What's the challenge?

- **Technical:** Data everywhere and no-where
- **Analysis:** understanding what you've got
- **Process:** what to do with what you've got

## Differences

- Gender
- Age
- Income
- Family status
- Cultural
- Regulatory
- Shopping patterns
- Market maturity
- Transaction history
- Channel engagement profile
- Marketing influences

A scene from the movie 'The Matrix' showing a computer monitor displaying a grid of data, with a person standing in the foreground. The monitor is illuminated with a green glow, and the person is looking at the screen. The background is dark and filled with more computer monitors.

*A computer which can calculate  
the Answer to the Ultimate Question,*

Analytics culture

Biggest challenge =  
building a culture of  
So what???

Analytics has no  
inherent value  
without action

Its about getting from interesting to here:

[@clearreturns](https://twitter.com/clearreturns)

[www.clearreturns.com](http://www.clearreturns.com)

- Bought 10 dresses at an average of £100 each last year.
- Buys in response to email offers
- Returned 9
- Refund = £900
- Cost to serve = £50
- **Customer value = £50**

**Only 30% of CIOs have “very strong” relationship with marketing**
