

APAR: IZ49514

Symptom:

Documentation is not complete as to what reports the manager can run.

Note:

A future revision of the IBM Tivoli Identity Manager InfoCenter will be made to show the information as follows:

Scope of the Manager group

The scope of activities for members of the Manager group is primarily to manage the accounts, profiles, and passwords of their direct subordinates.

These tasks might be unavailable if the person form is customized to exclude some of the attributes for which the manager has permission to read or write. Managers can manage and delegate activities on their to-do lists, as described in Table 1.
