Lotterie de l'Eglise Evangélique Française,

SECONDE CLASSE,

Autorisée par l'Etat de la Louisiane.

D. MALCOLM. *Directeur.*

A déposé à la Banque d'Orléans des garanties suffisantes pour assurer le plein et exact paiement de tous les lots

Pour commencer cette maison, le Directeur a le plaisir d'annoncer au public le tirage suivant, qui aura lieu positivement le Samedi 29 Novembre 1828.

1	lot de	$ 3000	est	$ 3000
1	do	do 1620	do	do 1620
1	do	do 1000	do	do 1000
1	do	do 1000	do	do 1000
1	do	do 1000	do	do 1000
2	lots de	do 750	sont	do 1500
3	do	do 250	do	do 750
14	do	do 170	do	do 2380

3000	do	do 2-50	do	do 7500

45000 lots
10500 blancs

15000 billets $ 32 font $30000

MODE DE TIRAGE.

POUR déterminer les lots gagnans, on emploie 4 roues ; dans la première, pour ce tirage, on place quinze paquets, numérotés 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, dont dix seulement sont tirés. Dans chacune des autres roues, on placera dix paquets, numérotés 0, 1, 2, 3, 4, 5, 6, 7, 8, 9. Alors on tirera successivement un paquet de chacune des roues, en commençant par la gauche, ce qui formera des séries correspondant aux numéros de quelque billet pris dans cette Loterie. Après cela on tirera encore un autre paquet de chaque roue, et ainsi de suite jusqu'à ce que tous les paquets soient tirés, ce qui formera dix séries.

Le billet dont les numéros correspondront à ceux de la premiere série, dans l'ordre de tirage, gagnera $ 3000
do do 2e. série 1620
do do 3e. série 1000
do do 4e. série 1000
do do 5e. série 1000
do do 6e. série 750
do do 7e. série 750
do do 8e. 9e. et 10e. séries chaque 250

Les 112 billets dont les trois derniers numéros correspondront, dans l'ordre de tirage, aux trois derniers des 1re. 2e. 3e. 4e. 5e. 6e. 7e. et 8e. séries, gagneront 25

Les 14 billets dont les trois derniers numéros correspondront, dans le même ordre, aux trois derniers de la 9e. série 50

Les 14 billets dont les trois derniers numéros correspondront, dans le même ordre, aux trois derniers de la 10e. série 170

Tous les billets (au nombre de 1350) qui auront pour derniers numéros les deux derniers de quelque série que ce soit, toujours dans l'ordre de tirage, gagneront autant de lots de 5

Tous les billets (au nombre de 3000) ayant pour dernier numéro le dernier numéro de 1ère. ou de la 2de. série, gagneront autant de lots de 2-50 cts

Tous les autres billets seront blancs.

Aucun billet ayant gagné un gros lot n'aura droit à un lot inférieur, si ce n'est de la plus petite valeur désignée.

PRIX DES BILLETS.

Billet entier $2. 50 cents ; demi-billet $1. 25 c. quart de billet 62½ c.

Paquet de 10 billets entiers garanti pour gagner dix piastres $25 ; certificats do. 16 piastres 50 cents. Parties de chaque en proportion. S'adresser au

BUREAU DU DIRECTEUR.
Rue de Chartres N°. 54,
ou au
BUREAU DE LA ROUE FORTUNE,
10 Novem. *Rue de Chartres N°. 86.*

AVIS AU PUBLIC.

A l'écurie N°. 93. rue St. Louis on trouvera un **CHAR FUNEBRE** à quatre roues, attelé de deux chevaux, ainsi qu'un carosse pour conduire Mrs. les ecclésiastiques au cimetière. Le tout pour huit piastres. 13 sept.

THE BEE.

PRINTED DAILY, BY P. DELAUP
Peter-Street, between Bourbon & Royal.

WEDNESDAY, NOV. 12, 1828.

ELECTIONS.

☞The return of the parish of Catahoula, arrived yesterday, it gives 147 votes for Jackson, and 38 for the Administration. It results from the returns known, that the majority in favor of Jackson is 310, including the parish of Lafayette. We have yet to hear the result of Natchitoches, Rapides, and Washita.

CINCINNATTI, Sept. 12.

Mr. SLOAN, Esq.

Sir—In compliance with your request for the drawing of the Sugar Evaporater for the instruction of such of the sugar planters of your neighbourhood as have no knowledge of its nature or organization, I beg leave to observe, that the design herewith presented, differs from the one before the Legislature in its arrangement. This is owing to my having several designs, or organizations for the Evaporator. And it is not in my power to determine which is the best, as relates to the convenience of manufactory, and the chemical process through which it has to pass previous to granulation. In this plan, I have placed the clarifyers over the furnace and between the granulator and evaporator. You will also observe that I have put jumpers in the chimneys; the use of jumpers is to give complete command over the direction of the fire, so as to turn it into any part of the apparatus at pleasure. In this plan the clarifyers and the granulator are first filled with the juice of the cane, and the fire kindled takes its direction to the side chimney, and continues till the juice is clarifyed, it is then suffered to pass down the evaporator in a thin sheet of one eighth of an inch in thickness, or more if evaporation should be so rapid as to granulate the juice before it arrives at the bottom of the inclined undulation of the evaporator, as the intention is when it arrives there, that its consistency shall be at the point of granulation; and that it discharges itself into a small reservoir, out of which it is taken (in the state of syrup at the point of granulation) by a lifting pump (attached to the machinary) and deposited in a reservoir over the kettle or granulator, there to be kept ready for filling the granulator at a moment's warning—by this arrangement, the only objection that was apprehended (by the sugar makers) is removed. In the other plan, instead of lifting the syrup by a pump, I extended to lift the cane-juice, this it appears is objectionable, although many do it, and make excellent sugar; but I am convinced that it is attended with a loss in the saccharine matter, but the cause is beyond the limits of this paper to explain. In the drawing herewith presented, the *red* represents the course of the fire, and the undulated flue is designed to check latural velocity, the cause of the diminution of heat. The juice of the cane after clarification runs down the evaporator on one side while the fire passes down on the other, and the distance the fire and the fluid will be apart is one quarter of an inch, and the juice one eighth in thickness or more, if that is too thin to pass down before it is made into sugar. The juice wanted to supply an evaporator with a constant sheet of one eighth of an inch thickness, would be all that could pass through a hole six inches by one, and if the sheet was one fourth of an inch in thickness the quantity that would be wanted would be double. If the foregoing estimates be correct the evaporation will be more than four times what it now is on the present plan, and if so, the benefit to the sugar district would be nearly as follows—

The sugar for the year 18[illegible] been estimated at 65,000 hhds—the wood wanted to grind and granulate, three cords to the hogshead (aggregate) 195,000 cords, a quantity large enough to reach in cordwood farm and sugar from New-Orleans to Natchez. The wood at four dollars per cord amounts to the sum of seven hundred and eighty thousand dollars.—Now if our estimate of evaporation be correct or any thing like it, the sugar district must be benifitted for every 65,000 hhds more than half a million of dollars yearly. But to admit that evaporation is increased only one half, in that case the advantage to be derived from the mode of evaporation would be $390,000 annually. Be it as it may, I submit the subject for your ultimate consideration, as it is one that only interests the sugar districts, it is for their interest to have a fair and full investigation of the subject by making the necessary arrangements to have the expense borne by the sugar district at large, and not to think that some one individual will open his purse to test a subject in which thousands are equally interested in the success of. See the other drawing where the subject is continued.

I am Sir, with due deference, your very obedn't &c. J. BLAIR.

LONDON, Sept. 12—Dutch, German and St. Petersburg papers to a late date arrived last night. Accounts from Odessa, so late as the 24th ult. had been received at Berlin, at which time the Emperor Nicholas had not quitted that place. The other news brought by these papers are of minor interest. The French papers, which arrived yesterday, are full of rumours and statements, differing little from the former accounts of the position of affairs in the East; but repeating the thrice-told tale of reinforcements and marshings from Constantinople for Adrianople; and some further particulars respecting the operations against Schumla, which are furnished by the officers, who had been sent to the Russian Army. They state, that the Russians were every day erecting new fortifications before that garrison, in order to keep the Turks in check to prevent sorties, and to close them up in their position. They describe the [illegible] magazines of the Russian army as consisting of 22,000 wagons, drawn by oxen, and 6000 wagons drawn by horses. The number of sick in the army before Schumla does not, they say, amount to more than 30,000 spite of the heat, and want of water; the heat exceeding 45 degrees Reaumur; 30,000 sick, however, is not a small proportion of a besieging army to be placed *hors de combat!* However, it is stated that Schumla, Varna, and Silistria, will be attacked at one and the same time.

Letters from Corfu of the 13th ult. advise the arrival there on the 8th of that month, of the Right Hon. Stratford Canning. They further say, that it is few days it was the intention of his Excellency to proceed to the Archipelago. Of this movement, however, we are very doubtful, for we cannot conceive its object.

Annual consumption of London.—The number of oxen annually consumed in London has been estimated at 110,000, calves 50,000, sheep 720,000, lambs 180,000, hogs and pigs 200,000, besides animals of other kinds. The total amount of butchers meat sold at the principal market, which is Smithfield, is estimated at 8,000,000*l.* annually. There are on an average annually brought to Billingsgate Market 2,400 cargoes of fish, of forty tons each, and about 20,000 tons by land carriage, in the whole 120,000 tons. The supply of poultry being unadequate to the demand, the prices are consequently high, and that article is mostly confined to the tables of the wealthy. The consumption of wheat in London may be averaged at 900,000 quarters each containing eight Winchester bushels; of porter and ale 2,000,000 barrels, each containing 36 gallons; spiritis and compounds 11,000,000 gallons; wines 65,000 pipes; butter 21,000,000 lbs. and cheese 26,000,000 lbs. The quantity of coals consumed is about 1,200,000 chaldrons of thirty-six bushels or a ton and a half to each chaldron. About 9,600 cows are kept in the vicinity of London, for supplying the inhabitants with milk, and they are supposed to yield nearly 7,800,000 gallons every year; even this great quantity, however, is considerably increased by the dealers, who adulterate it, by at least one-fourth with water, before they serve their customers. The difference of feeding cattle about the year 1700, and at the present period 1828, is strikingly illustrated by the following comparison:—In the year 1700, the average of the oxen sold in the London market was 370 lbs.; of calves 50 lbs.; of sheep 23 lbs.; and of lambs 18 lbs.; the present average weight is, of oxen 800 lbs.; of calves 440 lbs.; of sheep 80 lbs; & of lambs 50.

The state of Ohio was first settled by a few emigrants, at Marietta, on the 3d April, 1787, little more than forty-one years ago, and became a state in 1803. It is now divided into 73 counties, which send to the Legislature 72 representatives and 36 senators; and into 14 congressional districts, which send 14 members to Congress. The population is now about 800,000, of which there were in 1827, of free white males over 21 years old, 145,745. The militia number 110,313; the taxable property is estimated at $50,414,000; the quantity of land at about 23,000,000 of acres. Ohio abounds in mineral productions: has five colleges, and a theological and a medical seminary, and is fast improving in roads, canals, and manufactures. It will soon be the first state in the Union, in point of population.

A Catholic church is about to be erected in Hartford, Connecticut, which will be the first ever built in that state.

The French government is about to give up its manufactures of tobacco, salt, powder and firearms; and the government is also about to give up its establishment for improving the breed of horses, as they have thereby degenerated and become scarce.

FRENCH EVANGELICAL CHURCH

LOTTERY,

[*Authorized by the State of Louisiana.*]

D. MALCOLM,

Manager—who has deposited in the Bank of Orleans, ample security for the *full and punctual payment of all the Prizes.*

The manager has the pleasure to announce, for the commencement of the season, the following splendid scheme, to be drawn on *Saturday, the 29th November, instant.*

SCHEME.

1	prize of	$3000	is	$3000
1	prize of	1620	is	1620
1	prize of	1000	is	1000
1	prize of	1000	is	1000
1	prize of	1000	is	1000
1	prize of	750	is	750
1	prize of	750	is	750
3	prizes of	250	is	750
14	prizes of	170	is	2380
14	prizes of	50	is	700
112	prizes of	25	is	2800
1350	prizes of	5	is	6750
3000	prizes of	2 50	is	7500

45000 Prizes
10,500 Blanks

15,000 Tickets at $2, $30,000

MODE OF DRAWING.

To determine the prizes, four wheels are used: into the first, in this scheme, will be placed fifteen ballots numbered 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14 (from which only will be drawn); into each of the other wheels will be placed ten ballots, and numbered 0, 1, 2, 3, 4, 5, 6, 7, 8, 9. One ballot will then be drawn from the several wheels in succession, beginning at the left hand, by which a series will be formed corresponding to the number of some one ticket in the lottery. One other ballot will then be drawn from the respective wheels before, and so on until all the [illegible] from the three last wheels, and terminated.

That ticket having for its number, the figures of the 1 series, in the order drawn, will be the prize of $3000
Ditto ditto 2d series, 1620
Ditto ditto 3d series, } each 1000
Ditto ditto 4th series, }
Ditto ditto 5th series, } each 1000
Ditto ditto 6th series, }
Ditto ditto 7th series, } 750
Ditto ditto 8, 9, or 10th series, 250

The 112 tickets terminating with the three last figures, in the order drawn, of the 1st, 2d, 3d, 4th, 5th, 6th 7th, and 8th do. 25

The 14 tickets terminating with the three last figures, in like order, of the 9th series, 50

The 14 tickets terminating with the three last figures of the 10th series, in like order 170

All tickets (being 1350,) terminating with the two last figures, in the order drawn, of either series, will be prizes of 5

All tickets (being 3000,) having for their termination the last figure of the 1st or 2d series, will be prizes of 2 50

All other tickets will be blanks.

No ticket having drawn a superior prize can be entitled to an inferior one, except of the lowest denomination.

PRICE OF TICKETS.

Whole Tickets, $2 50; Half do. $1 25; Quarters, 62½ cts.—Packages of 30 whole tickets, $25; warranted $10; Certificates of do. $16 50; shares of each in proportion. Apply at the office of the manager, No. 58 Chartres st. or at his office of the Wheel of Fortune No. 86 Chartres street.
