Notes:

**On Linux, you need to perform either of the following actions before you can print the license page during installation:*

- Install a correct driver for your local printer.

- Or use your current Postscript printer and set the GhostScript pre-filtering as Convert to PS level 1 on the Advanced tab.

**You must uninstall Lotus Symphony before you switch to a different account on the same machine to re-install Lotus Symphony.*

**On Window Vista, you cannot install Lotus Symphony from a remote server.*

**The installation folder should contain valid characters only.*
