATM\_Route

The ATM route which consists of one or more hunted virtual paths (VP) or virtual channels (VC), which connect two ATM exchanges.

Attribute Name	Description	Type	Related Object
ATM_Route_Id	The unique identifier for the ATM Route.	STRING	
ATM_Route_Name	The user-friendly name preferably unique for the ATM Route.	STRING	
RNC_Id	The reporting side of the RNC associated with the ATM Route.	STRING	RNC
Region_Id	The region associated with the ATM Route.	STRING	Region
Network_Id	The network associated with the ATM Route.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the ATM Route.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the ATM_Route	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

## 4.5 ATM\_VCC

ATM Virtual Circuit Connection Interface

Attribute Name	Description	Type	Related Object
ATM_VCC_Id	The unique identifier for the ATM VCC.	STRING	
ATM_VCC_Name	The user-friendly name preferably unique for the ATM VCC.	STRING	
ATM_VPC_Id	The ATM VPC associated with the VCC.	STRING	ATM_VPC
Region_Id	The region associated with the VCC.	STRING	Region
Network_Id	The network associated with the VCC.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the ATM switch that handles the VCC.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
AAL_Id	Unique identifier for the AAL link.	STRING	
AAL_Name	A user friendly name for the AAL link.	STRING	
NodeB_Id	Identifier of the NodeB.	STRING	
NodeB_Name	Meaningful name of the NodeB.	STRING	
AAL_Type	Type of the AAL link (e.g. AAL1, AAL2, AAL5).	STRING	
Vendor	Manufacturer of the ATM_VCC	STRING	

## 4.6 ATM\_VPC

ATM Virtual Path Connection Interface

Attribute Name	Description	Type	Related Object
ATM_VPC_Id	The unique identifier for the ATM VPC	STRING	

ATM_VPC_Name	The user-friendly name preferably unique for the ATM VPC	STRING	
Region_Id	The region associated with the ATM VPC.	STRING	Region
Network_Id	The network associated with the ATM VPC.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the ATM switch that handles the VPC.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the ATM_VPC	STRING	

## 4.7 Cell

The Cell handles the radio interface to the mobile station. The Cell is the radio equipment (transceivers and antennas) needed to service each cell in the network. A group of Cells is controlled by a BSC.

Attribute Name	Description	Type	Related Object
Cell_Id	A unique identifier for the Cell.	STRING	
Cell_Name	A user friendly name preferably unique for the Cell.	STRING	
BSC_Id	A unique identifier for the BSC.	STRING	BSC
BS_Id	A unique identifier for the BS at which the Cell is located. The BS at which the cell is located.	STRING	BS
GPRS_Cell_Id	A unique identifier for the Cell.	STRING	Cell
LAC_Id	The Location Area Code encompassing the Cell.	STRING	LAC
MSC_Id	A unique identifier for the MSC.	STRING	MSC

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

NSVC_Id	A unique identifier for the NSVC.	STRING	NSVC
Network_Id	Network associated with the Cell.	STRING	Network
PCU_Id	A unique identifier for the PCU.	STRING	PCU
Region_Id	Region associated with the Cell.	STRING	Region
Registration_Area_Id	A unique identifier for the Registration_Area.	STRING	Registration_Area
Routing_Area_Id	A unique identifier for the Routing_Area.	STRING	Routing_Area
SGSN_Id	A unique identifier for the SGSN.	STRING	SGSN
UMTS_Cell_Id	A unique identifier for the Cell.	STRING	Cell
RNC_Id		STRING	RNC
NodeB_Id		STRING	NodeB
BCH_Power	Broadcast channel power.	STRING	
BVC_Id	A unique identifier for the BVC.	STRING	
Cell_Description	Description of Cell.	STRING	
Cell_Type	Is the cell omni_directional, or a sector, or micro/pico/macro/umbrella cell, etc.	STRING	
Cell_Version	Hardware/Software version of the Cell.	STRING	
Dedicated_PDCH	Dedicated Packet Data Channel.	INTEGE R	
Defined_CCH	Number of defined CCH channels for the Cell.	INTEGE R	
Defined_PDCH	Designated Packet Data Channel.	INTEGE R	
Defined_TCH	Number of defined TCH channels of the Cell.	INTEGE R	
Defined_TRX	Number of defined TRX belonging to the cell.	INTEGE R	
Max_Power	The bs_tx_pwr_max configuration attribute.	FLOAT	
NSVC_CN_Id	A unique identifier for the NSVC CN.	STRING	
Primary_Common_Pilot_Ch_Power	Primary CPICH channel power.	FLOAT	

Primary_Scrambling_Code	Primary DL scrambling code.	STRING	
Primary_Sync_Ch_Power	Primary synchronisation channel power, DL.	FLOAT	
Secondary_Sync_Ch_Power	Secondary synchronisation channel power, DL.	STRING	
Segment_Id	A unique identifier for the Segment.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
UTRAN_Absolute_Radio_Freq_DL	DL UTRAN absolute Radio Frequency Channel number.	STRING	
UTRAN_Absolute_Radio_Freq_UL	UL UTRAN absolute Radio Frequency Channel number.	STRING	
UARFCNUL	UL UTRAN absolute Radio Frequency Channel number	STRING	
UARFCNDL	DLL UTRA absolute Radio Frequency Channel number	STRING	
PRIMSCRMBLCD	Primary DL scrambling code	STRING	
PRIMCPICHPOWER	Primary CPICH channel power	INTEGER	
PRIMSCHPOWER	Primary synchronisation channel power, DL	INTEGER	
SECSCHPOWER	Secondary synchronisation channel power, DL	STRING	
BCHPOWER	Broadcast channel power	STRING	
Vendor	Manufacturer of the Cell	STRING	

## 4.8 Computer\_Unit

Computer Unit within Nokia NE

Attribute Name	Description	Type	Related Object

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Computer_Unit_Id	Computer Unit id	STRING	
Computer_Unit_Name	Computer Unit name	STRING	
Region_Id	The region associated with the computer unit.	STRING	Region
Network_Id	The network associated with the computer unit.	STRING	Network
Computer_Unit_Type	Type of Computer Unit	STRING	
Version	The hardware/software version for the computer unit.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Node_Id	Identifier of the Node (e.g. MGW, RNC).	STRING	
Node_Name	Meaningful name of the Node.	STRING	
Node_Type	Type of the Node (cf. MGW, RNC).	STRING	
Vendor	Manufacturer of the Computer_Unit	STRING	

## 4.9 Destination\_Point

Destination Point

Attribute Name	Description	Type	Related Object
Destination_Point_Id	The unique identifier for the Destination Point	STRING	
Destination_Point_Name	The user-friendly name preferably unique for the Destination Point.	STRING	
Region_Id	The region associated with the Destination Point.	STRING	Region
Network_Id	The network associated with the Destination Point.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the Destination Point.	STRING	
Technology	Technology of the network/element (e.g. GSM,	STRING	

	GPRS, UMTS).		
Vendor	Manufacturer of the Destination_Point	STRING	

## 4.10 DSP\_Pool

DSP Pool

Attribute Name	Description	Type	Related Object
DSP_Pool_Id	The unique identifier for the DSP Pool.	STRING	
DSP_Pool_Name	The user-friendly name preferably unique for the DSP Pool.	STRING	
RNC_Id	The RNC associated with the WBTS which supports the DSP Pool.	STRING	RNC
Region_Id	The region associated with the DSP Pool.	STRING	Region
Network_Id	The network associated with the DSP Pool.	STRING	Network
Version	The hardware/software version of the equipment that handles the DSP Pool.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the DSP_Pool	STRING	

## 4.11 DSP\_Service\_Type

DSP Service Type

Attribute Name	Description	Type	Related Object
DSP_Service_Type_Id	The unique identifier of the DSP Service Type	STRING	
DSP_Service_Type_Name	A user-friendly name for the DSP Service Type	STRING	
Vendor	Manufacturer of the DSP_Service_Type	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

## 4.12 Ethernet\_IF

Etherment Interface

Attribute Name	Description	Type	Related Object
Ethernet_IF_Id	The unique identifier for the Ethernet Interface.	STRING	
Ethernet_IF_Name	The user-friendly name preferably unique for the Ethernet Interface.	STRING	
RNC_Id	The RNC which supports the Ethernet Interface.	STRING	RNC
Region_Id	The region associated with the Ethernet Interface.	STRING	Region
Network_Id	The network associated with the Ethernet Interface.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the Ethernet Interface.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the Ethernet_IF	STRING	

## 4.13 Exchange\_Terminal

Exchange Terminal

Attribute Name	Description	Type	Related Object
Exchange_Terminal_Id	The unique identifier of the Exchange_Terminal	STRING	
Exchange_Terminal_Name	A user-friendly name for the Exchange_Terminal	STRING	
Region_Id	Region associated with the Exchange_Terminal	STRING	Region
Network_Id	The Network associated with the Exchange_Terminal	STRING	Network
ET_Unit_Type	The exchange terminal unit type	STRING	

ET_Unit_Index	The exchange terminal unit index	STRING	
Node_Id	The name of the node associated with the object	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	The type node associated with the object	STRING	
Vendor	Manufacturer of the Exchange_Terminal	STRING	

## 4.14 FTM\_AAL2

The Flexi Transport Module (on Flexi Base Station) AAL2 Object

Attribute Name	Description	Type	Related Object
FTM_AAL2_Id	The unique identifier for the FTM AAL2.	STRING	
FTM_AAL2_Name	The user-friendly name preferably unique for the FTM AAL2.	STRING	
NodeB_Id	The reporting side of the WBTS associated with the FTM AAL2.	STRING	NodeB
RNC_Id	The reporting side of the RNC associated with the FTM AAL2.	STRING	RNC
Region_Id	The region associated with the FTM AAL2.	STRING	Region
Network_Id	The network associated with the FTM AAL2.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the FTM AAL2.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_AAL2	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

## **4.15 FTM\_ATM\_IF**

The Flexi Transport Module (on Flexi Base Station) ATM interface object.

<b>Attribute Name</b>	<b>Description</b>	<b>Type</b>	<b>Related Object</b>
FTM_ATM_IF_Id	The unique identifier for the FTM ATM Interface.	STRING	
FTM_ATM_IF_Name	The user-friendly name preferably unique for the FTM ATM Interface.	STRING	
NodeB_Id	The WBTS associated with the FTM ATM Interface.	STRING	NodeB
RNC_Id	The RNC associated with the WBTS which supports the FTM ATM Interface.	STRING	RNC
Region_Id	The region associated with the FTM ATM Interface.	STRING	Region
Network_Id	The network associated with the FTM ATM Interface.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the FTM ATM Interface.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_ATM_IF	STRING	

## **4.16 FTM\_ATM\_VC**

The Flexi Transport Module (on Flexi Base Station) ATM Virtual Channel object.

<b>Attribute Name</b>	<b>Description</b>	<b>Type</b>	<b>Related Object</b>
FTM_ATM_VC_Id	The unique identifier for the FTM ATM Virtual Channel.	STRING	

FTM_ATM_VC_Name	The user-friendly name preferably unique for the FTM ATM Virtual Channel.	STRING	
NodeB_Id	The WBTS associated with the FTM ATM Virtual Channel.	STRING	NodeB
RNC_Id	The RNC associated with the WBTS which supports the FTM ATM Virtual Channel.	STRING	RNC
Region_Id	The region associated with the FTM ATM Virtual Channel.	STRING	Region
Network_Id	The network associated with the FTM ATM Virtual Channel.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the FTM ATM Virtual Channel.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_ATM_VC	STRING	

## 4.17 FTM\_ATM\_VP

The Flexi Transport Module (on Flexi Base Station) ATM Virtual Path object.

Attribute Name	Description	Type	Related Object
FTM_ATM_VP_Id	The unique identifier for the FTM ATM Virtual Path.	STRING	
FTM_ATM_VP_Name	The user-friendly name preferably unique for the FTM ATM Virtual Path.	STRING	
FTM_ATM_IF_Id	The WBTS associated with the FTM ATM	STRING	FTM_ATM

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

	Virtual Path.		_IF
NodeB_Id	The ATM interface associated with the FTM ATM Virtual Path.	STRING	NodeB
RNC_Id	The RNC associated with the WBTS which supports the FTM ATM Virtual Path.	STRING	RNC
Region_Id	The region associated with the FTM ATM Virtual Path.	STRING	Region
Network_Id	The network associated with the FTM ATM Virtual Path.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the FTM ATM Virtual Path.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_ATM_VP	STRING	

#### 4.18 FTM\_Ethernet\_Link

The Flexi Transport Module (on Flexi Base Station) Ethernet Link interface object.

Attribute Name	Description	Type	Related Object
FTM_Etherlink_Id	The unique identifier for the FTM Ethernet Link.	STRING	
FTM_Etherlink_Name	The user-friendly name preferably unique for the FTM Ethernet Link.	STRING	
NodeB_Id	The WBTS associated with the FTM Ethernet Link.	STRING	NodeB
RNC_Id	The RNC associated with the WBTS which supports the FTM Ethernet Link.	STRING	RNC
Region_Id	The region associated with the FTM Ethernet Link.	STRING	Region

Network_Id	The network associated with the FTM Ethernet Link.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the FTM Ethernet Link.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_Ethernet_Link	STRING	

## 4.19 FTM\_IP

The Flexi Transport Module (on Flexi Base Station) IP Interface Object

Attribute Name	Description	Type	Related Object
FTM_IP_Id	The unique identifier for the FTM IP.	STRING	
FTM_IP_Name	The user-friendly name preferably unique for the FTM IP.	STRING	
NodeB_Id	The reporting side of the WBTS associated with the FTM IP.	STRING	NodeB
RNC_Id	The reporting side of the RNC associated with the FTM IP.	STRING	RNC
Region_Id	The region associated with the FTM IP.	STRING	Region
Network_Id	The network associated with the FTM IP.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Version	The hardware/software version of the equipment that handles the FTM IP.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_IP	STRING	

## 4.20 FTM\_PDH\_IF

The Flexi Transport Module (on Flexi Base Station) PDH interface object.

Attribute Name	Description	Type	Related Object
FTM_PDH_IF_Id	The unique identInterface.ier for the FTM PDH Interface.	STRING	
FTM_PDH_IF_Name	The user-friendly name preferably unique for the FTM PDH Interface.	STRING	
NodeB_Id	The WBTS associated with the FTM PDH Interface.	STRING	NodeB
RNC_Id	The RNC associated with the WBTS which supports the FTM PDH Interface.	STRING	RNC
Region_Id	The region associated with the FTM PDH Interface.	STRING	Region
Network_Id	The network associated with the FTM PDH Interface.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the FTM PDH Interface.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_PDH_IF	STRING	

## 4.21 FTM\_PHB

The Flexi Transport Module (on Flexi Base Station) PHB Object

Attribute Name	Description	Type	Related Object
FTM_PHB_Id	The unique identifier for the FTM PHB.	STRING	
FTM_PHB_Name	The user-friendly name preferably unique for the FTM PHB.	STRING	
NodeB_Id	The reporting side of the WBTS associated with the FTM PHB.	STRING	NodeB
RNC_Id	The reporting side of the RNC associated with the FTM PHB.	STRING	RNC
Region_Id	The region associated with the FTM PHB.	STRING	Region
Network_Id	The network associated with the FTM PHB.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the FTM PHB.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_PHB	STRING	

## 4.22 FTM\_PSN\_IP

The Flexi Transport Module (on Flexi Base Station) IP Connection Tunnel interface object.

Attribute Name	Description	Type	Related Object
FTM_PSN_IP_Id	The unique identifier for the FTM PSN IP Interface.	STRING	
FTM_PSN_IP_Name	The user-friendly name preferably unique for the FTM PSN IP Interface.	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

NodeB_Id	The WBTS associated with the FTM PSN IP Interface.	STRING	NodeB
RNC_Id	The RNC associated with the WBTS which supports the FTM PSN IP Interface.	STRING	RNC
Region_Id	The region associated with the FTM PSN IP Interface.	STRING	Region
Network_Id	The network associated with the FTM PSN IP Interface.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the FTM PSN IP Interface.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_PSN_IP	STRING	

#### 4.23 FTM\_PWMP\_IF

The Flexi Transport Module (on Flexi Base Station) SDH VCX interface object.

Attribute Name	Description	Type	Related Object
FTM_PWMP_IF_Id	The unique identifier for the FTM SDH VCX Interface.	STRING	
FTM_PWMP_IF_Name	The user-friendly name preferably unique for the FTM SDH VCX Interface.	STRING	
NodeB_Id	The WBTS associated with the FTM SDH VCX Interface.	STRING	NodeB
RNC_Id	The RNC associated with the WBTS which supports the FTM SDH VCX Interface.	STRING	RNC
Region_Id	The region associated with the FTM SDH VCX Interface.	STRING	Region
Network_Id	The network associated with the FTM SDH	STRING	Network

	VCX Interface.		
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the FTM SDH VCX Interface.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_PWMP_IF	STRING	

## 4.24 FTM\_SDH\_IF

The Flexi Transport Module (on Flexi Base Station) SDH interface object.

Attribute Name	Description	Type	Related Object
FTM_SDH_IF_Id	The unique identifier for the FTM SDH link Interface.	STRING	
FTM_SDH_IF_Name	The user-friendly name preferably unique for the FTM SDH link Interface.	STRING	
NodeB_Id	The WBTS associated with the FTM SDH link Interface.	STRING	NodeB
RNC_Id	The RNC associated with the WBTS which supports the FTM SDH link Interface.	STRING	RNC
Region_Id	The region associated with the FTM SDH link Interface.	STRING	Region
Network_Id	The network associated with the FTM SDH link Interface.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

	Node.		
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the FTM SDH link Interface.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the FTM_SDH_IF	STRING	

## 4.25IMA\_Group

IMA Group

Attribute Name	Description	Type	Related Object
IMA_Group_Id	A unique identifier for the IMA Group.	STRING	
IMA_Group_Name	A user friendly name for the IMA Group.	STRING	
Region_Id	The region associated with the IMA Group.	STRING	Region
Network_Id	The network associated with the IMA Group.	STRING	Network
NodeB_Id	A unique identifier for the NodeB.	STRING	NodeB
RNC_Id	A unique identifier for the RNC.	STRING	RNC
Node_Id	A unique identifier for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version for the ATM equipment that manage the IMA Group circuit.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
IMA_Group_Type	Type or Information about the IMA Group.	STRING	
Vendor	Manufacturer of the IMA_Group	STRING	

## 4.26Interface

Interface

Attribute Name	Description	Type	Related

			Object
Iface_Id	Identifier for the Interface.	STRING	
Iface_Name	Meaningful name for the Interface.	STRING	
Region_Id	The region associated with the STM equipment	STRING	Region
Network_Id	The network associated with the STM equipment	STRING	Network
Exchange_Terminal_Type	Type of SDH Exchange terminal	STRING	
Version	The hardware/software version of the STM equipment	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Node_Id	Identifier of the interface parents (e.g. SGSN, GGSN, ROUTER)	STRING	
Node_Type	Type of the interface parent (e.g. SGSN, GGSN)	STRING	
Iface_Type	Type of the interface (e.g. ATM, FR, IP)	STRING	
Mag_Id	Magazin identifier	STRING	
Slot_Id	Slot identifier	STRING	
Iface_Direction	Interface direction and/or traffic type (e.g. Simplex, Half-duplex, Full-Duplex, Incoming, Outgoing)	STRING	
Vendor	Manufacturer of the Interface	STRING	

## 4.27 IP\_IF

IP Interface

Attribute Name	Description	Type	Related Object
IP_IF_Id	The unique identifier for the IP Interface.	STRING	
IP_IF_Name	The user-friendly name preferably unique for	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

	the IP Interface.		
RNC_Id	The RNC which supports the IP Interface.	STRING	RNC
Region_Id	The region associated with the IP Interface.	STRING	Region
Network_Id	The network associated with the IP Interface.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the IP Interface.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the IP_IF	STRING	

## 4.28 IP\_PHB

IP PHB

Attribute Name	Description	Type	Related Object
IP_PHB_Id	The unique identifier of Per Hop Behaviour (PHB)	STRING	
IP_PHB_Name	A user-friendly name for Per Hop Behaviour (PHB)	STRING	
Vendor	Manufacturer of the IP_PHB	STRING	

## 4.29 IP\_Route\_BTS

IP Route on NodeB

Attribute Name	Description	Type	Related Object
IP_Route_BTS_Id	The unique identifier for the IP Route BTS.	STRING	
IP_Route_BTS_Name	The user-friendly name preferably unique for the IP Route BTS.	STRING	
NodeB_Id	The reporting side of the WBTS associated with	STRING	NodeB

	the IP Route BTS.		
RNC_Id	The reporting side of the RNC associated with the IP Route BTS	STRING	RNC
Region_Id	The region associated with the IP Route BTS	STRING	Region
Network_Id	The network associated with the IP Route BTS.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the IP Route BTS.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the IP_Route_BTS	STRING	

## 4.30 IP\_Route

IP Route

Attribute Name	Description	Type	Related Object
IP_Route_Id	The unique identifier for the IP Route.	STRING	
IP_Route_Name	The user-friendly name preferably unique for the IP Route.	STRING	
RNC_Id	The reporting side of the RNC associated with the IP Route.	STRING	RNC
Region_Id	The region associated with the IP Route.	STRING	Region
Network_Id	The network associated with the IP Route.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the IP Route.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the IP_Route	STRING	

#### 4.31 IuPC\_IF

Logical interface between an RNC and a stand-alone AGPS SMLC (SAS) within the UTRAN.

Attribute Name	Description	Type	Related Object
IuPC_IF_Id	The unique identifier for the IuPC interface.	STRING	
IuPC_IF_Name	The user-friendly name preferably unique for the IuPC interface.	STRING	
RNC_Id	The reporting side of the RNC associated with the IuPC interface.	STRING	RNC
Region_Id	The region associated with the IuPC interface.	STRING	Region
Network_Id	The network associated with the IuPC interface.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the IuPC interface.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the IuPC_IF	STRING	

#### 4.32 IuPS\_IF

Logical interface between an RNC GTPU unit and the SGSN within the UTRAN.

Attribute Name	Description	Type	Related Object

IuPS_IF_Id	The unique identifier for the IuPS interface.	STRING	
IuPS_IF_Name	The user-friendly name preferably unique for the IuPS interface.	STRING	
RNC_Id	The reporting side of the RNC associated with the IuPS interface.	STRING	RNC
Region_Id	The region associated with the IuPS interface.	STRING	Region
Network_Id	The network associated with the IuPS interface.	STRING	Network
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the IuPS interface.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the IuPS_IF	STRING	

## 4.33 LCG

The local cell group unit which manages the channel resources under WBTS

Attribute Name	Description	Type	Related Object
LCG_Id	The unique identifier for the LCG.	STRING	
LCG_Name	The user-friendly name preferably unique for the LCG.	STRING	
NodeB_Id	The WBTS associated with the LCG.	STRING	NodeB
RNC_Id	The RNC associated with the WBTS which supports the LCG.	STRING	RNC
Region_Id	The region associated with the LCG.	STRING	Region
Network_Id	The network associated with the LCG.	STRING	Network

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that handles the LCG.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the LCG	STRING	

#### 4.34 Neighbour\_RNC

RNC neighbour relationships.

Attribute Name	Description	Type	Related Object
RNC_Neighbour_Id	A unique identifier for the RNC.	STRING	
RNC_Neighbour_Name	A user friendly name preferably unique for the RNC.	STRING	
Source_RNC_Id	A unique identifier for the Source RNC.	STRING	RNC
Source_RNC_Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Source_RNC_Type	Type of Source RNC.	STRING	
Source_RNC_Vendor	Manufacturer of the Source RNC.	STRING	
Source_RNC_Version	Hardware/Software version of the Source RNC.	STRING	
Target_RNC_Id	A unique identifier for the Target RNC.	STRING	
Target_RNC_Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Target_RNC_Type	Type of Target RNC.	STRING	
Target_RNC_Vendor	Manufacturer of the Target RNC.	STRING	
Target_RNC_Version	Hardware/Software version of the Target RNC.	STRING	
Vendor	Manufacturer of the Neighbour_RNC	STRING	

## 4.35 Neighbour

Represents a handover relationship between two cells that may perform handovers to each other.

Attribute Name	Description	Type	Related Object
Neighbour_Id	A unique identifier for the Neighbour.	STRING	
Neighbour_Name	A user friendly name preferably unique for the Neighbour.	STRING	
Source_Cell_Id	A unique identifier for the Cell_Id of the Cell that is handling calls.	STRING	Cell
Source_Cell_Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Source_Cell_Type	Type of Source Cell.	STRING	
Source_Cell_Vendor	Manufacturer of the Source Cell.	STRING	
Source_Cell_Version	Hardware/Software version of the Source Cell.	STRING	
Target_Cell_Id	A unique identifier for the Cell_Id of the Cell that is receiving handed-over calls.	STRING	
Target_Cell_Position	Position of Target Cell.	INTEGE R	
Target_Cell_Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Target_Cell_Type	Type of Target Cell.	STRING	
Target_Cell_Vendor	Manufacturer of the Target Cell.	STRING	
Target_Cell_Version	Hardware/Software version of the Target Cell.	STRING	
Vendor	Manufacturer of the Neighbour	STRING	

## 4.36 Network

Network information.

Attribute Name	Description	Type	Related Object

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Network_Id	A unique identifier for the Network.	STRING	
Network_Name	A user friendly name preferably unique for the Network.	STRING	
Default_Link_Speed	The default speed of SS7 Signalling Links in this network.	FLOAT	
Network_Type	Type of Network (e.g. GSM-900, GSM-1800 or GSM-1900).	STRING	
Vendor	Manufacturer of the Network	STRING	

#### 4.37 NodeB

NodeB (BS in GSM, representing a cell site in UMTS) is mainly used as a link between Cell and RNC objects in the network hierarchy.

Attribute Name	Description	Type	Related Object
NodeB_Id	A unique identifier for the NodeB.	STRING	
NodeB_Name	A user friendly name preferably unique for the NodeB (site).	STRING	
MSC_Id	A unique identifier for the MSC.	STRING	MSC
Network_Id	Network associated with the NodeB.	STRING	Network
RNC_Id	The RNC that controls this NodeB.	STRING	RNC
Region_Id	Region associated with the NodeB.	STRING	Region
SGSN_Id	A unique identifier for the SGSN.	STRING	SGSN
NodeB_Version	Hardware/Software version of the NodeB.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the NodeB	STRING	

#### 4.38 Originating\_Point

Originating Point

Attribute Name	Description	Type	Related Object
Originating_Point_Id	The unique identifier of the originating point	STRING	

Originating_Point_Name	A user-friendly name for the originating point	STRING	
Vendor	Manufacturer of the Originating_Point	STRING	

## 4.39 Physical\_Layer\_Term\_Point

Physical Layer Termination Point

Attribute Name	Description	Type	Related Object
Termination_Point_Id	termination point id for the physical layer	STRING	
Termination_Point_Name	termination point name	STRING	
RNC_Id	The RNC associated with the termination point.	STRING	RNC
Region_Id	The region associated with the termination point	STRING	Region
Network_Id	The network associated with the termination point.	STRING	Network
Version	The hardware/software version of the termination point equipment.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the Physical_Layer_Term_Point	STRING	

## 4.40 Radio\_Connection\_Type

Radio Connection Type to identify RCPM RLC measurements in Cell RCPM RLC

Attribute Name	Description	Type	Related Object
Radio_Connection_Type_Id	A unique identifier for the Radio Connection Type (which consists of RC type components)	STRING	
Radio_Connection_Type_Name	A unique identifier for the Radio Connection Type (which consists of RC type components)	STRING	
Traffic_Class	Type of traffic class	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

RAB_Bit_Rate	The bit rate for the Radio Access Bearer	STRING	
RB_Bit_Rate	The bit rate for the Radio Bearer (RB)	STRING	
BER_SDU_Ratio	The BER/SDU error ratio used as a RAB quality target	STRING	
Vendor	Manufacturer of the Radio_Connection_Type	STRING	

## 4.41 Region

A user defined grouping of network elements.

Attribute Name	Description	Type	Related Object
Region_Id	Region associated with the network object.	STRING	
Region_Name	A user friendly name preferably unique for the Region.	STRING	
Network_Id	Network associated with the Region.	STRING	Network
Vendor	Manufacturer of the Region	STRING	

## 4.42 RNC

The Radio Network Controller provides all the control functions and physical links between the MSC (and/or SGSN) and Cell. It switches circuit/packet data & provides functions such as handover, cell configuration data & control of RF power levels in base transceiver stations.

This object is used for Data Availability tracking

Attribute Name	Description	Type	Related Object
RNC_Id	A unique identifier for the RNC.	STRING	
RNC_Name	A user friendly name preferably unique for the RNC.	STRING	
MSC_Id	The MSC to which this RNC is connected.	STRING	MSC
Network_Id	Network associated with the RNC.	STRING	Network
Region_Id	Region associated with the RNC.	STRING	Region
SGSN_Id	A unique identifier for the SGSN.	STRING	SGSN
RNC_Version	Hardware/Software version of the RNC.	STRING	

Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the RNC	STRING	

## 4.43 SCCP\_Subsystem

Signalling Control Connection Part Subsystem

Attribute Name	Description	Type	Related Object
SCCP_Subsystem_Id	Primary identifier of the SCCP Subsystem	STRING	
SCCP_Subsystem_Name	Meaningful name of the SCCP Subsystem	STRING	
SCCP_Id	Identifier of SCCP	STRING	SCCP
RNC_Id	Identifier for the RNC.	STRING	RNC
Region_Id	The region of the SCCP Subsystem	STRING	Region
Network_Id	Network associated with the SCCP Subsystem	STRING	Network
Version	Hardware/Software version of the SCCP Subsystem	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the SCCP_Subsystem	STRING	

## 4.44 SCCP

Signalling Control Connection Part

Attribute Name	Description	Type	Related Object
SCCP_Id	Primary identifier of the SCCP	STRING	
SCCP_Name	Meaningful name of the SCCP	STRING	
RNC_Id	Identifier for the RNC.	STRING	RNC

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Region_Id	The region of the SCCP / RNC	STRING	Region
Network_Id	Network associated with the SCCP / RNC	STRING	Network
MGW_Id	Primary Identifier of MGW	STRING	MGW
Version	Hardware/Software version of the SCCP / RNC	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the SCCP	STRING	

#### 4.45 SDH\_Exchange\_Terminal

SDH Exchange Terminal

Attribute Name	Description	Type	Related Object
SDH_Exch_Term_Id	SDH Exchange Terminal id	STRING	
SDH_Exch_Term_Name	SDH Exchange Terminal name	STRING	
Region_Id	The region associated with the SDH Exchange Terminal	STRING	Region
Network_Id	The network associated with the SDH Exchange Terminal	STRING	Network
Version	The hardware/software version of the SDH Exchange Equipment	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
SDH_Exch_Term_Type	Type of SDH Exchange terminal	STRING	
Node_Id	Identifier of the Node parent of the SDH Exchange Terminal (e.g. MGW, RNC).	STRING	
Node_Name	Meaningful name for the Node.	STRING	
Node_Type	Type of the Node parent of the SDH Exchange Terminal (e.g. MGW, RNC).	STRING	
Vendor	Manufacturer of the SDH_Exchange_Terminal	STRING	

#### 4.46 Signalling\_LinkSet

A set of Signalling Links between two points.

Attribute Name	Description	Type	Related Object
SS7_LinkSet_Id	A unique identifier for the SS7 LinkSet.	STRING	
SS7_LinkSet_Name	A user friendly name preferably unique for the SS7 LinkSet.	STRING	
Network_Id	Network associated with the SS7 LinkSet.	STRING	Network
Region_Id	Region associated with the SS7 LinkSet.	STRING	Region
SS7_Point_Id	The SS7 Point to which this SS7 LinkSet is connected to (at this end).	STRING	Signalling_Point
Adjacent_Node_Id	The Adjacent Node that this SS7 LinkSet is connected from (at the other end).	STRING	
Data_Rate	The total of all the individual SS7 Link speeds (aggregated over all SS7 Links in the SS7 LinkSet) in bits per second (bit/s).	FLOAT	
Designed_Link_Failures	The number of SS7 Link failures permitted on the SS7 LinkSet while still keeping the SS7 LinkSet up to its designed capacity.	INTEGER	
Node_Id	The Node (MSC or HLR) that this SS7 LinkSet is connected to (at this end).	STRING	
Node_Name	Name of the node that this SS7 LinkSet is connected to (at this end).	STRING	
Node_Type	The type of the network element that the SS7 LinkSet is connected to (at this end).	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the Signalling_LinkSet	STRING	

## 4.47 Signalling\_Link

The SS7 Signalling data link is a full-duplex, digital transmission channel, usually operating at 64 kbit/s.

Attribute Name	Description	Type	Related
----------------	-------------	------	---------

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

			<b>Object</b>
SS7_Link_Id	A unique identifier for the SS7 Link.	STRING	
SS7_Link_Name	A user friendly name preferably unique for the SS7 Link.	STRING	
Network_Id	Network associated with the SS7 Link.	STRING	Network
Region_Id	Region associated with the SS7 Link.	STRING	Region
SS7_LinkSet_Id	The Node (MSC or HLR) that this SS7 Link is connected to (at this end).	STRING	Signalling_LinkSet
SS7_Point_Id	A unique identifier for the SS7 Point.	STRING	Signalling_Point
Adjacent_Node_Id	The Adjacent Node that this SS7 Link is connected from (at the other end).	STRING	
Data_Rate	The SS7 Link speed in bits per second (bit/s).	FLOAT	
Node_Id	The Node (MSC or HLR) that this SS7 Link is connected to (at this end).	STRING	
Node_Name	The name for the network element that the SS7 Link is connected to (at this end).	STRING	
Node_Type	The type of the network element that the SS7 Link is connected to at this end.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the Signalling_Link	STRING	

## 4.48 Signalling\_Point

Represents a signalling entity that is part of a Node.

<b>Attribute Name</b>	<b>Description</b>	<b>Type</b>	<b>Related Object</b>
SS7_Point_Id	A unique identifier for the SS7 Point.	STRING	
SS7_Point_Name	A user friendly name preferably unique for the SS7 Point.	STRING	
Network_Id	Network associated with the SS7 Point.	STRING	Network
Region_Id	Region associated with the SS7 Point. SS7_Point - the default value is derived via the	STRING	Region

	Node.		
Adjacent_Node_Id	A unique identifier for the Adjacent Node.	STRING	
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the Signalling_Point	STRING	

## 4.49 WAC\_Unit

Window Access Control (WAC) Unit

Attribute Name	Description	Type	Related Object
WAC_Unit_Id	The unique identifier for the Window Access Control Unit (WAC)	STRING	
WAC_Unit_Name	The user-friendly name preferably unique for WAC Unit.	STRING	
Region_Id	The region associated with the WAC unit function.	STRING	Region
Network_Id	The network associated with the WAC unit function.	STRING	Network
WAC_Unit_Type	Function type of WAC Unit	STRING	
Node_Id	A unique identifier for the Node.	STRING	
Node_Name	A user friendly name preferably unique for the Node.	STRING	
Node_Type	Type of Node.	STRING	
Version	The hardware/software version of the equipment that manage the WAC unit.	STRING	

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Technology	Technology of the network/element (e.g. GSM, GPRS, UMTS).	STRING	
Vendor	Manufacturer of the WAC_Unit	STRING	

## 5 Busy Hours

This section lists the busy hours that are defined in this technology pack, grouped by the network object to which they relate, as follows:

Each of the busy hours listed can be referenced within this document by way of a busy hour acronymn, which is included in the table below.

- [ATM\\_VCC](#)
- [Cell](#)
- [Computer\\_Unit](#)
- [RNC](#)
- [Signalling\\_Link](#)
- [Signalling\\_Point](#)

### 5.1 ATM\_VCC Busy Hours

Busy Hour Name	Defining KPI	Acronym
Nokia_ATM_VCC_AAL2_Connection_Busy_Hour	ATM_VCC.Nokia.cac_resource.avg_aal2_connections	nkavcacbh
Nokia_ATM_VCC_Total_MSU_Busy_Hour	ATM_VCC.Nokia.saal.tot_bothway_msus	nkavctmbh

### 5.2 Cell Busy Hours

Busy Hour Name	Defining KPI	Acronym
Nokia_Cell_total_traffic_Busy_Hour	Cell.Nokia.cell_busy_hour_kpi.total_traffic	nkcttbh

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

				Measurement, where the average PCH Throughput of a cell is measured. See RNC Counters - RNW Part in Nokia WCDMA RNC Product Documentation.	
average_rach_througput	$\{\{Nokia.rach.ave\_rach\_throughput\}/\{Nokia.rach.rach\_denom\_3\}\}/1000$	FLOAT	kbps	Average RACH Throughput [kbit/s] over the reporting period. Includes both user and signalling data. This measurement is based on Cell Resource Measurement, where the average RACH Throughput of a cell is measured. See RNC Counters - RNW Part in Nokia WCDMA RNC Product Documentation.	Average, avg, max, min, nkcttbh, nkrttbh, tot
average_sab_througput	$\{Nokia.sccpch.ave\_fach\_total\_throughput\_sab\} / (\{Nokia.sccpch.ave\_fach\_total\_throughput\_sab\_denom\}*1000)$	FLOAT	kbps	Average SAB Throughput [kbit/s] over the reporting period. Includes both the user and signalling data. This measurement is based on Cell Resource Measurement, where the average SAB Throughput of a cell is measured. See RNC Counters - RNW Part in Nokia WCDMA RNC Product Documentation.	Average, avg, max, min, nkcttbh, nkrttbh, tot

## 6.6.112Cell.Nokia.UMTS.RAN\_Usage.Cell\_Usage

WCDMA RAN KPI Usage:Cell Usage related statistics

KPI Name	Expression	Data Type	Units	Description	Aggregation
cs_erlang	nok_ran_use_cell_use_tab.ywb045xahk26seccb00hw01qk4	FLOAT	Erlang	CS Erlang meaning the CS RAB holding time. This KPI is based on Service Level measurement on RNC Counters - RNW Part in Nokia WCDMA RNC Product Documentation. The Traffic measurement provides only data when traffic allocation occurs. Therefore, there may not always be data for all the cells or all the intervals. The formula does not take this into account.	Average, avg, max, min, nkcttbh, nkrttbh, tot

## 6.6.113Cell.Nokia.UMTS.RAN\_Usage.RCPM

WCDMA RAN KPI Usage:RCPM related statistics

The performance data measurements for this KPI group are recorded against the combination of Cell and Radio\_Connection\_Type (radio\_connection\_type\_id)

KPI Name	Expression	Data Type	Units	Description	Aggregation
----------	------------	-----------	-------	-------------	-------------

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

### 6.6.116Cell.Nokia.UMTS.rcpm.dl\_pdcp\_sdu\_pdu\_rlc

RCPM RLC - Downlink PDCP, PDU, SDU transfer statistics

The performance data measurements for this KPI group are recorded against the combination of Cell and Radio\_Connection\_Type (radio\_connection\_type\_id)

KPI Name	Expression	Data Type	Units	Description	Aggregation
am_rlc_dl_pdus_for_transmission	nok_nkcel_rcpdlpdcppdur_tab.rmx6xtahl26seccb00hw01qk4	INT8	#	The number of downlink RLC AM PDUs added to the RLC transmission buffer. This includes also PDUs retransmitted due to RLC polling procedure.	Sum, nkcttbh, nkrttbh, tot
am_rlc_pdus_transmitted_in_downlink	nok_nkcel_rcpdlpdcppdur_tab.rno4qhdahl26seccb00hw01qk4	INT8	#	The number of transmitted RLC AM DL PDUs. Includes also retransmitted DL PDUs and control PDUs.	Sum, nkcttbh, nkrttbh, tot

average_am_rlc_transmission_buffer_occupancy	nok_nkcel_rcpdlpdcppdur_tab.rmlnn02ahl26seccb00hw01qk4	INT8	Byte	The average RLC AM DL PDU transmission buffer occupancy. Includes both first-time transmission and retransmission buffers. Does not include periods when the DL transmission buffers in the RLC entity are empty.	Average, avg, max, min, nkcttbh, nkrttbh, tot
average_number_of_transmissions_per_pdu_in_am_rlc_dl	nok_nkcel_rcpdlpdcppdur_tab.rmu0xytahl26seccb00hw01qk4	FLOAT	#	The average number of required transmissions per PDU in RLC AM DL. For a perfect connection the value of this counter is one.	Average, avg, max, min, nkcttbh, nkrttbh, tot
average_pdcp_buffer_occupancy	nok_nkcel_rcpdlpdcppdur_tab.rmmg4bxahl26seccb00hw01qk4	INT8	Byte	The average PDCP buffer occupancy in RLC AM DL. Does not include periods when the DL transmission buffers in the RLC entity are empty.	Average, avg, max, min, nkcttbh, nkrttbh, tot
bad_rlc_am_dl_connections	nok_nkcel_rcpdlpdcppdur_tab.rnqlvhtahl26seccb00hw01qk4	INT8	#	The number of bad connections for RLC AM in downlink direction.	Sum, nkcttbh, nkrttbh, tot
dl_gross_throughput_of_am_rlc_pdu	nok_nkcel_rcpdlpdcppdur_tab.rmp4jydaahl26seccb00hw01qk4	FLOAT	kbps	The average downlink PDU gross throughput of the RLC AM connection.	Average, avg, max, min, nkcttbh, nkrttbh,

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

				Includes also retransmissions. Does not include periods when the DL transmission buffers in the RLC entity are empty.	tot
dl_net_throughput_of_am_rlc_pdu	nok_nkcel_rcpdlpdccppdur_tab.rmrnfxlahl26seccb00hw01qk4	FLOAT	kbps	The average downlink net PDU throughput of RLC AM connections. Does not include retransmissions. Does not include periods when the DL transmission buffers in the RLC entity are empty.	Average, avg, max, min, nkcttbh, nkrttbh, tot
dl_pdu_error_ratio_in_am_rlc	nok_nkcel_rcpdlpdccppdur_tab.rnnekdpahl26seccb00hw01qk4	FLOAT	#	The ratio between unsuccessfully transmitted RLC AM DL PDUs and all transmitted RLC AM DL PDUs (including retransmissions).	Average, avg, max, min, nkcttbh, nkrttbh, tot
dl_rlc_am_sdu_payload_of_ps_traffic	nok_nkcel_rcpdlpdccppdur_tab.rnrfgx6ahl26seccb00hw01qk4	INT8	Byte	The number of SDU bytes transmitted in downlink using RLC AM. The RLC SDU payload measuring is made for compressed bytes (after PDCP in DL) and includes RLC SDU headers. Discarded SDUs are included.	Sum, nkcttbh, nkrttbh, tot
ideal_rlc_am_dl_connections	nok_nkcel_rcpdlpdccppdur_tab.rmo4ajpahl26seccb00hw01qk4	INT8	#	The number of ideal connections for RLC AM in downlink direction.	Sum, nkcttbh, nkrttbh, tot

measurement_time_period_for_dl_rlc_am	nok_nkcel_rcpdldpcppdur_tab.rn56s0xahl26seccb00hw01qk4	INT8	ms	The total time period when the measurement was active in the RLC AM DL entity. The active time is the time between when the first RLC SDU arrives in the RLC buffer and when all the RLC PDUs of the packet call have been acknowledged. Periods when the DL transmission buffers are empty are excluded.	Sum, nkcttbh, nkrttbh, tot
pdu_discard_ratio_in_am_rlc_dl	nok_nkcel_rcpdldpcppdur_tab.rmusqbxbahl26seccb00hw01qk4	FLOAT	#	The RLC PDU discard ratio for downlink connections using RLC AM.	Average, avg, max, min, nkcttbh, nkrttbh, tot
received_dl_pdu_reports	nok_nkcel_rcpdldpcppdur_tab.rnpsjplahl26seccb00hw01qk4	INT8	#	The number of RLC AM reports for the RLC AM DL PDU error ratio measurement.	Sum, nkcttbh, nkrttbh, tot
reports_for_average_dl_buffer_occupancy	nok_nkcel_rcpdldpcppdur_tab.rnel436ahl26seccb00hw01qk4	INT8	#	The number of RLC AM reports for the RLC AM DL transmission buffer and the PDCP buffer occupancy measurement.	Sum, nkcttbh, nkrttbh, tot
reports_for_dl_am_	nok_nkcel_rcpdldpcppdur_	INT8	#	The number of	Sum,

rlc_throughput	tab.rmqv1qlahl26seccb00hw01qk4			RLC AM reports for RLC AM DL gross and net throughput values.	nkcttbh, nkrttbh, tot
rlc_am_dl_average_transfer_delay_of_sdu	nok_nkcel_rcpdlpdcppdur_tab.rn1corlahl26seccb00hw01qk4	INT8	ms	The average transfer delay of transferred RLC AM SDUs in downlink. Transfer delay is the time difference between when the SDU is received from the upper layer (RRC or PDCP) and when the last PDU containing data from that SDU is acknowledged by the UE as successfully transferred. If an SDU is discarded due to SDU discard function, the transfer time is then the difference between the time when SDU is received from the upper layer and the time when SDU is discarded.	Average, avg, max, min, nkcttbh, nkrttbh, tot
rlc_am_dl_sum_of_ave_transfer_delay_of_sdu	nok_nkcel_rcpdlpdcppdur_tab.rn23ot6ahl26seccb00hw01qk4	INT8	ms	The sum of average SDU transfer delay values in RLC AM DL.	Sum, nkcttbh, nkrttbh, tot
rlc_am_dl_sum_of_squared_transmission_delay_of_sdu	nok_nkcel_rcpdlpdcppdur_tab.rn3nbkhahl26seccb00hw01qk4	INT8	msSqr	The sum of squared SDU transmission delay values in RLC AM DL.	Sum, nkcttbh, nkrttbh, tot
rlc_am_dl_sum_of_standard_deviatio	nok_nkcel_rcpdlpdcppdur_tab.rn2vcvdahl26seccb00h	INT8	ms	The sum of standard deviations	Sum, nkcttbh,

ns_of_transfer_delay_of_sdu	w01qk4			of the SDU transfer delay values in RLC AM DL.	nkrbbh, tot
rlc_am_sdu_dl_error_ratio	nok_nkcel_rcpdldpcppdur_tab.rmypwchahl26seccb00hw01qk4	FLOAT	#	The average SDU error ratio in RLC AM downlink. Defined as the ratio between discarded SDUs and the total number of SDUs received for transmission from the PDCP layer. Note that this counter does not include RLC SDUs that have overflowed from the PDCP buffer.	Average, avg, max, min, nkcttbh, nkrbbh, tot
rlc_retransmission_distribution_class_0	nok_nkcel_rcpdldpcppdur_tab.rnilkntahl26seccb00hw01qk4	INT8	#	The number of downlink RLC AM PDUs which have been successfully delivered to the UE without retransmissions.	Sum, nkcttbh, nkrbbh, tot
rlc_retransmission_distribution_class_1	nok_nkcel_rcpdldpcppdur_tab.rnjef4lahl26seccb00hw01qk4	INT8	#	The number of downlink RLC AM PDUs which have been successfully delivered to the UE with one retransmission.	Sum, nkcttbh, nkrbbh, tot
rlc_retransmission_distribution_class_2	nok_nkcel_rcpdldpcppdur_tab.rnk5exexahl26seccb00hw01qk4	INT8	#	The number of downlink RLC AM PDUs which have been successfully delivered to the UE	Sum, nkcttbh, nkrbbh, tot

		Type			on
measurement_time_period_for_ul_rlc_am	nok_nkcel_rcpmulamrl_tab.rntw5ghahl26seccb00hw01qk4	INT8	ms	The total time period when the measurement was active in the RLC AM UL entity. The active time is the time between when the first RLC SDU arrives in the RLC buffer and when all the RLC PDUs of the packet call have been acknowledged. Periods when the transmission buffers are empty are excluded.	Sum, nkcttbh, nkrttbh, tot
transmitted_am_rlc_pdus_in_uplink	nok_nkcel_rcpmulamrl_tab.rnt433pahl26seccb00hw01qk4	INT8	#	The number of received RLC AM PDUs in uplink.	Sum, nkcttbh, nkrttbh, tot
ul_rlc_am_sdu_payload_of_ps_traffic	nok_nkcel_rcpmulamrl_tab.rnscq5hahl26seccb00hw01qk4	INT8	Byte	The number of SDU bytes transmitted in uplink using RLC AM. The RLC SDU payload measuring is made for compressed bytes (before PDCP in UL) and includes RLC SDU headers.	Sum, nkcttbh, nkrttbh, tot

#### 6.6.118Cell.Nokia.UMTS.rcpm.ul\_pdcp\_sdu\_pdu\_rlc

RCPM RLC - Uplink PDCP, PDU, SDU transfer statistics

The performance data measurements for this KPI group are recorded against the combination of Cell and Radio\_Connection\_Type (radio\_connection\_type\_id)

KPI Name	Expression	Data Type	Units	Description	Aggregation
user_ul_throughput	nok_nkcel_rcpulpdcppdur_	INTEG	#	The number of	Sum,

_distribution_class_1	tab.uaqadfr1im2ahsxr0035xkcuai	ER		connections with the 0 kbit/s...250 kbit/s uplink SDU throughput.	nkcttbh, nkrttbh, tot
user_ul_throughput_distribution_class_2	nok_nkcel_rcpulpdcppdur_tab.uaqadft1im2ahsxr0035xkcuai	INTEG ER	#	The number of connections with the 250 kbit/s...500 kbit/s uplink SDU throughput.	Sum, nkcttbh, nkrttbh, tot
user_ul_throughput_distribution_class_3	nok_nkcel_rcpulpdcppdur_tab.uaqadfv1im2ahsxr0035xkcuai	INTEG ER	#	The number of connections with the 500 kbit/s...1 Mbit/s uplink SDU throughput.	Sum, nkcttbh, nkrttbh, tot
user_ul_throughput_distribution_class_4	nok_nkcel_rcpulpdcppdur_tab.uaqadfx1im2ahsxr0035xkcuai	INTEG ER	#	The number of connections with the 1000 kbit/s...1500 kbit/s uplink SDU throughput.	Sum, nkcttbh, nkrttbh, tot
user_ul_throughput_distribution_class_5	nok_nkcel_rcpulpdcppdur_tab.uaqadg01im2ahsxr0035xkcuai	INTEG ER	#	The number of connections with larger than the 1500 kbit/s uplink SDU throughput.	Sum, nkcttbh, nkrttbh, tot

### 6.6.119Cell.Nokia.UMTS.rlc\_retransmission\_wcel

RLC AM PDU retransmission statistics

The performance data measurements for this KPI group are recorded against the combination of Cell and Radio\_Connection\_Type (radio\_connection\_type\_id)

KPI Name	Expression	Data Type	Units	Description	Aggregation
rlc_retrans_distr_cl ass_0_w	nok_wcel_rlcretx_tab.xjvhe06dmm2aicsd002uaxybdk	INTEG ER	#	The number of downlink RLC AM PDUs which have	Sum, nkcttbh, nkrttbh,

## 6.16 FTM\_IP Performance Indicators

- [FTM\\_IP.Nokia.UMTS.ftm\\_ip\\_stats](#)
- [FTM\\_IP.Nokia.UMTS.ftm\\_timing](#)

### 6.16.1 FTM\_IP.Nokia.UMTS.ftm\_ip\_stats

FTM IP statistics

KPI Name	Expression	Data Type	Units	Description	Aggregation
ifinerrors15	nok_nkftmip_stats_tab.y34uvhhdm2aicsd002uaxybdk	INT8	Packets	The number of inbound packets that contained errors preventing them from being deliverable to a higher-layer protocol.	Sum, nkrttbh, tot
ifinoctets15	nok_nkftmip_stats_tab.y34uvhb2dm2aicsd002uaxybdk	INT8	kByte	The total number of octects received by the interface, including framing characters.	Sum, nkrttbh, tot
ifinpackets15	nok_nkftmip_stats_tab.y34uvh6dm2aicsd002uaxybdk	INT8	Packets	The number of inbound packets that were delivered to higher-layer protocols.	Sum, nkrttbh, tot
ifoutoctets15	nok_nkftmip_stats_tab.y34uvhf2dm2aicsd002uaxybdk	INT8	kByte	The total number of octects transmitted by the interface, including framing	Sum, nkrttbh, tot

				characters.	
ifoutpackets15	nok_nkftmip_stats_tab.y34uvh dmm2aicsd002uaxybdk	INT8	Packets	The number of outbound packets that were successfully transmitted.	Sum, nkrttbh, tot

## 6.16.2 FTM\_IP.Nokia.UMTS.ftm\_timing

Timing over packet service statistics

KPI Name	Expression	Data Type	Units	Description	Aggregation
topavephaseerror15	nok_nkftm_tim_tab.y34uvh dmm2aicsd002uaxybdk	INTEGER	ms	The average value of the timing over packet service phase error in microseconds during the interval.	Average, avg, max, min, nkrttbh, tot
topmaxphaseerror15	nok_nkftm_tim_tab.y34uvh dmm2aicsd002uaxybdk	INTEGER	ms	The maximum value of the timing over packet service phase error in microseconds during the interval.	Constant, avg, max, min, nkrttbh, tot
topminphaseerror15	nok_nkftm_tim_tab.y34uvh dmm2aicsd002uaxybdk	INTEGER	ms	The minimum value of the timing over packet service phase error in microseconds during the interval.	Minimum, avg, max, min, nkrttbh, tot
toprxsyncmsg15	nok_nkftm_tim_tab.y34uvh dmm2aicsd002uaxybdk	INTEGER	Packets	The number of received ToP event messages. Event messages are time stamped and used for clock recovery.	Sum, nkrttbh, tot

status_qf	nok_nkss7_saal_tab.uq0mf ptahl26seccb00hw01qk4	INT8	#	-Obsolete in RAS6.0, group moved to ATM VCC object-The number of status queue fulfillments. SAR Reassembly status. A status queue overflow or full condition is entered when the last available status queue entry is written. The reassembly coprocessor detects the condition by comparing the WRITE and READ_UD index pointers in the corresponding status queue base table. Upon detecting a status overflow condition, the Rsm coprocessor sets the internal OVFL bit in the last status queue entry written to a logic high, to indicate the condition. The Rsm coprocessor also sets to one either the RSM_HS_FULL bit in the HOST_ISTAT1 register, or the RSM_LS_FULL bit in the LP_ISTAT1 register, to prompt an interrupt. While the reassembly coprocessor is in status full condition,	Sum, nksltmbh
-----------	---	------	---	--	------------------

				it discards all cells. If a COM or EOM cell is received while the status queue is full, the channel is marked for status full packet discard. When an SSM, EOM, or OAM cell is received during a status full condition, the cell is discarded and the status queue checked. If there is now room in the status queue, then the status full condition is exited.	
tot_bothway_msus	nok_nkss7_saal_tab.uqci3ihahl26seccb00hw01qk4	INT8	#	-Obsolete in RAS6.0, group moved to ATM VCC object- Bothway total (received & transmit) number of received signalling data messages from Layer 3.	Sum, nksltmbh
unexp_err	nok_nkss7_saal_tab.uplltx6ahl26seccb00hw01qk4	INT8	#	-Obsolete in RAS6.0, group moved to ATM VCC object- The number of reassembled AAL5 CPCS PDUs which have contained unexpected errors. SAR Reassembly status.	Sum, nksltmbh

vcc_fw	nok_nkss7_saal_tab.uq1u5 2hahl26seccb00hw01qk4	INT8	#	-Obsolete in RAS6.0, group moved to ATM VCC object-The number of AAL5 CPCS PDUs which have been discarded because vcc firewall is crossed. SAR Reassembly status. Implementation of multiple free buffer queues and EPD performs a firewall functionality on a group basis. The user can also set up per VCC a firewall on a channel bychannel basis. The firewall mechanism allows the user to allocate buffer credits on a perchannel basis. During reassembly on a channel enabled for firewall processing, whenever a buffer is taken off free buffer queues 0 through 15, the Rsm coprocessor decrements the RX_COUNTER[15. 0] in the Rsm VCC Table entry for that channel. This allows COM buffers to be placed on queues 16 through 31 and not be stopped by the firewall. If the RX_COUNTER[15. 0] for a channel is	Sum, nksltmbh
--------	---	------	---	---	------------------

				zero when a buffer is required, then the Rsm coprocessor declares a firewall condition. If the firewall condition occurs on a BOM or SSM, the RS8234 writes a status queue entry with the FW bit set, and a NULL in the BD_PNTR field. If the firewall condition occurs on a COM or EOM, the Rsm coprocessor initiates EPD and writes a status queue entry with the FW and EPD bits set. It then discards cells on that channel, until the channel has recovered from the firewall condition. All AAL5 PDUs discarded under the firewall condition cause the AAL5_DSC_CNT counter to be incremented. Recovery occurs only on a BOM or SSM cell when the credit is rechecked.

## 7.2 Raw Performance Tables

This section lists the performance tables that are included in this technology pack module's database schema, grouped by the network object to which they relate, as follows:

- [AGPS\\_IF](#)
- [ASSOIND](#)
- [ATM\\_Route](#)
- [ATM\\_VCC](#)
- [ATM\\_VPC](#)
- [Cell](#)
- [Computer\\_Unit](#)
- [DSP\\_Pool](#)
- [Ethernet\\_IF](#)
- [Exchange\\_Terminal](#)
- [FTM\\_AAL2](#)
- [FTM\\_ATM\\_IF](#)
- [FTM\\_ATM\\_VC](#)
- [FTM\\_ATM\\_VP](#)
- [FTM\\_Ethernet\\_Link](#)
- [FTM\\_IP](#)
- [FTM\\_PDH\\_IF](#)
- [FTM\\_PHB](#)
- [FTM\\_PSN\\_IP](#)
- [FTM\\_PWMP\\_IF](#)

- [FTM\\_SDH\\_IF](#)
- [IMA\\_Group](#)
- [Interface](#)
- [IP\\_IF](#)
- [IP\\_Route](#)
- [IP\\_Route\\_BTS](#)
- [IuPC\\_IF](#)
- [IuPS\\_IF](#)
- [LCG](#)
- [Neighbour](#)
- [Neighbour\\_RNC](#)
- [NodeB](#)
- [Physical\\_Layer\\_Term\\_Point](#)
- [RNC](#)
- [SCCP](#)
- [SCCP\\_Subsystem](#)
- [SDH\\_Exchange\\_Terminal](#)
- [Signalling\\_Link](#)
- [Signalling\\_LinkSet](#)
- [Signalling\\_Point](#)
- [WAC\\_Unit](#)

## 7.3 Raw AGPS\_IF Tables

### 7.3.1 NOK\_NKAGPS\_MEAS\_TAB

## **8 Performance Alarms**

This section shows details of the performance alarms that are defined in this technology pack module:

None.

# 9 Reports

This section shows details of the reports that are defined in this technology pack module.

All reports can be run as raw, daily, weekly or monthly reports.

Where a KPI is marked (DA), it means Data Availability is to be reported upon it.

## 9.1 AGPS\_IF Server Connection Report

This report describes the connections and data requests to the AGPS Server for AGPS functionality.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.AGPS_IF
Primary Object	AGPS_IF
Graph for AGPS Connection and Data Requests	AGPS_IF.Nokia.agps_measurements._%_successful_connections_to_agps_server, AGPS_IF.Nokia.agps_measurements._%_successful_data_requests_from_agps_server
Table for AGPS Connection and Data Requests	AGPS_IF.RNC_Id, AGPS_IF.AGPS_IF_Id, AGPS_IF.Nokia.agps_measurements.successful_connections_to_agps_server, AGPS_IF.Nokia.agps_measurements.unsuccessful_connections_to_agps_server, AGPS_IF.Nokia.agps_measurements.lost_connection_to_agps_server, AGPS_IF.Nokia.agps_measurements.successful_data_requests_from_agps_server, AGPS_IF.Nokia.agps_measurements.unsuccessful_data_requests_from_agps_server, AGPS_IF.Nokia.agps_measurements._%_successful_connections_to_agps_server, AGPS_IF.Nokia.agps_measurements._%_successful_data_requests_from_agps_server

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

## 9.2 ATM VCC CAC Resource Utilisation

This report shows the AAL2 Connection Admission Control average resource utilisation covering normal, reserved AAL2 connections as well as a for HSDPA connections.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.ATM_VCC
Primary Object	ATM_VCC
Table for AAL2 CAC Resource	ATM_VPC.ATM_VPC_Name, ATM_VCC.ATM_VCC_Id, ATM_VCC.Nokia.cac_resource.avg_aal2_connections, ATM_VCC.Nokia.cac_resource.avg_reserved_cell_rate, ATM_VCC.Nokia.cac_resource.avg_aal2_connections_hsdpa, ATM_VCC.Nokia.cac_resource.avg_shared_hsdpa_aal2_allocation

## 9.3 ATM VCC Connection Resource Allocation

This report shows the AAL2 transport resource allocation performance.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.ATM_VCC
Primary Object	ATM_VCC
Table for AAL2 Resource Allocation	ATM_VPC.ATM_VPC_Name, ATM_VCC.ATM_VCC_Id, ATM_VCC.Nokia.resource_reservation.aal2_succeeded, ATM_VCC.Nokia.resource_reservation.aal2_rejected, ATM_VCC.Nokia.resource_reservation._%_res_succeeded, ATM_VCC.Nokia.resource_reservation.aal2_succeeded_hsdpa, ATM_VCC.Nokia.resource_reservation.other_rejected_hsdpa, ATM_VCC.Nokia.resource_reservation._%_aal2_succeeded_hsdpa
Table for AAL2 Allocation Failure per Cause	ATM_VPC.ATM_VPC_Name, ATM_VCC.ATM_VCC_Id, ATM_VCC.Nokia.resource_reservation.res_int_cap, ATM_VCC.Nokia.resource_reservation.res_ext_cap, ATM_VCC.Nokia.resource_reservation.res_other, ATM_VCC.Nokia.resource_reservation.reject_hsdpa_too_many_users , ATM_VCC.Nokia.resource_reservation.transport_rejected_ext_hsdpa, ATM_VCC.Nokia.resource_reservation.transport_rejected_int_hsdpa

## 9.4 Cell Availability

This report uses the Cell availability formula stated Nokia WCDMA RAN KPI documentation which is based on the average code usage in the pool.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graphs for Cell Availability	Cell.Cell_Id, Cell.Nokia.RAN_Usage.Service_Level.cell_availability
Table for Cell Availability	Cell.BS_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.RAN_Usage.Service_Level.cell_availability

## 9.5 Cell Average RAB and DCH Holding Times

Report for RAB holding times for all CS and PS services.CS covering voice, conversational , streaming while PS covering conversational, streaming, interactive , background.Includes DCH Holding times -PS Interactive , Background services. Data units-10ms

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graph for CS RAB Holding Times	Cell.Cell_Id, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_cs_voice_call, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_cs_data_call_with_streaming_class, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_cs_data_call_with_conversational_class
Graph for PS RAB and DCH Holding Times	Cell.Cell_Id, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_ps_call_with_streaming_class, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_ps_call_with_conversational_class, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_ps_call_with_interactive_class, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_ps_call_with_background_class, Cell.Nokia.rab.holding_times.average_dch_holding_time_for_ps_rab_with_interactive_class, Cell.Nokia.rab.holding_times.average_dch_holding_time_for_ps_rab

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

	with_background_class
Table for RAB Holding Times	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_cs_voice_call, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_cs_data_call_with_streaming_class, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_cs_data_call_with_conversational_class, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_ps_call_with_streaming_class, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_ps_call_with_conversational_class, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_ps_call_with_interactive_class, Cell.Nokia.rab.holding_times.average_rab_holding_time_for_ps_call_with_background_class, Cell.Nokia.rab.holding_times.average_dch_holding_time_for_ps_rab_with_interactive_class, Cell.Nokia.rab.holding_times.average_dch_holding_time_for_ps_rab_with_background_class

## 9.6 Cell Average RRC and RAB Setup Times

Report for RRC , RAB setup times for all CS , PS services. CS covering voice, conversational ,streaming while PS covering conversational, streaming, interactive , background. RRC Setup time covers both RRC Setup , RRC Access phases. Data units-10ms.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graph for RRC and CS RAB Setup Times	Cell.Cell_Id, Cell.Nokia.rab.setup_time.average_setup_time_for_rrc, Cell.Nokia.rab.setup_time.average_setup_time_for_cs_voice_rab, Cell.Nokia.rab.setup_time.average_setup_time_for_cs_data_stream_rab, Cell.Nokia.rab.setup_time.average_setup_time_for_cs_data_conv_rab
Graph for PS RAB Setup Times	Cell.Cell_Id, Cell.Nokia.rab.setup_time.average_setup_time_for_ps_data_stream_rab, Cell.Nokia.rab.setup_time.average_setup_time_for_ps_data_conv_rab , Cell.Nokia.rab.setup_time.average_setup_time_for_ps_data_interactive_rab,

	Cell.Nokia.rab.setup_time.average_setup_time_for_ps_data_backround_rab
Table for RRC and RAB Setup Times	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.rab.setup_time.average_setup_time_for_cs_voice_rab, Cell.Nokia.rab.setup_time.average_setup_time_for_cs_data_stream_rab, Cell.Nokia.rab.setup_time.average_setup_time_for_cs_data_conv_rab, Cell.Nokia.rab.setup_time.average_setup_time_for_ps_data_stream_rab, Cell.Nokia.rab.setup_time.average_setup_time_for_ps_data_conv_rab, Cell.Nokia.rab.setup_time.average_setup_time_for_ps_data_interactive_rab, Cell.Nokia.rab.setup_time.average_setup_time_for_ps_data_backround_rab

## 9.7 Cell Channel Element Utilisation Voice

This report describes the average Channel Element Used for conversational voice service.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Cell Channel Element Utilisation Voice	Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.ce_capacity.Avg_used_ce_cs_conversational_64_kbps, Cell.Nokia.ce_capacity.Avg_used_ce_amr_allocations

## 9.8 Cell Ch Element Utilisation PS Background 1

This part 1 of the report describes the average Channel Element Used for PS Background Services.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for PS Background 1 - UL	Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_8_kbps_ul,

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

	Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_16_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_32_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_64_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_128_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_256_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_384_kbps_ul
--	--

## 9.9 Cell Ch Element Utilisation PS Background 2

This part 2 of the report describes the average Channel Element Used for PS Background Services.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for PS Background 2 - DL	Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_8_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_16_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_32_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_64_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_128_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_256_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_background_384_kbps_dl

## 9.10 Cell Ch Element Utilise CS PS Streaming 1

This part 1 of the report describes the average Channel Element Used for CS/PS Streaming Services.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for CS/PS Streaming 1 - UL	Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.ce_capacity.Avg_used_ce_cs_streaming_144_kbps, Cell.Nokia.ce_capacity.Avg_used_ce_cs_streaming_576_kbps, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_8_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_16_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_32_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_64_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_128_kbps_ul

## 9.11 Cell Ch Element Utilise CS PS Streaming 2

This part 2 of the report describes the average Channel Element Used for CS/PS Streaming Services.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for CS/PS Streaming 2 - DL	Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_8_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_16_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_32_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_64_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_128_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_256_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_streaming_384_kbps_dl

## 9.12 Cell Ch Element Utilise PS Interactive 1

This part 1 of the report describes the average Channel Element Used for PS Interactive Services.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for PS Interactive 1 - UL	Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_8_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_16_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_32_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_64_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_128_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_256_kbps_ul, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_384_kbps_ul

## 9.13 Cell Ch Element Utlse PS Interactive 2

This part 2 of the report describes the average Channel Element Used for PS Interactive Services.

Report Feature	Details

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for PS Interactive 2 - DL	Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_8_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_16_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_32_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_64_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_128_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_256_kbps_dl, Cell.Nokia.ce_capacity.Avg_used_ce_ps_interactive_384_kbps_dl

## 9.14 Cell Code Usage and Unavailability

This report shows the code pool usage and unavailability.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graph for Code Pool Usage	Cell.Cell_Id, Cell.Nokia.code_occupancy.max_code_occupancy_percentage, Cell.Nokia.code_occupancy.minimum_code_occupancy_percentage, Cell.Nokia.code_occupancy.avg_usage_of_code_capacity
Table for Code Pool Usage and Unavailability	RNC.RNC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.code_blocking.no_codes_available_sf4, Cell.Nokia.code_blocking.no_codes_available_sf8, Cell.Nokia.code_blocking.no_codes_available_sf16, Cell.Nokia.code_blocking.no_codes_available_sf32, Cell.Nokia.code_blocking.no_codes_available_sf64, Cell.Nokia.code_blocking.no_codes_available_sf128, Cell.Nokia.code_blocking.no_codes_available_sf256, Cell.Nokia.code_occupancy.max_code_occupancy_percentage, Cell.Nokia.code_occupancy.minimum_code_occupancy_percentage, Cell.Nokia.code_occupancy.avg_usage_of_code_capacity, Cell.Nokia.code_blocking.the_nbr_of_succ_code_tree_allo

## 9.15 Cell CS Erlang

This report shows the value of CS Erlang as given by the Nokia WCDMA RAN KPI document. The calculation takes into consideration of the CS type services (Voice, 64kbps conversational, 14.4 kbps streaming, 57.6kbps streaming).

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graph for CS Erlang in the Cell	Cell.Cell_Id, Cell.Nokia.RAN_Usage.Cell_Usage.cs_erlang
Table for CS Erlang in the Cell	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.RAN_Usage.Cell_Usage.cs_erlang

## 9.16 Cell CS PS Service Traffic Throughput

This report shows the throughput of the service traffic on SRNC according to each service class.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graph for CS Traffic	Cell.Nokia.traffic.dch_duration_cs_voice_calls.srnc.ul_cs_amr_throughput, Cell.Nokia.traffic.dch_duration_cs_voice_calls.srnc.ul_cs_amr_throughput, Cell.Nokia.traffic.dch_allocations_cs_data_calls.srnc.transparent_cs_data_throughput, Cell.Nokia.traffic.dch_allocations_cs_data_calls.srnc.ul_non_transparent_cs_data_throughput, Cell.Nokia.traffic.dch_allocations_cs_data_calls.srnc.ul_non_transparent_cs_data_throughput
Table for CS Traffic	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.traffic.dch_duration_cs_voice_calls.srnc.ul_cs_amr_throughput, Cell.Nokia.traffic.dch_duration_cs_voice_calls.srnc.ul_cs_amr_throughput, Cell.Nokia.traffic.dch_allocations_cs_data_calls.srnc.transparent_cs_data_throughput, Cell.Nokia.traffic.dch_allocations_cs_data_calls.srnc.ul_non_transparent_cs_data_throughput, Cell.Nokia.traffic.dch_allocations_cs_data_calls.srnc.ul_non_transparent_cs_data_throughput

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

## 9.19 Cell EDCH Setup Failure Report

This report shows the EDCH setup failure report for various reasons. This covers both interactive and background connections.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for EDCH Setup Failures	Cell.BSC_Id, Cell.BS_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.traffic.edsch_setup_failures.edch_setup_failure_due_to_ue_for_interactive, Cell.Nokia.traffic.edsch_setup_failures.edch_setup_failure_due_to_bts_for_interactive, Cell.Nokia.traffic.edsch_setup_failures.edch_setup_failure_due_to_transport_for_interactive, Cell.Nokia.traffic.edsch_setup_failures.edch_setup_failure_due_to_other_reasons_for_interactive, Cell.Nokia.traffic.edsch_setup_failures.edch_setup_failure_due_to_ue_for_background, Cell.Nokia.traffic.edsch_setup_failures.edch_setup_failure_due_to_bts_for_background, Cell.Nokia.traffic.edsch_setup_failures.edch_setup_failure_due_to_transport_for_background, Cell.Nokia.traffic.edsch_setup_failures.edch_setup_failure_due_to_other_reasons_for_background, Cell.Nokia.traffic.edsch_setup_failures.tot_edsch_setup_fail_inter, Cell.Nokia.traffic.edsch_setup_failures.tot_edsch_setup_fail_backg

## 9.20 Cell HSDPA Accessibility Retainability Traffic

This report shows the percentage on the accessibility and retainability of the HSDPA connection in the cell.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graph for HSDPA Accessibility/Retainability	Cell.Cell_Id, Cell.Nokia.RAN_Accessibility.Traffic._%_hsdpa_accessibility_nrt_traffic, Cell.Nokia.RAN_Accessibility.Traffic._%_hsdpa_resource_accessibility_rt_traffic, Cell.Nokia.RAN_Retainability.Traffic._%_hsdpa_retainability_nrt_traffic, Cell.Nokia.traffic.hdsch_allocation._

	%_hsdpdpa_resource_retainability_rt_traffic
Table for HSDPA Accessibility/Retainability	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.RAN_Accessibility.Traffic._%_hsdpdpa_accessibility_nrt_traffic, Cell.Nokia.RAN_Accessibility.Traffic._%_hsdpdpa_resource_accessibility_rt_traffic, Cell.Nokia.RAN_Retainability.Traffic._%_hsdpdpa_retainability_nrt_traffic, Cell.Nokia.traffic.hsdsch_allocation._%_hsdpdpa_resource_retainability_rt_traffic

## 9.21 Cell HSDPA MAC Efficiency (WBTS WN3.0)

WBTS WN3.0 based report. This report shows the retransmission ratio of the between BTS and HSDPA capable UEs done by MAC-hs. Based on successfully sent MAC-hs PDUs divided by totally sent MAC-hs PDUs. Based on Nokia WCDMA RAN KPI document.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for Cell HSDPA MAC Transmission Efficiency	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.wbts_wn3.mac_hs_transmit.hsdpa_mac_hs_efficiency

## 9.22 Cell HSDPA PDU Vol and MACd Thruput WBTS WN3.0

WBTS WN3.0 based report. This report shows the MAC-d net throughput and the PDU volume received by the WBTS over the IuB. Based on Nokia WCDMA RAN KPI document. Volume is in Mbit, while Throughput is in kbps.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graph for HSDPA PDU Volume/MAC-d Throughput	Cell.Cell_Id, Cell.Nokia.wbts_wn3.mac_d_pdu.hsdpa_data_volume_macd_Iub, Cell.Nokia.wbts_wn3.mac_d_pdu.hsdpa_macd_net_throughput_bts

Primary Object	Cell
Graph for RRC Connections Setup	Cell.Cell_Id, Cell.Nokia.rrc.connection_setup._%_rrc_setup_fail, Cell.Nokia.rrc.connection_setup.rrc_setup_compl, Cell.Nokia.rrc.connection_setup.tot_rrc_setup_fail, Cell.Nokia.rrc.connection_setup._%_rrc_connections_success_rate
Table for RRC Connections Setup	RNC.RNC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.rrc.connection_setup.rrc_setup_att, Cell.Nokia.rrc.connection_setup.rrc_setup_compl, Cell.Nokia.rrc.connection_setup._%_rrc_connections_success_rate, Cell.Nokia.rrc.connection_setup.tot_rrc_setup_fail, Cell.Nokia.rrc.connection_setup._%_rrc_setup_fail

## 9.56 Cell RRC Drops Ratio

This report shows Drop ratio covering RRC Active Phase of a call. The initial connections of the RRC active phase takes assumption of the RRC access completion. Or the total of all the RRC active statistics (I.e completion, releases and failures).

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for RRC Drops Ratio	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.rrc.connection_access.rrc_acc_comp, Cell.Nokia.RAN_Retainability.Service_Level._%_rrc_drop_ratio

## 9.57 Cell RRC Setup Failures Per Cause

This report shows the RRC connection setup failure per cause. Total failures theoretically should be equal to the sum of all causes.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for RRC Setup Failures Per Cause	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.rrc.connection_setup.rrc_setup_fail_due_to_hc, Cell.Nokia.rrc.connection_setup.rrc_setup_fail_due_to_ac, Cell.Nokia.rrc.connection_setup.rrc_setup_fail_due_to_bts_reasons, Cell.Nokia.rrc.connection_setup.rrc_setup_fail_due_to_trans,

Cell.Nokia.rrc.connection_setup.rrc_setup_fail_due_to_rnc_inter_reasons, Cell.Nokia.rrc.connection_setup.rrc_setup_fail_due_to_frozen_bts, Cell.Nokia.rrc.connection_setup.rrc_conn_setup_fail_due_to_rnti_alloc_fail, Cell.Nokia.rrc.connection_setup.rrc_setup_fail_due_to_iub_aal2_trans, Cell.Nokia.rrc.connection_setup.tot_rrc_setup_fail, Cell.Nokia.rrc.connection_setup.rrc_setup_att, Cell.Nokia.rrc.connection_setup._%_rrc_setup_fail
---

## 9.58 Cell Service CSSR Performance

This report shows the CSSR performance on the AMR, UDI, Packet and Streaming services.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graph for CSSR Performance	Cell.Cell_Id, Cell.Nokia.RAN_Accessibility.Service_Level._%_amr_cssr, Cell.Nokia.RAN_Accessibility.Service_Level._%_udi_cssr, Cell.Nokia.RAN_Accessibility.Service_Level._%_streaming_cssr, Cell.Nokia.RAN_Accessibility.Service_Level._%_packet_cssr
Table for CSSR Performance	RNC.RNC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.RAN_Accessibility.Service_Level._%_amr_cssr, Cell.Nokia.RAN_Accessibility.Service_Level._%_udi_cssr, Cell.Nokia.RAN_Accessibility.Service_Level._%_streaming_cssr, Cell.Nokia.RAN_Accessibility.Service_Level._%_packet_cssr

## 9.59 Cell Soft Handover RT NRT

This report shows the soft handover performance based on active set updates for RT and NRT services.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graph for Soft Handover RT	RNC.RNC_Id, Cell.Cell_Id, Cell.Cell_Name,

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

Graph for Soft Handover NRT	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.soft_handover.nrt.successful_active_set_updates_on_sho_for_nrt_traffic, Cell.Nokia.soft_handover.nrt.unsuccessful_active_set_updates_on_sho_for_nrt_traffic, Cell.Nokia.soft_handover.rt.%_successful_active_set_updates_on_sho_for_rt_traffic

## 9.60 Cell Throughput Report

This report shows the cell data throughput, both downlink and uplink directions.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Throughput	Cell.Cell_Id, Cell.BS_Id, Cell.BSC_Id, Cell.Nokia.cell_thruput.cch_data_cell_dl, Cell.Nokia.cell_thruput.cch_data_cell_ul, Cell.Nokia.cell_thruput.edch_data_ns_ns_edch_ul, Cell.Nokia.cell_thruput.edch_data_ns_s_edch_ul, Cell.Nokia.cell_thruput.edch_data_scell_ul, Cell.Nokia.cell_thruput.hs_total_data

## 9.61 Cell Total Service Traffic Throughput

Report for thruput of total cs,ps service traffic on SRNC.The services comprised of allocated CS Voice,CS data transparent-nontransparent,PS Data(Streaming, Interactive, Conversational and Background).Uplink and Downlink thruputs are taken into account

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Graphs for Cell Total Service Traffic Throughput	Cell.Cell_Id, Cell.Nokia.cell_busy_hour_kpi.total_traffic
Table for Cell Total Service Traffic Throughput	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.cell_busy_hour_kpi.total_traffic

## 9.62 Cell Transport Channel Throughput

Report for average throughput of the transport channels in UL and DL, namely RACH, PCH, FACH and FACH used for Service Area Broadcast in kbps as described in the Nokia WCDMA RAN KPI document.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Cell
Primary Object	Cell
Table for Transport Channel Throughput	Cell.BSC_Id, Cell.Cell_Id, Cell.Cell_Name, Cell.Nokia.RAN_Usage.Cell_Resource.average_fach_throughput, Cell.Nokia.RAN_Usage.Cell_Resource.average_pch_throughput, Cell.Nokia.RAN_Usage.Cell_Resource.average_sab_throughput

## 9.63 Computer Unit CPU Load in DSP

This report shows the CPU load in the DSP

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Computer_Unit
Primary Object	Computer_Unit
Graph on CPU Load	Computer_Unit.Nokia.dsp_load.cpu_load_avg, Computer_Unit.Nokia.dsp_load.cpu_load_max, Computer_Unit.Nokia.dsp_load.cpu_load_max_mem_use_exter, Computer_Unit.Nokia.dsp_load.cpu_load_max_mem_use_inter, Computer_Unit.Nokia.dsp_load.cpu_load_max_proc_num
Table on CPU Load	Computer_Unit.Computer_Unit_Id, Computer_Unit.Node_Id, Computer_Unit.Nokia.dsp_load.cpu_load_avg, Computer_Unit.Nokia.dsp_load.cpu_load_max, Computer_Unit.Nokia.dsp_load.cpu_load_max_mem_use_exter, Computer_Unit.Nokia.dsp_load.cpu_load_max_mem_use_inter, Computer_Unit.Nokia.dsp_load.cpu_load_max_proc_num

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

## 9.64 Computer Unit Processor Load

This report shows the processor load in computer units.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Computer_Unit
Primary Object	Computer_Unit
Graph for Processor Load	Computer_Unit.Computer_Unit_Id, Computer_Unit.Nokia.unit_load.average_load, Computer_Unit.Nokia.unit_load.peak_load

## 9.65 Computer Unit Total TCP IP Traffic

This report shows the TCP and IP packet traffic in the computer unit. The statistics is in bytes

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Computer_Unit
Primary Object	Computer_Unit
Graph for TCP/IP Traffic	Computer_Unit.Computer_Unit_Id, Computer_Unit.Nokia.tcpip_measurement.tcp.tot_tcp_tx_rx_bytes, Computer_Unit.Nokia.tcpip_measurement.ipv4.tot_Ips_sent_received_fwd, Computer_Unit.Nokia.tcpip_measurement.ipv6.tot_ip6s_sent_received_fwd
Table for TCP/IP Traffic	Computer_Unit.Computer_Unit_Id, Computer_Unit.Nokia.tcpip_measurement.tcp.tot_tcp_tx_rx_bytes, Computer_Unit.Nokia.tcpip_measurement.ipv4.tot_Ips_sent_received_fwd, Computer_Unit.Nokia.tcpip_measurement.ipv6.tot_ip6s_sent_received_fwd

## 9.66 DSP Pool Resource Utilization Report

This report shows the DSP resource utilization

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.DSP_Pool
Primary Object	DSP_Pool
DSP Resource Utilization	DSP_Pool.DSP_Pool_Id, DSP_Pool.RNC_Id, DSP_Pool.Nokia.dsp_resource_util.available_cap_on_ne,

DSP_Pool.Nokia.dsp_resource_util.curr_res_alloc_on_ne, DSP_Pool.Nokia.dsp_resource_util.succ_res_alloc_on_ne, DSP_Pool.Nokia.dsp_resource_util.lowest_cap_on_ne, DSP_Pool.Nokia.dsp_resource_util.peak_res_alloc_on_ne
---

## 9.67 Ethernet Interface Performance Report

The report shows the ethernet interface performance

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Ethernet_IF
Primary Object	Ethernet_IF
Ethernet frames received	Ethernet_IF.Ethernet_IF_Id, Ethernet_IF.RNC_Id, Ethernet_IF.Nokia.ethernet_if_perf.ether_rx_frame, Ethernet_IF.Nokia.ethernet_if_perf.ether_rx_kilobyte, Ethernet_IF.Nokia.ethernet_if_perf.ether_rx_broadcast_frame, Ethernet_IF.Nokia.ethernet_if_perf.ether_rx_multicast_frame, Ethernet_IF.Nokia.ethernet_if_perf.ether_rx_unicast_frame
Ethernet frames transmitted	Ethernet_IF.Ethernet_IF_Id, Ethernet_IF.RNC_Id, Ethernet_IF.Nokia.ethernet_if_perf.ether_tx_frame, Ethernet_IF.Nokia.ethernet_if_perf.ether_tx_kilobyte, Ethernet_IF.Nokia.ethernet_if_perf.ether_tx_broadcast_frame, Ethernet_IF.Nokia.ethernet_if_perf.ether_tx_multicast_frame, Ethernet_IF.Nokia.ethernet_if_perf.ether_tx_unicast_frame

## 9.68 IP Route Accessibility Report

This report shows the average success rate of the transport resource reservation attempts for IP Route based connections

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.IP_ROUTE_BTS
Primary Object	IP_Route_BTS
Graph for IP Route Accessibility	IP_Route_BTS.Nokia.ip_transport_resource_reservations._%_ip_route_accessibility

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Table for IP Route Accessibility	IP_Route_BTS.Nokia.ip_transport_resource_reservations.fail_rnc_ip_res_ext, IP_Route_BTS.Nokia.ip_transport_resource_reservations.fail_rnc_ip_res_int, IP_Route_BTS.Nokia.ip_transport_resource_reservations.fail_rnc_ip_res_other, IP_Route_BTS.IP_Route_BTS_Id, IP_Route_BTS.NodeB_Id, IP_Route_BTS.RNC_Id, IP_Route_BTS.Nokia.ip_transport_resource_reservations.succ_rnc_ip_res
----------------------------------	--

## 9.69 LCG Channel Element Availability Report

This report describes the channel availability in the Local Cell Group.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.LCG
Primary Object	LCG
Table for Channel Element Availability	LCG.RNC_Id, LCG.NodeB_Id, LCG.LCG_Id, LCG.Nokia.wbts_pool_ce_resources.average_number_of_available_channel_elements, LCG.Nokia.wbts_pool_ce_resources.maximum_number_of_available_channel_elements, LCG.Nokia.wbts_pool_ce_resources.minimum_number_of_available_channel_elements

## 9.70 LCG Channel Element Usage HSPA Report

This report describes the channel usage in the Local Cell Group for HSPA connections both Uplinks and Downlinks.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.LCG
Primary Object	LCG
Table for Channel Element Usage HSPA	LCG.RNC_Id, LCG.NodeB_Id, LCG.LCG_Id, LCG.Nokia.wbts_pool_ce_resources.average_number_of_used_ce_for_hsupa_ul, LCG.Nokia.wbts_pool_ce_resources.maximum_number_of_used_ce_for_hsupa_ul, LCG.Nokia.wbts_pool_ce_resources.minimum_number_of_used_ce_for_hsupa_ul, LCG.Nokia.wbts_pool_ce_resources.average_number_of_used_ce_for_

	<code>_hsupa_dl,</code> <code>LCG.Nokia.wbts_pool_ce_resources.maximum_number_of_used_ce_</code> <code>for_hsupa_dl,</code> <code>LCG.Nokia.wbts_pool_ce_resources.minimum_number_of_used_ce_f</code> <code>or_hsupa_dl</code>
--	--

## 9.71 LCG Channel Element Usage NonHSPA Report

This report describes the channel usage in the Local Cell Group for non HSPA connections both Uplinks and Downlinks.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.LCG
Primary Object	LCG
Table for Channel Element Usage NonHSPA	<code>LCG.RNC_Id, LCG.NodeB_Id, LCG.LCG_Id,</code> <code>LCG.Nokia.wbts_pool_ce_resources.average_number_of_used_ce_for_</code> <code>_ul,</code> <code>LCG.Nokia.wbts_pool_ce_resources.maximum_number_of_used_ce_</code> <code>for_ul,</code> <code>LCG.Nokia.wbts_pool_ce_resources.minimum_number_of_used_ce_f</code> <code>or_ul,</code> <code>LCG.Nokia.wbts_pool_ce_resources.average_number_of_used_ce_for_</code> <code>_dl,</code> <code>LCG.Nokia.wbts_pool_ce_resources.maximum_number_of_used_ce_</code> <code>for_dl,</code> <code>LCG.Nokia.wbts_pool_ce_resources.minimum_number_of_used_ce_f</code> <code>or_dl</code>

## 9.72 LCG Iub Throughput Report

This report shows FP layer total Iub Throughput volume UL on BTS side for the reporting period on Iub.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.LCG
Primary Object	LCG

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

Throughput	RNC.RNC_Id, LCG.LCG_Id, LCG.NodeB_Id, LCG.RNC_Id, LCG.Nokia.frame_protocol.cch_data_to_iub_interface, LCG.Nokia.frame_protocol.dch_data_to_iub, LCG.Nokia.frame_protocol.edch_data_to_iub, LCG.Nokia.frame_protocol.iub_throughput_ul_bts
------------	---

## 9.73 MTP Signalling Link Performance

This report displays the MTP signalling link performance statistics.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Signalling_Link
Primary Object	Signalling_Link
Link Performance	Signalling_Link.SS7_Link_Id, Signalling_Link.SS7_LinkSet_Id, Signalling_Link.SS7_Point_Id, Signalling_Link.Nokia.mtp_signalling_link_performance.dur_in_service_state, Signalling_Link.Nokia.mtp_signalling_link_performance.link_failures_all_reasons, Signalling_Link.Nokia.mtp_signalling_link_performance.link_failures_abnorm_fibr_bsnr, Signalling_Link.Nokia.mtp_signalling_link_performance.link_failures_ali_or_prov_fail, Signalling_Link.Nokia.mtp_signalling_link_performance.link_failures_exc_del_of_ack, Signalling_Link.Nokia.mtp_signalling_link_performance.link_failures_exc_dur_of_cong, Signalling_Link.Nokia.mtp_signalling_link_performance.link_failures_exc_error_rate, Signalling_Link.Nokia.mtp_signalling_link_performance.sign_units_received_in_error, Signalling_Link.Nokia.mtp_signalling_link_performance.negative_acks, Signalling_Link.Nokia.mtp_signalling_link_performance.automatic_changebacks, Signalling_Link.Nokia.mtp_signalling_link_performance.automatic_changeovers, Signalling_Link.Nokia.mtp_signalling_link_performance.link_restorations, Signalling_Link.Nokia.mtp_signalling_link_performance.sd_loss

## 9.74 MTP Signalling Link Utilisation

This report displays the signalling link utilisation statistics.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Signalling_Link
Primary Object	Signalling_Link
Link Utilisation	Signalling_Link.SS7_Link_Id, Signalling_Link.SS7_LinkSet_Id, Signalling_Link.SS7_Point_Id, Signalling_Link.Nokia.mtp_signalling_link_utilization.msus_received, Signalling_Link.Nokia.mtp_signalling_link_utilization.msus_transmitted, Signalling_Link.Nokia.mtp_signalling_link_utilization.octets_retransmitted, Signalling_Link.Nokia.mtp_signalling_link_utilization.sif_and_sio_octets_received, Signalling_Link.Nokia.mtp_signalling_link_utilization.sif_and_sio_octets_transmitted

## 9.75 MTP Signalling Point Status

This report displays the MTP signalling point status measurements

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Signalling_Point
Primary Object	Signalling_Point
Status	Signalling_Link.SS7_Point_Id, Signalling_Point.Nokia.mtp_signalling_point_status.adjacent_sp_inaccessible, Signalling_Point.Nokia.mtp_signalling_point_status.nbr_of_received_tfc, Signalling_Point.Nokia.mtp_signalling_point_status.upus_received, Signalling_Point.Nokia.mtp_signalling_point_status.adjacent_sp_inaduration, Signalling_Point.Nokia.mtp_signalling_point_status.msu_discarded_rec_msus, Signalling_Point.Nokia.mtp_signalling_point_status.msu_discarded_trans_msus, Signalling_Point.Nokia.mtp_signalling_point_status.upus_transmitted

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

## 9.76 MTP Signalling Point Traffic

This report displays the MTP signalling traffic measurement of signalling points.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Signalling_Point
Primary Object	Signalling_Point
Traffic	Signalling_Point.SS7_Point_Id, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.sif_and_sio_oct_rec_with_opc, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.total_octets_rec_trans, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.total_octets_trans_to_dpc, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.transmitted_octets_1, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.transmitted_octets_2, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.transmitted_octets_3, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.transmitted_octets_4, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.transmitted_octets_5, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.transmitted_octets_6, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.transmitted_octets_7, Signalling_Point.Nokia.mtp_signalling_traf_report_sp.transmitted_octets_8

## 9.77 Neighbour\_RNC Iur Interface Availability

This report describes the availability of the Iur Interface.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Neighbour_RNC
Primary Object	Neighbour_RNC
Neighbour_RNC Iur Interface Availability	Neighbour_RNC.RNC_Neighbour_Id, Neighbour_RNC.Source_RNC_Id, Neighbour_RNC.Target_RNC_Id, Neighbour_RNC.Nokia.rnsap.iur_avail.pc_iur_availability, Neighbour_RNC.Nokia.rnsap.iur_avail.iur_not_working_duration

## 9.78 Neighbour Inter Frequency HHO Report

This report shows the inter-frequency hard handover attempts and complete statistics.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Neighbour
Primary Object	Neighbour
Table for Inter Frequency Handovers	Neighbour.Source_Cell_Id, Neighbour.Target_Cell_Id, Neighbour.Neighbour_Id, Neighbour.Nokia.inter_frequency_ho.number_of_inter_frequency_hho_attempts, Neighbour.Nokia.inter_frequency_ho.number_of_completed_inter_frequency_hho

## 9.79 Neighbour Inter System HHO Report

This report shows the inter-system hard handover attempts and complete statistics to GSM Cells.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Neighbour
Primary Object	Neighbour
Table for Inter System Handovers	Neighbour.Source_Cell_Id, Neighbour.Target_Cell_Id, Neighbour.Neighbour_Id, Neighbour.Nokia.hard_handovers.number_of_inter_system_hho_attempts, Neighbour.Nokia.hard_handovers.number_of_completed_inter_system_hho

## 9.80 Neighbour Soft Handover Report

This report shows the soft handover attempts and complete statistics.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.Neighbour
Primary Object	Neighbour
Table for Soft Handovers	Neighbour.Source_Cell_Id, Neighbour.Target_Cell_Id,

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

	Neighbour.Neighbour_Id, Neighbour.Nokia.soft_handovers.number_of_intra_frequency_sho_attempts, Neighbour.Nokia.soft_handovers.number_of_completed_intra_frequency_sho
--	---

## 9.81 NodeB Hardware Pool Capacity

This report shows the hardware pool capacity.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.NodeB
Primary Object	NodeB
Table for NodeB Hardware Pool Capacity	NodeB.RNC_Id, NodeB.NodeB_Id, NodeB.Nokia.bts_hw.average_available_percentage_pool_capacity_ul , NodeB.Nokia.bts_hw.average_available_percentage_pool_capacity_dl , NodeB.Nokia.bts_hw.nbr_of_cells

## 9.82 RNC Capacity Usage Report

This report shows the RNC capacity usage

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.RNC
Primary Object	RNC
Capacity Usage	RNC.RNC_Id, RNC.Nokia.rnc_capacity_usage.amr_average, RNC.Nokia.rnc_capacity_usage.amr_max, RNC.Nokia.rnc_capacity_usage.amr_lic_capacity, RNC.Nokia.rnc_capacity_usage.ave_rrc_conn_mode_users, RNC.Nokia.rnc_capacity_usage.ave_users_cell_dch, RNC.Nokia.rnc_capacity_usage.ave_users_cell_fach, RNC.Nokia.rnc_capacity_usage.ave_users_cell_pch, RNC.Nokia.rnc_capacity_usage.ave_users_ura_pch, RNC.Nokia.rnc_capacity_usage.iu_ps_thr_average, RNC.Nokia.rnc_capacity_usage.iu_ps_thr_limit_duration, RNC.Nokia.rnc_capacity_usage.iu_ps_thr_peak, RNC.Nokia.rnc_capacity_usage.iub_ps_thr_lic_capacity, RNC.Nokia.rnc_capacity_usage.max_rrc_conn_mode_users, RNC.Nokia.rnc_capacity_usage.peak_iu_ps_throughput

## 9.83 RNC CS Iu Release Reason Report

This report describes the Iu release signal coming from and to circuit switched core network subsystem MSC.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.RNC
Primary Object	RNC
RNC CS Incoming Iu Release Reason Report	RNC.RNC_Id, RNC.RNC_Name, RNC.Nokia.cswitch.iurelreq.inter_syst_hho_iu_rel_in_contr_by_msc_due_to_rn_layer_cause, RNC.Nokia.cswitch.iurelreq.inter_syst_hho_iu_rel_in_contr_by_msc_due_to_tr_cause, RNC.Nokia.cswitch.iurelreq.inter_syst_hho_iu_rel_in_contr_by_msc_due_to_non_stan_cause, RNC.Nokia.cswitch.iurelreq.inter_syst_hho_iu_rel_in_contr_by_msc_due_to_prot_cause, RNC.Nokia.cswitch.iurelreq.inter_syst_hho_iu_rel_in_contr_by_msc_due_to_misc_cause
RNC CS OutGoing Iu Release Reason Report	RNC.RNC_Id, RNC.RNC_Name, RNC.Nokia.cswitch.iurelreq.inter_syst_hho_iu_rel_out_contr_by_msc_due_to_rn_layer_cause, RNC.Nokia.cswitch.iurelreq.inter_syst_hho_iu_rel_out_contr_by_msc_due_to_tr_cause, RNC.Nokia.cswitch.iurelreq.inter_syst_hho_iu_rel_out_contr_by_msc_due_to_non_stan_cause, RNC.Nokia.cswitch.iurelreq.inter_syst_hho_iu_rel_out_contr_by_msc_due_to_prot_cause, RNC.Nokia.cswitch.iurelreq.inter_syst_hho_iu_rel_out_contr_by_msc_due_to_misc_cause

## 9.84 RNC HSPA HHO Cell Change Failure Report

This report describes the inter-RNC HSPA service Cell Change Failure report

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.RNC
Primary Object	RNC

This edition applies to IBM® Tivoli® Netcool® Performance Manager for Wireless and to all subsequent releases and modifications until otherwise indicated in new editions.

© Copyright IBM Corp. 2010. All Rights Reserved.

US Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM Corp.

RNC HSPA Cell Change Report	RNC.RNC_Id, RNC.RNC_Name, RNC.Nokia.anchoring.intrasys_hho_scc.inter_rnc_hho_attempts_due_to_hspa_scc, RNC.Nokia.anchoring.intrasys_hho_scc.unsuccessful_inter_rnc_hho_caused_by_hspa_scc, RNC.Nokia.anchoring.intrasys_hho_scc._%_unsuccessful_inter_rnc_hho_caused_by_hspa_scc
-----------------------------	--

## 9.85 RNC Intra System Handover Report

This report shows the intra system handover statistics

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.RNC
Primary Object	RNC
Intra system handover	RNC.RNC_Id, RNC.Nokia.hspa_ifho_meas.att_hspa_inter_ifho, RNC.Nokia.hspa_ifho_meas.att_hspa_intra_ifho, RNC.Nokia.hspa_ifho_meas.succ_hspa_inter_ifho, RNC.Nokia.hspa_ifho_meas.succ_hspa_intra_ifho_hsdpa, RNC.Nokia.hspa_ifho_meas.succ_hspa_intra_ifho_hsupa, RNC.Nokia.hspa_ifho_meas.succ_hspa_intra_ifho_rel99

## 9.86 RNC Iu Interface Availability

This report describes the Iu interface availability connected to CN.

Report Feature	Details
Report Tree Branch	System.UMTS.Engineering.UTRAN.Nokia.RNC
Primary Object	RNC
