

than they imagine and that this *Phenomenon* will not have an end, till the Mine of Sulphur is entirely consumed.

II. An Account of divers Rare Plants, lately observed in several Curious Gardens about London, and particularly the Company of Apothecaries Physick Garden at Chelsey. By Mr. James Petiver, F. R. S.

S E C T I. Rare English Plants

**P**oly-pody of the Wall. *Polypodium murale*. pinnae ferratis. *Polypodium alterum* C. B. in *Matthiol* pag: 887. Fig. *Polypodium Quercinum* Gerard. p. 974. Fig. *Polypodium* 2. *Tabern.* Histor. 478. Fig. *Polypodium* 2. *Filicula Ejsd.* Icon. 799. Fig. 1. *Tabernæmontanus's* Figure, which *Caspar Bauhine* upon *Matthioli*; and *Gerard* have copy'd, seems to resemble this Plant in its somewhat waved Wings, and tip. But the *Polypodium minus* *Dodon.* Pemptad. 464. *Polypodium Quercinum* *Jonston.* 1132. *Polypodium* 2 *Matthioli Lugd.* Histor. 1230. which *Caspar Bauhine* makes to be the same with this, viz. *Polypodium minus* C. B. pin. 2. 359. is not like it, but a less and slenderer sort of the Common. Dr *John Salvadore*, a very Curious Botanist, sent this lately from *Barcelona* by the Name of *Polypodium majus ferrato folio* *Barrslier* Icon. Instit. Rei Herb. *Tourn.* 540. I gathered this Plant 8 May 24. A. D. 1709. on the Walls of <sup>Place</sup> *Windsor Castle*, in the Apartment of the Reverend Dr. *Manningham*, then Dean of that Place, and now Bishop of *Chichester*, whose Son, a very Nice Botanist, first ob-  
G g g 2
served

N. B.

served and shewed it me there ; and hath since sent it to *Chelsey Garden*.

<sup>2</sup>  
Names. Jagged *Welsh* Polypody *Ray* Hist. Plant. 136. 2. Syn. 22. 2. Edit. 2. p. 45. *Polypodium Cambrobritannicum*, lobis foliorum profundè dentatis *Bobart*. Hist. Oxon. 563. 8. Sect. 14. Tab. 2. Fig. 8. *Polypodium Cambrobritannicum*, pinnulis ad margines laciniatis *Ray* Hist. Plant, 136. 2. Synops. 22. 2. Edit. 2. p. 45. *Filix amplissima*, lobis foliorum laciniatis *Cambrobritannica* *Pluk*. Tab. 30. Fig. 1. Dr. *Hans Sloane* first sent a Specimen of this (then rare) Plant to Mr *Ray*, which he describes in his *History*. It differs from the common *Polypody*, in having its *Alæ* or *Wings* deeply jagged or torn : I never yet observed any *Seed* on this *Fern*. Mr. *Jacob Bobart*, Botanick Professor at *Oxford*, gives a very lively *Figure* of this elegant Plant, which he says was first discover'd *A. D.* 1668. by *Richard Kayse* of *Bristol*, on a *Rock*, in a *Wood* near *Dennis Powis* Castle by *Caerdiff* in *Glamorganshire*.

Distinction.

Discovery and Place.

<sup>3</sup>  
Names. *Orton Flowring Fern*, or *Small Osmund*. *Ray* Hist. Plant. 153. 3. *Osmunda Westmorlandica*, folijs tenuissimè dissectis, *Mus. Petiver*. 792. to whose various *Synonyms* I thither refer you. Dr. *Plukenet* has figured this in his *Phytographia*, Tab. 3. Icon 2. and Mr *Jacob Bobart* very elegantly in his 3d Volume *Plantar. Histor. Oxoniens.* Sect. 14. T. 4. p. 593. 4. Mr *John Ray*, that *Patron of Botany*, first observed this in *England*, about the *Parish* of *Orton*, where it grows plentifully, and in other places in *Westmoreland*. Mr *Edward Lhwyd* hath also found it on *Snowdon Hill* in *North Wales*. Mr *John Robinson*, alias *Fitz-Roberts*, a *Curious Naturalist*, sent up several of these Plants from *Kendal*, which were set in *Chelsea Garden* and elsewhere, but after a *Winter* or two, they often go off.

Place.

Rough ear'd Fox-tail Grass, Ray Hist. Pl. 1265. 7. Syn. 239. ed. 251. 5. Gramen *Alopecuroides* asperâ spicâ C. B. phyt. 13. Pl. LI. Gr. Alop. Spicâ asperâ C. B. 4. 6. prodr. 10. F. Theatr. 56. F. 6. Gr. Al. sp. asp. brevi Park. 1558 Fig. 6. Gramen echinatum Dalechampij Histor. Lugdun 432. Fig. Gramen xi Jonston in Gerard, l. 1. c. 22. p. 30. Gramen cum candâ Leporis asperâ, sive spicâ murinâ Chabrei 185. Icon 6. I. B. 3. l. 18. p. 474. Fig. It grows in the dry Borders of sowed Grounds about Montpelier and Narbon. <sup>Places.</sup> Mr Jezreel Jones gathered it about Lisbon. That Consummate Botanist Dr. William Sherard, now Consul at Smyrna, was the first who found it in our own Dominions, viz. in the Island of Jersey, where it grows very common in all the sandy Grounds. The last and the preceding Summer it spiked very plentifully in Chelsea Garden.

Welsh Sorrell, Mr Petiver's English Herbal, Tab. 3. Fig. 4. Ray H. Pl. 180. 11. Syn. edit. 2. p. 57. 10 Acetosa <sup>5</sup> *Cambrobritannica* montana Park. 745. 12. Acetosa *Cochleariæ* folio, montana Lhwyd. Acetosa *Britannica* rotundifolia fructu & semine compresso P. Blair. Acetosa rotundifolia repens *Eboracensis*, folio in medio deliquium patiente Moris H. Oxon. 583. 10. Sect. 5. Tab. 28. fig. 10. Pluk. Phyt. Tab. 252. fig. 2. Mr Ray takes this to be the same with the *Acetosa* scutata repens C. B. 114. 10. Prodr. 55. 3. Park. 744. 6. This rare Plant Mr John Parkinson, that accurate Botanist and Apothecary in his *Theatrum Botanicum* tells you, was found about 80 <sup>Where and by who first discovered in England</sup> Years ago on a Mountain in Wales, by Mr. Moris Lloyd of Prislieworth, and about 20 Years since it hath been again observed by his Namesake, that celebrated and known Naturalist Mr Edward Lhwyd, on the Mountains Snowdon and Caderidris; and soon after by Mr Tho. Lawson and Mr John Fitz-Roberts, two other expert Botanists, in Westmorland, where the Curious Dr. Richard Richardson tells me he has also found it, as well as in Wales,

Wales, but not as yet in *Yorkshire*, where he lives. Mr *Patrick Blair*, a Curious Botanist and Anatomist, hath observed it in divers places in *Scotland*.

6  
Names.

*Jersey* Cudweed. *English Herbal*, Tab. 18. Fig. 5. *Ray* Hist. Plant, 284. 17. & 296. 7. Syn. ed. 82. 3. *Gnaphalium Plateau* 2 *Clus. H.* 329. Fig. *Gnaphal. majus lato oblongo folio* C. B. 263. 9. *Pluk. Phyt. T.* 31. F 6. *Gnaphalium oblongo folio* *Jonst.* 643. Icon. *Gnaphalium supinum oblongo folio* *Park.* 686. Fig. 6. *Gnaphalium ad Siechadam-citrinam accedens* *Chabr.* 371. Ic. 2. I. B. 2. l. 26. p. 160. Fig. *Elychrysum Sylvestre latifolium, capitulis conglobatis* C. B. 264. 8. *Phyt.* 514 7. By this last Name Monsieur *Vaillant*, a very Curious Botanist, and Secretary to Dr. *Fagon* the French King's Chief Physician, sent it me from *Paris*, where he gathered it wild. Dr. *Sloane* in his Voyage to *Jamaica*, found it about *Funchall* in the *Madera* Islands, where he observed it to sport very much in the shape of its Leaves, Flowers, and Stature. Dr. *Sherard* hath found it nearer home, viz, in the Isle of *Jersey* on dry Banks and Walls very common.

Places.

*Common Yellow Oxe-eye.* *English Herbal*, Tab. 19. Fig. 7. *Ray* Hist. Plant. 341. 9. Syn. 56. edit. 90. *Buphtthalmum vulgare* *Jonst.* 747. Fig. 3. *Buphtthalmum Dioscoridis* C. B. phyt. 226. 5. *Buphtthalmum Tanaceti minoris folijs* C. B. pin. 135. 1. *Buphtthalmum Matthiol. vulg. Millefolij folijs* *Park.* 1370. *Chaenamelum Chrysanthemum quorundam* *Chabr.* 363. Icon. 2. J. B. 2. l. 26. p. 122. Fig. Its Leaves are like *Tansy*, but smaller and hoary; by which and its short rim'd yellow Flowers, its easily known from others. It grows in divers parts of *Germany* and *Italy*. Mr *Ray* found this on a Bank near the River *Tees*, not far from *Sogburn* in the *Bishoprick* of *Duresm*.

Names.

*Welsh Yellow Poppy* *Ray* Hist. Pl. 856. 9. Syn. 122. 6. ed. 180. 6. *Argemone Cambrobritannica lutea* *Park.* 369. fig. 4. opt. *Argemone luteum perenne, laciniato folio*

*Cam-*

*Cambrobritannicum* Ray Syn. 122. 6. edit. 2. p. 180. 6. Its long smooth Heads, yellow Flowers, and Leaves not unlike *Celandine*, distinguish it from all others. Mr John Parkinson, that laborious Botanist, first found this elegant Plant in *Wales*; since which the Inquisitive Mr Ray and Mr Lloyd, have both observed it in divers other Places in those Parts. It Flowers and Heads in *Chelsey Garden* most part of the Summer.

*Germaner Whitlowgrass* Ray 790. 4. Syn. ed. 165. 3: *Alysson Veronica* folio Elem. Botan. 790. *Bursa Pastoris* major loculo oblongo C. B. 108. Prodr. 50. Fig. Phyt. 171. 6. descr. *Bursæ P.* sublongo loculo affinis pulchra planta I B. 2. l. 22. p. 938. Fig. Chabr. 295. l. 5. *Draba minima muralis discoides* Col. 274. Fig. *Thlaspi Veronica* folio Park. 843. P. 13. Its Leaves resemble our wild *Germaner*, the Flowers white and small, and the Pods longer than those of *Whitlowgrass*. It Flowers and Seeds in *March* and *April*. Grows about *Mompelien*, and in the Hedges between *Luca* and *Pisa*. Mr Ray found this on the sides of the Mountains in several Parts of *Craven*, *Yorkshire*; from whence Dr. Richardson in those Parts, has been pleased to send it to *Chelsey Garden*. Mr Thomas Pool of *Nottingham*, a curious Botanist, has observ'd it about *Cramford* in *Darbyshire*.

*Small Sea Cranesbill.* Ray 1056 3. Syn. 154. 1. ed. 216. *Geranium minimum procumbens*, folijs *Betonice* Mor. H. Ox. Sect. v. p. 512. 8. *Geranium pusillum supinum maritimum* *Altheæ* aut *Betonice* folio nostras Ray 1056. 3. Syn. 154. 1. edit. 216. Pluk. Tab. 31. Fig. 4. The first discovery of this Plant is owing to Dr. Morisson, that learned Botanist, who found it in stoney places about *Chadder* in *Somersetshire*; and since by Mr Ray on the Sea Coasts of *Cornwall* and *Wales* plentifully.

SECT. II. *European Plants, not English.*

11  
Names. **S**Oft, short-ear'd *Fox-tail*. *Ray* Hist. Pl. 1265. 6. *Alopecuros* *Dod.* Pempt. 541. fig. *Ger.* 81. fig. *Jonst.* 87. Fig. *Alopecuros* genuina *Park.* 1166. Fig. 1. *gures*, were they more procumbent, would better resem-  
 ble this Plant than those of I. B. and *Chabrens*. Grows *Place*.  
 about *Mompelier* and *Messina* in *Sicily* plentifully. Dr.  
*Salvadore* hath also found it near *Barcelona*. This *Flow-*  
*ered* in *Chelsea Garden* from *July* till *Autumn*.

Greater *Spanish* bearded *Hawkweed*. Ray H. Pl. 232. 7. 16  
*Hieracium medio nigrum Baticum majus*. Park 792. 6. *Names*.  
*Hieracium medio nigrum*, fl. majore *Jonst.* 1625. The  
 peculiarity of this Plant is to have a bearded Head, *Character*.  
 with *Brimstone Flowers* and black in the middle. This  
 pretty *Hawkweed* was first brought into our *English Gar-*  
*dens* about the Year 1620 from *Spain* by Mr *William Boel*,  
 a *Fleming*, who communicated the Seeds of this and  
 several other *Spanish* and *Portugueze* Plants to Mr. *Coys*,  
*Goodyer*, *Jonston*, and *Parkinson*, all eminent *Botanists*  
 in those Days.

Hoary *Buckshorn* Chamomil. Chamæmelum *Coronopi* *17*  
 folio tomentoso. The largest of these *Leaves* resemble  
 our *Wart* or *Swines Cress*, but are very hoary; its a low *Described*  
 Plant with hollow *Stalks*, especially when dry. The *Flowers*  
 of the size and shape of the *Single Sweet Chamomil* the  
 Branches leafy, but the *Flowers* when full grown, stand  
 on *Stalks* void of *Leaves* two and sometimes three *In-*  
*ches* bare. *Chelsea Physick Garden* is obliged to Mr *Ja-*  
*cob*

cob Bobart, Botanick Professor of Oxford, for this elegant Plant, and divers others he has been pleased to send thither.

18  
Names.

Roman Wormwood Ray H. Pl. 367. 5. *Absinthium* An-  
ftriacum *Sophia* folio. *Nobis* *Absinthium Ponticum* vulgare  
*Chabr.* 374. Ic. 3. *Clus.* 339. Fig. opt. fol. inferius albo  
I. B. 3. l. 26. p. 175. Fig. *Absinthium Ponticum* tenui-  
folium incanum C. B. 138. 4. *Phyt.* 225. 6. seu *Romanum*  
vulgare. *Park.* 98. Ic. opt. 3. *Absinthium tenuifolium Pon-*  
*ticum* Galeni. *Jonst.* 1096. Fig. 2. The lower Leaves of

Distinction.

this Wormwood so much resemble those of the *Sophia Chi-*  
*rurgorum*, or *Flixweed*, that its very easie to distinguish  
Place. it from the other sorts. Grows in divers parts of Ger-  
*many*, and near *Vienna*, in Stoney Places. Flowers and  
Seeds towards Autumn.

19  
Names.

*Bur-Cumin.* Ray Hist. Pl. 402. 6. *Cuminoides* vulgare  
*El. Bot.* 250. *Inst. Rei Herb.* 301. *Cuminum* Sylvestre *Dod.*  
300. Fig. *Ger.* 908. Fig. opt. 1. *Jonst.* 1067. Ic. 1. *Park.*  
372. Ic. 3. capitulis globosis C. B. 146. 3. *Phyt.* 253. 2.  
*Cuminum* Sylv. 1. valde odoratum, globulosum I. B. 3. l. 27.  
p. 23. Fig. *Chabr.* 384. Ic. 6. This is a very singular Herb,  
and not easie to describe; its lower Leaves like *Honewort*,  
but deeper cut; its flessey Heads grow in round clutters,  
with elegant feathered Seed. *Tabernæmontanus* his Figure,  
N. E. which Gerard has coppied, is much the finest Icon. and by  
which you will have a good Idea of it. Grows in *Nar-*  
Place. bone and other Parts of France. I have also had it from  
some of the *Mediterranean* Isles.

*Annise* Dale 210. *Anis* Pomet. l. 1. p. 13. *F. Lemery* 44.  
*Anisum* C. B. *Phyt.* 2. 9. *Ger.* 880. Fig. 1. *Jonst.* 1035.  
Fig. *Park.* 911. Ic. *Anisum* vulgare *Clus.* l. 6. p. 202. Fig.  
*Anisum Herbarijs* C. B. 159. 1. *Anisum Veteribus* *Chabr.*  
396. Icon. 1. I. B. 3. l. 29. p. 92. Fig. The first or lower  
N. E. Leaves of this Umbel are often single and round, which  
few or none of the Figures express. Mr Ray says it  
sowed

sowed plentifully in the *Isle of Malta*, where they make *Place.*  
great profit of it, and call it there *Sweet Cumin*.

*Aleppo Ziziforum* or *Rose Basil*. Ray Vol. 3. p. 299. 18. 21  
*Clinopodium* humile Syriacum breviori folio *Ziziforum*. *Names.*  
Bob. H. Ox. p. 374. 5. S. xi. Tab. 8. Fig. 2. *Clinopodium*  
fistulosum pumilum, *India Occid.* summo caule floridum  
*Pluk.* Phytograph. Tab. 164. fig. 4. *Clinopodium Alpi-*  
*num* *Roseum Satureia* folijs *Boccon.* Mus. Plant. rar. 135.  
Tab. 95. This *Icon* seems to be taken from a shriveled  
Specimen, which the Author found on the Mountains of  
*Norcia*. Mr *Bobarts* Figure which Dr. *Plukenet* copied, very *Form.*  
well resembles this Plant, which from a stringy Root  
rarely rises a foot high; its two lower *Leaves* resemble  
our great Stone Basill (or *Clinopodium majus*) with four  
more at the top; in the midst of these stand a tuft of  
purplish *Flowers*, set in long pipey *bushes*, rough or hairy  
as is the whole Plant. The Learned Dr. *Huntington*  
first sent this elegant Plant from *Aleppo* to *Oxford*,  
from whence our *Physick Garden* has been adorned  
with it.

Purple, long-leav'd *Arch-angel*. Ray 559. 2. *Lamium*  
folio oblongo C. B. *Phyt.* 437. 2. *Lamium* fl. rubro *Park.* 22  
606. 4. *Lamium* purp. non fætens, folio oblongo C. B. *Names.*  
231. 2. *Galeopsis* five *Urtica iners*, fl. purpurascente ma-  
jore, fol. non maculato I. B. 3. l. 28. p. 321. Fig. This  
Plant is like the common white *Arch-angel*, but that  
the *Flowers* are purple and curiously speckled. *J. B.*  
hath observed this in *Italy*, also about *Geneva* and *Basil*.  
*Parkinson* says, it is found in some places with us; *Place.*  
but the *Herbarists* of this *Century* have not yet met with  
it. It hath *Flowered* several *Summers* in *Chelsea Garden*,  
and I presume from the *Physick Garden* at *Oxford*, Mr *Ja-*  
*cob Bobart* having formerly sent me Specimens of it.

Hemp Mallow. Ray H. Pl. 605. 6. *Alcea Cannabina* 23  
C. B. 316. v. *Phyt.* 634. 6. *Chabr.* 308. Ic. 1. *Alcea fruti-*

Fig. *Minimus Gramineis folijs* Chabr. 470. Ic. 4. This has long blueish *grassey Leaves*, with a single yellow *Flower* and *stringey Root*, by which its known from the other narrower leaved *Crowfeet*. Grows in *Meadows* about *Montpelier*, *Narbone*, and *Provence*. It *Flowers* in our *Gardens* in *April* and *May*.

Place.

Time.

26

Dr. *Covell's Venus Looking-glass*. *Speculum Veneris fl. amplissimo Thracicum*. Ray H. Pl. 742: 2. The *Leaves* are broad and long like our great *Stitchwort*, and those about the *Flower* are hairy edg'd; by which and the specious largeness of its *Flowers*, it differs from the rest. We owe the first *Discovery* of this beautiful and ornamental Plant to that Reverend, Curteous and Curious Gentleman Dr. *John Covell*, Master of *Christ Church* in *Cambridge*, who in his *Travels to Constantinople* found this

Discovery  
and. Place.

in *Thrace*, and brought Seeds of it over, which he gave to Mr *Peter Dent*, an Eminent *Apothecary* and *Botanist* in the University, who communicated the same to Mr *Ray*, who raised the Plant, as we have lately done at *Chelsey Garden*, where it makes a beautiful Show.

*Dasie Rocket.* Ray H. Pl. 807. 6. *Eruca Bellidis folio* 27  
*Moris. H. Oxon. 231. 18.* The *Leaves* of this Plant may *Names.*  
 be taken for the *great Dasie*, were it not for its biting  
*Radish* taste, the *Flowers* are yellow, and *Pods* long like  
 the *Common*; both these appear from *May* till *August.* *Time.*

*Dented leaved Hedge Mustard.* *Erysimum folio dentato,* 28  
*fl. minimo:* The *Root-leaves* of this Plant are long, *Names.*  
 narrow, and toothed like the *Dandelion*, but more slight- *Description.*  
 ly; these on the *Stalk* are much less, and only serrated,  
 the *Flowers* pale, yellow, and very small; these are fol-  
 lowed by slender *Pods* above 3 Inches long, and when  
 ripe seem joynted; they stand off from the *Stalk* on  
 very short *Pedicles.*

*Sciatica Cresses.* Ray Hist. Plant. 827. 1. *Iberis C. B.* 29  
*Phyt. 153. Iberis Cardamantica. Ger. 197. Jonst. 253.* *Names.*  
*Fig. opt. Iberis latiore folio C. B. 97. 2. Park. 854. Fig. 2.*  
 The *Root-leaves* stand on long footstalks, are half an *Description.*  
 Inch broad, two or three long, notch towards the point,  
 but on the *Stalks* they are long, narrow pointed, and  
 plain, with *Pedicles*, both of a *Cressley* last. The *Flowers* *Place.*  
 small and white, the *capsules* cordated. Grows common  
 in *Highways*, and untilled places both in *Germany, Italy,*  
*Sicily, &c.*

*Boccones Spangle-Mustard.* Ray H. Pl. 837. *Thlaspi* 30

*Coral. 5. Parkinson*, that accurate and knowing Botanist,  
 is of the Opinion that all *Clusius* his Figures are only differ- *N. B.*  
 ing states of the same Plant, which I am also inclined to  
 believe, not only of his, but also those of *Alpinus*, *Bau-*  
*hine*, and *Imperatus*, which are all different both from  
*Clusius* and one another, which may arise from a pecu-  
 liarity it has, especially in dry Seasons, to shrink or send  
 its Head towards its Root, the Flower Stalks being  
 short and extream woolly; for which reason I look up-  
 on *Rawolfs Plantain*, which the *Hist. Lugd. app. 21. Fi-*  
 gures

gures under the Name of *Planta rara Plantagini longe similis*, (which some would have the same with this) to be another Plant, it rather resembling the *Plantago angustifolia*, paniculis *Lagopi* C. B. *Prodr.* 98. 4. which I know grows also in those Parts. This long-lost Herb I found in her Grace the Dutchess of *Beaufort's* Garden at *Chelsey*, whose Nursing Care scarce any Plant (tho' from the most distant Climates) can withstand. I do not remember that any Garden in all Europe has yet boasted of this rare Plant, in the many *Catalogues* hitherto published.

50  
Names.

*Rawolphi's* Sea Lavander. *Ray* H. Pl. 397. 10. *Limonium peregrinum* folijs *Asplenij* C. B. 192. 7. *Limonium folijs Asplenij* C. B. *Phyt.* 356. 4. *Rawolphij Park. parad.* 251.
