Hi, I'm Gene Ratzlaff I am at SuperComputing 07 and I am demonstrating DCV Deep Computing Visualization.

What we have here today is a demonstration of our ability to remote terminals to a rack mounted server and the ability to collaborate between multiple clients. What I have here is a demonstration of a Graphics application running on a rack mounted server 3755 and Collaboration between 2 end stations and the capability of bringing 3D to those end stations.
