

IBM Software Group

# DB2 9 (formerly viper) for z/OS and System z

**DB2** Information Management Software

A horizontal decorative bar spanning the width of the slide, composed of various colored segments (green, yellow, red, purple, cyan, and several shades of green) and icons (a camera, a crosshair, a globe, a downward arrow, a grid, and a document).

**ON** DEMAND BUSINESS™

## Topics

- DB2 9 for z/OS
  - Business Insight
  - Cost Savings thru Optimization
  - Business Resiliency
- zIIP and System z
- DB2 tools
- DB2 9 summary

## DB2 9 for z/OS Innovation: Insight

- ✓ **Business Insight**
  - ✓ Hybrid data server: XML and relational
  - ✓ Enhanced SQL
  - ✓ Business Partner improvements
  - ✓ QMF cross-platform work station & web
  
- ✓ **Cost Savings through Optimization**
  
- ✓ **Business Resiliency**

# Capabilities Inside the Engine

***Performance, Performance, Performance***

## SERVER

## CLIENT

SQL(X)

Native storage   Schema Index Functions Utilities

# SQL: Productivity, DB2 family & porting

- XML
- MERGE & TRUNCATE
- SELECT FROM UPDATE, DELETE, MERGE
- INSTEAD OF TRIGGER
- BIGINT, VARBINARY, BINARY, DECIMAL FLOAT
- Native SQL Procedure Language
- Nested compound
- Optimistic locking
- LOB File reference variable & FETCH CONTINUE
- FETCH FIRST & ORDER BY in subselect and fullselect
- INTERSECT & EXCEPT
- ROLE & trusted context
- Many new built-in functions, caseless comparisons
- Index on expression
- Improved DDL consistency
- CURRENT SCHEMA

# Business Partners: Many enhancements

- SHRLEVEL(REFERENCE) for REORG of LOB table spaces
- Online RENAME COLUMN
- Online RENAME INDEX
- Online CHECK DATA and CHECK LOB
- Faster REORG by intra-REORG parallelism
- More online REORG by eliminating BUILD2 phase
- LOB Lock reduction
- Skipping locked rows option
- Online REBUILD INDEX
- Change SCHEMA & VCAT
- Tape support for BACKUP and RESTORE SYSTEM utilities
- Recovery of individual tablespaces and indexes from volume-level backups
- Enhanced STOGROUP definition
- Utility TEMPLATE switching
- Conditional restart: automatic search for appropriate checkpoint
- CLONE Table: fast replacement of one table with another
- Buffer management by WLM
- Global query optimization
- Generalizing sparse index and in-memory data caching method
- Optimization Service Center
- Autonomic reoptimization
- Logging enhancements
- LOBs Network Flow Optimization
- Faster operations for variable-length rows
- NOT LOGGED table spaces
- Index on expressions
- Universal Table spaces
- Partition-by-growth table spaces
- APPEND option at insert
- Autonomic index page split
- Index page sizes 8K, 16K, 32K
- Support for optimistic locking
- Faster and more automatic DB2 restart
- MODIFY RECOVERY enhancements
- RLF improvements for remote application servers such as SAP
- Preserving consistency when recovering individual objects to a prior point in time
- DECIMAL FLOAT, BIGINT
- VARBINARY, BINARY
- TRUNCATE TABLE statement
- MERGE statement
- FETCH CONTINUE
- ORDER BY and FETCH FIRST n ROWS in sub-select and full-select
- ORDER OF extension to ORDER BY
- Various scalar functions
- XML support in DB2 engine
- Native SQL Stored Procedures, able to use zIIP
- SELECT FROM UPDATE/DELETE/MERGE
- Enhanced CURRENT SCHEMA
- IPv6 support
- Unified Debugger
- Network Trusted Context
- Database ROLES
- Automatic creation of database objects
- Modify early code without requiring an IPL
- Utilities CPU reduction
- Temporary space consolidation
- . . .

TCO Reduction

Continuous Availability

Performance

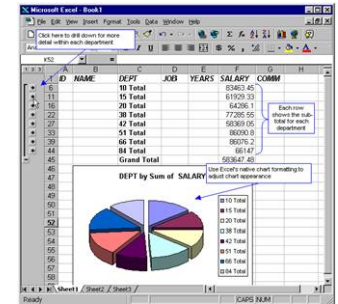

Scalability

SQL

Portability

# QMF

- Drag and drop querying, reporting and analytics
- Executive dashboards and data visualization
- Enhanced OLAP with DB2 Cube Views
- Reengineered cross-platform development environment
- New security model for access control & personalization
- Enabled for WebSphere Application Server

QMF for WebSphere

# DB2 9 for z/OS Innovation: Cost

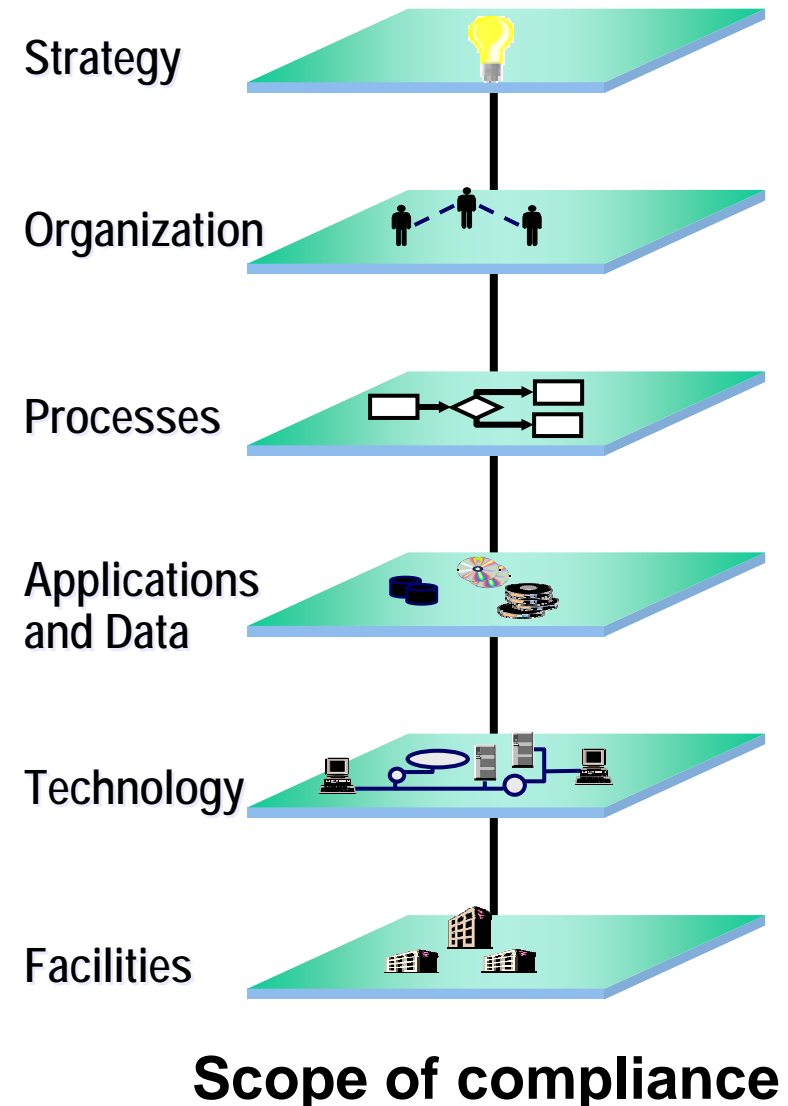

- **Business Insight**
- **Cost Savings through Optimization**
- **Security and Regulatory Compliance**
- **Performance improvements**
- **Synergy with System z**
- **Query enhancements**
- **Business Resiliency**

# Regulatory Compliance Characteristics

- **Mandatory:** Agencies may require qualification and/or adherence to specific standards
- **Non-directive:** Usually do not specify exact steps needed to comply
- **Non-certifiable:** Agencies generally do not approve, recommend, or validate solutions
- **Continuously changing:** Regulations, their interpretation, and their codification into corporate policies change frequently
- **Increasing IT impact:** While few apply directly to IT, regulations increasingly affect IT systems
- **Intrinsically related to risk:** Agencies now recommend a risk-based management approach

## Regulatory Compliance in DB2 9 for z/OS

- Key implementations
- Roles
- Network Trusted Contexts
- Improved auditing
- Data Encryption
- Secure Socket Layer

# DB2 9 for z/OS

## Performance Improvements

- CPU reductions in LOAD and REORG
- LOB performance, function, scalability
- SQL and optimization improvements
- Use zIIP in remote native SQL Procedure Language
- Improved varying length performance
- Sequential disk access

# Query Enhancements

- SQL enhancements: INTERSECT, EXCEPT, RANK, caseless comparisons, cultural sort, FETCH FIRST in fullselect ...
- Index improvements: index on expression
- Improved Optimization statistics: Histogram
- Optimization techniques
  - Cross query block optimization
  - Generalize sparse index & in-memory data cache method
  - Dynamic Index ANDing for Star Schema
- Analysis: instrumentation & Optimization Support

## DB2 9 for z/OS Innovation: Resiliency

- **Business Insight**
- **Cost Savings through Optimization**
- **Business Resiliency**
  - **Availability: Database on Demand**
  - **Scalability**
  - **Usability**

# Online Schema Evolution → Database Definition On Demand

- Online reorganization with no BUILD2 phase
- Fast replacement of one table with another
- Table space that can add partitions, for growth
- Improve ability to rebuild an index online
- Rename column and index
- Modify early code without requiring an IPL
- Alter table space and index logging
- Create & alter STOGROUP SMS constructs

# Scalability

- Insert performance APPEND INDEX LOG  
INDEX on expression, 8K, 16K, 32K
  - Randomized index key
  - Log Latch contention & spin relief, archiving
  - Not logged table space
- Partitioned table with segmented space
- Memory improvements 64 bit address space

# Usability

- Application Programming

- Backup and restore objects, use tapes
- Optimization Service Center
- INDEX page split
- Buffer pool management by WLM

# SOA and Information on demand

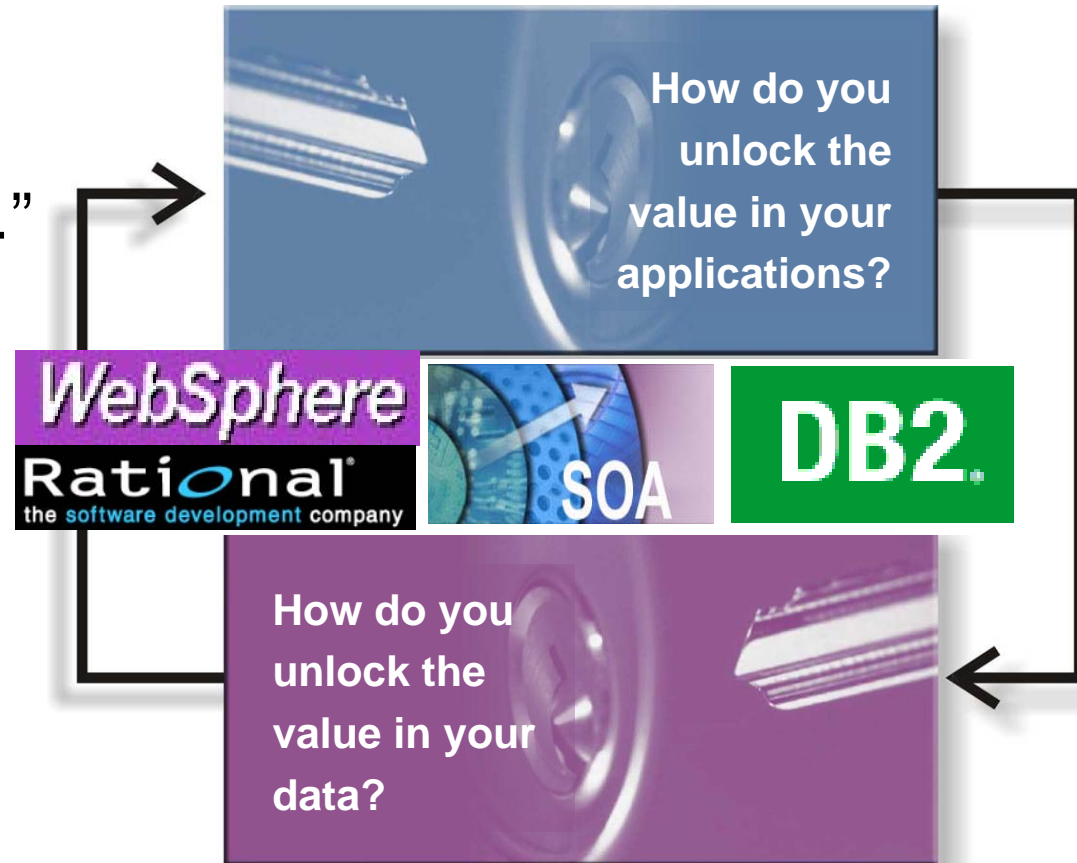

## *What the market is telling us*

Huge investment in traditional programs & data

- “200 Billion lines of COBOL ...”
- “more than a trillion dollars’ worth of legacy mainframe code.”

The key to unlocking value:

- Unstructured and structured
- Easy to find & use, tailored, cost-effective & integrated

**It's time to unlock the value of these assets**

## System z Synergy & DB2 9

- System z9 Integrated Information Processor (zIIP) Enterprise Class & Business Class
- Enhanced Cryptography
- Channels (4 Gb & MIDAW)
- Faster Processors
- Up to 54 Processors EC
- More memory, better value; 64 bit virtual storage
- z/Architecture new instructions
- Parallel Sysplex

- IPv6
- SSL
- Java
- Decimal float
- Backup & restore
- Security
- Unicode collation
- Compression
- System z Application Assist Processor (zAAP)
- WLM enhanced ...

# Technology Evolution with Mainframe Specialty Engines

**★ Building on a strong track record of technology innovation with specialty engines, IBM intends to introduce the System z9 Integrated Information Processor**

Centralized data sharing across mainframes

**Internal Coupling Facility (ICF) 1997**

**Integrated Facility for Linux® (IFL) 2001**

Support for new workloads and open standards

**System z9 Application Assist Processor (zAAP) 2004**

Incorporation of Java™ into existing mainframe solutions

**IBM System z9 Integrated Information Processor (IBM zIIP) 2006**

Designed to help improve resource optimization for eligible data workloads within the enterprise

# DB2 V8 exploitation of IBM zIIP can add value to database workloads

- Portions of the following DB2 for z/OS V8 workloads may benefit from zIIP\*
  1. ERP, CRM, Business Intelligence or other enterprise applications
    - Via DRDA<sup>®</sup> over a TCP/IP connection

2. Data warehousing applications\*
    - Requests that utilize complex star schema parallel queries
  3. DB2 for z/OS V8 utilities\*
    - Internal DB2 utility functions used to maintain index maintenance structures
- **Utilization of the zIIP is expected to be transparent to the application.**
    - No anticipated changes to applications that access DB2 for z/OS V8 data

\* The zIIP is designed so that a program can work with z/OS to have a portion of its enclave Service Request Block (SRB) work directed to the zIIP. The above types of DB2 V8 work are those executing in enclave SRBs, of which portions can be sent to the zIIP.

# System z9 EC helps address corporate data goals

- **Simplify infrastructure**

- Capacity on demand – can add memory, capacity, I/O – with minimal downtime
- Leadership capabilities to help improve access to data \*
  - Dedicated I/O processor
  - 80% more bandwidth than the IBM eServer zSeries 990 (z990)
  - 40% more FICON® channels than the z990
  - Up to 56% reduction in response times and up to 125% improvement in I/O throughput using MIDAW facility

- **Helping lower risk of downtime**

- Parallel Sysplex clustering and GDPS®
- Superior access to applications via comprehensive protection from unplanned and planned outages
  - Enhanced book availability
  - Redundant I/O interconnect
  - Enhanced driver maintenance

- **Helping address compliance**

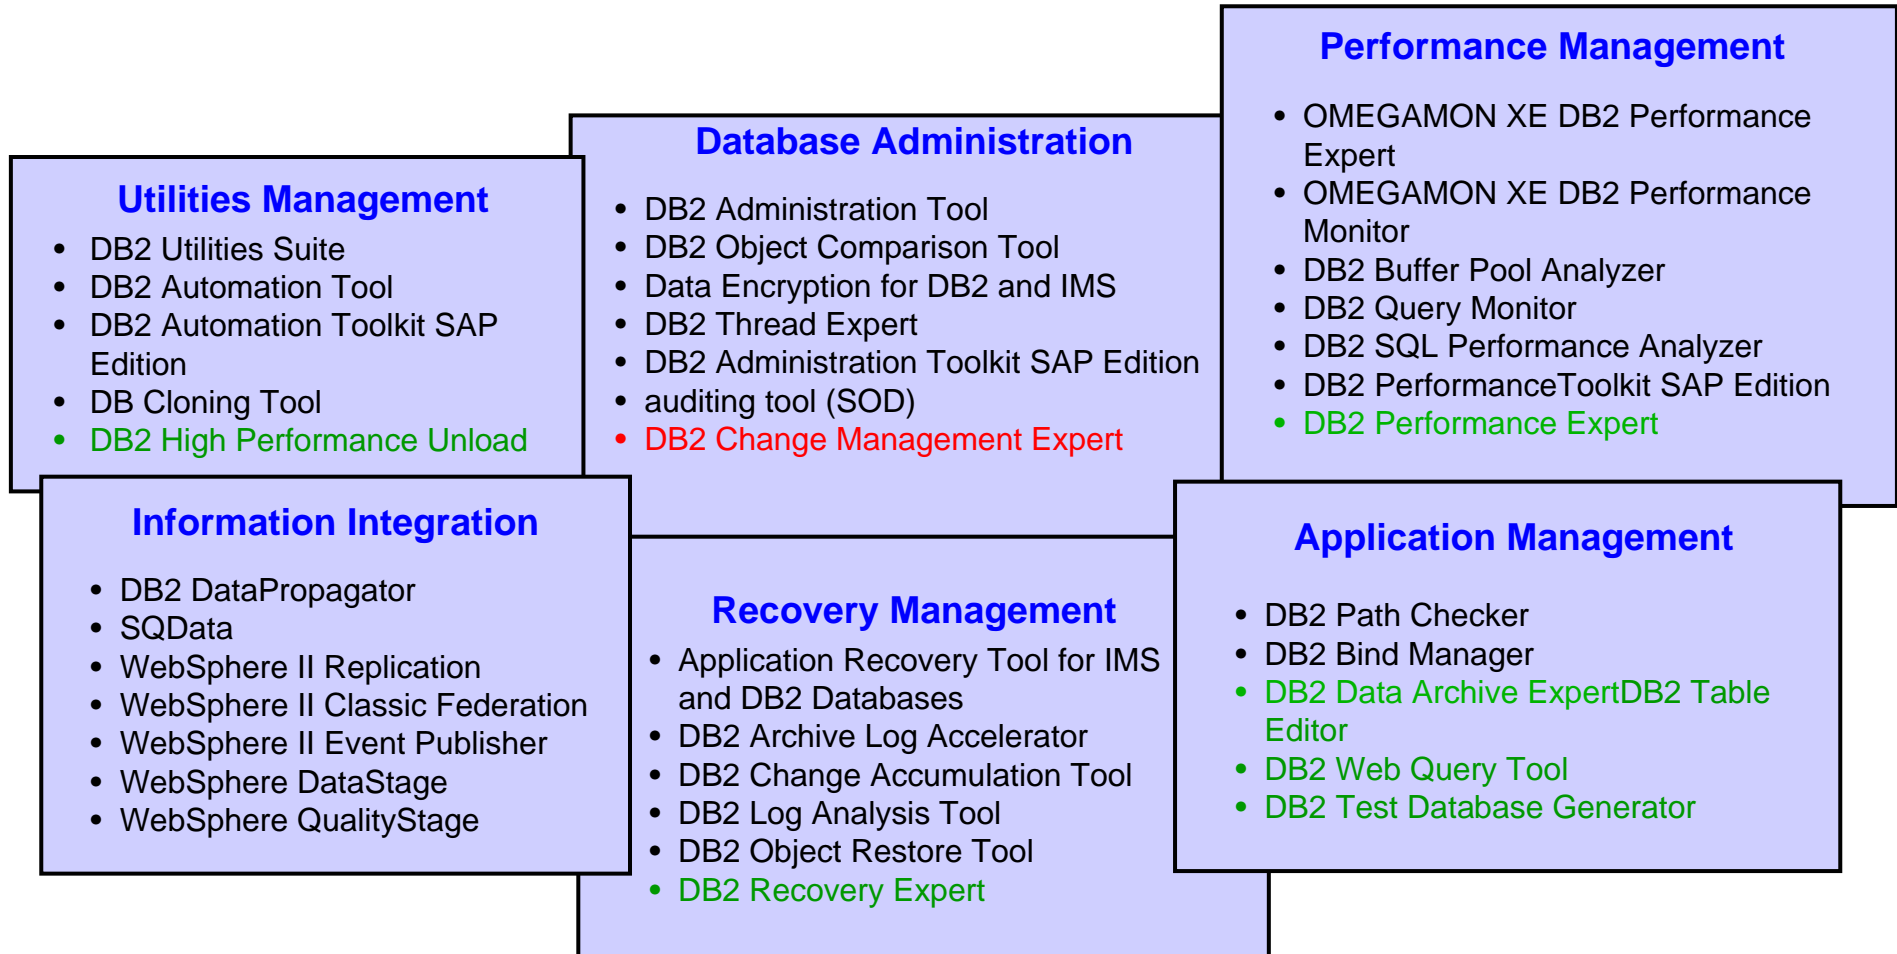

- Industry certifications and regulatory compliance
- Advanced encryption support (AES)
- Up to 6,000 SSL handshakes/sec. on new configurable cryptographic feature\*\*
- Protecting data you share outside your organization

\*Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the numbers stated here.

\*\* The SSL rate was achieved with a System z9 with four processors and two Crypto Express2 Cards (one feature, both configured as accelerators). When a System z9 with four CPs and both PCI-X adapters on a Crypto Express2 feature are configured as accelerators, the Crypto Express2 feature is designed to perform up to 6,000 SSL handshakes per second.

# Today's IBM DB2 Tools for z/OS and Multiplatform Product Portfolio

**Day 1 V9 Support !**

Available on zSeries (shown on chart in black)  
 Available on zSeries and multiplatforms (LUW)  
 Currently available only on multiplatforms (LUW)
