

THE BEE.

PUBLISHED DAILY, BY
JEROME BAYARD,
STATE PRINTER.
THE UNION—it must be preserved."

FRIDAY MORNING, APRIL 12, 1833.

FOR GOVERNOR:
J. B. DAWSON.

We are requested to announce as candidates for the office of Governor, General, the following gentlemen:

C. C. JUSTAMONT.

G. W. BOYD, and

C. W. THOMAS.

Louisianian general Milburn, a member of the national convention, one of those who voted the death of the XVII Louis, died at Aix-la-Chapelle, the beginning of the year, in the 60th year of his age. Tacitus, the British commander, in our revolutionarily watered near Liverpool.

"If as the Britons hath taught, then he—
A land of shadows, unpeopled by man."

Strange meetings of meetings and rechristenings of that sum of English inhabitants. The events of the latter half of the eighteenth and beginning of the nineteenth century, are destined to be the guides of these modern Dantes and the mediæval bards of the infernal regions of modern days, of round paper regeneration.

Mr. D'Hoersoult, who, from time to time under the patronage of the venerable Perrin Duroucq, presented a memoir to Congress on the growth of silk, has undeniably fabricated his note paper from unweave silk of this country's prejudice. Large quantities, if we mistake not, of foreign silk handkerchiefs, had hitherto been employed for this purpose. This will be an additional improvement, for which we shall be indebted to Mr. D'Hoersoult's persevering zeal.

The several messages of the president, drawing the attention of Congress to the necessities of the United States, and suggesting the necessity of devising some efficacious means of preserving the live oak timber owned by the nation, have elicited a report, presented by the navy secretary, to congress during the recent session. The report is too voluminous for insertion; but the measures, devised for the better security of this valuable material, seems to us the most appropriate that could have been determined upon. The secretary recommends that provision be made by law, that all masters of vessels having live oak on board, on private account, before they shall have been admitted to clearance, must show evidence that the timber was obtained from private lands. This very simple result, will supersede the necessity of forests, and obviate the expense of thousands of dollars appropriated for the present service. The suggestion has been adopted by congress, and embodied in the act providing for the gradual improvement of the navy. The supply of timber on the domain, is valued at eight millions dollars, at a medium calculation of fifty feet a tree.

We received yesterday, some fifty or sixty papers, by the mails conveyed through Major Moutoussy's post offices, "The French New York" dated of the 26th, Washington of the 29th, and Charleston of the 30th of March. We have no more choice, excepted on the "New York Commercial," the only paper of the 26th, supplying Liverpool dates of the 26th and London of the 22d, received by the packet ship Roscoe, Rogers. The intelligence extracted, will be found below.

London, Feb. 22d. Friday evening, half past 7 o'clock.—We enclose the following letter from our private correspondent at Paris, dated 20th April.

"We have accounts to-day from Madrid, to the 10th, just. The new institution established for the purpose of defending the government against the combinations of the carlists, which was imitation of the national guard of this country, was becoming exceedingly popular. Every person of note, who is attached to the government, and partial to the liberal policy which it has lately shown, has a disposition to adhere to and enshrine under its banner. Up to the 10th, this corps of patriotic volunteers already amounted to 100,000."

On the other hand, the disbandment of the royalist volunteers was going on. The captain general of Old Castile, after disowning the volunteers of Leon, who had taken part in the affairs of the 14th and 15th of January, had published ordinance by which the entire body was dissolved, and many of them were compelled to disappear.

"The very mutinies which these volunteers were

engaged in, were the cause of their dispersion.

"Don Juan Alfonso, has been appointed captain general of the Balaric Islands. Gen. Foyne to remain as captain general of New Castile; and intendants have been appointed by the minister of finance, Don Encina Piedra, over the provinces of Aragon, Granada, Leon, Jaen, Sevilia, Asturias, Cartagena, Zamora, and Guadalajara.

"Gen. Livingston.—We learn that amid the many and pressing duties which devolve upon the secretary of state, he has long been engaged in perfecting a very important official document, which will exhibit at a glance, the different modes of taxation of the several states and territories of the U.S. and S. Amer.

"Spain.—Intelligence has been received from Madrid, but containing nothing of importance except the appointment of some new officers, all of whom are said to be of a similar cast than their predecessors, and that they are mainly attached to the cause of the Queen and her young daughter.

"The relative expense of the different governments is not so important a matter as the advantages which the people derive from them. It is not to be questioned, however, that all wise governments should consult economy in the administration of their affairs. There are two kinds of governments, says J. T. Smith, in his "Principles of Government,"—one which is called despotic, and the other, which is called popular; the former is one of high practical utility, independently of the consideration that it has become necessary in order to enable the friends of freedom to vindicate them from the charge of profuse expenditures of the public money. It will afford to the Jeffersonian state governments an opportunity to improve their several modes of taxation, adopted by each.

"The comparative cheapness of monarchical and republican governments, which has occupied much public attention in Europe, has boldily challenged a comparison, and indeed, it has been affirmed in the chamber of deputies, that the cost of the United States paid a heavier tax than those of France.
