

# Chemical Engineering Society

Chemical Engineering Society (ChES) is a student body organization comprising of chemical engineering students of IIT Madras. It has been established to expose students to Chemical Engineering world in a holistic fashion along with application to other fields in engineering and business which imparts a flavor of its vast scope.

CHES is hierarchically well structured. It is managed by a student body of President, Cores, Coordinators and Volunteers headed by the Convener, Professor Raghuram Chetty, Department of Chemical Engineering, IIT Madras. The society is active throughout the academic year and strives for the excellent standards of quality and performance in all its activities.

## ACTIVITIES:

Since its inception in 2007, CHES has been responsible for keeping up the spirits of students by organizing events, '**Chemclave**' the Annual Chemical Engineering Department fest at IIT Madras, '**Industrial visits**' and bringing out the department magazine, '**TDC (The Dissemination Column)**'. Besides these, CHES actively participates in introducing the students of the department to advances in Chemical Engineering by conducting demonstrations, workshops and lectures. It provides a stage to leverage standards of undergraduates apart from their academic curriculum in effective handling of projects with the assistance of professors in the name of SOE (Spirit of Engineering).

It also plans and conducts cultural programs (Freshie night) and an annual department sports meet to promote friendly and interactive environment among the faculty, scholars & the students. In the past, it has organized picnics and tours to help the students of the department unwind.

## **CHEMCLAVE:**

CHES provides that vast canvas where budding chemical engineers from all over the country can meet, and apply their minds, to a plethora of creative pursuits. It affords the chance to unleash the engineer and scientist within you, providing glimpses of the elegance and the scope of technology. It offers a series of events like CHEQ, CHEMICALX, IDP (Industrial Defined Problems), Process Design competition, Case Study, various workshops, lectures, virtual stock market and many on spot entertaining events that bring out the chemical engineer in you. Spread over a period of three days in the month of March, Chemclave is a veritable chemical engineer's paradise where fervent enthusiasts participate in intense contests, witness spectacular demonstrations, assimilate world-class lectures, avail of informative workshops and do much more. What makes it more exciting is their diversity, with people from all over the India participating.
