The expenditures for the year 1842 including \$7,000,000 for the redeauption of Treasury notes, are estimated at

. 14.218.570 68 fore it is redeemable, the government has not be-

rendsjte Congress to authorise.

1. An extension of the term within which the residue, not yet taken, of the loam already authorised shall be redeemable, amounting to \$6,500,000.

2. The re-issue of the Treasury notes heretofore authorised by law, amounting to \$5,000,000.

3. The balance still required, of \$2,218,570.68, regether with an additional som of \$2,000,000, (a

n relation to the principle of home valuation's which is also provided for by the bill. This feature was engrafted upon the compromise act as a conservative clause. To protect home production from the fragell's supposed to be committed by foreign manufacturers is making out involves. Among the diffirulties which the Secretary anticipates will result from collecting duties upon the home valuation of imported articles, are the floctuations in prices, and the difference in value of the same articles in differnt ports of the Union. He thinks that from these auses, the law afficing, as it does the maximum of tuy at 90 per cent. ad valorem, may be uncertain

In suggesting the propriety of noise modification of the act of 1833 in this particular, the report enters in-o the circumstances of the times that produced the compromise act, and very justily contentle that it was he offering of a spirit of commenced. conspression act, and very justly contenue tons.
he offspring of a spirit of compromise, when the country that the principal start the principal start that the principal start the principal start that the principal start the principal start that le of "Bone valuation," was introduced to princh the of "Bone valuation," was introduced to qualify the clustion of duties to 20 per cent. The reduction was a concession to one party, the cash principle and none valuation a concession to the puber party to the umpromise. If, then, Congress should modify the atter provision of the act, something ought to be done or the manufacturers, whose interests would be one.

In relation to the mode in which the tariff enght to be modified, the views of the Secretary may be gathered from the following extract.

"So long as the policy of other countries shall continue to varieties the products of our agricultura from their ports, and thus deap to us the advantage of a fair reciprocity in trade, it would appear to equally the dietate of policy and of justice to our proplet o secure to them, as far as may be reasonably and properly done, a market of conjumption for their produce in their own country."

Welwould have been better satisfied with this report had the Secretary recommended the establishment of a "warehouse system," is consection with

nent of a " warehouse system;" in connection with who import artic too for restripment. It now requires an additional capital equal to the amount of duties will upon goods imported for sublipment, to enable we merchants so compute with fondgment in the Gulf
