

VI. *An Account of a person who took a great quantity of Opium, without causing Sleep*

Newberry, Jan. 28. 1707.

Here happened out here a very remarkable Case of one Mrs *Lovelock*, who had been seized ill of a Fever about eleven days before this instant ; which affected her so, as to make her Light-headed to a great degree, Convulsed and restless ; upon which the Physicians whose names are mentioned below, agreed to give her great quantities of Opiats, in order to compose her ; but, as an instance against the sleeping quality of this Medicine, with the Doses below attested they could never procure any thing like sleep ; but still as she took them they seem'd to refresh her, and make her sensible, but caused nothing of rest. And what was very remarkable, the good Women about her began at last to scruple her taking any more, upon a notion they had, that by the effects this Medicine was too high a Cordial for her, and still kept her waking ; upon which her Physicians were forc'd to alter the form. The quantity she took from *Tuesday* night twelve a clock to *Friday* night twelve a clock was as follows. *Jan. 29.* 4 Boluses with two gr. each of *Laud. Lond.* made up in *Venice Treacle*. Six Pills, with two grains each of the same. A Bolus with eight grains of the same in *Ven. Treacle*. *Jan. 30.* Twelve Pills with 2 grains each, and one Bolus with ten gr. of the same in *Venice Treacle*. *Jan. 31.* 4 Draughts with ten gr. of the said *Laud Lond.* one

ounce of *Syr. de Mecon.* in each Draught. So that in all she took in the time above-mentioned 102 gr. of *Laud. Lond.* and ℥iij. of *Venice Treacle*, and ℥iij. of *Syr. de Meconio.*

This is attested under the hands of her 3 Physicians, and the Apothecary.

VII. *Au Account of a Woman, who voided the greatest part of a Foetus by the Navel.* By *Mr Christopher Birbeck.*

ONE *Raper's* Wife, in a Town called *Coxwold*, 12 miles from *York*, falling in Labour of Child Birth, the Midwife using her endeavour extracted the *Secundine*, it offering first, and could not by her best skill perceive any thing else remaining: The Womans body falling, and for some days being pretty easie, and the Womb contracted, the Midwife took this *Secundine* to be a *Mola* or false Conception, but in about a weeeke more she began to discharge plenty of *Fætid Matter* by the *Vagina*, which continued, and in process of time she felt a troublesom hardnes on the *Hypogastrium*, which increas'd daily for above 6 weeke, by which the Woman was brought so low, they despaired of her Life, this lump, hardnes and forenes wrought upwards to the *Regio Umbilicalis*. I suppose it continued there fixt for
