INTRODUCING – IBM RATIONAL TEAM CONCERT

Imagine if you could:

- **Collaborate in real time in the context** of the work you are doing, especially in globally diverse environments
- Provide visibility into **accurate project health information** drawn directly from actual work
- Automate traceability and auditability by **managing artifacts and their relationships** across the lifecycle
- Provide **customizable process design and enactment** through rule-based process guidance

All this and more is enabled by IBM Rational Team Concert, a collaborative development environment that includes integrated source control, work item and build management. IBM Rational Team Concert enables software innovation through collaboration.

This proof of Technology will show how IBM Rational Team Concert can deliver value to a project team in days not weeks through intuitive user interfaces, low maintenance administration and true out of the box processes that require simple configuration, not huge customisation.

- **Real time, in-context team collaboration :** Make software development more automated, transparent and predictive
- **"Think and work in unison" :** Integrated source control, work item and build management
- **Assess real-time project health :** Capture data automatically and unobtrusively
- **Automate best practices :** Leverage out-of-the-box or custom processes to accelerate team workflow

OBJECTIVE

The objective of this session is to demonstrate through an interactive, hands-on experience, the power of collaborative development enabled by IBM Rational Team Concert

DELIVERY

Attendees will work together as a team to learn key concepts and use major capabilities. Each attendee will work on a laptop or IBM workstation for the day. Workshop documentation is yours to keep after the event for further reading and reference.

AUDIENCE

This Proof of Technology is specifically designed for software developers and team leads, with some applicability to software managers and project managers. No prerequisite knowledge is required, although it would be helpful if the attendee has some familiarity with Eclipse-based environments.

AGENDA

Introduction to Rational Team Concert	Module 5 Further Software Configuration Management Operations
Module 1 Setting up the Team	Module 6 Build Automation and Continuous Integration
Module 2 Planning Your Work	Module 7 Exploring Change and Traceability
Module 3 Keeping Track of All Our Work	Module 8 Ready for Release ? Tighten the Process
Module 4 Creating, Sharing and Managing File Content	Module 9 Visibility : Dashboards to Share Real-time Information

COST

There is no cost to attend the event and complimentary tea/coffee during the morning and afternoon and a buffet lunch are provided. However, attendees are responsible for their own travel costs to reach the event.

LOCATIONS AND DATES

23rd August – Hursley, Winchester

27th September – Hursley, Winchester

12th October – Southbank, London

20th October – Manchester

22nd November – Southbank, London

6th December – Southbank, London

Note that the 12th October event will be part of the second day of the IBM Rational UK Innovate Conference, for which the main conference event takes place at the Grange Hotel, St Pauls, London. For further information go to :
