The Locofocos have a strong man running for Andror of the State. Col. Pontag is a formulative candidate. We freely acknowledge the safet, for it is a stapid policy that affects the merits of an opponent. Judge floresteet, the safety has several advantages over his antagonist. He is a most capable and one-lous josition of State Androf for four years, and has discharged his duties most un years, and host substitute of State Androf for four years, and has discharged his duties most un years, and host substitute of clearness and comprehensiveness. He posts as models of clearness and comprehensiveness. He posts as models of clearness and comprehensiveness. He posts as models of clearness and comprehensiveness. The post is a company, from Camargo, under command of Don Jonas Collagues. A Discover in Sugarty - A Prussian named Arm is said to have recently made a discovery in surferly that is exciting considerable interest in the selection of chlorins to relieve pain. Unlike Chitoroform, it can be need without the least dancer to the patient, and is very effectual in its operation. From the account, a small quantity of the fluid, (from ten to twenty drops) is dropped on the part effected, or on a lint bandge slightly moistened with water, and then applied, and all bound up in oil slik, and a linen hand. After from two to ten minutes the neptity of the fluid, flore the total control of the surfer is no longer fell, whether it be from rheumatic, nervous, or other disorders. After a time it returns again, but usually weaker, and with several applications it is often entirely relieved. The discoverer has presented a meanatial on the subject to the Academy at Pa. 19.
