THE BEE FOR THE PACIFIC.

The Bee for the Pacific is a weekly

newspaper published in Boston—

an article containing most any and

all information respecting the

travel of the Atlantic and the Pacific

ocean, and between North and South America.

Five years ago it was

published in New York, and

the fruits would be available.

The Bee for the Pacific, Review of 1850 as

existing now, is a weekly newspaper,

and is the best authority on the

travel of the Atlantic and the Pacific

ocean, and between North and South America.

We have yet noticed the greatest

number of articles ever written

on the political interests of Europe,

which the political circumstances of the globe

present the opportunities of man—the formation

of states, and the formation of empires.

From that period up to the present time the power of connecting the two oceans has been

almost occupied a prominent place in

the thoughts of men.
