

Arapiles new route update May 2010

New routes and new fixed gear since the last guidebook came out.

*** Grimstone 26** 35m

Climb *Reaper* to its crux. Step right at a prominent chalked jug and ooze up the unlikely seam past a bolt to gain the upper traverse on *Taste Sensation*. Step right again and climb the excellent face above passing a second bolt to join *TS* at its final crack. IL

Veneer 26 15m

The bolted line immediately left of *Unrequited*. IL

Blah 24 25m

Up to first bolt on *On the Prowl* then left to another. Easily up trending right to chains on arête.

The Dude Abides 26 30m

Climb the hanging nose just left of *Nursery Rhymes* past 2 bolts. Join NR until it moves right. Continue left then up past 2 more bolts. Bring wires. Lower off. IL

Tobermory 24 25m

Start as for *Directathal*. Move right after the initial diagonal and up wall past two bolts. Lower off. IL

Siva Malinger 25 12m

A true direct finish to *Siva* boulders straight up past a 2nd bolt. Add a grade if you don't bail-out to the arete. GP

*** Social Retard 26** 35m

Up *Social Comment* to ledge then up past some wires & 2 carrots. Span right into *Birdman's* crux then bizarre moves out right onto the headwall (bolt). Right to 2nd bolt and up. 30m lower off. KL/GP

Social Retard Deviant 26 30m

Up *Social Comment* then straight up into *Birdman*. Out right past *Social Retard* bolt after *Birdman* crux to crack, then straight up with difficulty past 2nd bolt to chains. GP/KL/DB

*** Smear Campaign 28** 20m

The gobsmacking arete left of *Yesterday* is steep, sustained and technical. Go right from *Lunatic's* first bolt then blast up arete past 5 more bolts. GP

Super Pooh 28 15m

Climb the bulging arete to the right of *Poosticks* - beware the tweak factor! IL

Encore 27 30m

Start as for *Cliffhanger*. Up the initial crack. Step left then up slab past bolt. At roof move right then over roof and up wall past 2 bolts. IL

*** Stage Fright 24** 20m

Start up *Curtain Call*. Instead of the tedious traverse(!) left, blast straight up the gorgeous headwall past the thread and 2 bolts. GP

Bada boom 27 30m.

Start as for *Cut Short*. Step left after a few metres and follow the bolts up and left into *Tapestry*. Lower off.
Ingvar Lidman 2009

New chains now service **Copyright**, **Cecelia**, **No Standing**, **Deathrow** (30m). Also just below base of **Tannin** (30m to ground, 25m to big ledge).
