Such an exploit would be eder of thy of you Mr. Que. Warranto."

We are heartily tired of the discussion we have enter inte with the Equisiana Advertiser. Its obstinacy is truly rising. Will our readers believe us, whole we say, skibough it holds the affirmative, and we the negative, it still insists are shall some out with our soidence before gar, with a doubloon in it, and he cleared output de a particlasof fits own in support of the barefaced tantiated arections, with which every one of ers for more than two weeks past, has been filled. Is this ignorance in the Advertises, or does it wish to throw eges of the people, and docaive them, by treating the subject in a blustering and illogical manner, avoiding the real point in disputs between us:

The Louisiana Advertises has asserted (without an he that we are bribed that we are under the control of Mintin Gurden that this gentleman has by unfair means wed the removal of Blidell and Spotts-that we hold la with him at the custom-house before writing our artier articles are resisten by a custom-house effenthat Martin Gordon is an overbearing tyrant-that he has nd is affoid as well as prises power to put down the of the Advertises, and to cap the climat, that the old and tried friends of the President will be ed and persecuted!!!!!!!!

Indeed we are at a loss what to do with these outrageous casadoan, to which has been added a transfast Advertiser, a long story about all the marking suffered by Mrs. Penrice before she succeeded in the sale of her office—the personal sections of her creditors, S.c. &c. &c.; with which it is said. Descintly you Descent! has identified himself; but how we are not tent to him of "the Mercantile," some sighteen menths ago, awallowing with a sharkish avidity, a hook baited with the principle of the city carporation. What was the public west of any thing else mote tangible which we might grapple and destroy, we have endeavored to show to be false by simple argumentation. Reasoning with the Advertiser upon its own grounds, we attempted to show the falsey of all it had advertised. But exsertions—exercises—were assertions—were the weekly of the control. But how, or in what epeciations was could get in ably. It is true the Advertiser for how how "the thirty pieces" were counted out to own grounds, we attempted to show the faltacy of all it had advanced. But exercions—exertions—exertions—wave the we did to did get in hely. It is true the Advertiser has since the start been promising racor and still raconsand it; but we begin isdeed to despair. In fine, it has tried hard by noing birthering to atun the common sense of the public however, are not be castly cheated, and have their expellence of the interval of the public however, are not be castly cheated, and have their expellence of the common them. The Louisiana Advertiser defins in to the proof of whatever, american we may have made on passent, during the deman of this discussion. We tall the Advertiser, once for all, that if it wishes to discuss any question with us, that in arguing it, some order and method must be observed.—
