THE THELLION PROCESSION.

The proposition to place the sum of thirty militions of dollars at the discretion of President Rechange, to be employed by him in actinitiating the acquisition of Cube, been to find favor with sobody. Opposition journals such as the New York Threes, and Administration prints, such as the Bibhmond Enquirer and Washington States, are equally heatile to the scheme. We think with these synonests of public opinion, and sold that the proposed appropriation is usedes, and that the object contemplated by it is impracticable. Tactionable.

The public would not willingly behold the reation of a public debt of \$30,000,000, unrease for some momentums purpose which would yield advantages commensurate with solarge an expenditure. It is not pretended but their millions of dollars can purchase jubs. The prospect of pressenting that sinch by peaceful transfer for a consideration is dismost and more distant than evertain in its dismost of the research have com-

SENDING NEWSPAPERS AND PAMPELETS TO EX SENDINO NEWSPAPERS AND PARTHLESS TO ECMORE.—The Philadelphia Ledger says the
persons who seed newspapers and pamphots to Europe should be careful not to enclose them in wrappers, as it subjects them
to letter poetage, generally so high that the
papers are refused by the persons to whom
they are directed. A gentleman, just returned from Engiand, informs us that he saw
bankts of American newspapers and pamphiets in one of the English poet-offices which
had been thrown aside on this account. If
the newspapers are tied around with a piece
of twine or cord, they will go as well as if in
a wrapper, and the postage is then the ordinary price for newspapers. The fact that
many newspapers and pamphiets fail to
reach persons in England and France to
whom they are directed may be accounted
for in this way.
