

Breaking News: Egyptian Inventor Invents a New Source of Clean Energy

PLEASE SPREAD THIS NEWS LET EVERYBODY KNOWS ABOUT IT

This is my gift to the mankind

The EVER-LASTING POWER

New device general clean and free energy ( Permanent magnet perpetual engine )

**I'm MOHAMED MAHMOUD KHALIFA**

**inventor from Egypt and i invented**

**Permanent magnet perpetual engine**

Patent Number : [GB2485625](#)

**read more in :** <http://everlastingpower.wordpress.com/>

Magnet Power One thing which we are told, is that permanent magnets themselves resist the pull of gravity when they stick on your refrigerator, but, Really? What exactly is a permanent magnet? Well, if you take a coil of wire and drive a strong electrical current through the coil, then that converts the iron into a permanent magnet. What length of time does the current need to be in the coil to make the magnet? Less than one hundredth of a second. How long can the resulting magnet support its own weight against gravity? Years and years. Does that not strike you as strange? See how long you can support your own body weight against gravity before you get tired. Years and years? No. Months, then? No. Days, even? No. You suggesting that a single pulse for a minute fraction of a second can pump enough energy into the piece of iron to power does it? So, how does the magnet do it? The answer is that the magnet does not actually exert any power at all. In the same way that a solar panel does not put any effort into producing electricity, the power of a magnet flows from the environment and not from the magnet. The electrical pulse which creates the magnet, aligns the atoms inside the iron and creates a magnetic environment surrounding it and causes great streams of energy flow around itself. One of the attributes of this of your refrigerator and defy gravity for years on end. Unlike the battery, we do not put it in a position where it immediately destroys its own dipole, so as a result, energy flows around the magnet, pretty much indefinitely. do useful work. That is not true.

## Conspiracy of the Free Energy

Most people specially the inventors don't seem to realize it, but almost every government is opposed to members of public getting hold of any serious Free-Energy device ( although they are happy to use these device themselves ) their objective is to dominate and control ordinary people and major factor in that is to control the supply and cost of power . A second method used everywhere is to control money ( which is now been Measured by the oil production ) and without noticing it , governments manage to take away about 78% of people's income , mainly by concealed methods , indirect taxes ,charges , fees, etc...

If you want to to know more about it than visit [www.yourstrawman.com](http://www.yourstrawman.com)

But please understand that the reason why free-energy devices are not for sale in local shop has to do with political control and vested financial interests and thousands has noting whatsoever to do with the technology .

All technological problems have been solved,

Literally thousands of times, but the benefits have been suppressed by those in power.

**‘Perpetual motion’ machines**

**Perpetual motion is impossible? My, you’re a difficult one to please. The electrons in the molecules of rock formations have been spinning steadily for millions of years without stopping – at what point will you agree that they are in perpetual motion?**

**So, why don’t electrons run out of energy and just slow down to a standstill?**

**Quantum Mechanics has shown that the universe is a seething cauldron of energy with particles popping into existence and then dropping out again. If  $E = mC^2$ , then we can see that a tremendous amount of energy is needed to create any form of matter. Scientists remark that if we could tap even a small part of that energy, then we would have free energy for our lifetime.**

**The Law of Conservation of Energy is undoubtedly correct when it shows that more energy cannot be taken out of any system than is put into that system. However, that does not mean that we cannot get more energy out of a system than we put into it. A crude example is a solar panel in sunlight. We get electrical power out of the panel but we do not put the sunlight into the panel – the sunlight arrives on its own.**

**This example is simple as we can see the sunlight reaching the solar panel.**

**If, instead of the solar panel, we had a device which absorbs some of the energy which Quantum Mechanics observes and gives out, say, electrical power, would that be so different? Most people say “yes! – it is impossible!” but this reaction is based on the fact that we cannot see this sea of energy. Should we say that a TV set cannot possibly work because we cannot see a television transmission signal?**

**Many people have produced devices and ideas for tapping this energy. The energy is often called “Zero-Point Energy” because it is the energy which remains when a system has its temperature lowered to absolute zero. This presentation is introductory information on what has already been achieved in this field: devices which output more power than they require running. This looks as if they contradict the Law of Conservation of Energy, but they don’t, and you can see this when you take the zero-point energy field into account.**

**The Dirty Energy Conspiracy – Why do they hide the radiant energy from us?**

**Free Energy technology is here, now. It offers the world pollution-free, energy abundance for everyone, everywhere. It is now possible to stop the production of “greenhouse gases” and shut down all of the nuclear power plants. We can now desalinate unlimited amounts of seawater at an affordable price, and bring adequate fresh water to even the most remote habitats. Transportation costs and the production costs for just about everything can drop dramatically. Food can even be grown in heated greenhouses in the winter, anywhere. All of these wonderful benefits that can make life on this planet so much easier and better for everyone [can be attained once the forces that oppose such improvements in the quality of life have been removed].**

**Making perpetual motion is not impossible as many people think but**

**I believe there is a Zionist conspiracy to hide it from all to**

dominate the world by controlling the petroleum and Measure the currency units using it

**Who I'm I and what I did for you**

I'm Mohamed Khalifa from Port Said @ Egypt and

I have idea for new device generates clean and free energy

I name it the Everlasting Power

Literally Will change the world

imagine electric batteries can last for ever in every one hand?

For two decades now I have been searching the planet for exotic free energy technologies that can bring us clean, renewable, practical, dependable, and affordable energy in a distributed manner — freeing us from our dependence on fossil fuels, the grid and all the control and pollution that comes with it. I have been of the conviction that the emergence of such a technology could revolutionize the planet, empower individuals (literally and figuratively), boost the economy, and help facilitate the emergence of a more peaceful, responsible, freedom-based civilization. Finally I found the forgetting mystery it's one of the primary source of energy in the cosmos

The Magnetic Power

My idea device is not like any one I found in Google

It suppose to make new permanent magnets pattern can provide continuous force

In a single direction pointing them attraction and repulsion balance

to produce endless movement making one magnet moves forever and using

the intersection of lines of magnetic flux with isolated coils to

generate free electricity In short, this device capable of producing unlimited free energy with

zero environmental impact.

It sounds too good to be true but

Just imagine never wanting for energy again. Imagine no coal fired power plants belching out black soot and pollutants to satisfy our gluttonous energy needs, but rather, electric generators in every basement. Imagine cars with NO exhaust and no engine noise that can't run out of gas and deliver more horsepower than most sports cars of today. Imagine no gas stations contaminating our ground water, no oil barges or derricks spilling crude. Imagine no power lines, no pipe lines, no wind turbines, no solar panel arrays, no hydroelectric dams cluttering up our landscapes. Imagine taking a breath of fresh air again or basking in the sun without fear of cancer. Imagine restoring and Please note that my idea like no other

I searched the Google and I found many not working projects in

<http://www.google.com/patents>

<http://www.free-energy-info.co.uk/>

<http://pureenergysystems.com>

<http://www.uspto.gov/patents/process/search/>

Also I come across many articles & videos talking about (Free Energy – Pentagon Conspiracy to Cover up & Nikola Tesla & over-unity & free energy & zero point energy & Free Energy Conspiracy (

**Those articles made limiting believe in every one mind that the ‘Perpetual motion’ machines its absolute imposable**

As we had been told in schools that there is a scientific consensus that perpetual motion in an isolated system would violate the first law of thermodynamics and/or the second law of thermodynamics. Machines which extract energy from seemingly perpetual sources—such as ocean currents—are capable of moving “perpetually” (for as long as that energy source itself endures), but they are not considered to be perpetual motion machines because they are consuming energy from an external source and are not isolated systems. (In reality, no system can ever be a fully isolated system.) Similarly, machines which comply with both laws of thermodynamics but access energy from obscure sources are sometimes referred to as perpetual motion machines, although they also do not meet the standard criteria for the name.

Despite the fact that successful isolated system perpetual motion devices are physically impossible in terms of our current understanding of the laws of physics, the pursuit of perpetual motion remains popular.

I know it sounds crazy breaking all Laws of motion for Newton as you know it  
But I succeeded in theory to make new device  
Can make power from nothing  
To use the magnetic power to make forever electric power  
My idea it’s really new and will change the world as you know  
What’s make the Everlasting Power different  
They all have the Common Mistakes like  
In every project I found the inventor is trying to produce the perpetual motion  
without taking into account the friction that resulting loss in energy or reaching the  
magnates to balancing point between attraction and repulsion forces  
In my idea there is not any kind of friction or any kind of energy loss  
On the contrary, the speed of the moving magnet will multiply  
Under the influence of the difference in pressure it will reach the  
speed of light  
In seconds making me believe that there are many theories Based on my  
invention device  
Like time traveling according to Einstein and  
Optical configuration of metals according to Newton theories ( accelerating the material  
to the speed of light than it will have the light properties which we can manipulate by  
Lenses and mirrors than tern it back to Other forms )  
The Everlasting Power is small, but produces a robust amount of energy  
Can’t tell you much about the Everlasting Power now but soon  
I will publish all about it in my page  
<http://www.facebook.com/pages/Everlasting-Power/107017786055907>

... To be my gift to mankind

So I need your help to get my idea to the light (save the planet)

**How you can help**

Spread the word , Share This Page

Publish this article in your Blog , facebook , tweeter even to your friends emails lists

Don't hesitate to contact me whenever needed

Best Regards,

Mohamed Khalifa
