

panty, is to have a longitudinal wharf of a rectilineal dimension extending from the upper cotton press to Canal street, with regular breaks in it to permit the entrance of the minor craft behind to land against the latitudinal wharves or slipe projecting to the former-whick will be carfied into the fiver some fo or 18 feet. By this the betture will be preserved to the paulie; and will be annually filled up so as in a few years to extend to the lengitudinal wharf, and form a spacious landing place.

The same plan need not be adopted for the wharves necessary for the central municipality; yet parts of it are useful in any river wharves. If these be made regularly from the continuation of every street guaning to the river, they might be projected to some distance beyond lew water metk; and an outer wharf be continued or the street of the Knick sphere. beyond low water meth; and an outer wharf be constructed at the end of each in the form of the latter T.

The state of the wherves and the condition of the levee opposite the central municipality, require the prompt attention of the council. It is known that the upper council have passed an ordinance allowing a large space of the port above for the landing of steam and flat beauty and that proper wherves, affording the constructed.
