

The administrator of Profitable Sunrise (Roman Novak) has been in business for 10 years. In the last a couple of years, the demand have been so great they've pursued outside partners to meet the demand for capital (money) to aid existing clients as well as those client's referrals which is where investors in Profitable Sunrise play a vital yet rewarding role.

HOW DOES PROFITABLE SUNRISE EARN MONEY?

Profitable Sunrise is a real company in London GB that provides short term installment loans to companies, primarily companies in the United States. These loans have terms of 5-20 days on average; however, some extend up to 6 months. The company, Profitable Sunrise gets collateral from the borrowers to secure the loan which dramatically lowers the default rate. They also insure the loans if they do not have enough collateral. The insurance provides 70% of the loan amount back to the company if the borrower defaults. YES, some borrowers default on the loans BUT the company spreads our funds through multiple companies and does have collateral and insurance on each loan as a back up. Profitable Sunrise generally charge their clients more in interest on the money they borrow than they pay investors. The difference between what they pay us and what they charge is their profit. Most of the companies they deal with only need funds for 5-20 days.

There are primarily two types of loans being funded:

1. A company who has receivables where money is owed to them through invoices but they need cash now to meet current demands.
2. Companies needing proof of funds in order to get funding. As an example, say ABC Company wants to borrow \$1,000,000.00 for working capital and expansion. They may need to show at least \$300,000 in the bank for at least 90 days to 6 months. This company loans them the funds to do this. Once they get funded, the money comes back with interest. The loans range from \$50,000-\$500,000 on average, but can be more.

Right now Profitable Sunrise has a backlog of companies who qualify and have requested funding, but Profitable Sunrise reserves are stretched. This is where we come in. We get to help companies create cash-flow and sustain themselves and we get paid a share in profits for doing so. It's kind of like getting in on the banking industry as an insider where the fees to clients are extraordinarily high as in the case of a pay day loan company, but people will gladly do it because their options are very limited.. We can make a fair and substantial profit comfortably as a participating investor.

Our funds are split between numerous companies to further reduce our risk.

WHY JOIN OUR TEAM?

The CEO of Profitable Sunrise Roman Novak has agreed a special arrangement for our investment team to get paid 2.15% per business day (Mon-Fri and excluding any banking holidays) for 170 days. You do NOT have to wait 170 days to access your funds though.

You can start withdrawing daily interest in next business day! The significance of the term is in regards to the return on your investment which has proven to out exceed conventional investors expectations. You will get that back after the 170 days.

JUST TO BE CLEAR.....you will get paid for 170 BUSINESS DAYS in Profitable Sunrise. So the length of the term will be much longer than 170 days when you add all of the weekend days and any holidays. For example, 4 weeks has 20 business days, but the full length is 28 days. You will get paid for 170 business days, but it will actually take much longer than that to get all 170 payments when you include weekends and holidays.

HOW TO GET YOUR SEED MONEY FAST WITH PROFITABLE SUNRISE?

In Profitable Sunrise, assuming you fund with \$10,000.00 after the first business day, you will have \$210.00 available in your account. You can use those funds to make a new deposit or withdraw them and have them in your hands within 24 hours! If you do this every business day for 48 business days you will have every dime you deposited back in your hands! You can then choose to let each payment for the remaining 122 business days compound 100% risk free! This is probably the most utilized strategy.

There are currently over 3000 partners in Profitable Sunrise worldwide but most are getting paid 1.6-1.8% per day. Our Group is getting 2.15% per business day because of the Charity works we do around the world.

WHAT IS YOUR STRATEGY WITH PROFITABLE SUNRISE?

Profitable Sunrise is still a high return program and obviously still has some risk so our rules of engagement remain the same as virtually any other program:

1. Get your seed money back as quickly as possible and compound the profits.
2. Never use money you can't afford to lose.

This is the best way for us to be ultra conservative and truly minimize our risk.)

The company accepts Solid Trust Pay, Liberty Reserve, Ego Pay and Bank Wires.

We can request a withdrawal daily and we get paid within 24 hours!

This means you can realistically have ALL of your money back in your pocket in 48 business days if you withdraw every business day from the beginning. You can then compound the rest risk free!

Profitable Sunrise have a responsive customer support system that generally responds in 2-3 hours with a max of about 24 hours on weekdays.

DISCLAIMER: As with every one of our opportunities, you **MUST** invest with discretion. Don't put your feeding money into any investments. Follow our investment guidelines and adhere to our wealth building philosophy. As always I am happy to assist you if your have questions regarding Profitable Sunrise.
