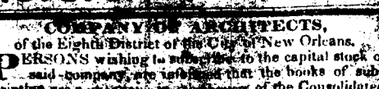
WRITING AND SHORT HAND.



DUPERTIS'S incomparable systems of free, elegant and standard Penmanship, suited to every purpose of life and business, and adapted to every age and capacity, continues to be taught perfectly in Six easy lessons of one hour each;—also, the delightful art of Short Hand taught in Six Lessons. Academy No 43, Camp Street, corner of Grawier, New Orleans. Ladies taught exclusively on three days, of the week. His stay is limited. Comments on his system is he, himself, deems unnecessary further than to say, that in Europe it has become the standard and generally adopted one, while America,

Points out its worth with an impartial eye,
And lifts its labeled banner to the sky.

Many hundred specimens of improvements made by persons of various ages to be seen at the Academy which is open daily from 10 a. m. to 2, and from 5 to 8 every evening.

☞ This system differs in every respect from any that has ever been offered in America; and mean time Mr Duperts begs to call attention to the following:

☞ At a meeting held in London, at the Argyle Rooms, Regent street, on the 19th January, 1828, where were present, these distinguished characters: Lord Brougham and Sir Francis Burdett, also the members of the Royal Society of Arts and Sciences; the Society of Schoolmasters, &c. amounting in all, to about 340 personages. After a lecture of two hours and a half, having been delivered by Mr. Duhertis, on his newly invented system of teaching the art of writing in Six lessons, and on the various causes that prevented persons from attaining perfection in the art, according to the ordinary mode of teaching; Sir Francis Burdett then proposed, that the meeting should decide upon a resolution relative to the gratification which they felt in hearing testimony to the great and unparalleled advantage of Mr. Duhertis's system of teaching the art of Penmanship. After some deliberation it was unanimously resolved, that, Mr. Duhertis's system of teaching the art of Writing in a few lessons, (six only) appears to us as the most extraordinary improvement in the method of instruction, which the ingenuity of the human mind has hitherto devised. feb 5

As soon as the list will be filled, the Raffle will take place: particular notice will be given.

J. R. PUTNAM, DENTIST,

RESPECTFULLY informs the public that he has removed to the house recently occupied by Dr. Ker, at the corner of Canal and Royal streets, over the Post Office, (entrance No. 6, Royal street,) where he may be found from 9 o'clock, A. M. until 3 P. M., ready to attend to the duties of his profession, and where he invites those who wish to employ or consult him to call, as it is impossible for him to leave his rooms during these hours, except in cases of indisposition. The rooms for the accommodation of his visiters, separate and distinct from his family apartments, where they can be entirely private during the performance of an operation, or whilst waiting for his services, should he be at the time engaged. His charges will be such as are sanctioned by the usages of this profession and will not be deviated from except for persons of limited means, or where families are to be attended to, then a reasonable deduction will be made. As he has no assistant in his business, and as it is expected that he will be found always in his rooms, it must be obvious to all, that it is impossible for him to keep books and attend personally to the collection of his bills; he therefore respectfully solicits those who receive his services to make settlement at the time, or attend to it as soon as convenient to the visiter, as he has given offence to some by presenting his accounts through another person employed for that purpose. It is expected that punctuality will be strictly observed where positive engagements are made, or an excuse furnished in time, as a neglect to do this may subject those who have made engagements to disappointment and him to loss and inconvenience. Those indebted for services rendered during the last season, will oblige him by calling and paying their bills. may 28

DR. PARSONS,

SURGEON DENTIST, from New York.

RESPECTFULLY informs the Ladies and Gentlemen of New Orleans, and its vicinity, that he has removed to No 68, Royal street, 2d door near Bienville, he performs any operation on the teeth and Gums in a style not surpassed.

NATURAL and ARTIFICIAL TEETH set in the best manner, and at the most reasonable charges. Also, PORCELAIN TEETH, from a single one to a whole set

On the first appearance of Tartar or Scurvy, Teeth should always be cleansed, as the corrosion of the Tartar will in a short time reach the roots of the teeth, and they will eventually fall out; and by attending to them in season they may be restored, at a trifling expense, to their original beauty.

The operation of plugging and filing the Teeth when decayed, is so truly important that it is impossible to recommend it too earnestly to the attention of the public. Thousands of the most useful Teeth, which otherwise would, on account of their painfulness, be sacrificed by extraction, may thus be preserved to many years.

From a practice of Dental Surgery for more than twenty years, he hopes to merit a continuance of public patronage. The most difficult Teeth and Roots extracted.

The most celebrated Tooth Powder and Tooth brushes may be had.

N. B. He will attend at the dwelling of those Ladies and Gentlemen who request it.

Reference to Dr. V. Mott and Dr. Thomas Boyd, New York; and Drs. Semie and Harrald, of this city. jan 16

VALSIN VIGNAUD,

feb 14 58 Conti street, opposite Bank of La.

GARLEPIED & CO.

Braziers, Pump-makers, Water-engine-makers, and Mechanicians, Conde street No. 16, between Maine and St Philipp streets:—

HAVE the honor to inform the Planters of Louisiana, that they make all kinds of kettles; sugar kettles, cooking kettles, refining kettles; lamps; spoons, skimmers, etc. etc.

They have brought from France the last mode of the apparatus for distilling, which has been perfected by the best distillers, such as Derone, Baglioni, Derode, Le Adam, Bernard, etc. etc.

They are themselves the inventors and proprietors of a new apparatus for distillers, which though not so expeditious as that of Derone and Baglioni, offers to the distillers of Rum and Tafia, the same results as to quantity, and for the rectification of alcohol, there is no difficulty in the working of it without the constant care that other apparatus indispensably require. They make all kinds of alembics, such as conic, chaptal, balin, etc. etc.

They are also the inventors and proprietors of a new rectifying still, giving two results for one, in the same space of time.

For the kettles, distilling apparatus, and alembics, they will put them up, and see them go into operation and give instruction thereon, until those who have the care of them are sufficiently initiated.

They will make all kinds of pumps, such as fire pumps arrosages mounted, aspirant well-pumps, Foulanters and Elevatory (English sites,) vougation pumps, throwing a great deal of water with a very little force; in consequence of these pumps being without pistons or any kind of frottaman, they cannot easily be deranged. They are constructed in the same manner to pump up strop, or any other boiling liquid. There is nothing omitted to make them serviceable, and their solidity is guaranteed against all derangements.

They also make ward-robes or inodorous valve hydrolics, which do not let evaporate any odor, the feculent matter being retained for a month or more.

They also make filtering machines, which purifies in a very short space of time a great quantity of water without the intermixtion of any foreign body. Likewise, beer kettles, teinture kettles, [illegible] boilers with three cylinders, do. wash furnaces, all kinds of bathing establishment for public and private houses; kitchen utensils of copper and iron; covering for houses; troughs; tunnels, and cocks to furnish water throughout a house, the same as established in all the great hospitals in Bordeaux.

They charge themselves with repairing all kinds of kettles coverings of all kinds of pieces and with the fabrication of every thing that can be made of copper, iron, and zinc.

The moderate prices they charge, and the solidity and superior workmanship of every thing that comes out to their shop, assures them that satisfaction will be given of all who may favor them with their confidence. sept 9
