Drospectus of the New York Classical and Commorcial Institution.—The patrons and fronds of the boording achool conducted by the under signed, at No 7 B-aver at, and the public in general, ar respecifully informed that it will be removed, under the above name, on the last of May to Blosmingdale, where a very desirable property of a out ten across has been purchased for the purpose of continuing the establishment with each increased advantages as it is hope will meet the approbation and merit the support of those parents who leed interested in the cause of education.

To combine effectually the benefits of a country and city resultence, much care, has been taken in selecting a smable location. To accomplish which the last of ject was to obtain a healthy situation, sufficiently ness to insure the regular attendance of the misters engaged in the modern languages and accomplishments. I has formed an important part of the system heretofor adopted at this achool, to have more but the best mattructure in the several departments of French, Spanish Drawing, mucic, dancing and fancing, and as them contained in the several departments to be within such distance of the city as will enable them to attend punctually and without inconvenience.

With regard, therefore, to the place selected, the twenters and the contained of the city as will enable them to attend punctually and without inconvenience. distance of the city as will enable them to attend puntually and without inconvenience.

With regard, therefore, to the place selected, the twe fold advantage, is united in the fullest extent. That one halth has already been seewell ascertained that it would be superfluous to dwell on the subject, except for this information of strangers, to whom it may be mentioned; the same property was occupied for many years by M. Bansell, and afterwards by Mr Dominguez, for a smill ar purpose, during all which time it has maintained thureputation of a most delightful and healthy residence. On the whole island there could not probably have been a place shoose better calculated for a boarding school.

Do the whole island there could not incomply been a place shoot better calculated for a boarding school.

The house stands on an elevated site, commanding a view of the Hudson, from which it is distant about a mile, 3 miles from the city, and within a mile of the Hudson, it was built expressely for a school and when the additions and improvements at present in progress are completed, the whole will form an establishment upsymposed in any part of the gate of the accommodations and dvantages will afford.

The plan of instruction, and general system of education adopted by the undersigned, have been now been one the public for 5 years. Sifficient time, therefore, and the public for 5 years. Sifficient time, therefore, which is also stated to judge of the beneficial essits to be derived from them. The limits of a newspaper advertise, and the public for 5 years. Sifficient time, therefore, which is a state of May, and other was a state of the public for the public for the public for a publication to the principal in Beaver at unait the issuint on at Bloom application to the principal in Beaver at unait the list of May and afterward efficient at the Institution at Bloom.

The following reterences also may prove eartsfactory to strangers and those living at a distance, inassunch as the testimony of those gentlemen is derived from experience and personal knowledge, and it is, therefore, with much confidence in their lavorable recommendation of the establishment, that the annexed list is given.

obvious cannot be anticipated. The vacations are the month of August, and one week at Christmas and at Easter.

The course of instruction is extensive and varied, including the Greak, Latin, French and Spanish languages, in themseics, writing, arithmatic and book-keeping, natural pailosophy and chemistry, for which a valuable apparatus has been provided], music, drawing, inclient and modern history and geography, Grecian & Roman antiquities, use of the globes electrions, reading, English, grammar, spelling, Latin, and English composition, epistolary, correspondence &c.

Dancing and fencing are also taught, but as extra charges.

From the foregoing list it may be seen, that the education of youth can be pursued to such an extent as may suit the wishes of parents. In the plan of the school 2 important features are constantly kept in view. First, that nothing is professed to be taught, which is not attended to thoroughly; and 2d, that parents may rely with confidence upon the preparation of their children for whitever course of life they intend them. The French language is spoken not only during the time of recitations in that department, but also generally in the samily.

The masters connected with the establishment in modern languages and ascomplishments, are Mons Petu de Billier, professor of French and Spanish.

Henri Picard, (late professor of modern languages in the Albany Academy), resident French masters.

Henri Picard, (late professor of modern languages in the Albany Academy), resident French maseer.

Mr F Graine, professor of drawing.

Mr Alexander Kyle, professor of masic.

Mr Charrand, professor of dancing.

Mr Charrand, professor of dancing.

These together with well qualified masters and assistants in the mathematical and classical departments, constitute a faculty capable of imperting such a system of general education, set it shoped will meet the wishes of those parents who are desirous of having their sons instructed in whatever is necessary to lay the foundation of fitture usefulness, both as scholars and gentlemen, and who are aware of the great advantages to be gained by having so many brunches of education taught at the same establishmont.
