David France IT Director, Honda Racing F1 Team

Managing Change in the Fast Lane

David France, IT Director

www.HondaRacingF1.com

Who we are

- Member of the exclusive formula one "club"
 - A global shop window
- Highly competitive environment
 - Performance improvements are measured in terms of 1,000ths of a second
- Technology reliant
 - Pushing technology for competitive advantage (materials, ICT, etc.)
 - But not "bleeding" edge
- Secretive and security conscious

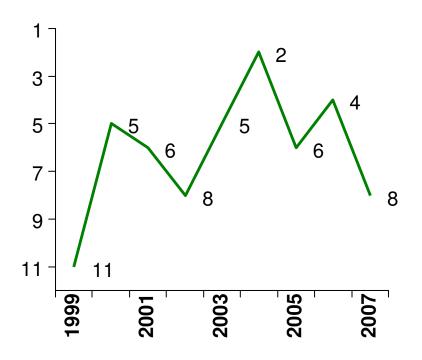

A brief history of the team

notable facts

- Founded in 1997 (acquired the Tyrell Racing team)
- British American Tobacco, Craig Pollock and Adrian Reynard
- Honda became joint shareholder with BAT in December 2004
- Honda became sole owner in December 2005
- The Power of Dreams

championship positions

The Power of Dreams

- "Since childhood, my dream was to become a champion in World automobile racing with a machine I had made myself"
- "If there is no racing, there is no Honda."
- Soichiro Honda
- •1906-1991

- Honda dominated Formula
 One in the 1980s
 supplying engines to the
 Williams & McLaren teams
 - 5 drivers championships
 - 6 constructors championships
- Our dream is to achieve that level of success again

The Honda Racing F1 Team

- Operate from
 - High tech. purpose-built factory in Brackley
 - Sophisticated engineering manufacturing plant
 - •2 wind tunnels
 - Race tracks around the world
- We have
 - Over 650 staff
 - Plus 50 Honda engineers
- •A light engineering business
 - · With a "mobile" front office
- Everyone is passionate about motor racing!

Drivers of change

- FIA regulations
 - "Compliance"
- Car performance
 - Competitiveness
- Race season
 - Calendar of events
- Honda integration
- Change is always "time driven"

To be successful in Formula 1

- You must be able to design, build, test and race a car... that has the right balance between speed, reliability and safety
- and
- be able to develop and improve the performance of the car during the race season...
 - at a faster pace than the competition

The Competitive Environment

- A contest between
 - FIA regulators trying to slow the cars down
 - F1 engineers trying to make the cars go faster
- Technical regulations
 - Extensive & voluminous
 - But open to interpretation in many areas
- Competitive advantage can be gained by
 - Responding well to major changes every 2-3 years
 - Exploiting the "grey areas"

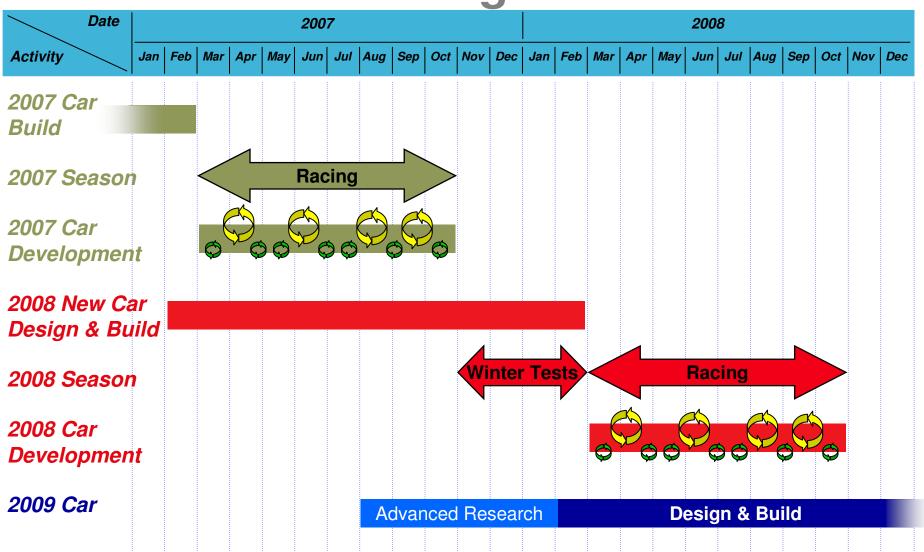

How to improve the car

- Replication
 - Observation
 - "Similar" developments
- Evolution
 - Rapid, continuous development
- Revolution
 - Innovation
- Main focus: Aerodynamics
 - Engines are "homologated"
 - Single tyre supplier

Outline Scheduling

Some facts about the RA107

- We build 7 or 8 chassis pa for testing & racing
- More than 80% of the car is designed & built in-house
- 30,000 aero parts drawn pa
- 20,000 car parts drawn pa
 - Including revisions
- 10,000 components in the race car BoM
 - 3,500 drawn by Honda
- Manufacture over 250,000 components each year
- Relentless drive to develop & improve the car

End to end process flow

Rapid car development needs IT

- CFD systems that
 - Enable fast analysis of models
- FEA systems that
 - Stress analysis of component designs / concepts
- CAD systems that
 - Supports rapid iterations in part design
- PDM systems that
 - Manage multiple part versions
- ERP systems that
 - Provide traceability
- Processes that are
 - Simple & efficient

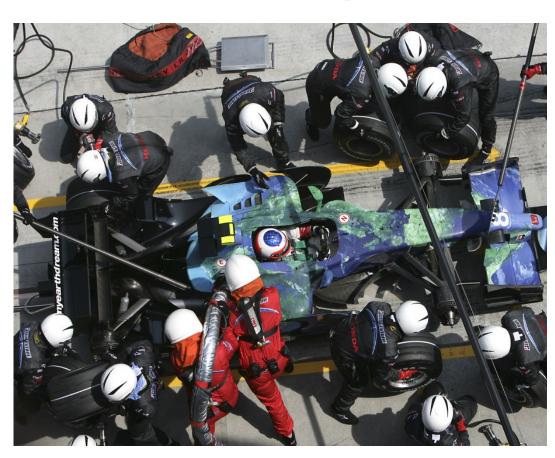

Culture to facilitate the process

- No blame culture
 - Fear of failure can limit willingness to experiment
 - Risk taking is allowed
- Learning environment
 - Plan → Do → Review
 - Sharing information
- Competitiveness
- But you need to know ...
 - When to stop pursuing unproductive lines of development
 - When to revisit previously discarded concepts

Strategies to handle change

- Involvement in operational planning
- Aligning IT changes to season schedule
- Driving projects with IT involvement
- Advance planning & preparation
- Change priorities when needed
- Teamwork

"The ability to complete quick change is a pre-requisite to success in Formula One"
