

*An Account of an Aqueduct design'd for carrying  
the River Eure to Versailles.*

THE *Aqueduct* which is to be made neer *Maintenon*, for the carrying the River *Eure* to *Versaille*, will have in length 7000 Fathom; 462 whereof will be 35 Fathom and 4 foot high, the rest will be lower according to the difference of the ground, but not less than 5 foot and 6 Inches high. There will be to the said *Aqueduct* 861 Arches, which, where they are highest, will have 12 Fathom in bredth and 8 Fathom in thicknes, diminishing to 14 foot at the top. The other Arches will be lesser in breadth, as well as thicknes, according to the Nature of the ground. The said *Aqueduct* will have 15 Inches fall to every 1000 Fathom in length, so that for the 7000 Fathom, there will be 8 foot 8 Inches fall. The River is to pass by *Maintenon*, *le Parc Espernon*, *Gajeran*, *Rambouillet*, *les Effars*, *le Perrey*, *Cognieres*, and from thence to *Versailles*. There are 14000 Soldiers that work thereat, under the Command of the *Marques d'Uxello*, with three Commissarys of War for their Conduct, together with Treasurers, Pay-Masters, and Victuallers.
