

I am a graduate of Engineering. I have a good general view on Science and Technology. I have studied religious texts of India comprehensively.

Read many articles on religions by persons having good understanding of the subject. I have slightly read about Abrahmic/western religions (Judaism, Christianity, Islam)

which refer to the same godly being, but separated due to needs of the respective people. Though Indian/Eastern Religions like Hinduism, Buddhism, Jainism, Sikhism refer to same

same godly being(s) [for example Gods Brahma & Indra are referred in Buddhist literature which is clear from the below link], preachers have evolved these respective religions because of the needs of

time (i.e. of the people, needs of themselves (very subtle to understand), needs of the Godly/divine inspiration). I am confident that

there is some link between Eastern & Western Religions.

First find my unbiased summary/understanding and later on how I arrived at such summary

Irrespective of the terminologies of Science and Religion, there is one homogenous particle(s)/substance which is the basis/building

material of the universe, it (each particle) is Individual/Indivisible. Every object, living-being (including any godly) is/was/will be this particle.

Even space is made of these particles. Nothing which is imaginable/can't be imagined is not made of these particles. It (as a common

noun) is the basis of all existence.

It was not created in the past, can't/will not be created in the present/any-future even by any godly being (Need less to mention

the same regarding any other class of beings).

Three characteristics of each particle is

- It is ever-existent
- It has feelings (i.e. it is self-conscious (its own pain & pleasure & peace))
- It perceives/feels/experiences its environment/others

Absolute-Time is never ending i.e Absolute-past was uncountable,Absolute-future will be uncountable/infininitely large.

The gap between any two time units(ex. second) can be divided into infinitely small units(ex. micro,nano,femto,....)

Now based on the above.All possible space,sub-atomic particles,atoms,molecules,gases,liquids,solids,unicellular organisms like ameoba,

multi-cellular organisms like bacteria,fungi,virus,algae,plants,animals,humans,machines and any other possible/impossible object/being

were/are/will-be made of these individual particles.Any system/being/object can be made by a capable person/being.

(ex. Inventor makes a machine,Godly-beings make lower-creatures.But the essence is un-creatable & un-destructible.The relationship

i.e obligations & benefits were/are/will be/should be mutual,otherwise it will create problems for the involved ones)

There can be all possible combinations/systems like monarchy,oligarchy,democracy,zamindari,communism,wild-life-protection,

wild-life-extinction,disease,health,long-life/short-life i.e for the combination of system/body and it's ruler/leader(for computer

it is processor)[continual long/short lifes/any combinations for the system/it's-leader],Upgradation(willful/forced/obligatory) to Godly/divine/intermediate status,

degradation(willful/forced/obligatory) to lower-status like stone/any intermediate status(from any godly being(god/goddess/neuter-god/godly-animal,godly-reptile) status with super power/control),universe-controlled/uncontrolled-by-godly beings,

the role/power/person called god/goddess.. exist/not-exist(in past/present),come in to existence/go extinct(go out of existence)

A stone can be happy & A godly-being can be un-happy or any possible combination.

Every one wants to be atleast peaceful.

A system/living-body may/may-not have leader. Leader may/may-not depart/move-out from the system with a lot of self/internal/external

factors/considerations

The above are the facts irrespective of faith/belief, religion/communal-etiquettes, gender(male, female, neuter), living-species, language(written/spoken), non-verbal/symbolic

[only exception is plain english is used to explain the above]

Based on the Needs/problems different(all possible) systems/beings evolve i.e come-into-existence/stay/go-out-of-existence in any/all

universe(s)
