The death of William Henry Poulett, the sixth Earl Poulett, which occurred at London the other day, opens an interesting dispute concerning the succession to the title. When the earl was young he was a harum-scarum fellow, and it is stated that on one occasion when returning from abroad he wagered that he would marry the first woman he met on landing. Whether this report is true or not, the fact remains that he married the daughter of a. pilot at Lamport after a very brief acquaintance. A son was born, but the earl subsequently repudiated the paternity of the child and obtained a divorce from his wife, whom, however, he supported until her death.

A man claiming to be this son adopted the title of Viscount Hinton, which is borne by the heirs of Earl Poulett, and he has for years tramped the country with a barrel organ, on which was a placard declaring his alleged parentage, and asserting that he had adopted this method of earning a living because his father refused to assist him. "though no fault of my own." His wife accompanies him in his wanderings, and the couple are frequently seen on the London streets.

The late earl married twice after divorcing the pilot's daughter and recognized a son by his third wife as heir to his fine estate, Hinton St. George, near Crewkerne, which is worth some thousands of pounds annually. It is said that the organ grinder has gone to that place and will attempt to take pos session.

A ROSE FREAK.

Wonder of a Cincinnati Hothouse Attracting Attention Among Eastern Florists.

· Cincinnati is attracting attention from eastern cities by reason of a new rose born in the horticultural world. Mr. Paul Dallidouze and Ernest Astmus, two leading florists of New York city, and Mr. Robert Craig, of Philadelphia, were in Cincinnati to examine the new wonder in the flower world.

The rose itself is known as a "sport." The word "sport" in the floral world signifies a freak of nature.

The marmet has long been known as one of the most beautiful of pink roses, a delicate light pink, and the bridesmaid rose, light pink, and the bride, white in color, are both "sports" of the parent marmet. The new rose, which, it is thought, will supplant the new bridesmaid in favor, is of a much deeper pink than the latter flower, and shaped more like the marmet. One stem of this new rose, which has been named the Clara Barton, was discovered growing in Hoffmeister's Fairmount greenhouse and was carefully cut from the parent plant. Then by budding, grafting and rooting shoots it was cultivated until now Cincinnati has a corner on the market of from 60,000 to 75,000 of these plants for sale in the coming spring. It is said that a number of eastern florists have visited Cincinnati during the past month to examine this new won der in the rose world and leave heavy orders for the plant.

OUT OF HER HOME.

Unpleasantness in Gladstone Family -Widow of Grand Old Man to Live in London.

Good old Mrs, Gladstone is no longe mistress of Hawarden castle, and the latter henceforth is no longer her home That is the intimation which will come in the nature of something of a shock to all the many admirers of England's grand old man on both sides of the Atlantic. There has been a considerable amount of friction and unpleasantness in the Gladstone family since the old statesman's death, mainly in connection with the disposition of his estates and in the control of the property, bad feelings being engendered in the minds of the sons and daughters of Mr. Gladstone by the altered position in which the widow of his eldest sonnamely, Hon. Mrs. William Gladstonehas been placed by his death. It is probable that henceforth and for the remainder of her days the elder Mrs. Gladstone will make her home in London with her son Herbert, and be cared for and nursed by her unmarried daughter, Helen.

YALE RECOVERS A RARE BOOK

Part of the Plunder Taken by Rev James Brittain Miller, the Theological Student.

Prof. Day, of the Yale theological school, the other day complained to the police that his copy of Martin Day's famous "Doomsday Book" had been

The book was printed in 1613, and only a few copies are in existence. It is one of the most valuable books in America.

Sergt. Daley, of the detective bureau, suggested that perhaps it might be found in the collection of stolen books found in the possession of Rev. James Brittain Miller, the Yale theological student from Ypsilanti, Mich., who was arrested last month. A search revealed the precious volume lying in a pile of French novels on the floor of the police station. Had the book never been recovered the Yale library would have lost one of its most precious posses-

CLAIMED BY KANSAS. CHECK ON HUSBANDS.

Strip of Land Held by Missouri Cause of a Dispute.

Effort Being Made in Former State to Bring Proceedings in United States Supreme Court for a Resurvey.

The movement to have the Missouri-Kansas state line resurveyed has been revived and an effort is to be made to get the Kansas legislature at its present session to authorize proceedings in the United States supreme court to bring about the resurvey. A bill has already been prepared in conformity with a belief which has long existed in the minds of many old residents of Kansas that the state line is nearly onehalf mile west of where is should be. and that the state of Missouri is exercising jurisdiction over a strip of territory, extending from Kansas City to the southern line of the state which really belongs to Kansas.

This belief is based on the fact that under the survey of 1820 the boundary line between Missouri and the territory on the west was made to follow meridian line which passed through the mouth of the Kaw river. Many who have lived in Kansas City for a long time say that as late as 1840 the Kaw river flowed into the Missouri at a point more than one-half mile east of its present mouth. In 1855, when Kansas was created, the western boundary line of Missouri was made the eastern boundary of Kansas, and in the theory of the Kansans the engineers, in making the survey, made the mistake of taking the mouth of the Kaw at that time as the starting point, instead of following the line established by the government in

At all events, the Kansans who are behind this movement contend that a large part of the west bottoms in Kansas City, Mo., which contains many large wholesale establishments, implement houses, manufactories, railroad depots and yards, and the Dodd packing house, as well as the Missouri part of the stock yards, is soil rightfully belonging to Kansas. By a resurvey of the state line, under a commission appointed by the supreme court of the United States, they hope to reclaim this valuable territory for theirs.

THINKS ELOPING IS JOLLY.

Glenna Crisler-Lakin, Said to Be Only Fourteen Years Old, Talks of Her Hasty Marriage.

Rev. I. W. Corey, who married Miss Glenna Crisler and Percy Lakin, of Mount Avr. Ind., in Kenosha, Wis., the other Sunday, is unwilling to believe the statement that Miss Crisler is only 14 years old.

The view of the minister is confirmed by the young people themselves. Miss Crisler, in speaking of the romantic marriage, said:

"This has been awfully jolly, and we are not at all sorry for what we have done. I am 19 years of age, and had a right to marry anyone I chose. "Mr. Lakin and I had no intention of

eloping. We went to a dence on Saturday evening, and had gone out of the house

and sat down in a buggy. "When the company missed us some one said we had eloped, and my little brother came out and told me that a older brother and Mr. Haskett were

mounting their horses to follow us. "That settled it, and we at once started to Chicago to get married.

"We didn't intend to run away at all, but when the folks acted the way they did we got mad and eloped.'

SINGER QUITS THE HOTEL. Alice Nielsen Angry Because Her Maid Could Not Enter the

Elevator. Alice Nielsen, the prima douna, quit the Planters' hotel, St. Louis, abruptly the other morning, or rather late at night, because her maid, Geraldina White (colored) was not allowed to ride in the passenger elevator. No negroes are employed at this hotel and under no circumstances is one permitted to ride in the passenger elevators. The opera singer evidently was not aware of this when she took apartments there, for when she entered the elevator she beckoned to her maid to follow. There were other guests in the

car. The conductor refused to allow the negress to enter. Miss Nielsen was angry. She went straight to Manager Weaver, who informed her that the conductor was right. The young woman stormed about awhile, then walked up to the desk, paid her bill and went over to the Southern.

Blessings for Flat Dwellers. An artificial stone has been invented that is a nonconductor of heat, cold and noise. It is especially intended for roofs and floors, says an exchange. The fact that a floor can be laid in a flat that will prove a nonconductor of sound should certainly fall like a benediction on the ears of those who dwell in apartments and have been made unwilling participants in all the sorrows and joys of their near neighbors. This so-called stone is made of purified paper pulp, mixed with various other ingredients to harden it. Papyristile is the name of this thrice-welcome invention, and Mr. Gehre, a civil engineer of Zurich, is the blessed inventor. The preparation is as hard as stone, but much lighter in weight. It is noiseless

and inexpensive. Growth of American Cities, A hundred years ago there were only six cities in the United States. Now

there are over 400. Pope Holds English Investments. All the pope's private fortune is in-

vested in British securities.

to Tell When They Come Home.

Husbands can no longer stay out late at night and lie about the time they came home without detection. The man who in the past has taken his shoes off on the front steps and sneaked up to bed like a burglar, will have to contend with a scheme as hard to defeat as a cash register. The invention of Charles Ryberg, a draughtsman in the recorder's office at Chicago, makes it impossible for a door to be opened without registering the exact time the key was placed in the lock. The mere turning of the key does the work.

The inventor expects the greatest practical utility from his device to be found in its general adoption by the owners of stores, who have some one to do the opening of the doors in the morning and the closing at night. The invention consists of a metallic case, which incloses a revolving registration sheet, ruled to indicate time, and operated by clockwork; a storage battery is also in the case, and a switchboard set into the door panel, and so arranged as to open or shut a circuit with electricity from the battery on the operation of the lock.

The clockwork runs for eight days. and the ruled paper makes one revolution in that time. When the door is closed and the key turned in the lock the electric circuit is completed, and a registration is made in red ink at the proper place on the paper to indicate the hour. That is intended to tell when the last man leaves the store. When the night watchman tries the door by turning the knob he will make another registration, in black ink, by a separate circuit. The opening of the door again with a key makes another registration in red ink.

Lieut. Wells, of the United States Battleship Brooklyn, Marries Miss Rommell, of Boston,

Lieut. Benjamin W. Wells, Jr., flag secretary on the cruiser Brooklyn, flagship of Admiral Schley's squadron, again distinguished himself in Boston the other day. In the battle with Cervera's fleet he won signal honors as the right-hand man to the American admiral who chased the Spaniards, and now he has won a bride in Miss Julia Laurette Rommell, a Boston girl of an aristocratic Beacon Hill family, who served as a nurse during the Porto
