3.IP Communications Applications

4.IP Communications benefits

Market Shift Has Begun - Voice As An Application

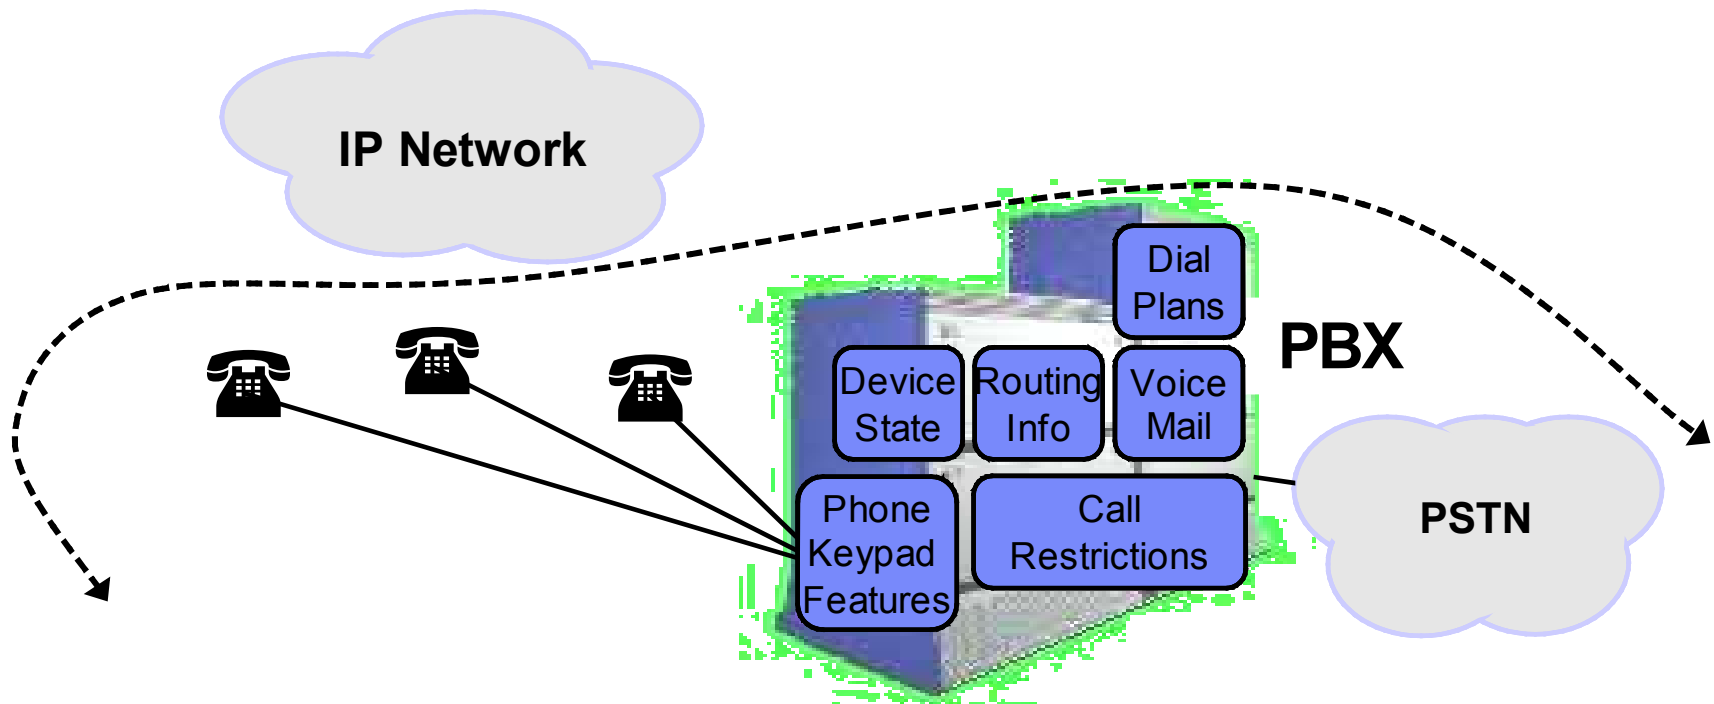

Sources: Yankee Group, IntelliCom Analytics

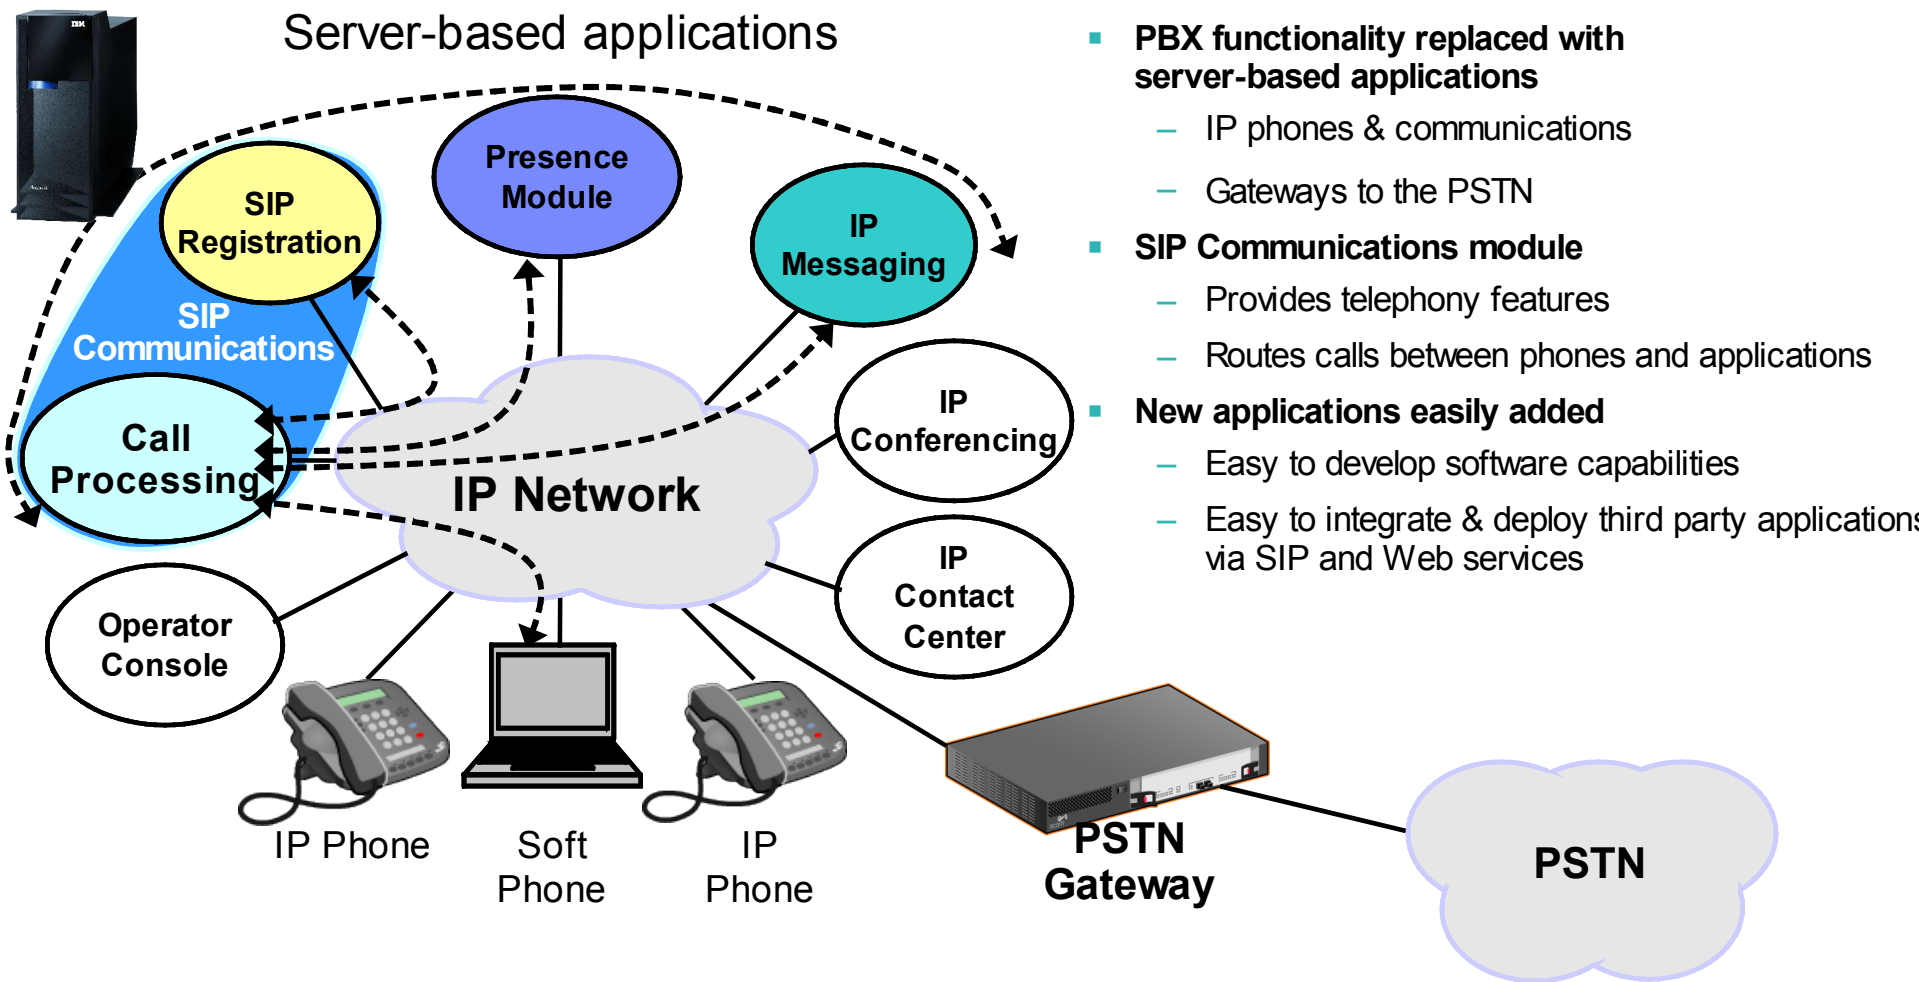

IP Telephony – moving to an application model

Traditional telephony

Often totally independent from the IP network

IP Telephony – moving to an application model

- **PBX functionality replaced with server-based applications**
 - IP phones & communications
 - Gateways to the PSTN
- **SIP Communications module**
 - Provides telephony features
 - Routes calls between phones and applications
- **New applications easily added**
 - Easy to develop software capabilities
 - Easy to integrate & deploy third party applications via SIP and Web services

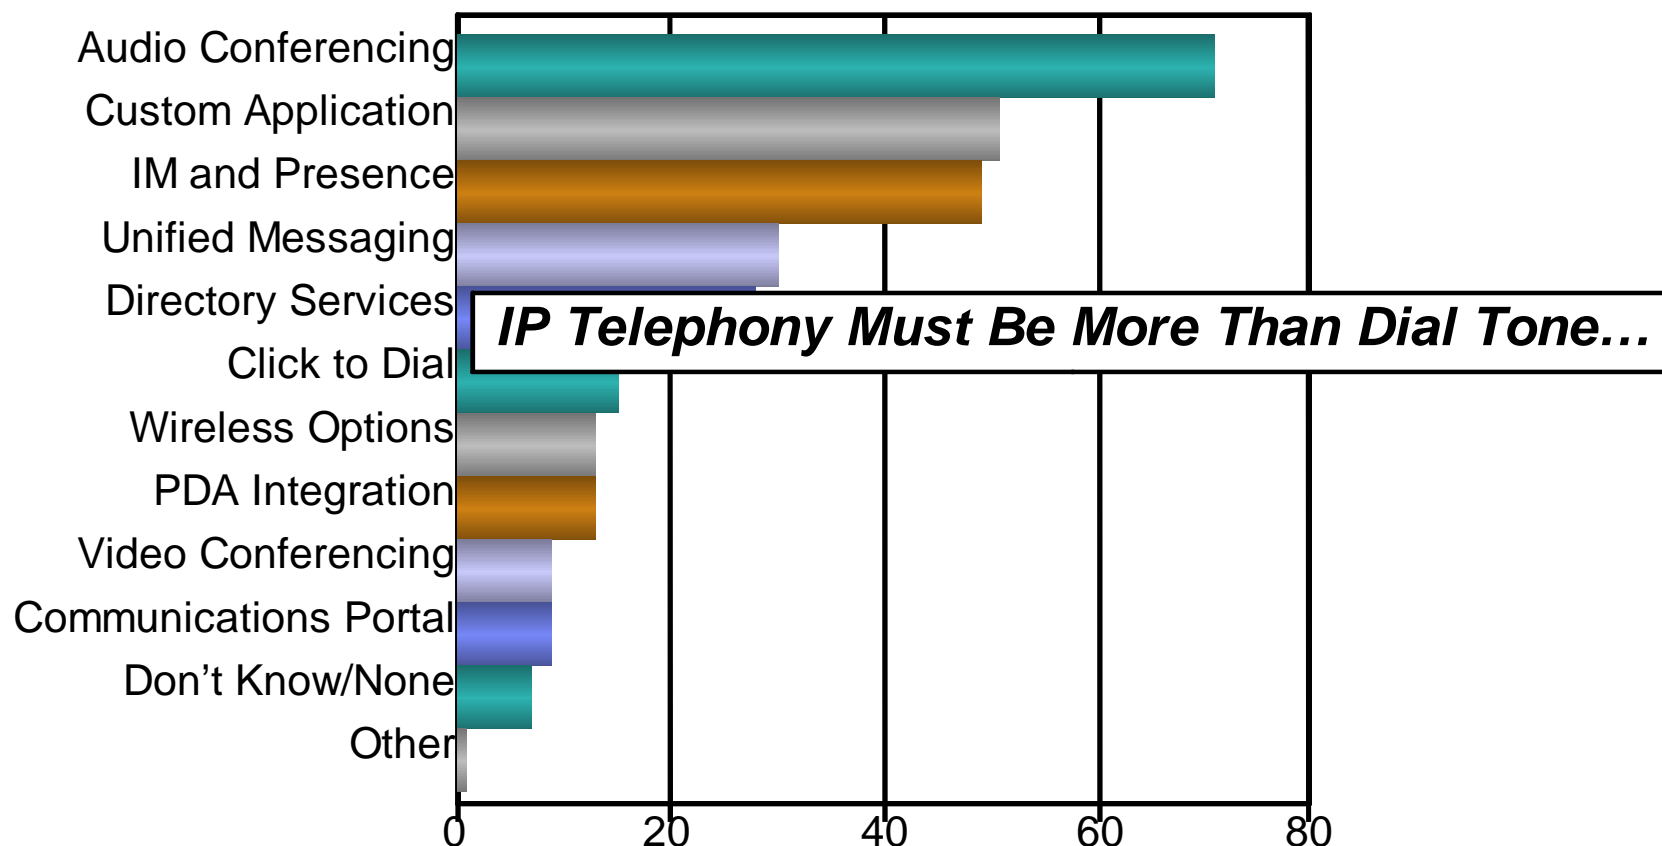

Telephony:

– Just Another Application on the IP Network

What Convergence Applications Are Driving IP Telephony Adoption?

“Which of the following enhanced services or features are being used with the IP PBX?”

What users are looking for from Unified Communications....

Integration of communications control across devices

Common Contact Lists

- Easy to maintain contacts across multiple devices

Media choice

- Simple to respond to communications with alternate media
 - E.g. Click-to-call to respond to email

Presence

- Is someone available now?

Multimedia

- Communicate using multiple media
 - Voice
 - Video
 - IM
 - Desktop share

Unified inbox

- All messages in one place
 - Email
 - Voicemail
 - Fax

Beyond Unified Communications

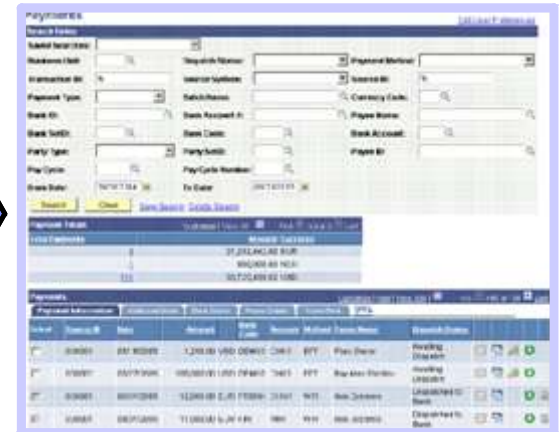

- Integration of telephony, collaboration tools and business applications to drive revenue, improve business processes and increase customer satisfaction

1. IP Changes Communications

2. Open Standards Route to Multimedia: SIP

3. IP Communications Applications

4. IP Communications benefits

Open Standards Route to Multimedia: SIP

A standard for initiating interactive sessions:

Session Initiation Protocol

- Enables multi-vendor deployment of IP Telephony
- Supports communications using multiple media such as video and instant messaging – not just voice
- Can be easily integrated with Web technologies
- Calling based on email-like addressing
- Extremely flexible

Enriched Communications

Multimedia SIP Clients

- Support multimodal sessions
 - Instant Messaging
 - Audio
 - Video
 - Desktop sharing
- Enables workers to communicate more effectively
 - Media appropriate to communication
 - Increases contact and understanding

A single SIP infrastructure can support many different services!

Lotus Integration Functions in IBM/3Com Suite 7.2.5

- **Domino Integration**
 - LDAP for Telephone Directory
 - Voicemail in Email
 - Fax in Email
- **Notes Integration**
 - Click to Dial
- **Sametime Integration**
 - Telephony Presence
 - Click to Dial
 - Click to Conference

Instant Web conference – with telephone integration and moderator controls, chat and desktop sharing capabilities.

Or schedule a web conference in advance, publishing dial in info etc. into form below – participants can just click on ‘join call’ to have their phones dial into published bridge.

The screenshot shows the 'New Meeting' form in the IBM Meeting Center. The form is titled 'New Meeting' and has tabs for 'Essentials', 'People', 'Status', and 'Options'. The 'Essentials' tab is active. The form contains the following fields and options:

- Meeting name:** A text input field.
- Description or other meeting information:** A text area.
- When:** A section with a 'Start Now' checkbox and three date/time pickers: 'Starting date' (1/10/2007), 'Time' (12:15 PM), and 'Duration' (04 1h 00m). A 'Repeat...' button is also present.
- Audio, video, and phone services:** Radio buttons for 'None', 'Computer audio', 'Computer audio and video', and 'Use the phone number provided by my telephone service'. A link 'Get help with these fields' is provided.
- Client ID:** A text input field.
- Client Password:** A text input field.
- Passcode:** A text input field.
- Service Location:** A dropdown menu with 'IP Telephony Service' selected.
- Meeting password:** A text input field.
- Re-type password:** A text input field.

The form is part of a web application with a sidebar on the left containing navigation links like 'New Meeting', 'In Progress Today', 'Scheduled', 'Completed', 'Unlisted Meetings', 'All Meetings', 'My Meetings', 'Recorded Meetings', 'View by Calendar', 'Test Meeting', 'Download Print', and 'Capture'. The top right corner shows the date and time: 'Wed, 1/10/2007 12:34 PM' and 'Logged in as prisme (10)'. The bottom of the browser window shows 'Done', 'Internet', and '100%' zoom.

Applications: IP Call Center

- **Inbound Call Center Application**
 - Planned General Availability : Q2 2007
- **Typical Inbound Call Center applications**
 - Internal sales teams
 - Help desks
 - Support centers
 - Customer service centers
 - Telemarketing response lines
 - Incident response centers
 - Order entry teams
 - Any requirement to route calls to a team of agents with
 - Application integration
 - Supervisor and monitoring functions

Telephony API SDK –

3Com Telephony Software Development Kit

- **Allow ISVs to integrate with telephony applications**
- **Call control and phone configuration capabilities with service oriented web services API (HTTPS, XML, SOAP)**
- **Sample applications in various languages and developer documentation**

▪ **Call Control Functions:**

- Make a Call
- Put a Call on Hold
- Disconnect a Call
- Transfer a Call
- Add party to a conference call

▪ **Phone configuration functions:**

- Set/Clear Do Not Disturb
- Set/Clear Forward to Voicemail
- Call Forward Busy/Ring No Answer/Universal
- Hunt group login/logout
- Mute phone

WELCOME TO THE 3COM OPEN NETWORK!

3Com® is committed to providing the best possible solutions for our customers. We're demonstrating that commitment everyday with superior products and services, and now we're substantiating it even more with a community of technology providers that will add unique value to our solutions.

The 3Com Open Network™ Program, or 3Com|ON™, is dedicated to finding and supporting exciting new solutions, for seamless integration with the 3Com portfolio. It offers a wealth of resources, including training, solution support and testing, innovative marketing, and business development opportunities for our members.

You can be part of this aggressive initiative to build highly flexible networks that take full advantage of today's advanced technologies.

It's simple, so get turned on to 3Com|ON! [JOIN NOW >](#)

Enriched Communications through Application Integration and Multimedia

1. IP Changes Communications
2. Open Standards Route to Multimedia: SIP
3. IP Communications Applications
- 4. IP Communications benefits**

IP Telephony delivers on cost and productivity

Moving from Traditional to IP Telephony can deliver significant benefits

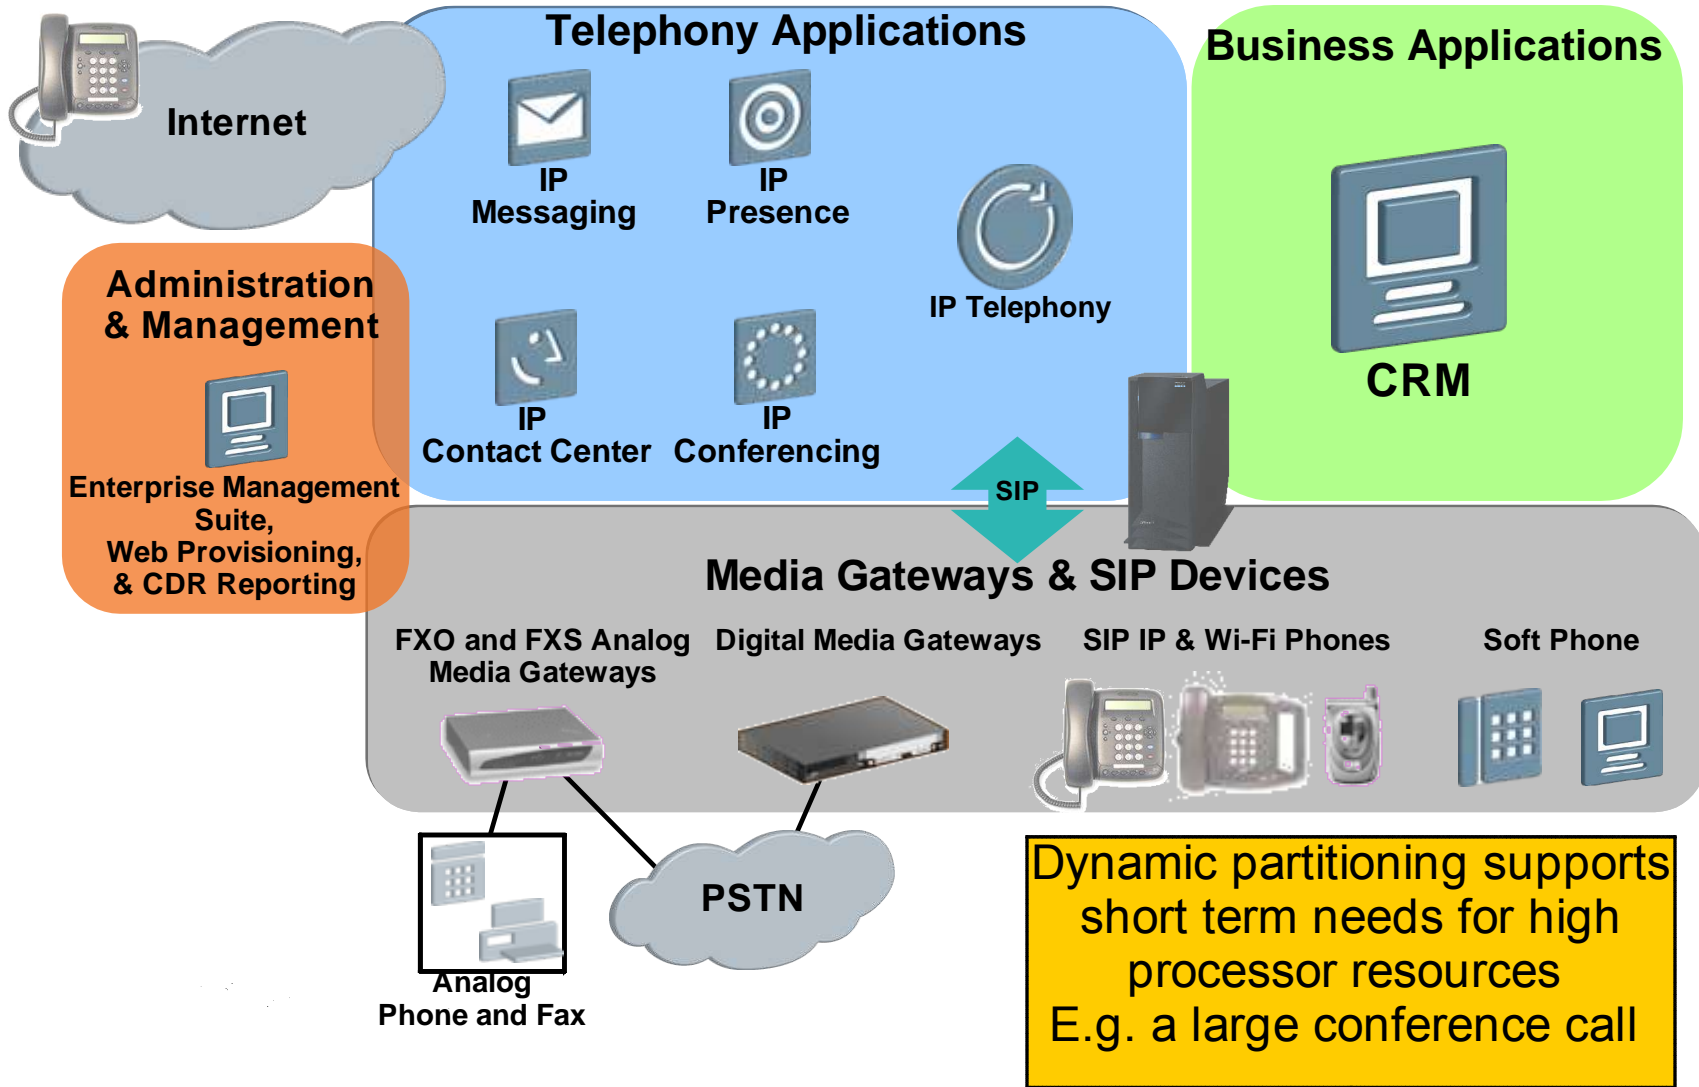

- Reduced costs associated with long distance, voice mail, and conferencing
- Simplified administration
- Reduced construction and maintenance
- Increased employee productivity
- Improved customer service

System i IP Telephony is Powered by 3Com

- > Shared values make a great fit:
 - > Support for Open Standards
 - > Focused on the mid-market
 - > Promise simplicity and integration
- > System i brings core values
 - > Scalability – A complete IP Telephony suite on a single system
 - > Reliability – Legendary uptime, expert support and #1 in customer satisfaction
 - > Integration – With collaboration and business processing apps already on your system

System i IP Telephony Suite

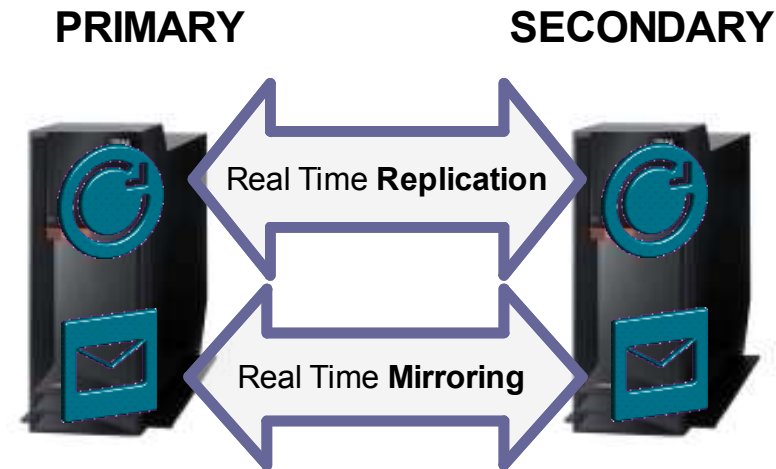

Dynamic partitioning supports short term needs for high processor resources
E.g. a large conference call

High Availability through Application Redundancy

■ Application approach to resilience

- Database replication ensures multiple application instances remain synchronized
 - Hot standby redundant applications that can take over services instantly
 - Critical data replicated or mirrored between servers
 - Gateways provide survivable telephony to enable calling even if contact to server lost
- Application capacity scales with processing resources, memory and hard discs
 - Can grow with the business
 - No forklift upgrades or server replacement
 - Traditional PBX vendors often requires phones to be replaced for larger platforms
- You should always have dial tone....

“In testing fail-over of the VCX, we were frankly astonished that we could keep disconnecting back-up controllers, and phone service continued without skipping a beat.”*

How Does System i IP Telephony Work?

Example: An employee in Oregon calls a Florida colleague

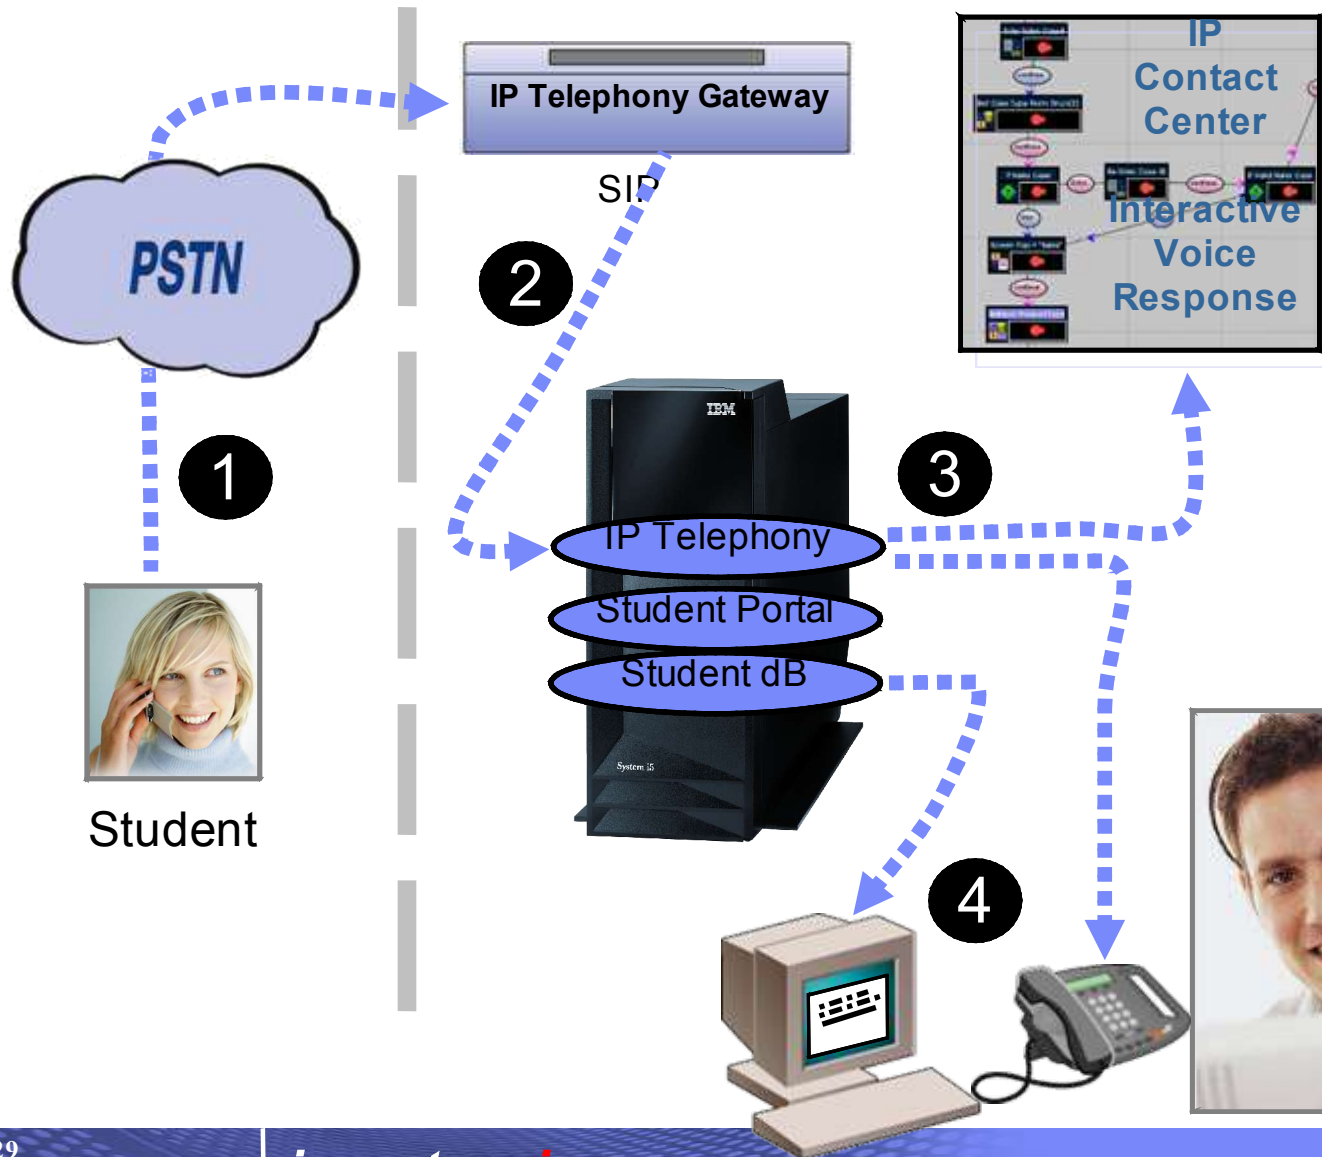

With IP Telephony, all calls are placed directly between handsets. This fact enables some key benefits of our solution:

- *Fantastic scalability – Over 5,000 users on a 1-way 520*
- *Efficient routing of IP calls to save money and reduce traffic*
- *Phones “know” their back-up server – calls get through*
- *Servers “know” user’s IP address - mobility*

Headquarters
Primary
Telephony /
Messag

Regional Office
Secondary
Telephony /
Messaging

Convergence Example – Student Portal

- 1 Student Calls from Public network
 - 2 System i routes call to operator
 - 3 IVR asks for student info/ID
 - 4 Student advisor answers call with student info on computer screen
- Advisor can conference in other persons from computer screen if needed

System i IP Telephony

Benefits of System i IP Telephony

- Consolidate Phone and Data Networks
- Make calls on low-cost data networks
- Dynamic resource allocation
- Unified Messaging and advanced features
- Support mobile and remote workers
- Integration with business applications
- Integration with collaboration applications

Information is provided "AS IS" without warranty of any kind.

All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.

Information concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information, including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only. Contact your local IBM office or IBM authorized reseller for the full text of the specific Statement of Direction.

Some information addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance, function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.

The 3Com IP Telephony ROI Analysis Tool™ ("Tool") was developed by Alinean and 3Com. IBM is not responsible for the contents of the Tool, the accuracy of the data contained in the Tool, how results are generated, or any reports created by the Tool. Any ROI projections cited are estimates and were created using the Tool, which includes certain assumptions relative to the value of IP Telephony. Any reliance by you on the Tool and any results from the Tool is at your sole risk and will not create
