The Arkansas newspapers are discussing the subject of the settlement of the debt of that State. Including the sale number of five and six per cent. bonds, on which no interest has been paid for twelve years, this debt now amounts to $6,000,000. The annual interest of which is about $250,000, and the principal is annually augmented by $160,000, the amount of the coupons falling due. "Quite a number of Free Bankers assembled here yesterday, and we hear that they suggested to the Legislature of State to prosecute all failing in five per cent. of the entire circulation of the Free Banks. As the stocks now stand, they are worth a quarter of a million of dollars more than the amount issued on them. If five per cent. of the circulation is called in, and the stocks remain in the Auditor's hands, the bills will bear a depreciation of seven and a half per cent.—quite a bonus to fall back on. But as state securities are continually increasing in price, we see no cause for alarm in the present attempts of the Cincinnati Brokers to crush our Free Banks."
