

THE BEE.

PRINTED AND PUBLISHED DAILY, BY
JEROME TAYLOR,
STATE PRINTER.
THE UNION—We're PREPARED!

TUESDAY MORNING, JUNE 11, 1833.

FOR GOVERNOR:

J. B. DAWSON.

We have been requested to announce JAMES BARNARD Esq., a candidate to represent the second district of this state in congress.

The names of candidates in the Catholic and Protestant wings Greene for the two last days are as follows:

Catholic—
John... 23/
John... 23/
John... 13
T. Jones... 23/
T. Jones... 13
T. Jones... 417.

The Cholera.—In the present state of things, we deem it incumbent upon us to give the widest circulation to the sanitary measures adopted by the permanent committee of our board of selectmen. We, therefore, transcribe the regulations from the city journal of last Saturday, and recommend that parties, relative to the closing of yards, etc., the situation of the public. We think it our duty, at the same time, to state, that the disease is in its decaying, the most characteristic, which marked its progress, last fall, is still in the present invasion. The malady, at present, is diminished and diffused, and, at the time of the breaking out, it went on increasing uninterruptedly, and from that date it subsided gradually. This tends to suppose that it has passed its mere fatal limits, and that with the assistance of the measures adopted, and the beneficial influences of the late rain, it will entirely die a spear from our devoted city.

We had no northern mail yesterday; none, at least, has reached us at a late hour. We again repeat it:—the child has received its pap and sleeps on quietly. Our readers will blink at the jocoseness of the paper;—even when we have mail, in these “piping times of peace” it is difficult to confine a decently liable sheet. We might chronicle store breakings and thefts of batches—for thives too “do bear a holy reverence for the hours;”—we might tell of yerkings under the fifth rib and phlebitomy by the process of powder and ball; and such like as once afflicted anatomies of the human body;—we might dash our columns with a slight solution of scandal about town, and then shake them out to their lawful length—but that we abbreviate, unceasly raking of the catalogue of crime, and fear both to expose the sympathies of over sensitive hearts; or shock the moral sense of our readers, with the naked pictures of our city's chronicque scandaleus.

After the lamentable accident which has deprived on one of its best citizens, it is really gratifying to us to have it in our power to state, that the community is not again called upon to mourn a farther loss of members, supposed to have perished in the bursting of the steamboat Puritan. By advices received in the city, it is evident that the rumour was unfounded; the boat was subsequently to the periods of her reported explosion.

The packet ship Tennessee, which left this place for New York, Saturday last, put back into this port with the loss of her rudder.

We give the following order of the permanent committee having a subject connected with the general health of the city:

The permanent committee of the City Council believing that the effects of the cholera are more to be dreaded during the hot seasons, than during any other, and that this malady may become more serious than it was in October, and that it will be necessary to use all the precautions which the law allows to the administration;—the committee is therefore of opinion,

That the commissioners of police should be directed to pay strict attention to the conduct of the use of steam, and yards of public and private houses, and to order such, them to be cleaned without delay, as are found in a dirty condition;

That they ought, without delay, to prosecute all offenders in a most vigorous manner, who offend against the ordinances of a public health.

Third.—That a deposit of quick lime ought to be established at the expense of the city, whence the commissioners of police should order to be taken all such quantities of lime as might be required to correct the exhalations caused by stagnated water, or any other dangerous substance;

4th.—That the expenses of removing all dead bodies must be kept going as we do; and that if any obstacle should prevent the removal of the waters, in the gutters, canal and ditches, the commissioners of police must have them removed immediately, and to which end they are empowered to require the aid of the city surveyor, the city guard, and the Alderman of the city, in their capacity as justices of the peace.

5th.—That the city surveyor is requested to acquire in all respects what may be made to him by the commissioners of police, to send workmen immediately to all such places where the police may require them.

6th.—That the public and private hospitals must be under the vigilant inspection of the police, and two commissioners of police shall visit said hospitals and make their daily report, either to the Mayor, Recorder, or to the permanent committee.

7th.—The sections of the different burying grounds shall give a daily account of the situation of their cemeteries, and if there should be any delay in interring the dead, they must give immediate information either to the mayor, recorder, or the permanent committee.

8th.—The commissioners of police shall see that the graves are kept clear of water, and of proper depth.

E. & CANON, Chairman,
PRED. BUSSIEN,
Standing committee of the City Council.

Expedition against Texas.—Extract of letter from Matamora, dated April 22d to a general of this city.—“The three vessels now in Matamora, Texas, are now forming in this place. During the last week, four vessels arrived from Matamora, with about 1500 men, and 3 pieces of artillery. The Commander, Gen. Filisola, is daily expected from Matamora, with about 1500 men, and 3 pieces of artillery. Cutters are to be fitted out to blockade the ports of Matamora and Brownsville. It is said that Gen. Filisola (who is an Italian by birth) will try to conquer Missouri before he proceeds to form the colonies are to be fitted out to blockade the ports of Texas in a state of war. A most important neutral trade is carried on by them by land, to the Northern States and provinces, through the Indian territory, which will be the principal aim of the general to put a stop to. Several of these convoys have been lately attacked by Indians, among the rest one with an amount of \$600 in goods, escorted by 30 men, of whom but one were cut down. In the same manner, a transport of money was lost between Chiata and St. Louis, Missouri.—Ver. Mo.”

NAVY DEPARTMENT, {
17th May, 1833.}

The accompanying extract of the cruise made by the Federal School Ship Saenger, in Europe, on the 18th ult. William B. Bass, Esq., has just been received from Commander John D. Merley, the Commander of the Naval force of the United States in the West Indies and the Gulf of Mexico.

[COPY.] United States Schooner Saenger, Pensacola, April 27th 1833.

“Sir:—I have the honor to inform you of my return to this port, having made my intermediate voyage to the 1st of February, and along the whole coast of Venezuela, and New Granada. The specified time having expired, and our provisions failing short, prevented me from executing the latter part of your orders—that is, of visiting the ports of Trujillo and Guayaquil. The following is a detailed report of events:

Left from Matamora on the 15th of February, and arriving at the port of Maracaibo, Venezuela, on the 18th ult.

Some farmers are very careful to save their spring crops and gather a little, but now, in the heat of the season, and just before the rainy season, they can only depend on the weather to support their crop.
