DB2 10 for z/OS: Out-of-the-Box Savings

Up to 20% CPU reductions for transactions, queries, and batch

- Out-of-the-box CPU reductions of 5-10% for traditional workloads
- Out-of-the box CPU reductions of up to 20% for new workloads
- Up to additional 10% CPU savings using new functions

Scales with less complexity and cost

- 5-10x more concurrent users up to 20,000 per subsystem
- Significant scale-up capabilities in addition to existing scale-out support
- Consolidate to fewer LPARs and subsystems

Improved operational efficiencies and lower administration cost

Automatic diagnostics, tuning, and compression

Even better performance

 Elapsed time improvement for small LOBS and Complex Queries

© 2011 IBM Corporation

DB2 10 for z/OS: Savings and performance

- Up to 40% savings in processing costs
- Up to 6 times the number of SAP users on a single system
- Time Travel temporal capabilities built directly into the database
- Direct Row access accelerates high performance applications

"We have measured a 38% reduction in CPU for heavy insert workloads in a data sharing environment. That's a significant savings which provides immediate business benefit."

Peter Paetsch, BMW Group

Major Insurance Company The new temporal functionality in DB2 10 for z/OS will allow us to drastically simplify our data-related queries and reduce our processing cost by having DB2 handle data movement more efficiently than our custom code

CION ESPAÑOLA DE CAJAS DE AHORBO

"In addition to the cost savings, DB2 10 for z/OS offers a far superior data server environment than Oracle" Manuel Gomez Burrierl, CECA (Spanish Bank Federation)

ceca

IBM DB2 Tools: Are you ready for DB2 10?

- Exploit DB2 10 performance savings out-of-the-box
- Optimize Performance Across Multi-Platform Applications
- Lower CPU costs while reducing batch windows
- Higher data availability through simplified recovery operations

DB2 Administration Tool/Object Compare 10.1 extends the value of DB2 10 with new capabilities that allow DBAs to quickly exploit DB2 10 features like schema evolution. Reduces the overhead of many routine tasks.

DB2 Sort 1.1 lowers the cost of DB2 Utility sort processing by exploiting advanced features of System z and z/OS while optimizing overall system efficiency. Significantly reduces batch windows. *Tivoli OMEGAMON XE for DB2 Performance Expert 5.1* extends its insight into distributed workloads and offers a robust infrastructure to support DB2 10 subsystem consolidation, with lower monitoring overhead. The recommended performance monitor of DB2 10!

QMF 10 delivers built-in visualizations and reports that dramatically extend the value to end users. A new metadata layer simplifies the process to understand and create reports.

DB2 High Performance Unload 4.1 reduces the cost of extracting DB2 10 data with support for TCP/IP Pipes and the new internal format as well as a new native XML data unload capability.

Roadmap to Exploit DB2 10 for z/OS Accelerate your ability to leverage compelling DB2 10 features

Administer DB2 Performance Savings

Optimize Dynamic Infrastructure Performance

Drive DB2 Efficiency and Productivity

Recover DB2 Advanced Technology

Accelerate Time to Value

Administer DB2 10 Performance Savings

DB2 Administration Tool 10.1 Exploitation

- Drive immediate DB2 10 out-of-the-box Performance Savings
- Exploit DBA-managed Performance Improvements
 - Include additional Columns in Indexes to Exploit Index Only Access
 - Convert LOBs to in-line to boost performance

Extend Administration Capabilities

- Manage new Security models
- Reduce Schema change overhead
- Recover from Access Path regressions
- Manage Autonomic Statistics collection

• Time Travel with Temporal Data – "as of"

- Record changes in history System Time
- Define, update and query events in past or future Business Time
- Browse Temporal Data "as of" a point in time with DB2 Table Editor 4.3

DB2 Admin Tool 10.1 Include Index non-key Column

Optimize Dynamic Infrastructure Performance

OMEGAMON XE for DB2 Performance Expert 5.1 Exploitation

Extended Insight

- Surface DB2 for z/OS end-to-end response time metrics
 - > Visibility to **all** the components that make up end-user response time
 - Facilitates platform-agnostic identification of response time bottlenecks
 - > Enables near-instantaneous response to and prevention of application slowdowns
- Leverages Tivoli Enterprise Portal GUI
- Summary SQL Reporting
- Manage thousands of Threads
- Support new DB2 10 Monitoring Data
- Lower Monitoring Overhead

OMEGAMON DB2 PE 5.1 Extended Insight Zoom into selected workload and see the TOP SQL list

OMEGAMON DB2 PE 5.1 Extended Insight Select Static or Dynamic SQL and zoom into SQL details

Corporation

Drive DB2 10 Efficiency & Productivity

DB2 Automation Tool 3.1 Exploitation

Autonomic Statistics

- Exploit real-time, sampling driven Statistics collection
- Invoke RUNSTATS with new Profile option
- Interface with existing Job Schedulers

FlashCopy Image Copy

- Reduce Batch-windows
- Reduce CPU consumption with Storage-based Backups
- Drive improved Recovery Time Objectives

Avoid Unnecessary Reorgs

- Set REORG thresholds based on DB2 10 Best Practices
- Detect when Indexes are insensitive to Clustering
- Avoid REORGs for poorly structured Indexes

Exploit Online Reorgs with DB2 Utilities Enhancement Tool 2.1

- Define policy to cancel Threads immediately before Switch Phase
- Exploit REORG Force option to eliminate Drain Failures
- No changes required to REORG Jobs

DB2 Automation Tool 3.1 Exceptions CLUSTERSENS and HASHACCESS

Drive DB2 9 & 10 Efficiency & Productivity

DB2 Sort 1.1

- Significant CPU and Elapsed Time reduction in Sort
 - LOAD, REORG, RUNSTATS, REBUILD INDEX, CHECK INDEX, CHECK DATA
 - Presort from DB2 Utilities Enhancement Tool for LOAD REPLACE
- Unique API to allow authorized utilities to invoke the sorting software
- Valuable for customers with large amount of data and aggressive SLA's

Internal Format for up to 4x Load Performance Improvements

- DB2 UNLOAD & LOAD Utilities
- DB2 High Performance Unload 4.1
- Exploit with DB2 Utilities Enhancement Tool 2.1 Constant & Valuelf Options

Unload and Load DB2 Data via USS Pipes & TCP/IP

- DB2 UNLOAD & LOAD Utilities
- DB2 High Performance Unload 4.1

Fast XML Data Unload

DB2 High Performance Unload 4.1

DB2 Sort 1.1 Performance Improvements

Customers using DB2 Sort 1.1 may see

- Up to 30% in reduction of elapsed time *
- Up to 50% reduction of CPU *
- Up to 30% zIIP offload of remaining CPU *

- IBM DB2 Utilities where you'll see performance benefits
 - LOAD, REORG, RUNSTATS, REBUILD INDEX, CHECK INDEX, CHECK DATA
 - DB2 Utilities Enhancement 2.1 Tool LOAD Presort

Workloads that may benefit from utility sort processing and DB2 Sort 1.1

- Highly-transactional workloads performing lots of insert, update, delete operations requiring RUNSTATS and REORG
- Applications such as data warehousing applications that are performing frequent or large volumes of loading data requiring LOAD and REBUILD INDEX
- Eliminate many Sort Capacity Exceeded errors

Recover DB2 10 Advanced Technology

DB2 Recovery Expert 2.2

- Exploit FlashCopy Image Copy
 - Take Consistent Online Image Copies in seconds
 - Reduce CPU and Batch-windows
 - Improve Recovery Times
 - Automate Recovery Jobs
 - Native EMC Storage-based copies
- Exploit RECOVER BACKOUT for faster recoveries

DB2 Log Analysis Tool 3.2

- Undo and Redo Temporal Data
- Support FlashCopy Image Copy
- Support all new DB2 10 Log changes

Further Exploit FlashCopy Image Copy

- DB2 Administration Tool 10.1
- DB2 Automation Tool 3.2
- DB2 Change Accumulation Tool 2.1
- DB2 High Performance Unload 4.1

DB2 Recovery Expert 2.2 FlashCopy and Snap Image Copies

Jump into DB2 10! The water's fine.

DB2 V8 DB2 9 DB2 10 Key Questions are WHEN? and HOW?

Accelerate DB2 10 Time to Value

DB2 Cloning Tool 2.2

- Exploit Storage-based copies to drastically reduce CPU and outages
- Create Subsystem and Object Clones to test DB2 10 with minimal effort
 - Automatically reduce number of Data Sharing Members
 - Convert Data Sharing to non-Data Sharing
 - Create Subsystem Clone from System Level Backup
 - Mask sensitive production data
- Supports native IBM, EMC and Hitachi Storage-based copies

DB2 Query Monitor 2.3

Track SQL Performance before and after Migration

DB2 Path Checker 4.1

- Identify potential Access Path regressions
- Export SQL to Optim Query Workload Tuner or Data Studio for tuning
- Save packages with DB2 9 Plan Management before DB2 10 Migration

DB2 Bind Manager 2.4

- Identify and Free unused Packages
- Reduce Bind impacts

IBM InfoSphere Optim solutions

Managing data throughout its lifecycle in heterogeneous environments

IBM InfoSphere Optim Test Data Management Solution

Create "right-size" production-like environments for application testing

Test Data Management

Requirements

- Create referentially intact, "right-sized" test databases
- Automate test result comparisons to identify hidden errors
- Shorten iterative testing cycles and accelerate time to market

Benefits

- Deploy new functionality more quickly and with improved quality
- Easily refresh & maintain test environments
- Reduce storage and operational costs

IBM InfoSphere Optim Data Growth Solution

Data Growth

Manage data growth and improve performance by intelligently archiving historical data

Requirements

- Archive, manage and retain application data according to business policies
- Minimize downtime during application upgrades
- Consolidate application portfolio and retire legacy applications

Benefits

- Reduce hardware, storage and maintenance costs
- Streamline application upgrades and improve application performance
- Safely retire legacy & redundant applications while retaining the data

IBM InfoSphere Guardium Data Redaction

Protect sensitive unstructured data in documents and forms

Data Redaction

Before

After

Requirements

- Protect unstructured data in textual, graphical and form based documents
- Control data views with user role policies
- Automate batch workflow process with optional human review

Benefits

- Prevent unintentional data disclosure
- Comply with regulatory and corporate compliance standards
- Increase efficiency and reduce risk via automation

© 2011 IBM Corporation

IBM InfoSphere Guardium

Database Protection and Compliance Made Simple

Requirements

- Maintain a trusted information supply chain by protecting sensitive data from unauthorized access or changes
 - In 2010 92% of compromised records came from DB servers
- Validate compliance with regulatory mandates
- Minimize operational costs

Benefits

- Secures high-value databases by continuous monitoring and protecting against threats from legitimate users and potential hackers
- Streamlines compliance processes with automated and centralized controls; slashing compliance costs

Guardium Database Activity Monitoring

- Non-invasive architecture
 - Outside database
 - Minimal performance impact
 - No DBMS or application changes
- Cross-DBMS solution
- 100% visibility including local DBA access

- Enforces separation of duties
- Does not rely on DBMS-resident logs that can easily be erased by attackers, rogue insiders
- Granular, real-time policies & auditing
 - Who, what, when, how
- Automated compliance reporting, sign-offs & escalations (SOX, PCI, NIST, etc.)
