MISCELLANEOUS.

Preservation of the Sight.

MR. C. DUHAMEL, optician, No. 18 Chartres street, begs leave to inform all those persons who may be desirous that he has just received a fresh invoice of patent Cylindrical Glasses, approved by the scientific men of Paris, and Drs. Hewell, Pennisson, Crawcour, Nee and others in New Orleans. The oath is such that these glasses can be used without the least danger to the eyesight.

The most skillful opticians have made a report declaring that the above articles are unquestionably the best for the preservation and improvement of the sight. These peculiarly powerful glasses, which are of a yellowish tint, are equally divided over the whole surface, instead of being in the center only, as is the case with spectacles or glasses generally. The interpolation of the two cylindrical curbs makes them besides as aromatic, and consequently much clearer than the others.

Near-sighted persons will find a great improvement in these glasses.

A pamphlet showing the advantages of these new glasses will be exhibited and explained, on application to C. Duhamel, to all those who may be desirous of being further informed on the subject. feb11
