

# ForeFront pour la protection des portails d'entreprise

Frédéric ESNOUF – Microsoft France  
Benoit HAMET – Microsoft France

# Agenda

- ➡ Qu'est-ce que la sécurisation des données
- ➡ Mise en œuvre de la protection des données dans un environnement SharePoint
- ➡ Publication d'un portail à l'aide de ForeFront Unified Access Gateway 2010
- ➡ Sécurité applicative Sharepoint

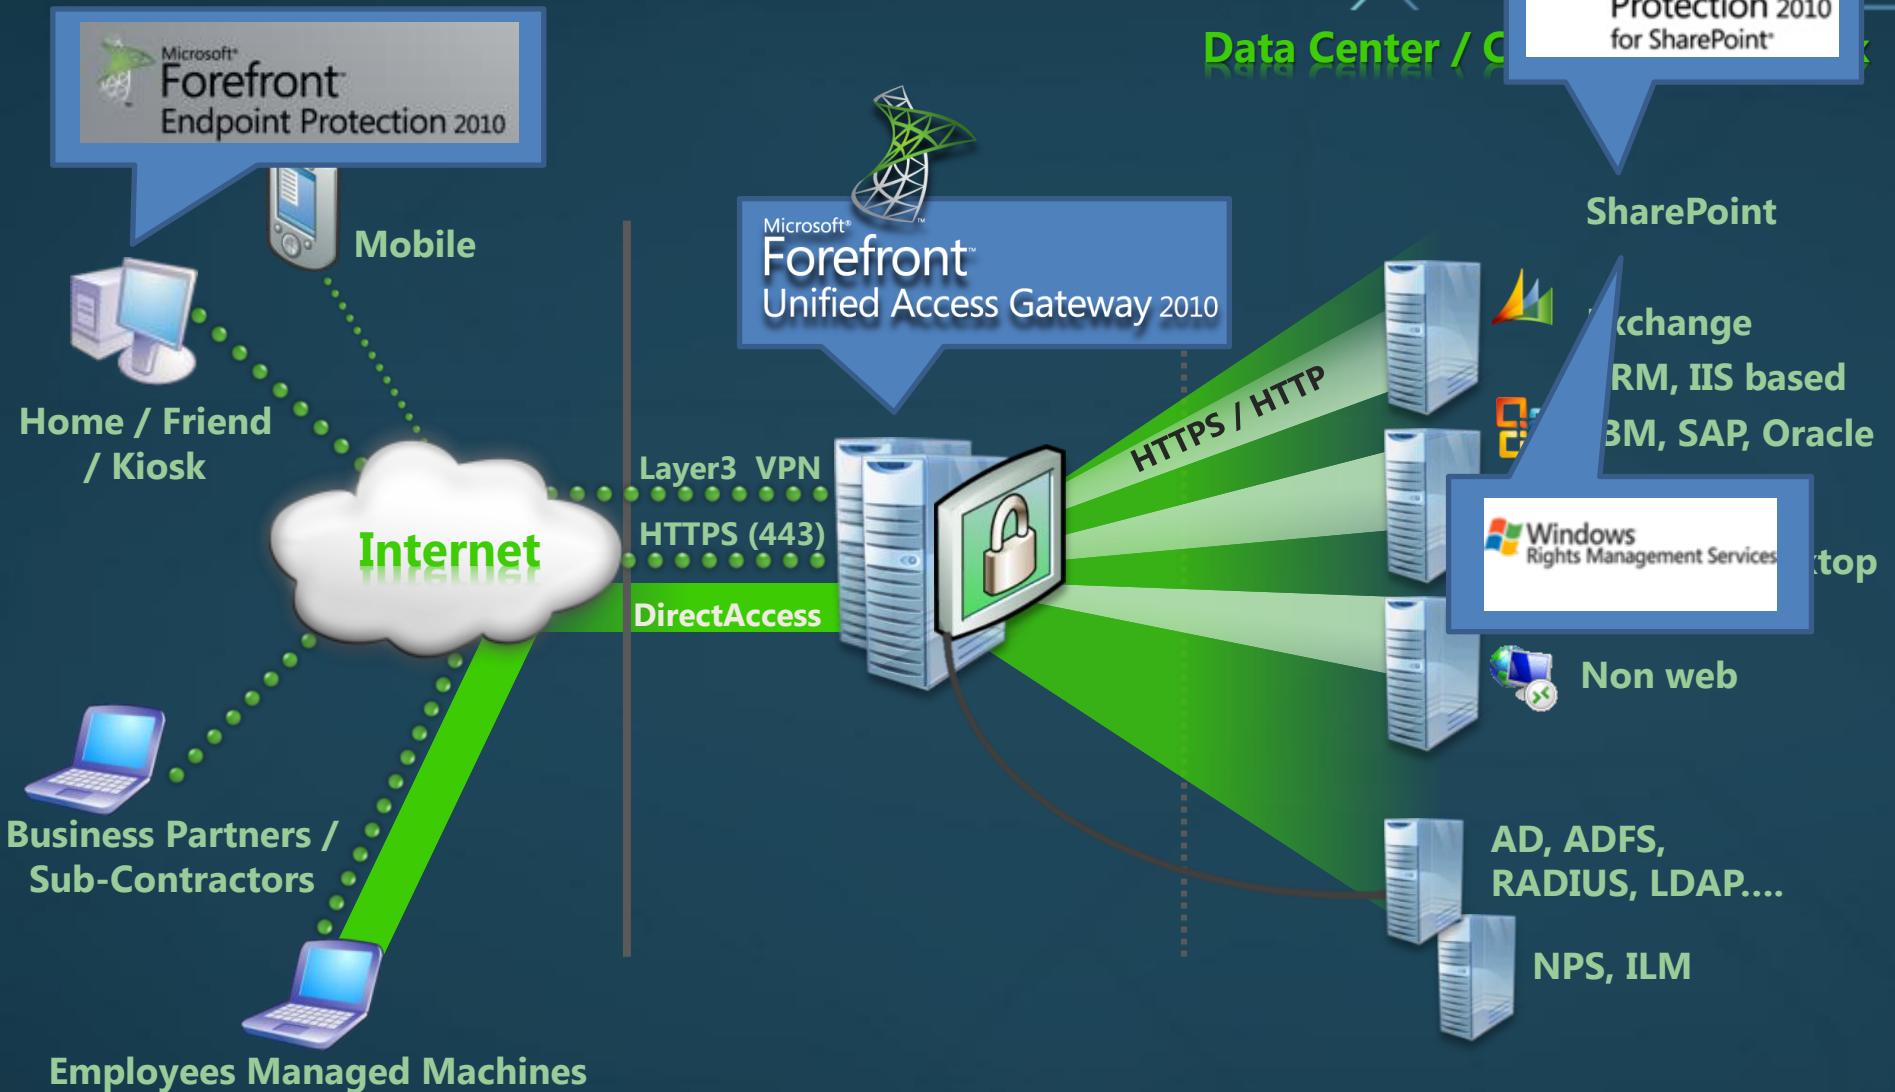

# Qu'est-ce que la sécurisation des données

- ➡ La sécurité, un problème complexe
  - ➡ Accès physique
  - ➡ Accès aux données
  - ➡ Multiplicité des moyens d'accès
- ➡ Nécessite des moyens matériels et humains
  - ➡ Logiciels dédiés (AV, firewall...)
  - ➡ Mises à jour logicielles
  - ➡ Formations, sensibilisations
  - ➡ Procédures...

# Sécurité dans le contexte Sharepoint

- ➡ Sharepoint=collaboration
- ➡ Collaboration=données (documents,...)
- ➡ Documents avec différentes \$\$/€€
  - ➡ Exemple : document fusion/acquisition, recherche, etc
- ➡ Méthodologie
  - ➡ Identifier les données et les valeurs : risque
  - ➡ Analyse de ce risque : contremesures
  - ➡ Implémenter les solutions/process pour y faire face

# Sécurisation et portfolio Microsoft

# Mise en œuvre de l'accès aux données dans un environnement SharePoint

- ⇒ Aucun système ne peut être totalement sécurisé mais...on peut limiter les failles
- ⇒ La difficulté de la sécurité est de donner l'accès aux données en limitant les risques
- ⇒ On ne sécurise pas SharePoint mais les données qui y sont stockées
  
- ⇒ Authentification de l'utilisateur
  - ⇒ IIS
  - ⇒ MOSS
- ⇒ Attribution des droits
  - ⇒ Administrateur
  - ⇒ Collaborateur
  - ⇒ Lecteur
  - ⇒ « Anonyme »

# Authentification utilisateur

- Authentification utilisateur

- Valider le compte utilisateur
- Gérer la sécurité par des utilisateurs/groupes
- Pas de listes de distribution

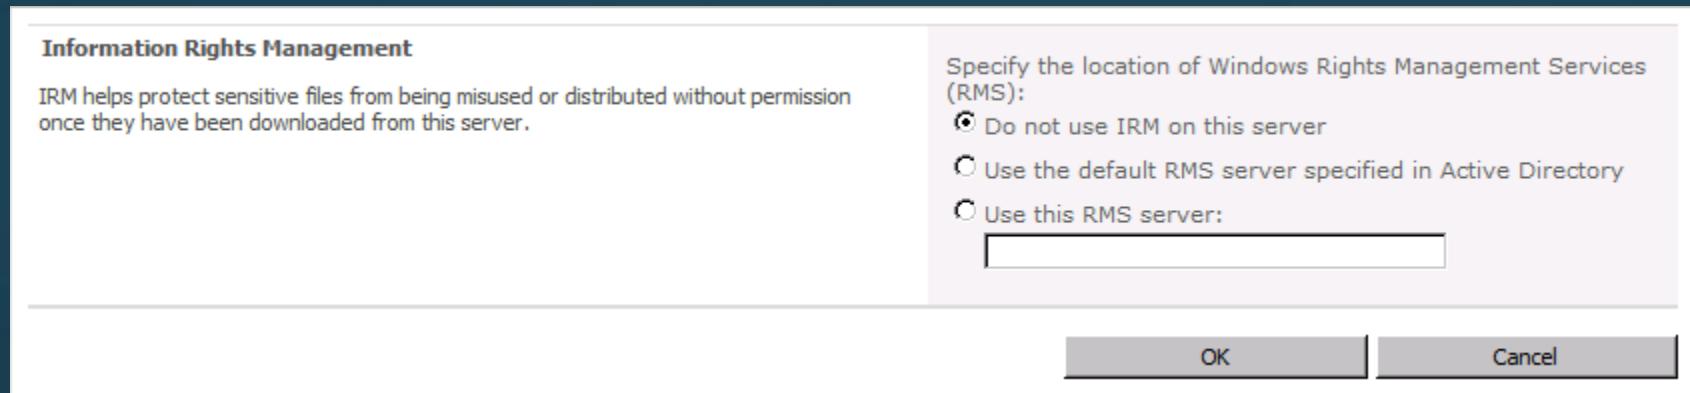

- Authentification

- Internet Information Services
  - Anonyme, Basic, Windows intégré, Kerberos, Certificats
- Authentification par formulaire
- Authentification intégrée (Kerberos/NTLM)
- Authentification via ADFS

# Right Management Services

- ➡ Protection numérique des documents
- ➡ Intégration avec SharePoint
  - ➡ Protection automatique des documents postés
- ➡ Conservation des droits

# ForeFront Protection for SharePoint

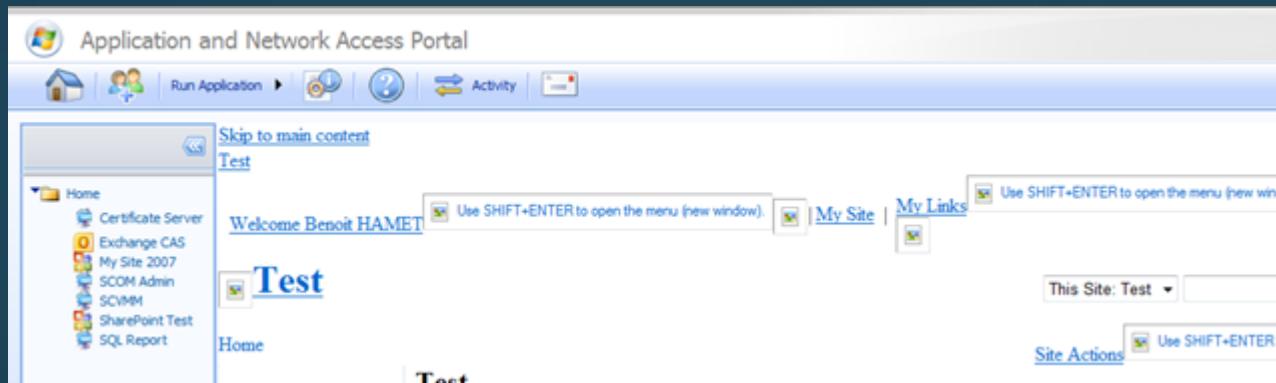

- ➡ Protection contre les codes malicieux
- ➡ Plusieurs moteurs antiviraux
  - ➡ Kapersky Labs
  - ➡ Microsoft
  - ➡ Sophos...
- ➡ Filtrage du type de document

# Accès distants, UAG & MOSS

- ➡ Passerelle officielle pour MOSS (quid TMG?)
- ➡ Supporte 100% des scénarios
- ➡ SSO : Web, NTLM/KERB, ADFS, KCD
- ➡ Intégration office
- ➡ Politiques de sécurité : application et fonctions
- ➡ Traçabilité : réseau, et niveau « utilisateur »
- ➡ Sécurité poste de travail (attachment wiper, ...)
- ➡ Scénarios externes (mobilité) et internes (SSO)
- ➡ Supporte nombreux systèmes authentification forte

# Configuration AAM

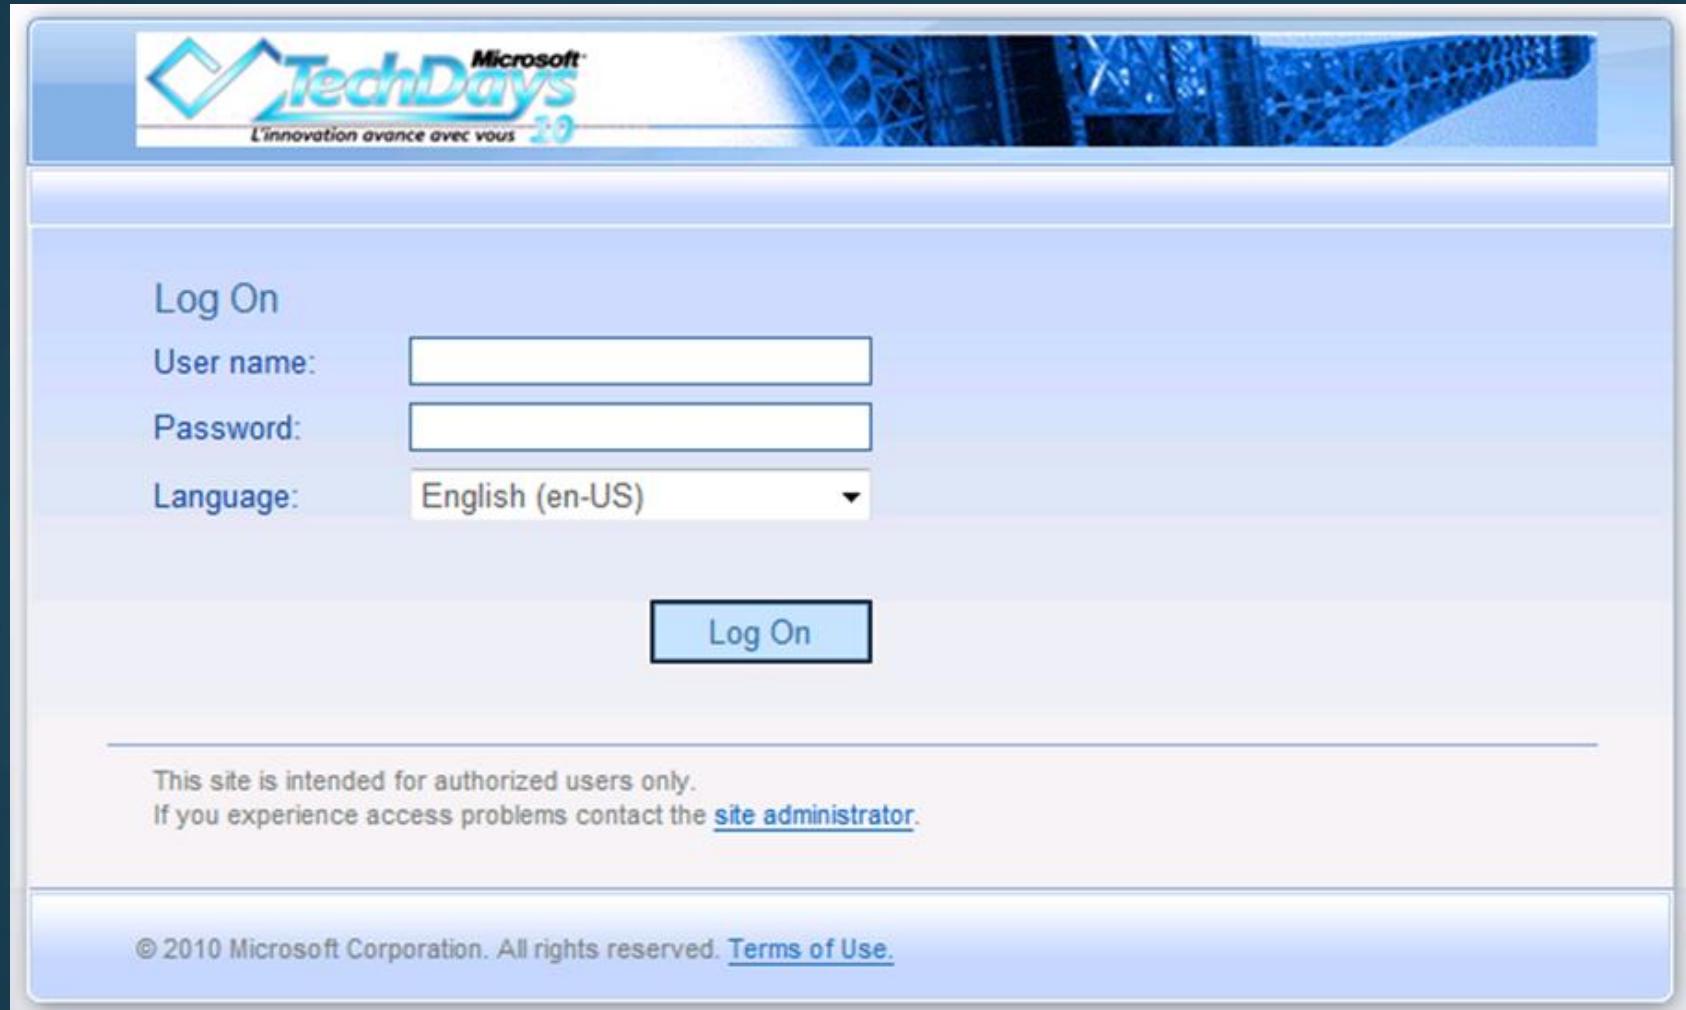

- ➡ Assistant de publication dans UAG; aussi simple que la publication ISA/TMG
- ➡ MAIS... configuration des AAM nécessaires

# Demo

## Publication de SharePoint avec UAG

# Authentification

The image shows a Microsoft TechDays 2010 login page. At the top, there is a banner with the TechDays logo and the text "L'innovation avance avec vous 10". Below the banner, the page title "Log On" is displayed. There are two input fields: "User name:" and "Password:", both represented by white input boxes with blue borders. To the right of the "User name:" field is a dropdown menu labeled "Language" with the option "English (en-US)". Below these fields is a blue rectangular button with the text "Log On" in white. At the bottom of the page, there is a horizontal line with the text "This site is intended for authorized users only." followed by "If you experience access problems contact the [site administrator](#)". In the footer, there is a copyright notice "© 2010 Microsoft Corporation. All rights reserved." followed by a link "Terms of Use".

# Portail

The screenshot shows the "Tech Days" Application and Network Access Portal. The top navigation bar includes icons for Home, Run Application, Activity, and Mail, along with a timestamp (00:59:48) and Log Off button. A red box highlights the left sidebar, which contains a tree view of applications: Home, Demo RemoteApp, File Access, FIM, WB CorpWeb (R&D), WB Intranet, WB Mail, and Web Monitor.

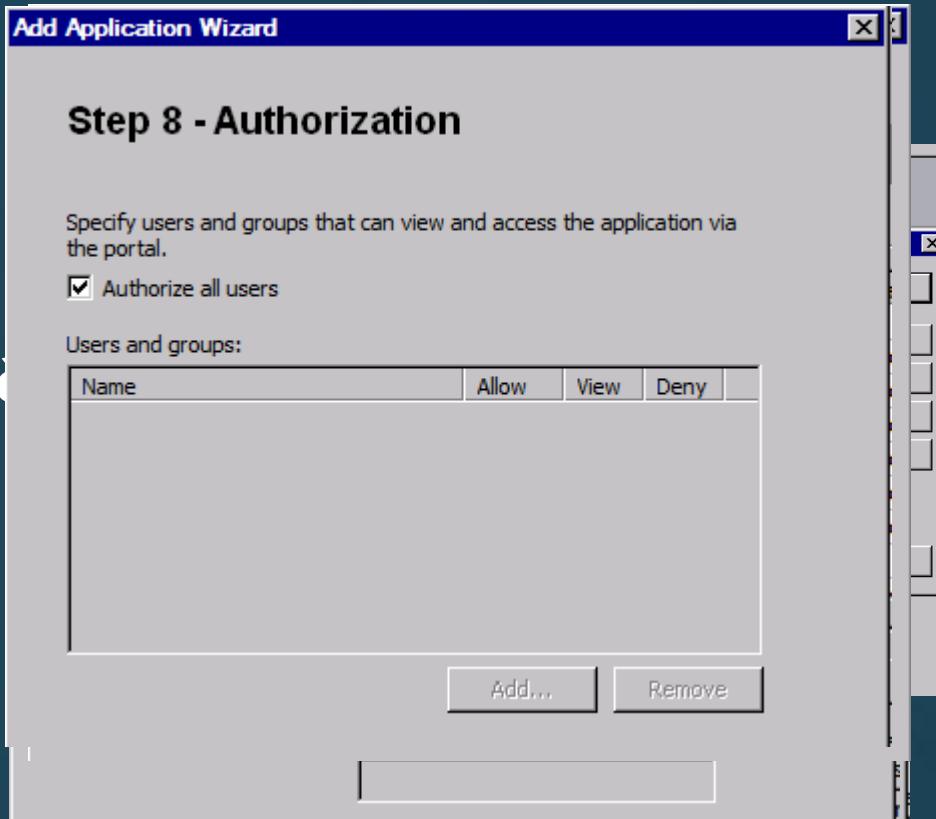

The main content area displays the following application tiles:

- Demo RemoteApp**: Icon of a yellow folder, description: Microsoft Forefront Identity Manager 2010, status: Stockholm.
- FIM**: Icon of a green document, description: Microsoft SharePoint Server 2010, status: Seattle, confidential.
- WB CorpWeb (R&D)**: Icon of a white document, description: Microsoft SharePoint Server 2010, status: Madrid.
- WB Intranet**: Icon of a blue document, description: SharePoint 2007, status: Sydney.
- WB Mail**: Icon of an envelope, description: Outlook Web App, status: Madrid.
- File Access**: Icon of a folder, description: Explore Your Files, note: Your computer does not meet the security policy requirements of this application, [Details].
- Web Monitor**: Icon of a blue and yellow swirl, description: Monitoring and reporting web application.

A search bar at the top right says "Search application" and a sort dropdown says "Sort by: Name".

# Microsoft Unified Access Gateway

Fournit aux *employés, partenaires et clients*, un *accès par politiques de sécurité*, aux *données et applications* depuis poste *managé* ou *non managé*

# UAG & défense en profondeur

Who can see this data?

What are attempting?

What can you Access?

Who are You?

Where are you coming from?

Remote User

## Endpoint Check

Does policy known Assets

Check and Allow without VPN

Out of box Anti-Malware

Level of access granted based on e.g SharePoint upload?

Customizable Endpoint Check

## Authentication

- Support of many protocols
  - Active Directory
  - LDAP
  - TACACS
  - RADIUS
  - RSA
  - Smart Card
  - Certificates
  - Customized - using IA

Level of access granted based on e.g SharePoint upload?

Customizable Endpoint Check

## Application Security

## Information Security

Prevents information leakage by clearing cache

Attachment wiper automatically:

- clears browser
- removes cookies, history, auto-complete
- Triggers session timeout - varies based on location

Out of the box network attack prevention

Proxy requests protect Servers from direct remote connections.

Application Optimizers for multiple Microsoft and non-Microsoft applications
