

The Figures of some Antiquities; communicated by a Member of the Royal Society.

1. A Ring of Corinthian Brass with a Wizard of *Silenus* in a *Sardonix*.
2. An Amulet of the Gnosticks cut in a Chalcedonian, the names of certain Æones or Intelligences.
3. A *Tessera* of Chrystal having on one side XIII. on the other IΔ.
4. A *Fortune* and a half *Diana* in an *Onyx*.
5. An Ancient Picture of the *Virgin* in a Chalcedonian.
6. A *Cameus*, with a mixture of severall Gods.
7. An *Onyx*.
8. A Glass *Lachrymatory*.

A Letter of Dr Lister's to Mr Ray, concerning some particulars that might be added to the Ornithology.

SIR,

In answer to your kind Letter, I send you, what I designed for you some years since, viz. an *Abstract* of my Notes about Birds, which may be added to yours and Mr. Willughby's *History of Birds*, if you think fit; such as they are take them.

Fringilla montana major] *Sea Larks* nostris Aucupibus appellantur. Sc. in Agro Eboracensi sœviente Bruma sat copiose capiuntur.

Rubeculæ excrementa semper liquida sunt; etiam si illa ovorum luteis duriter coctis viciet; intestinis Cæcis
D d d caret,

caret, aut ea valde exigua & inutilia habet. Muscarum autem cortices, & quæ ex id genus Victu facile coqui & eliquari in ventriculo non possunt; figura rotunda, pilorum in modum reicit.

Morinellus Angloinm] Hæ Aves bis in anno loca paludosa relinquunt & se in campos montosos gregatim recipiunt: Sc. *Aprili & Augusto*.

Transmigrationis autem causa ex Victu petenda est. Nam tum temporis aves quoddam Cibi genus ibidem periendum appetunt; ut autem id certo scirem, plurium Ventriculos dissecui, in quibus maximam partem Scarabæos quosdam minutos & nigricantes inveni; at inter alia & Costos & Cochleas Terrestres exiguas adverti.

Anserum ferorum 5 genera vulgo numerantur in agro Eboracensi satis frequentium (1) *The little Spanish Goose*, Sc. æque parvus ac *Brenta*, sed figura & colore quodammodo ad Anserem Domesticum accedens, ab Hispania denominatur: (2) *The Barnacle*, satis cognitus. (3) *The Scotch Goose*, Sc. Vulgatissimus ferus, à Scotia ad nos, exeunte *Augusto*, adveniens, è quibus fere constant innumeri illi Greges qui in plainis Campis (the Woold's dictis) & alibi passim inveniuntur. (4) *The Whilk Anser* maximus niger, ineunte bruma primum adveniens; raro alibi quam in Pratis, paucisque herba pascitur. (5) *Anser Palustris noster*, *Grey Lagg*, dictus; huic magnitudo Anseri Domestico subpar. Caput ex fusco nigricat, & ad medium Collum infuscatur; dorsum ex cinereo livescit; ipsæ autem Alæ, & earum remiges nigricant: Uropygium albescit, ejusque pennæ externæ albidæ sunt: Venter cinereus; is vero imus sensim fit niveus: Rostrum à Capite ad mediā fere partem nigrum, deinde subpurpureum, ipso ejus apice nigro; in superiore mandibulo non nisi unus denticulorum ordo, atque idem simplex ordo in inferiore; item huic lingua utrinque uno denticulorum ordine armatur. Pedes subpurpurei five Carnei coloris, ungues fere albidi, excepto medii digiti, qui ex ma, ore

majore parte nigricat. Pendet libras 7, & fere dimidium. In Paludibus Agri Eboracensis nidificant, ipsi & earum Pulli mense Mayo pinguescunt, & in deliciis habentur.

Ad Ianios ea Avicula referenda est, quam à *Germanis Silk-tail* vulgo appellari audio; harum unam aut alteram sclopeti glande transfixam, Eboraci, exeunte *Januario Anni 1680* vidi. Sane perquam elegans Avicula est, magnitudine Turdum fere æquabat: huic in extremis Alarum pennis 4 aut 5 apices parvi coccinci nudi, Cornei, minime plumis vestiti; item in extrema cauda limbis latus, luteus instar corticis Citri, cætera maximam partem Lanium colore refert.

Hos Ianios in Prusia frequentes esse ajunt Mercatores nostri.

Sir, I will not affirm the *Grey Lagg* to be different from the common *Wild Goose*: your Description and mine so well agree, save in the colour of the *Bill* and *Leggs*. The design of the *Lanius*, I can send you done from the Skin.

*I am, Sir, Your most Humble
Servant M. LISTER.*

I have since viewed the Bill of the Bird called Silk-Tail at Mr. Charltons, and find it to want the notches in the upper part of the Bill proper to the Lanius kind. It must therefore be removed, and put amongst the Jay's.

See Dr. Lister's Figure of the *Silk-Tail* Fig. 9th.

Philosoph: Transact: Numb: 175.
