# IBM Tivoli System Administration for Enterprise IT and Asset Management 7.1

## Overview

Course code	TR540AU	Delivery type	Classroom (Hands-on labs)
Duration	2.0 days	Course type	Public or Private on-site

IBM Tivoli System Administration for Enterprise IT and Asset Management is a hands-on scenario based course designed for individuals who manage Enterprise assets and IT assets. Students will learn System Properties, Logging and Managing Appenders, and Organizations, Sites, and Sets through lecture, instructor demonstration, and labs. Students will use the Domains and Database Configuration applications to create and modify domains and database objects and their attributes. Students will also set up automation through cron tasks, communication templates, actions, notifications, and escalations. Additionally, students will use the Workflow designer application and modify and administer a workflow.

## Audience

System Administrators - This course is designed for individuals who need to manage Enterprise IT and Asset management 7.1.

## Prerequisites

There are no prerequisites for this course.

## Objectives

- X Setup the application environment
- X Configure and Administer the application database
