

TERRIBLE SCREW WORMS

Numerous Cases of the Excruciating Affliction in Texas.

Bore Into the Nostrils, Base of the Brain or Under Chafed Parts of the Body—Cases Sometimes Prove Fatal.

Screw worms have caused the death of several persons the past few months. Affections of this kind heretofore have been rare, but now so frequent have the cases become that little attention, outside the horror of such a death, is paid to them. In truth, the death from such a cause is a terrible one. In some cases men are made raving maniacs by the intrusion of worms on the brain, their hallucinations ending always in death. Others, more fortunate, recover, but where the nose, the most frequent point, is attacked, they have always a distorted face to remind them of their narrow escape from a hideous death.

Four authentic cases have been reported in Newton county, Ia., alone in the past two months, none of which however, has resulted fatally, although one of the unfortunate, John W. Brown, a grocer at Pilot Point, is now reported in a precarious condition and not expected to live. Over 100 of the nauseous-looking pests were removed from his nostrils and the base of the brain. Another case there was that of Mrs. Selz, who had 77 taken from her nostrils, but recovered; another, a man named Smith, had several taken from under his arm, where the skin had become chafed and sore. He also recovered, the worms being discovered before they had made much headway. John Halford had 20 taken from his nose, and says he has no idea how they came there. All these, except the first mentioned, were fortunate and have recovered, or will, but in all the cases above mentioned except at Pilot Point the medical attendance has been prompt and sure and the intruders have been quickly removed.

The screw worms have long been unfavorably known among the cattlemen in Texas and other southwestern states, and have even been found as far north as the Osage river in Missouri, and many deaths among the cattle have resulted therefrom, the losses each year amounting to thousands of dollars. The worms are described as long and slender, of a whitish or cream color, with a well developed head and boring apparatus. They are deposited by a little brown fuzzy-looking fly. Casioin, chloroform and carbolic acid are regarded as the most efficacious remedies and preventives, although when these are not at hand soft plastic clay or mud is substituted, which, being placed on the wound, forces the worms to come out for air, when they are easily caught and killed. Several applications are necessary to thoroughly clean the fissure.

PATENT OFFICE RECORD BROKEN

Chicago Citizen Secures Notoriety in an Unusual Manner.

Milo G. Kellogg, a Chicago man, has broken the record of the patent office by taking out the largest number of patents ever granted to a single individual at one time. The patents cover the mechanism of a telephone switchboard. The number is 125, and the government fees called for from the invention amounted to \$1,475.

The check in payment of the final fee was the largest ever received by the patent office from a patentee. Mr. Kellogg is said to be the first man to operate a switchboard at a central telephone station.

TO LOOK FOR ANDREE.

Expedition Starts from Christiania to Search for Arctic Explorer.

A dispatch to the London Daily Chronicle from Christiania says that the expedition for Prince Charles promontory and in search of the Andree balloon, which is superintended by Capt. Sverdrup, of Dr. Nansen's exploring ship.

The governor of Sweden has instructed the governor of the province of Tromsø, the most northern province of Norway, to charter a steamer at the expense of the state, to provision it for six months and to send out a relief expedition for Henni Andree, the aeronaut who ascended in his balloon, the Eagle, on July 11 last from Spitzbergen, 1,400 miles northwest of the north cape of Norway, in a proposed expedition to the north pole.

The relief steamer will start from Tromsø, on Tromsø island, off the north coast of Norway, and will proceed to Spitzbergen.

CONSUMPTION CURE FREE.

Dr. Hirschfelder Will Surrender His Rights in Oxytuberculin.

It is proposed by the Cooper Medical college, at San Francisco, and persons who are convinced in the efficacy of Dr. Hirschfelder's oxytuberculin in the treatment of consumption to secure the compound for free distribution. No definite plans have been decided upon, but it is thought that the best channels of distribution will be the health departments of the cities and the public hospitals. Dr. Hirschfelder has given his sanction to the movement, and will reserve no proprietary rights. Dr. Reilly, of the Chicago health department, has written to Dr. Hirschfelder stating that he hopes soon to be able to use the consumption cure for the benefit of the poor of that city.

Died from Eating Glass.

After a long and peculiar illness of a horse belonging to Frank Heinlein, of Reading, Pa., died the other day, and a post-mortem examination revealed that the animal's stomach was partly filled with broken glass, some pieces of which had pierced the tissue. The glass was of several kinds, going to prove that the horse had a fondness for the diet.

A Search Watchman.

Searchlights are now used to illuminate at night the grounds of the Jersey state prison to prevent the escape of prisoners. It is reported to have been effective in preventing the escape of prisoners in several instances.

BAND TAKES PLACE OF CHOIR.

The Rev. Dr. Brushingham Adopts New Music in His Church.

Amid strains of martial music from full-fledged brass band the congregation of the First Methodist church at Clark and Washington streets, Chicago, assembled for the service last Sunday night. Upon entering the church, instead of the customary choir and minister, the worshippers saw a glittering array of brass buttons, gilt braid and highly polished instruments. Watts' Young Chicago Military band, from the Illinois school, of which Mr. Watts is principal, occupied the rostrum behind the pulpit and executed the music. The faces of small boys in the audience beamed with delight, and the nine floating out into the street made the passer-by shift his umbrella and gaze wonderingly at the windows in quest of something to inform him of what was in progress beyond them.

This departure from the trodden path of religious service by the pastor, Rev. Dr. Brushingham, was followed by another on the part of the congregation. When the band had finished playing a lively selection in waltz time the audience applauded and cheered heartily, some of the young women nearly bursting their gloves in the efforts they made to express their appreciation. The demonstration by his flock was not frowned upon by the pastor. On the contrary, his eyes sparkled with good humor and his mouth twitched with smiles which did not endeavor to hide as he stepped up to the pulpit and said: "I don't wonder you feel like cheering; this music is what the people all want and what we must have." When about half way through his sermon Dr. Brushingham turned toward the young men in the bright uniforms behind him and remarked: "I must hasten toward the close of this sermon, for when I finish these boys are going to give us some more music, and I am anxious to hear them play again."

FOOTBALL BARRED IN GEORGIA

Killing of Richard Gammon Followed by General Public Indignation.

The knell of the modern game of football in Georgia has been sounded. Following the tragic death of 18-year-old Richard Gammon from injuries sustained in the game at Atlanta a storm of public sentiment has swept over the entire state, demanding the immediate and absolute abolition of the brutal sport.

There is an anti-football ordinance now before the Georgia house of representatives, and one of like character was introduced in the senate recently. They both make the playing of the game a misdemeanor, the penalty for which is a heavy fine or imprisonment of one year. Nearly all of the legislators expressed themselves as firmly opposed to the existence of the game, and decided they would vote for the measure, now before them. A very few were in favor of simply eliminating the savage and dangerous portion of the game, but they will cut no figure in the final roundup.

The screws worms have long been unfavorably known among the cattlemen in Texas and other southwestern states, and have even been found as far north as the Osage river in Missouri, and many deaths among the cattle have resulted therefrom, the losses each year amounting to thousands of dollars. The worms are described as long and slender, of a whitish or cream color, with a well developed head and boring apparatus. They are deposited by a little brown fuzzy-looking fly. WILDCAT EATS WILDCAT.

The Rev. Dr. Brushingham Adopts New Music in His Church.

Amid strains of martial music from

full-fledged brass band the congrega-

tion of the First Methodist church at

Clark and Washington streets, Chicago,

assembled for the service last Sunday

night. Upon entering the church, instead

of the customary choir and minister, the

worshippers saw a glittering array of

brass buttons, gilt braid and high-

ly polished instruments. Watts' Young

Chicago Military band, from the

Illinois school, of which Mr. Watts is

principal, occupied the rostrum behind

the pulpit and executed the music.

The faces of small boys in the audience

beamed with delight, and the nine float-

ing out into the street made the passer-

by shift his umbrella and gaze won-

deringly at the windows in quest of

something to inform him of what was

in progress beyond them.

This departure from the trodden path

of religious service by the pastor, Rev.

Dr. Brushingham, was followed by another on the part of the congregation.

When the band had finished playing

a lively selection in waltz time the au-

dience applauded and cheered heartily,

some of the young women nearly burst-

ing their gloves in the efforts they made

to express their appreciation.

The demonstration by his flock was not frowned upon by the pastor. On the contrary, his eyes sparkled with good humor and his mouth twitched with smiles which did not endeavor to hide as he stepped up to the pulpit and said: "I don't wonder you feel like cheering; this music is what the people all want and what we must have."

When about half way through his ser-

mon Dr. Brushingham turned toward the young men in the bright uniforms behind him and remarked: "I must hasten toward the close of this sermon, for when I finish these boys are going to give us some more music, and I am anxious to hear them play again."

How the difficulty arose Gambel averred that as a matter of fact there were really two cats in the cage, although only one was visible. The other, he said, was somewhere in the innermost recesses of the disreputable-looking beast who spat viciously over his shoulder at all corners, and some fragmentary sesamoid and tufts of gray fur strewn about the floor of the cage and the en-sanguined whiskers of its occupant seemed to bear out his statement.

The cats previous to assimilation were

intrusted to Messenger Gambel's care

at Kansas City. He was there assured

that the animals had traveled together

from Fall Brook, Cal., in peace and

harmony. "A pair of turtle doves is

ugly and quarrelsome alongside of them

pretty purr' critters," said the return-ing messenger, and Gambel believed him.
