"STORING MY REAL-TIME DATA OFFSITE IS SAFER AND SMARTER."

I TRUST BRAINS II, THE VAULT FOR MY DATA.

Information is the lifeblood of my company. I need fast, uninterrupted access to it at all times to maintain my competitive edge. But I can't afford to spend my time, money and energy worrying about backups.

That's why Brains II is my trusted partner. Their fixed-cost online data vaulting costs only a fraction of what I would pay to install and manage my own solutions. They store my data on their equipment in their facilities, where their expert professionals maintain everything. And our secure, private networks are good enough to meet the rigorous standards of organizations including Revenue Canada, the Royal Canadian Mounted Police, and the Canadian Security and Intelligence Service.

Brains II is one of Canada's most respected technology companies, selling hardware, software, services and maintenance for 25 years. And now I trust them to take care of my data.

Brains II is an IBM Business Partner, specializing in System i™ solutions. System i is the premier "all-in-one" business computing system. It offers an ideal combination of open standards and integration, delivers freedom of application choice, rock-solid security, virus resistance, and legendary system uptime. Whatever applications truly matter to your business, you will want to run them on System i.

Contact Brains II today at 800.brains2 (800.272.4672), info@brainsii.com, or on the web at www.brainsii.com to learn more about how easy and secure they can make your data protection and business computing.

i want bulletproof security. i want control. i want an i.

Brains II managed data protection services include:
• **Data Vaulting (remote real-time data backup and data recovery)**
• **Disaster Recovery (Hot Sites, onsite expertise and rapid system recovery)**
• **Hosting (unsurpassed eBusiness on remote dedicated servers)**
