Our morning contemporaries, are telecitating, the patific on the circumstance, that the decrease in the quarter, as computed with the corresponding quarter of the last year, amounts to no more than \$12,420; Kathough the revenue could continue to sigh, wear after year, in the same ratio, while, the govern-most in naking every effort to sustain it at the highest a-

to sight, wear after year, in the same ratio, while, the governmont is making every effort to sustain it at the highest amount. The diminution during the last three years has been rapidised extensive, and it is scarcely possible for it to proceed much further. It has advanced, however, during tile quarter just ended, in the following superportion: In the customs, \$43,665; in the many department \$2.37%; in the post office, \$2,065; and in the imprest and other monites, \$376; making a total decrease of \$161,727.

On the other side, however, there is an increase in the taxes of \$59,979; and in the Miscellaneous department, of \$2,337—thus reducing the positive decrease to \$92,220.—When it is soon that the falling off is three items which inlights a shouristing or a depressed state of trade and commonster, as the Customs, Excess, Stamps, and Post office; we think our readears with us—not withstanding what the Times may say to the contrary—that there is "some ground for starm, "lighted of "despondency."

The probable amount of Exchange Edila, required to meet, the charge on the consolidated fund, for the quarter, is \$1,202,654—a small addition to the unfanded government debt.
