IBM Software
VisualAge Pacbase

**Monthly Newsletter
January 1998**

New Functionalities

. *VisualAge Pacbase 2.0*   *- Client/Server system develop.*

Number : 016035   *Platform : ALL*

Communication monitor MQ Series: parameterization of the waiting time for the next query.
The WAITINT=XXXX option will allow you to modify the waiting time used for the MQ Series communication in a Folder monitor.
The default value is 1000 seconds.

. *C/S Facility - Graphic Clients 2.0*   *- Generation*

Number : 016086   *Platform : ALL*

OCX generation: the compilation of proxies can be started from the generation window, after the generation. This window includes a button which triggers the compilation of generated sources.

Note: the existing proxies must not be compiled this way. In this case you must compile them manually in Visual C++, like before.

Corrected Bugs

. **VisualAge Pacbase 2.0**   **- Client/Server system develop.**

       Number : 016048   **Platform : ALL**

Communication monitor: abend on the cursor position in the temporary file which is not initialized in some cases.

. **VisualAge Pacbase 2.0**   **- Pacbase Access Facility**

       Number : 015760   **Platform : ALL**

The formatting of transactions to the PAF table format was not correct as far as U.E.Os are concerned. Corrected.

       Number : 015913   **Platform : ALL**

UPDP :
In english, some table codes were not recognized so the update was not possible.

. **VisualAge Pacbase 2.0**   **- Batch Procedures**

       Number : 015744   **Platform : ALL**

Multi-level extraction: not to extract the fields data structure and transaction codes on the Segment because they are on the description screen.

       Number : 015760   **Platform : ALL**

The formatting of transactions to the PAF table format was not correct as far as U.E.Os are concerned. Corrected.

       Number : 015913   **Platform : ALL**

UPDP :
In english, some table codes were not recognized so the update was not possible.

. *VisualAge Pacbase WorkStation 2.0*   *- Compatibility*

Number : 016145   **Platform : ALL**

ILRTF: Titles in the table of contents.

The titles that were following a page break were incorrectly indicated in the table of contents. This is corrected.

WARNING: In order that this modification be taken into account, the PDM facility must be reinstalled on Host.

. *VisualAge Pacbase WorkStation 2.0*   *- Non formatted description*

Number : 016072   **Platform : ALL**

TEXTE, DESCL: Loading screen fonts under Windows/NT.

The screen fonts are correctly loaded under Windows/NT

. *VisualAge Pacbase WorkStation 2.0*   *- Graph*

Number : 012179   **Platform : ALL**

Selection of a free line

Up to now, a selection by mouse drag could not completely select a free line: the end points could not be moved.
This has been corrected.

. VisualAge Pacbase WorkStation 2.0   - RTF Local prints

Number : 016089   Platform : ALL

ILRTF: display of the fisrt characters on text lines

The user is allowed not to define margins for texts in a PDM Document. ILRTF considered this as an error, which had the result not to print the first characters on the lines.
This behavior is avoided by specifying that 0 is the default value when no margin is defined.

Number : 016142   Platform : ALL

ILRTF: removing the extra blank page on top of the edition.

The blank page that was printed on top of the documents generated with ILRTF is removed.

Number : 016145   Platform : ALL

ILRTF: Titles in the table of contents.

The titles that were following a page break were incorrectly indicated in the table of contents. This is corrected.

WARNING: In order that this modification be taken into account, the PDM facility must be reinstalled on Host.

. VisualAge Pacbase WorkStation 2.0   - MERISE methodology

Number : 016056   Platform : ALL

Merise: Icons "with attributes" in the MET and MLT and SEP entities

It is now possible to link the following icons "with attributes":
- Phase, in METs
- Event/Result, in MLTs
- Processes, in SEPs
in the same way as the corresponding "without attributes" icons.

. *VisualAge Pacbase WorkStation 2.0*   *- Text*

Number : 016072   *Platform : ALL*

TEXTE, DESCL: Loading screen fonts under Windows/NT.

The screen fonts are correctly loaded under Windows/NT

. *VisualAge Pacbase WorkStation 2.0*   *- Miscellaneous*

Number : 015988   *Platform : ALL*

Chart facility creation

It is possible again to create chart facility description in a Free Entity.

. *C/S Facility - Graphic Clients 2.0*   *- Proxy functionalities*

Number : 015716   *Platform : ALL*

FVP: A second call to the readFirstChildrenFromCurrentInstance action no longer reads the following instances as before but sends the same request as the first call.

Number : 015986   *Platform : ALL*

PVD: Quick Form on the errorManager correct attribute errorList.

. *PACBASE 1.6*   *- Pacbase Access Facility*

Number : 015913   *Platform : ALL*

UPDP :
In english, some table codes were not recognized so the update was not possible.

. *PACBASE 1.6*   *- Batch Procedures*

Number : 015913   *Platform : ALL*

UPDP :
In english, some table codes were not recognized so the update was not possible.

. *WORKSTATION 1.6*   *- Non formatted description*

Number : 016072   *Platform : ALL*

TEXTE, DESCL: Loading screen fonts under Windows/NT.

The screen fonts are correctly loaded under Windows/NT

. *WORKSTATION 1.6*   *- MERISE methodology*

Number : 016056   *Platform : ALL*

Merise: Icons "with attributes" in the MET and MLT and SEP entities

It is now possible to link the following icons "with attributes":
- Phase, in METs
- Event/Result, in MLTs
- Processes, in SEPs
in the same way as the corresponding "without attributes" icons.

. *WORKSTATION 1.6*   *- Text*

Number : 016072   *Platform : ALL*

TEXTE, DESCL: Loading screen fonts under Windows/NT.

The screen fonts are correctly loaded under Windows/NT

New Availabilities
