

iSeries e-Business Opportunity Assessment

Start your e-business journey here! Move from awareness of e-business technologies to building and deploying competitive solutions!

Audience

Whether you are looking to capitalize on a technology advantage, or your partners or competitors are driving you to participate in the e-business arena, completion of an iSeries e-business Opportunity Assessment is an excellent place to start.

For most companies, the approach to deploying e-business solutions will be evolutionary. This typically involves extending your core business applications and data to the web.

The e-business Opportunity Assessment is specifically focused on surfacing potential e-business opportunities, clarifying requirements, and identifying a practical set of concrete projects to move the business forward.

You will learn of solution offerings and resources available to create a business advantage.

Description

The iSeries Opportunity Assessment is available to iSeries and AS/400 customers, and is performed by IBM iSeries e-business consultants or a qualified service provider.

The engagement includes up to 16 hours of an e-business consultant's time in the performance of:

- Review and analysis of e-business and related IT strategies

- Investigation and knowledge transfer in one or more e-business areas:
 - User to Business
 - User to Online Buying
 - Business to Business
 - User to Data
 - User to User
- Identification of potential e-business projects
- Identification of the design, development and deployment skills required to master a specific project
- Identification of service providers who can assist in the construction of customized solutions
- A summary report provided of any reviews and analysis performed

Pricing and Availability

At this time, this offering is available through IBM and qualified partners.

The assessment is based on the sessions being conducted in Rochester, MN. On site assessments are available at additional cost.
