THE ATLANTIC TRIBORATE.—The Washington Union, of the let instant, says "that the United States steam frigust Niegers will probably sail from New York some day during the present week on her second voyage in aid of the great atlantic telegraph enterprise. She will on this, as on her former and first voyage, be under the command of Captain W. H. Hudson. Since her return she has been caulked and refitted, the main rigging has been changed by the substitution of larger chains, and the fore and maintop-sail yards—which were found to be too light—have been replaced by heavier ones. Bhe has also been replanted, and now looks as good as new.

Her muster-roll embraces 401 men, all told. Her complement on the previous trip was 500 men, but experience stemonstrated that such a number could not be comfortably accommodated in consequence of the great space required for the telegraph cable. The main force consists of 50 men, and about an equal number belonging to the engineer department. The remainder, including officers and picked sailors. THE ATLANTIC TELEGRAPH. The Washing
