IMPORTANT TO COTTON PLANTERS

By which their Income must be Doubled.

THE undersigned has invented and obtained letters-patent from the United States for the arrangement and combination of machinery for conveying Seed Cotton into Farms by one operation, passing from the Gin through the preparation and separating machinery, until it is ready for shipment or weaving. The saving of WASTE ALONE will be at least 5c Per Cent.; and as I undertake in my present the use of machinery to prepare the seed for sale, or for hand feeding at all of those to open and sell through it, which are very destructive in their operations on the farm, but are now compelled to use them because no buyers cannot be surpassed by any other establishment in the city.

Please call and examine our stock.
