

List of the objectives, the outcomes and the outputs of a project

| | The problems | The solutions | Project Outcomes that contribute to the solution of the problems | Project Outputs that contribute to induce the expected outcomes |
|---------------------|--|--|---|--|
| Overall objectives | Underdevelopment; Disasters; Lack of health and security, ... | Understanding and contributing to change the factors that have caused the problems | Expected changes induced by the project | |
| Specific objectives | Determinant 1 that have fostered the factors causing problems | Objective 1. contributing to change the determinant 1 | Expected changes induced by the project that contribute to the achievement of the objective 1 | Project Outputs that contribute to these changes (relative to the objective 1) |
| | Determinant 2 that have fostered the factors causing problems | Objective 2. contributing to change the determinant 2 | Expected changes induced by the project that contribute to the achievement of the objective 2 | Project Outputs that contribute to these changes (relative to the objective 2) |
| | Determinant 3 that have fostered the factors causing problems | Objective 3. contributing to change the determinant 3 | Expected changes induced by the project that contribute to the achievement of the objective 3 | Project Outputs that contribute to these changes (relative to the objective 3) |
| | Determinant 4 that have fostered the factors causing problems | Objective 1. contributing to change the determinant 4 | Expected changes induced by the project that contribute to the achievement of the objective 4 | Project Outputs that contribute to these changes (relative to the objective 4) |

do not include here the project activities (you will do after receiving the green light for [Project scope document](#) when detailing the [List of the outputs and the activities of a project](#))
