This Thrilling Yarn About a Diver and a Shark Comes from Diego Garcia.

An article about diving in St. Nicholas tells the following story about Lambert, a famous English diver:

The fish in some waters are a hindrance and are greatly disliked by the diver. Perhaps the diver's worst foe is the conger eel. This creature attacks in swarms and is most daring and exceedingly vicious. The congers bark like dogs, and never hesitate in the least to bite a man.

"At one time my right hand," said a diver to us, "was exposed for a moment while in the water, when one of these fierce creatures made a dash for it and took a large piece from the back of the hand. It bled freely and I was obliged to come up to the surface and get it dressed."

"But how about the sharks? Don't you find them troublesome?"

"Not very. You see, sharks are like rats: 1eave them alone, and they run away if they catch sight of you. Corner a shark and he will fight.

"But if you want a shark story, I can give you one of Lambert's; he once had a thrilling fight with one at the bottom of the Indian ocean. He had been sent to the island of Diego Garcia to fix copper sheets on a coal bunk that had been fouled by a steamer, and was annoyed during his operations by the same shark for nearly a week.

"The monster was temporarily scared away, however, every time Lambert opened the escape valve in his helmet and allowed some air to rush out. One day Lambert signaled to his attendants for a big sheath knife and a looped rope.

"Having these, Lambert used his bare hand as a bait and waited until the shark commenced to turn on its back, when he stabbed it repeatedly. passed the noose around its body and signaled for it to be drawn up. The diver brought home the shark's backbone as a trophy."

WHEN HER SOLDIERS RETURN.

The Internal Crisis in Spain Will Then Have Begun in Bitter Earnest.

The loss of our (Spanish) colonies means the absolute disappearance of all industry and commerce which the inhabitants of those islands were forced to support, says "A Spaniard" in Fortnightly Review. Factories, workshops, magazines-all must be closed, and thousands upon thousands of operatives turned adrift on the world homeless and helpless. A hundred thousand soldiers will come home to swell their ranks, sickly, mutilated men, no longer needed to fight their country's battles, and no longer able to carry on the struggle for existence under the ruins of the old order of things. The greater number of of 30,000 military officers will be deprived of their command and placed on the reserve list, where the pay is such that a captain, who generally has a wife and family to support, receives about two shillings and four pence a day.

Agriculture, which is dying out, cannot support these legions of famishing men, women and children, nor are soldiers the kind of people who take kindly to the hard humdrum life of the fields. When these multitudes have felt the pinch of hunger, and see themselves thrown back upon the laws of nature to keep themselves and their loved ones from dying, then the interanal crisis will have begun in very truth, and the tocsin of the revolution will have sounded. In that day the army will decide, by its attitude, whether Carlists or republicans shall triumph.

SPANISH MUSIC.

The National Character of Spain Is Very Well Defined by its Harmonies.

It is interesting to note how a nation's favorite musical instrument is a key to the national character. Thus, for instance, England's musical instrument is the organ, Scotland's the bagpipe, Ireland's the harp, Italy's the violin, Spain's the guitar, Germany's the flute, the United States-south the banjo and north the piano. Spain's affinity seems strongest, and, just now, is of especial public interest. The guitar is ubiquitous in Spain. Its tinkling, sweetish harmonies may be heard on the battlefield, in my lady's bower, in the mule cart, in the barber's shop, In saloon, hotel and the highways and byways. Spanish music is pretty rather than powerful; its boleros, rigadvous and fandangos gay rather than grand. It savors more of dagger and hatpin than bayonet and bomb Glancing back in guitar history to the days of King David, when this instrument was known as a kinnor, one sees that while it was used to refresh Saul, it was also carried by depraved female minstrels, as evidenced by the Prophet Isaiah's ironical suggestion to them to "take a kinner, go about the city, make sweet melody, sing many songs, that you may not be forgotten." The popular Spanish air of "El Sereney" is a capital illustration of the characteristics of Spanish music and Spain. Its pretty, thin strains remind one of the country of the muleteer and friar.

Birch Canoes for the Orient. Bangor manufacturers are sending capoes of birch and canvas to Palestine, Japan, India and China. One recently sent to India was to the order of a British officer, and the cost of transportation was more than \$75. A canoe just ordered is intended for a trip up the river Jordan.

Railroads Needed in Brazil. The facilities for inland transportation are so limited in Brazi! that the inhabitants of the ports find it cheaper to import grain from North America than from their own farms.

L'ABEILLE

SHIPS' MASCOTS IN BATTLE.

The Detroit's Goat Particularly Distinguished Himself While Under Fire.

"Scared?" said an engineer of the

Terror, speaking of San Juan. "Well, I guess I was. It was awfully hot below, and we couldn't see a thing, and the concussion of the guns and the knowledge that we were in a rain of shells were mighty unpleasant. The cat and I were very badly frightened. I guess the cat was worse than I. But. then, you know, the cat and I were the only folks on board that minded it." He had evidently forgotten the celebrated goat, William Terror, who excited so much interest when the monitor was in New York last winter, says the Chicago Inter Ocean. Billy is very young. They call him an apprentice goat. It was his first time under fire, and he behaved very badly. When the action opened he was on the upper deck, and at the first broadside became panic-stricken. He tore about the deck. A sailor had to carry him below. and in the depth of the ship, alone and uncomforted, he trembled and bleated

till the last gun was silent. The Detroit's goat was braver. He had a station on the gundeck, and while the firing was going on and the shells were whirring over him he remained absolutely quiet. But whenever there came a lull he capered madly about. There is a difference of opinion as to why he was so composed during all the confusion. His friends among the crew say he was interested, and was watching the battle with a critical eye, and that his subsequent capers were but an expression of satisfaction at its results. His detractors contend that he was paralyzed with fear, and that when the noise ceased the spell was broken, and he gave vent to his feelings of terror by his wild antics.

EMPRESS ELIZABETH

The Ill-Fated Lady Positively Declined to Submit Herself to X-Ray Photography.

An interesting picture is drawn by Miss Emma Penther, a nurse who waited upon the ill-fated Elizabeth, empress of Austria, during the time when the victim of the assassin's knife was recuperating at Nauheim. In a letter to the Frankfurter Finanz Herald she says among other things:

"To assist in making a proper diagnosis of the heart trouble of the royal lady, Dr. Schott, her attending physisian, made an X-ray photograph of her. When a second attempt was made to use the X-rays her majesty said: 'No, no, professor; I'll not tol-erate it agin.' 'But, your majesty, it is absolutely necessary.' 'Perhaps for you and my brother, but not for me, I will not be dissected alive. Take a photograph of one of the peasant boys about here, and send it to my brother as a picture of my heart.' To me the empress said afterward: 'I do not like to be photographed. Every time I have had by photograph taken some misfortune has happened to me. Otherwise the empress was a most obedient patient. Her nature was naturally refined. She scorned artificial means to add to her natural beauty. Her figure was faultless, and her beautiful hair lav like a crown unon her head. She never wore any jewels, and the only thing of value she carried was a watch with a Greck inscription. An active correspondence was kept up between her and the emperor during her sojourn at Nauheim.'

USE OF HASHEESH.

It Is Said to Be the Cause of Much Insanity Among the Natives of India.

The reports of the asylum at Cairo, Egypt, as to the native patients there exhibiting the nature of the mental disturbance associated with the excessive use of hasheesh are said to show some remarkable facts, it appearing that in 41 per cent. of all the male patients hasheesh alone, or in combination with alcohol, caused the mental symptoms, while this was the case with only seven per cent, of the females. As to whether there is a special recognizable form of mental disturbance produced by hasheesh, authorities conclude that in a considerable number of cases in Egypt the hasheesh is the chief if not the only cause of such mental disease. The usual types of the disease are hasheesh intoxication—that is, an elated and reckless swaggering state, with optical delusions and hallucinations. Acute mania is another form of hasheesh insanity, incoherence and exhaustion; again, there is exhibited a weak-mindedness, the patients, though well behaved, being excitable about small things and unconcerned as to the

Five Dollars Postage for Letters. W. F. Bailey contributes an article to Century on "The Pony Express," from St. Joseph, Mo., to San Francisco. Mr. Bailey says: "The letters, before being placed in the pockets, were wrapped in oiled silk to preserve them from moisture. The maximum weight of any one mail was 20 pounds; but this was rarely reached. The charges were originally \$5 for each letter of onehalf ounce or less; but afterward this was reduced to \$2.50 for each letter not exceeding one-half ounce, this being in addition to the regular United States postage. Specially made lightweight paper was generally used to reduce the expense. Special editions of the eastern newspapers were printed on tissue-paper to enable them to reach subscribers on the Pacific coast. This, however, was more as an advertisement, there being little demand for them at their necessarily large

price." Watch Ticks.

PIG WITH A BROKEN LEG.

An Indiana Woman's Effort to Have Her Queer Pet's Injured Member Set.

The physicians at the city dispensary have all sorts of patients, but a new record was made the other day, COMPTOIR D'ECHANGES (CLEARING says the Indianapolis News, when a woman brought a pig there to have its leg set. She drove up in a carriage. and exhibited a five-weeks-old pig, with a broken leg, and entered into negotiations to have the injured member repaired. While she was talking she paused ever and anon to hold a milkbottle to the little sufferer's mouth, to stop its pitiful cries.

Dr. Kennedy informed her that it was not in their regular line to practice on pigs, but the case might be taken-for a consideration. Dr. Pink asked her why she did not go to a veterinary surgeon, and she said he would charge too much for the work. Dr. Pink offered to set the limb for 50 cents.

"Oh, you're awful high," the woman almost screamed. "I studied medicine myself, and have an idea of what von ought to charge. I'll give you a quar-

But Dr. Pink would not come down. and the woman finally consented to pay the price. The doctor was about to begin the operation, and had given the pig's leg a preliminary pull, which made the bottle again necessary, when the woman was struck with an idea. "I suppose you guarantee your work,"

she said. "I think so much of the little

fellow, and I want to know that his leg won't be crooked when he gets well." Dr. Pink would not agree to guarantee the job without additional pay. He informed the woman that it would cost an additional dollar to guarantee it. This almost caused the woman to faint. and as soon as she could recover from the shock, she grabbed the reins and drove away.

EMANCIPATED WOMAN.

She Is Found in Italy as Well as in the United States - How She Works There.

Though in Italy the so-called "emancipation" of women is by no means so far advanced as in England or the United States, there are few countries in Europe where the political influence of women is greater than in Italy. The influence, though great, is not, however, always apparent, for it is chiefly exercised indirectly and privately by the women of the upper classes. Instead of forming themselves into associations and leagues and international unions and organizations and competing with political orators, the Italian women interested in political work quietly, and certainly not less efficaciously than their more "emancipated" sisters.

As a rule, Italian women work by means of the old French expedient, the salon. In Rome alone there are no fewer than a dozen salons devoted almost entirely to the discussion of political topics. Each salon has it own political "color," which is generally that of the husband or father or friends of the mistress of the house; but while the thread and web of the politics carried on in a salon is spun and woven by the men who frequent it, the personal influence of the mistress of the house acts on each one of her guests, modifying views, and softening, or it may be accentuating, the roughness of ambition. As long as they remain in their salon Italian political women are in every way admirable.

BEES IN HIS HUNTING COAT. Pockets Full of Honey for a Soldier When He Came Home from

the War.

Asa Witham, a farmer of Blanchard, Me., has been a member of the Dover company, Maine volunteer militia, for two years, and is counted one of the best marksmen in his regiment. Last May when he was waiting for the government to call the troops to Augusta he went out one afternoon and shot six rabbits. On his return a messenger met him in the doorway and told him he must take the next train for the state capital. As his canvas hunting cont was wet with the blood of the rabbits he hung it up on the limb of an apple tree, remarking that it would be

well washed by the time he returned

from the war.

Witham was mustered in and went to Chickamauga, where he was on duty every day until a month ago, when his regiment was ordered back to Augusta. He was sent home on a month's furlough. Being somewhat exhausted from a continuous diet of hardtack and bacon, he thought he would try his luck at partridge shooting before setting down to farmwork. The canvas coat was hanging from the limb in the orchard, but when Witham went to put it on he found that it was already occupied by a swarm of bees, which had taken possession of the garment during his absence. With the aid of a sulphur smudge fire he expelled the insects, and secured 22 pounds of white comb honey.

A Queer Verdict. Upon the Isle of Man, where sheepstealing is evidently a serious offense, John Dixon was recently sentenced to three years' imprisonment for it. The exact words of the jury were: "Not having satisfactorily accounted to the minds of the jury for the possession of the sheep, we find the prisoner guilty." What puzzles the lawyers is this: Can a man be legally jailed on such a verdict?

Otter is a Speedy Swimmer.

The otter is the fastest swimming quadruped known. In the water it exhibits an astonishing agility, swimming in a nearly horizontal position with the greatest ease, diving and If kept continuously running a darting along beneath the surface watch will tick 160,144,000 times in a with a speed equal, if not superior, to that of many fishes.
