# 1 Description

Prospect® 8.0.5 P2 is a patch release for Prospect. Prospect 8.0.5 P2 is a cumulative release and can be applied on Prospect® 8.0.5 release or on Prospect® 8.0.5 P1 patch, in order to bring a system up to the 8.0.5 P2 release point.

Check you have a prerequisite version installed on your system, by running the `show_installed` command. Notice that 8.0.5 release is displayed as 8.0.5.0 and 8.0.5 P1 patch as 8.0.5.1.

This patch introduces the support for 3GPP standard special characters, '<>"&', into the loader component.

---

## 2 Resolved Issues

This release includes the following resolved issues:

<b><i>DDTS / SRS or APAR</i></b>	<b><i>Description</i></b>
SEAd68988 / IZ13905	Need rg_common.sql to set hash_area_size
SEAd69274 / IZ13925	BHUpdate log shows #INVALID# message during copy to BH table
SEAd69079 / IZ14994	ORA-01410 errors occur when reports and soft alarms run
SEAd69384	Improve the 'ps-mgr purge' command
SEAd69411	PartMaint parallel enhancement
SEAd69523 / IZ18779	pm_weekly summations take longer times as time progresses
valnt00019149	Introduce the 3GPP special characters support into the loader component

## 3 Installation and Upgrade Instructions

This section describes how to install the Prospect patch, 8.0.5 P2. This patch can be uninstalled (see section 3.7).

### 3.1 Network Timeouts

If your system has a security policy in place such that a session is disconnected after a lengthy period of apparent inactivity, you should disable it during this upgrade. There is the possibility that an upgrade can take a while to run. Since no user input is required during the most of the upgrade, this can make the upgrade session appear idle. If timeouts are not disabled, the upgrade terminal could be disconnected during the upgrade.

### 3.2 Installation Privileges Required

<i>Privilege</i>	<i>Required</i>
Oracle flexpm user DBA role	No
UNIX flexpm user in DBA group	Yes
Root privilege required	No
Oracle sys user password set to default (change_on_install)	No

### 3.3 Install Procedure Syntax

```
install.sh [ -install | -uninstall | -help ]
-install   :  installs the wmn_pkgb.sql
-uninstall :  removes the current hotfix file version and replaces
it with the previous version
-help     :  help
```

The scripts depend on \$DB\_CONNECT, make sure you have this setup correct.

## 3.4 Pre-Installation Instructions

### 3.4.1 Pre-Install Procedure

1. Login as flexpm and verify \$FLEXPM\_HOME is set.  

```
$ echo $FLEXPM_HOME
```

 If there are multiple Prospect installations on the server, source the .profile for the Prospect installation for which this patch should be applied.
2. Copy 8.0.5-PROSPECT-IF0002.tar.gz into \$FLEXPM\_HOME.
3. Uncompress the file.  

```
$ gunzip 8.0.5-PROSPECT-IF0002.tar.gz
```

- 
4. Untar the package. It will create a subdirectory (patches/Core8.0.5\_P2) in \$FLEXPM\_HOME and untar the files in to this directory.  

```
$ tar -xvpf 8.0.5-PROSPECT-IF0002.tar
```
  5. Install the Patch by following the instructions in Section 3.5 below.

## 3.5 Installation Instructions

**Important!** If there are no errors from the Pre-Installation section, then continue with the following steps:

1. Login as flexpm and verify \$FLEXPM\_HOME is set.  

```
$ echo $FLEXPM_HOME
```

If there are multiple Prospect installations on the server, source the .profile for the Prospect installation for which this patch should be applied.
2. Go to \$FLEXPM\_HOME/patches/Core8.0.5\_P2 directory.  

```
$ cd $FLEXPM_HOME/patches/Core8.0.5_P2
```
3. If Prospect Web is accessing this Prospect installation, then use the admin tool to disable the corresponding datasource.
4. Install the patch.  

```
$ install.sh -install 2>&1| tee install.log
```

Note: the patch installation program will automatically stop the middleware, install the patch files, and restart the middleware.

## 3.6 Post-Installation Instructions

### 3.6.1 Resource the Profile

If you have not done so already, log off and log on as flexpm.

### 3.6.2 Re-enable the datasource in Prospect Web

Once the installation has completed, re-enable the datasource in Prospect Web (if you disabled it before starting the patch installation)

1. If you disabled any datasources in step 3.5.3, then use the admin tool to re-enable them.

## 3.7 Uninstall Procedure

1. Login as flexpm and verify \$FLEXPM\_HOME is set.  

```
$ echo $FLEXPM_HOME
```

If there are multiple Prospect installations on the server, source the .profile for the Prospect installation for which this patch should be applied.

- 
2. Go to `$FLEXPM_HOME/patches/Core8.0.5_P2` directory.  
\$ cd `$FLEXPM_HOME/patches/Core8.0.5_P2`
  3. If Prospect Web is accessing this Prospect installation, then use the admin tool to disable the corresponding datasource.
  4. Remove the patch.  
\$ `install.sh -uninstall 2>&1| tee uninstall.log`
  5. If you disabled any datasources in step 3.7.3, then use the admin tool to re-enable them.

Note: the patch un-installation program will automatically stop the middleware, uninstall the patch files, and restart the middleware.

---

## 4 Useful Hints

### 4.1 New Configuration Option

#### 4.1.1 `part_tablespaces.sh` cli

This patch introduces the feature that enhances the granularity of parallel execution during the Analyze phase of `part_maint` process.

This way, it improves the performances of Analyze phase of `part_maint` process.

In order to handle the data manipulation for this feature, a new cli called `part_tablespaces.sh` has been introduced. Following the cli usage:

```
part_tablespaces.sh -O
part_tablespaces.sh -S [ -T <tablespace> | -t <table> ] [ -m
<degree> | -s <degree> ]
part_tablespaces.sh -h
```

Where:

```
-O                : output
-S                : set
-T <tablespace>  : for the specified tablespace
-t <table>       : for the specified table
-s <degree>      : analyze parallelism degree during part_maint
activity
                  : <degree> = 0: reset value (use the upper
                  hierarchy level)
                  : <degree> = 1: disable parallelism for
specified tablespace/table
parallelism      : <degree> = >1 && <99: apply specified
-h                : help, show usage
```

For appropriate parameter settings, please, contact IBM Customer support.

---

## **5 Customer Support**

Contact IBM Customer Support if a problem is encountered during the installation of this patch.
